- Represents zero. (X) Not applicable. (D) Withheld to avoid disclosing operations of individual companies. (Z) Less than one half of one percent.

[1]Value added by manufacture is the basis for determing company rank in this industry rather than value of shipments.

[2]The value of shipments figures for this industry include extensive duplication due to shipments between establishments within the industry.

[3]Establishments in this industry reported value of production rather than value of shipments. Consequently, the formula for computing value added by manufacture was modified to include only changes in work-in-process inventories between the beginning and end of the year.

[4]In this industry, which contains a large number of very small establishments, there is a possibility that some of these small establishments have been misclassified. Only the company and establishment counts are affected by the misclassifications.

[5]Government-owned, contractor-operated plants are included in addition to privately-owned establishments. For these government-owned, contractor-operated plants, the value added and shipments data are calculated using value added based upon averages reported for commercial establishments in prior years but exclude capital expenditures and government-owned materials furnished to these establishments.

[6]Value of work done rather than value of shipments is reported for this industry; therefore, value added has not been adjusted for any inventory change.

Table 9. **Share of Value of Shipments of Each Class of Product Accounted for by the 4, 8, 20, and 50 Largest Companies: 1977 and Earlier Years**

	1967..	160.9	(X)	(X)	(X)	(X)
	1963..	62.0	(X)	(X)	(X)	(X)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by Kind. r Revised. (S) Withheld because the data did not meet publication standards. (X) Not applicable.

[1]Product classes (5-digit codes) and product groups (4-digit codes) are assigned to the industry to which they are primary. Products which are primary to 2 or more industries are split according to the industry code of the establishment producing them.

[2]Represents for each product class or group the total value shipped by all producers in all industries. The 4-digit product group represents the total shipments by all producers of the products assigned the code with the same first 4 digits. For products primary to more than one industry, only the amount produced by plants with the same industry code is included. Thus, the total value of products of meat packing plants includes all fresh meats but only those prepared meats (20116, 20117, 20118) processed in plants classified in industry 2011. It does not include such products made elsewhere (20136, 20137, 20138).

[3]Company affiliation is determined from census reports and public records. The value of shipments of products falling within each 5-digit class or 4-digit group was aggregated for plants under common ownership, and company totals derived to determine the largest producers. Thus, the same company may contribute to total value of shipments in more than one product class or group.

[4]By definition, this product class is limited to the products produced by establishments classified in the industry having the same code as the first 4 digits of the product code. Appreciable amounts are also made in the other product classes referred to in the product description. The total value of shipments and the percent accounted for by large companies shown here are based exclusively on the products primary to this industry. See table 10 for the value of such products shipped from all establishments.

[5]Comparability of this industry has changed slightly as a result of the 1972 SIC revision. The change is estimated to be less than 3 percent of the total value of shipments. 1967 and earlier data are tabulated under the old definition.

[6]1977 data for natural sausage casings may not be comparable to prior years data because collagen casings were included with synthetic meat and sausage casings in Industry 3079, Miscellaneous Plastics Products, for 1977.

[7]For 1972, all data were collected and published under Industry 2016, Poultry and Dressing Plants, product codes only. However, industry 2016 products are defined to include only those products processed at slaughtering plants. Industry 2017, Poultry and Egg Processing, is defined to include the same products, but processed from purchased carcasses. For 1977, comparable product classes were created for collecting products primary to both industries 2016 and 2017.

[8]For 1963, the formerly separate Industries 2022, Natural Cheese, and 2025, Processed Cheese, were combined into one Industry 2022, Natural and Processed Cheese. In the revision, individual products were redefined from the 1958 Product Class 20220, Natural Cheese, into the 1963 product classes 20221 and 20222, so that 1958 concentration ratios for these classes could not be computed.

[9]Represents value of production rather than value of shipments.

[10]Individual products primary to other industries were included in the published totals of this product class in order to avoid disclosing operations of individual companies. Percentage share of this total accounted for by large companies is not available.

[11]Establishments in Alaska and Hawaii are important producers of these products. Recomputed figures cannot be shown for the 4, 8, 20, and 50 largest companies prior to 1963 without disclosing the operations of individual companies in Alaska and Hawaii.

[12]Revised concentration ratios not available because corrections to individual records could not be identified.

[13]The data for Product Class 20370, Frozen fruits and vegetables, n.s.k., are included with Product Class 20380, Frozen Specialties, N.S.K.

[14]For 1972, product class 20373 was reclassified as product classes 20381, 20382, and 20383.

[15]The composition of this product class was redefined compared to 1958. Where possible, corrections were made to the 1958 aggregate, but concentration ratios could not be recalculated.

Footnotes are continued on next page.

Table 9. **Share of Value of Shipments of Each Class of Product Accounted for by the 4, 8, 20, and 50 Largest Companies: 1977 and Earlier Years**—Con.

[16]The composition of this product class was redefined compared to 1963. Where possible, corrections were made to the 1963 aggregate, but concentration ratios are not available for prior periods.

[17]Comparable data are not available for 1967 and earlier years due to a major revision in the 1972 SIC system.

[18]For 1977, old product classes 20481, 20482, and 20483 were reclassified as 20481. Old product class 20484 was reclassified as new 20482 and 20483. Old product class 20485 was reclassified as new 20484 and 20485. Old product class 20486 was reclassified as new 20486 and 20487. Old product classes 20487 and 20488 were reclassified as new 20488.

[19]Includes unknown amounts of pet food manufactures.

[20]For 1972, product class 20511 was reclassified as product classes 20511 and 20512.

[21]For 1977, old product classes 20651, 20652, 20653, 20654, 20655, and 20657 were reclassified as new 20652 and 20653.

[22]For 1963, the formerly separate Industries 2094, Grease and Tallow, and 2095, Animal and Marine Oil Products, Including Foots, were combined as Industry 2094, Animal and Marine Fats and Oils, Including Grease and Tallow. The 1958 value of shipments figures for industries 2094 and 2095 have been combined and the shares accounted for by the 4 and 8 largest companies recomputed on a basis comparable to 1963.

[23]For 1972, product class 20820 was reclassified as product classes 20821, 20822, 20823, 20824, and 20820. The new 4-digit product group 2082- is comparable to the old 5-digit product class 20820 and the prior years data are shown for both classes.

[24]The total value of shipments figures contain substantial duplication resulting from the fact that some of the products shipped are used as materials, parts, or components in the manufacture of other products in the same product class or product group. The effect of this duplication on the concentration ratios is unknown.

[25]The 1977 data are not directly comparable to prior years data. A total of 388 establishments were added to industry 2092 in 1977. In prior years, the additional establishments were erroneously listed in the administrative record file as nonmanufacturing locations. The impact of the additional establishments was as follows: Product class 2092- increased 24 percent, 20922 increased 224 percent, 20923 and 20924 each increased 10 percent, and 20920 increased 28 percent.

[26]For 1972, product class 20361 was reclassified as product classes 20923 and 20924.

[27]For 1963, Industry 2099, Food Preparations, N.E.C., was redefined to exclude Product Class 20995, Roasted Coffee, which was made a separate industry, 2095. Concentration ratios for industry 2099 are not available for 1958 on a revised basis.

[28]For 1972, Product Class 20999, Other Food Preparations, N.E.C., was reclassified as Product Classes 20995, Tea in Consumer Packages, and 20999, Other Food Preparations, N.E.C. Data for 1972 are not comparable to prior years data due to the revision in the SIC codes.

[29]For 1977, data are not directly comparable to prior years because reconstituted tobacco was added to the description in 1977.

[30]Ratios for the 20 and 50 largest companies are not available. The total value of shipments and ratios for the 4 and 8 largest companies have been recomputed to exclude receipts for contract and commission work.

[31]1963, value of shipments. 1958 and earlier, value of production.

[32]The 1963 ratios include receipts for contract and commission work and are comparable with the 1967 ratios.

[33]The 1963 ratios exclude receipts for contract and commission work and, therefore, are not comparable to the 1972 and 1967 ratios; however, they are comparable to the 1958 and 1954 ratios.

[34]For 1972, product class 22562 was reclassified as product classes 22571, 22572, 22573, 22574, and 22576.

[35]For 1977, old product class 22573 was reclassified as new product classes 22575 and 22577. Old product class 22576 was redesignated new 22578.

[36]For 1972, product class 22569 was reclassified as product classes 22579 and 22589.

[37]For 1972, product class 22561 was reclassified as product classes 22581, 22582, 22583, and 22584.

[38]In prior years, these data were included in product class 22824. For 1977, product class 22824 was split into product classes 22825 and 28246. See table 10 for these data.

[39]Excludes shipments by establishments producing filament yarn and classified in Industries 2823, Cellulosic Manmade Fibers, and 2824, Organic Fibers, Noncellulosic.

[40]For 1972, product class 22991 was reclassified as product classes 22971 and 22972.

[41]Includes some duplication since some nonwoven ribbons are made from purchased nonwoven fabrics.

[42]In 1958, data for bonded fiber fabrics, product class 22991, are included with textile goods, n.s.k., product class 22990. This combination was made because the data were unsatisfactorily reported due to problems associated with the product definitions.

[43]Data for 1967 are not strictly comparable with 1963 because of product misclassification. Approximately 20 to 75 percent of the 1967 shipments data for product class 23962 were included in other product classes in 1963. Revised figures for 1963 are not available.

[44]Excludes commission receipts for Schiffli machine embroidering on materials owned by others. This amounted to $13.8 million in 1967 and $21.0 million in 1963. The 1967 total included $24.9 million which was not differentiated between the value of product sales and receipts for commission work. The comparable figure for 1963 was $5.5 million.

[45]1977 data for product classes 24211, 24212, and 24218 are not completely comparable to prior years because of 1977 revision to product class structure for industry 2421. For 1977, railway crossties and mine ties were switched from 24211 to 24218, and wood siding from 24211 and 24212 to 24218.

[46]Wood chips were reclassified in 1967 from Industry 2429, Special Product Sawmills, N.E.C., to industry 2421.

[47]Comparable data are not available for prior years due to a major revision in the SIC system. This product group now includes wood frames for household furniture which previously was identified as product class 25126.

[48]Includes shipments of wood chips, which in 1967 were reclassified to product class 24215.

[49]Comparable data are not available for prior years due to a significant revision to the 1972 SIC system. For 1972, 1967 Product Class 24317, Cabinet Work to be Built In, was reclassified to Industry 2434, Wood Kitchen Cabinets.

[50]For 1972, 1967 Product Class 24316, Finished Wood Mouldings, was reclassified as product classes 24316 and 24317.

[51]For 1972, industry 2434 was formed by combining 1967 Product Classes 24317, Cabinet Work to be Built In, and 25114, Kitchen Cabinets, Wood. Comparable data are not available for 1967 and earlier years at the product group level.

[52]For 1972, 1967 Product Class 24317, Cabinet work to be Built In, was reclassified as product classes 24342 and 24343. In addition, product class 24343 was expanded to include stock-line cabinets.

[53]For 1972, industries 2435 and 2436 were formed by splitting old Industry 2432, Veneer and Plywood. Comparable data are not available for 1967 and earlier years at the product group level.

[54]For 1972, 1967 product class 24324 was reclassified as product classes 24352, 24353, and 24363.

[55]Data for 1977 are not comparable to prior years due to misclassification in reporting between interior plywood using exterior glue and exterior plywood. 1977 data reflect corrections for these categories. Revised data for years prior to 1977 are not available.

[56]Comparable data are not available for 1967 and earlier years due to a major revision in the 1972 SIC system. All products now classified in industry 2439 were formerly part of old industry 2433. The balance of old industry 2433 is now classified as industry 2452.

[57]Comparable data for prior years are not available due to a major revision in the 1972 SIC system. This product group was previously identified as product classes 24420, 24430, and 24450.

[58]Comparable data for prior years are not available due to a major revision in the 1972 SIC system. Industry 2451 was previously a part of Product Class 37910, Trailer Coaches, under industry 3791.

[59]Comparable data for prior years are not available due to a major revision in the 1972 SIC system. All products now classified in this industry were formerly part of old Industry 2433, Prefabricated Wood Structures. The balance of old industry 2433 is now classified as 2439.

[60]Comparable data are not available for 1967 and earlier years due to a significant revision in the 1972 SIC system. This product group, as now constituted, excludes pallets and skids (1967 product class 24992) and particleboard (1967 product class 24993) which were reclassified to product classes 24480 and 24920, respectively.

[61]1977 data for product class 24996 are not completely comparable to prior years because of 1977 revisions to product class structure. For 1977, medium density fiberboard (MDF) was reclassified from product class 24996 to 24997.

[62]Comparable data are not available for 1967 and earlier years due to a significant revision in the 1972 SIC system. This product group, as now constituted, excludes product class 25111 and part of product class 25112 which were reclassified as 25170, and product class 25114 which was reclassified as product class 24341.

[63]Comparability of this product class has changed for 1972 due to the reclassification of sewing machine cabinets to product class 25170. The change is estimated to be approximately 11 percent of the total value of shipments.

Footnotes are continued on next page.

Table 9. **Share of Value of Shipments of Each Class of Product Accounted for by the 4, 8, 20, and 50 Largest Companies: 1977 and Earlier Years**—Con.

[66]Comparability of this product group has changed for 1972 due to the reclassification of wood frames for household furniture (1967 product class 25126) to industry 2426. The change is estimated to be less than 10 percent of the total value of shipments.

[67]Comparable data are not available for 1967 and earlier years due to a major revision in the 1972 SIC system. This product class was previously classified under industry 2511 as product class 25111 and part of product class 25112.

[68]For 1972, Product Class 25410, **Wood Partitions, Shelving, Lockers, and Office and Store Fixtures** was reclassified as product classes 25411, 25412, and 25413.

[69]For 1972, Product Class 25420, **Metal Partitions, Shelving, Lockers, and Office and Store Fixtures** was reclassified as product classes 25421, 25422, 25423, and 25424.

[70]For 1977, Product Class 26210, **Tissue Paper and Other Machine-Creped Paper**, includes data from Industry 26210, Papermill Products, Except Building Paper.

[71]For 1972, the 1967 product classes 26314, 26315, 26316, and 26317 were combined and reclassified as product class 26314.

[72]Comparable data are not available for prior years due to a significant revision to the SIC system. Product classes 26417 and 26418 were formed by regrouping 1967 product classes 26415 and 26416.

[73]Comparability of this product class has changed slightly as a result of the 1972 SIC revision. This product class now includes paper disposable diapers which previously were included with nonwoven disposable diapers in industry 2399.

[74]For 1972, product class 26491 was reclassified as industry 2648 and split into product classes 26481 and 26482.

[75]Comparable data are not available for prior years due to a major revision in the SIC system. This product group now includes wallpaper (old product class 26440) and excludes stationery products (old product class 26491) which were reclassified as industry 2648.

[76]This product class was previously identified as Product Class 27312, Subscription **Reference Books, Hardbound**. Since the definition was expanded to include other reference books such as dictionaries, thesauruses, and atlases, 1972 data are not completely comparable to data for 1967 and earlier years.

[77]For 1972, product class 27316 was reclassified as product classes 27318 and 27319.

[78]For 1972, product class 27321 was reclassified as product classes 27321, 27322, 27323, and 27324.

[79]Comparability of this product group has changed slightly as a result of the 1972 SIC revision. For 1972, product classes 27417 and 27518 were reclassified as industry 2754. The change is estimated to be approximately 13 percent of the total value of shipments. 1967 and earlier data are tabulated under the old definition.

[80]Comparability of this product group has changed due to the reclassification of product class 27527 to industry 2795. The change is estimated to be approximately 5 percent of the total value of shipments. 1967 and earlier data are tabulated under the old definition.

[81]For 1972, industry 2754 was formed by combining old product classes 27517 and 27518. Comparable data are not available for 1967 and earlier years.

[82]The data for product class 27544 are included with product class 27546.

[83]Ratios not available. In the mechanical conversion to the revised product codes based on the 1957 SIC system, the products of a significant number of small establishments were not properly changed from industry 2782. Although the total shipments have been corrected, it was not feasible to correct the individual figures for small establishments.

[84]For 1972, product class 27611 was reclassified as product classes 27615 and 27617.

[85]For 1972, product class 27527 was reclassified as product classes 27951 and 27952.

[86]Comparable data are not available for 1967 and earlier years due to a major revision in the 1972 SIC system. The 1972 revisions transferred the manufacture of household bleaches to industry 2842; the manufacture of synthetic ammonia, nitric acid, and ammonium compounds to industry 2873; and the manufacture of phosphoric acid to industry 2874.

[87]Aluminum oxide and other aluminum compounds data are combined for 1967 and earlier years.

[88]Comparability of this product class has changed slightly as a result of the 1972 SIC revision. Calcium hypochlorite (high-test) and other industrial bleaches were transferred from old Product Class 28192, Inorganic **Industrial and Household Bleaching Compounds**, to product class 28199. The change is estimated to be less than 15 percent of the total value of shipments. 1967 and earlier years are tabulated under the old definition.

[89]Comparable data are not available for 1967 and earlier years due to a significant revision in the 1972 SIC system. The 1972 revisions transferred the manufacture of unsupported plastics film, sheets, rods, and tubes; regenerated cellulosic products, except rayon; and custom compounded purchased resins to industry 3079. In addition, the production of synthetic resin adhesives from resins manufactured in the same establishment was transferred to industry 2891.

[90]Comparability of this product class has changed slightly as a result of the 1972 SIC revision. Data for synthetic resins for protective coatings (1967 product class 28216) are now included in product classes 28213 and 28214. The change is estimated to be less than 15 percent of the total value of shipments. 1967 and earlier data are tabulated under the old definition.

[91]Data for 1977 are not directly comparable with earlier years as a result of a 1977 SIC revision. Product class 22824 was split to form product classes 22825 and 28246.

[92]Although the content and definition of industry 2831 are the same as in 1972, 1977 totals for product classes 28314 and 28315 are not completely comparable to prior years, due to 1977 revision to product class structure for the industry. For 1977, product class 28316 was formed from parts of product classes 28314 and 28315. Amount of product class 28316 included in totals for 28314 and 28315 is not known for prior years.

[93]A major revision in the classification of products classified in industry 2834 was introduced in 1963 and, therefore, prior years data are not available at this product level.

[94]Comparable data are not available for 1967 and earlier years due to a major revision in the 1972 SIC system for this product class. The 1972 definition breaks nonhousehold soaps and detergents (28411) and household detergents (28412) into separate product classes. In 1967 and earlier years, soaps and detergents were defined by type: Alkaline, soap, and synthetic organic detergents.

[95]Data prior to 1963 include both natural and synthetic glycerine.

[96]Comparable data are not available for 1967 and earlier years at the product group level due to a major revision in the 1972 SIC system. For 1972, household insecticides and repellants, formerly product class 28421, were transferred to Industry 2879, Agricultural Chemicals, N.E.C., and household bleaches, formerly included in Industry 2819, Industrial Inorganic Chemicals, N.E.C., were reclassified to product class 28422.

[97]This product class was formerly included in the 1967 Product Class 28192, Inorganic **Industrial and Household Bleaching Compounds**. Data for 1967 and earlier years are not available.

[98]For 1977, product classes 28511, 28512, 28513, 28514, 28515, 28516, and 28517 were reclassified as 28511, 28512, and 28513 to correspond to new product definitions reported in Current Industrial Reports M-28F, Paints, Varnish, and Lacquers.

[99]Comparable data are not available for 1967 and earlier years due to a major revision in the 1972 SIC system for this product class. Caulking and sealant compounds were reclassified from product class 28518 to Product Class 28914, Synthetic Resin and Rubber Adhesives.

[100]Represents values reported by tar distillers and excludes shipments for tar, tar crudes, and pitches by establishments classified in Industry 2911, Petroleum Refining, and Industry 3312, Blast Furnaces and Steel Mills (Byproduct Coke Ovens).

[101]Excludes rubbing alcohol (primary to Industry 2834, Pharmaceutical Preparations) and antifreeze (primary to Industry 2899, Chemical Preparations, N.E.C.).

[102]Product classes 28696 and 28697 were formed by regrouping 1972 product classes 28691 and 28692, former two and latter two are comparable in total only. Change was made to maintain comparability with sections of U.S. International Trade Commission (ITC) Report "Synthetic Organic Chemicals: U.S. Production and Sales," which were similarly revised in 1976. See sections XIV and XV of 1976 ITC report for a discussion of this change.

[103]Comparable data are not available for 1967 and earlier years due to a major revision in the 1972 SIC system. Industry 2873, Nitrogenous Fertilizers, was formed by combining synthetic ammonia, nitric acid, and ammonium compounds (formerly classified as product class 28191); urea (formerly in product class 28182); and fertilizer materials of organic origin (formerly in product class 28712).

[104]The 1972 definition of this industry has been revised from that used in the 1967 SIC manual and a new SIC number and title were assigned. Industry 2874 was formed by combining phosphoric acid formerly classified in product class 28194, with superphosphate, other phosphatic fertilizer materials, and mixed fertilizers produced from one or more materials made in the same plant, which were formerly classified as industry 2871.

[105]Comparable data are not available for 1967 and earlier years due to a significant revision in the 1972 SIC system. Phosphoric acid was formerly classified in product class 28194.

[106]Comparability of this product class has changed as a result of the 1972 SIC revision. 1967 and earlier data are tabulated under the old definition. The production of fertilizer materials of organic origin was formerly classified with this product class under the product class 28712. The effect of this change is estimated to be less than 5 percent of the value of shipments.

[107]Comparability of this product group has changed significantly as a result of the 1972 SIC revision. Industry 2879 as now constituted includes the manufacture of household insecticides and repellants which were previously classified as product class 28421 in industry 2842. The change is estimated to be 15 percent of the total value of shipments. 1967 and earlier data are tabulated under the old definition.

Footnotes are continued on next page.

Table 9. **Share of Value of Shipments of Each Class of Product Accounted for by the 4, 8, 20, and 50 Largest Companies: 1977 and Earlier Years**—Con.

[108]Although the content and definition of this industry are the same as in 1972, the comparability of product classes for insecticidal, herbicidal, and household pesticidal preparations has changed slightly as a result of 1977 revisions. The change is estimated to be less than three percent of total value of shipments of each of these product classes. 1972 and earlier years are tabulated under the old definitions. Comparable data for fungicidal preparations are not available. 1977 product classes 28795, 28796, 28797, 28798, and 28799 replace 1972 product classes 28791, 28792, 28793, and 28794.

[109]Comparable data are not available for 1967 and earlier years due to a major revision in the 1972 SIC system. This product group as now constituted includes synthetic resin adhesives from resins manufactured in the same establishment (formerly in industry 2821), caulking compounds and sealants (formerly in industry 2851), rubber cement (formerly in industry 3069), and sealants, n.e.c., (formerly in industry 2899), and excludes gelatin and sizes (now in industry 2899).

[110]Comparable data are not available for prior years due to the reclassification of this product class for 1972. Product class 28913 was formerly included in 1967 product class 28911.

[111]Comparable data are not available for prior years due to a significant revision in the 1972 SIC system. This product class includes synthetic resin adhesives (formerly product class 28215), rubber cement (formerly in product class 30698), and synthetic base adhesives (formerly in product class 28911).

[112]Comparable data are not available for prior years due to a significant revision in the 1972 SIC sytem. This product class was formerly part of product class 28518.

[113]Comparability of this product group has changed slightly as a result of the 1972 SIC revisions. Industry 2899 as now constituted includes gelatin, except ready-to-eat dessert, (formerly classified in industry 2891), sizes (formerly in industry 2891), and embalming chemicals (formerly in industry 3994), and excludes sealants, n.e.c. (now classified in industry 2891).

[114]Data for 1972 are not directly comparable to earlier data due to a significant revision in the SIC system. Plastics footwear, which was classified in product group 3079- in 1967, is now included in product group 3021-. The amount of plastics footwear in 1967, and hence the degree of change for product group 3021-, is unknown. The relationships between the 1972 SIC number and the 1967 SIC number for the product classes in this grouping are shown below:

1972 SIC	1967 SIC	1972 SIC	1967 SIC
30211	30210 pt 30798 pt	30212	30210 pt 30798 pt

[115]The rubber and plastics hose and belting product grouping is included for the first time in the census of manufactures for 1972. This product group includes all of 1967 Product Class 30691, Rubber and Plastics Belts and Belting; all of 1967 Product Class 30692, Rubber Hose and Tubing, except code 30692 81, Tubing, Except Medical and Surgical and Reinforced; part of 1967 Product Class 30795, Industrial Plastics Products; and part of 1967 Product Class 30798, Consumer and Commercial Plastics Products, N.E.C. The relationships between the 1972 SIC number and the 1967 SIC number for the product classes in this group are shown below:

1972 SIC	1967 SIC	1972 SIC	1967 SIC
30411	30691 pt 30795 pt	30415	30692 pt 30798 pt
30412	30691 pt		
30413	30692 pt		
30414	30692 pt	30416	30692 pt 30798 pt

[116]This product grouping was significantly revised for 1972, although the code number was unchanged. All of 1967 Product Class 30691, Rubber and Plastics Belts and Belting and all of 1967 Product Class 30692, Rubber Hose and Tubing, except for code 30692 81, Tubing, Except Medical and Surgical and Reinforced, are now classified in Product Group 3041-, Rubber and Plastics Hose and Belting. Tubing, except medical and surgical and reinforced, is now included in product class 30695. In addition, seals and packing (formerly product codes 30695 26, 27, and 28) are now included in product group 3293-; and latex and solvent-type cement (formerly product codes 30698 64 and 65) are now classified in product group 3291-.

[117]The individual product codes included in this class of products for 1972 differ significantly from the prior years. Products shifting into or out of this class of products represent more than 15 percent of the total shipments value at the U.S. level. (See footnote 116).

[118]The individual product codes included in this class of products for 1972 differ from the 1967 definition. Products shifting into or out of this class of products represent approximately 13 percent of the total 1967 shipments at the U.S. level. (See foonote 116).

[119]Data for 1972 are not directly comparable to earlier data due to a significant revision in the SIC system. See the Explanatory Text section of MC72(2)-30A, Rubber and Miscellaneous Plastics Products, for a list of the changes.

[120]1977 product class 30796 is not historically consistent due to the inclusion of foam construction products from old 1972 product class 30792.

[121]The individual product codes included in this class of products for 1972 differ from the 1967 definition. Products shifting into or out of this class of products represent approximately 3 percent of the total 1967 shipments at the U.S. level. (See footnote 119).

[122]1977 product class 30790 is not historically consistent since products classified in 30790 in 1972 are classified in 1977 product classes 3079A and 3079H.

[123]Comparable data are not available for 1967 and earlier years due to a major revision in the 1972 SIC system. For 1972, Industry 3141, Shoes, Except Rubber, was split to form new industries 3143, 3144, and 3149.

[124]For 1972, Product Class 31411, Men's Dress Shoes, Including Play Shoes, was split to form new product classes 31431, 31432, and 31434.

[125]For 1977, old product classes 31431 and 31432 were combined to form new product class 31435.

[126]For 1977, old product classes 31441, 31442, 31443, and 31444 were combined to form new product classes 31446, 31447, and 31448.

[127]For 1972, Product Class 31414, Women's Dress, Work, and Play Shoes, was split to form new product classes 31441, 31442, 31443, 31444, and 31445.

[128]For 1977, old product class 31492 was split to form new product classes 31495 and 31496.

[129]For 1977, old product class 31494 was redesignated as 31497.

[130]Includes laminated glass made in Industry 3211, Flat Glass; and laminated glass made in Industry 3231, Products of Purchased Glass, combined to avoid disclosing operations of individual companies. For 1972, no production of shipments of "laminated plate over one-fourth inch" (code 32113 31), "laminated sheet (window) glass" (code 32113 51), or "other laminated glass" (code 32113 71) were reported in industry 3211, Flat Glass. The same was true for 1967, except that a small amount of "laminated plate over 1/4 inch" (code 32113 31) was produced in Industry 3211, Flat Glass.

[131]Excludes value of laminated glass (product class 32313) which is included with industry 3211.

[132]Insulation materials containing asbestos, which were previously classified in product class 32933, are now included in product class 32927. This shift into product class 32927 represents approximately 13 percent of the total 1967 shipments at the U.S. level.

[133]Not completely comparable. In 1954, an undetermined amount of vinyl asbestos tile was included in Industry 3971, Plastics Products, N.E.C.

[134]Comparable data are not available for 1967 and earlier years due to a major revision in the 1972 SIC system. Molded packings and seals, except plastics (formerly classified in product class 30695); axial mechanical face seals (formerly classified in product class 35992); plastics packing and seals (formerly classified in product class 30795), and leather packings, oil and grease retainers, including seals (formerly classified in product class 31210); are included in product class 32933 for 1972. Also, insulation materials containing asbestos, which were previously classified in product class 32933, are now included in product class 32927. This shift of products represents more than 15 percent of the total value of shipments at the U.S. level.

[135]For 1963, exfoliated vermiculite was reclassified from industry 3296 to industry 3295 and roofing granules produced in conjunction with mining operations have been reclassified from industry 3295 to industry 3296. Revised concentration ratios are not available.

[136]Product class 33121 includes ferroalloys made by establishments classified in industry 3312. This value is a disclosure (D) for 1977; $42.1 million for 1972; $79.0 million for 1967; $18.0 million for 1963; and not available (NA) for 1958. The totals for product group 3313 exclude ferroalloys made in industry 3312.

[137]Excludes the value of those products produced and consumed within the same plant in the manufacture of other products. Therefore, the data are limited to the value of those products that were produced for sale in commercial markets or for transfer to other plants at the same company for use in manufacuring other products.

Footnotes are continued on next page.

Table 9. **Share of Value of Shipments of Each Class of Product Accounted for by the 4, 8, 20, and 50 Largest Companies: 1977 and Earlier Years**—Con.

[138]Comparable data are not available for 1967 and earlier years due to the fact that ductile iron castings is a separate class of products in 1972. The amount of ductile iron castings included in the 1967 totals for product classes 33212 and 33214 is unknown.

[139]For 1972, product class 33220 was reclassified as product classes 33221 and 33222.

[140]For 1972, old product group 3352- was split to form new product groups 3353-, 3354-, and 3355-.

[141]For 1972, product class 33560 was reclassified as product classes 33561, 33562, 33563, and 33569.

[142]Product class 33569 includes bare nonferrous metal wire made in industry 3356, product code 3356992. This amounts to $194.0 million for 1977; $61.4 million for 1972; $34.6 million for 1967; and not available (NA) for 1963. The total of product class 33573 excludes bare nonferrous metal wire made in industry 3356.

[143]For 1972, product class 33610 was reclassified as product classes 33611 and 33612.

[144]For 1972, old product group 3399- was split to form new product groups 3398- and 3399-.

[145]Value represents, chiefly, receipts for work done on material owned by others. The value represents only the work done by establishments classified in the industry for which the product or service is primary.

[146]Not completely comparable: 1954 figures include "metal fluid milk shipping and delivery containers" valued at $8,638,000. In 1958, these containers were included in product class 34943.

[147]The 1972 census program requested separate value figures for aluminum cans and steel cans. Review indicates that the separation was not properly reported. Accordingly, these values have been combined. For 1967 and earlier years, data on aluminum cans and steel cans were not collected separately.

[148]Comparable data are not available for 1967 and earlier years due to a major revision in the 1972 SIC system. Warm air furnaces (product class 34332 in 1967) and parts and attachments for warm air furnaces (code 34336 73 in 1967) have shifted to Industry 3585, Refrigeration and Heating Equipment, in 1972. This change represents greater than 15 percent of the total 1967 shipments at the U.S. level.

[149]1972 product class 34337 is not completely comparable to the sum of 1967 product classes 34331 and 34336, since code 34336 73 shifted to industry 3585 in 1972. However, this change represents approximately 3 percent of the total 1967 shipments at the U.S. level.

[150]Comparable data are not available for 1967 and earlier years due to a major revision in the 1972 SIC system. For 1972, product group 3449- was split into product groups 3448- and 3449-.

[151]For 1972, product class 34510 was reclassified as product classes 34511 and 34512.

[152]Comparable data are not available for 1967 and earlier years due to a major revision in the 1972 SIC system. For 1972, product group 3461- was split into product groups 3465-, 3466-, and 3469-.

[153]Comparable data are not available for 1967 and earlier years.

[154]For 1977 and 1972, product class 34841 is combined with product class 34842 in order to avoid disclosing operations of individual companies.

[155]For 1972, product class 34930 was reclassified as product classes 34931 and 34932.

[156]Comparable data are not available for 1967 and earlier years due to a major revision in the 1972 SIC system. For 1972, product group 3481- was split into product groups 3495- and 3496-.

[157]For 1972, product class 34970 was reclassified as 34971, 34972, and 34973.

[158]Comparable data are not available for 1967 and earlier years due to a major revision in the 1972 SIC system. For 1972, product groups 3492-, 3496-, and 3499- were combined to form product group 3499-.

[159]For 1977, product class 35191 is combined with product class 35192 to avoid disclosing operations of individual companies.

[160]For 1972, farm wagons, trucks, and other farm transportation equipment were moved from industry 3799 to product class 35232. Products shifting into industry 3523 represent approximately 2 percent of the total 1967 shipments at the U.S. level.

[161]In years prior to 1967, parts were included with individual product classes of industry 3522; whereas, in 1967, parts are included in a separate product class 35229.

[162]For 1972, product class 35222 was reclassified as product classes 35232 and 35242.

[163]For 1972, product class 35228 was reclassified as product class 35238. Power hedge trimmers and shears moved from product class 35228 to 35249, for 1972. Farm wagons, trucks, and other farm transportation equipment were reclassified from product class 37992 to product class 35238. Products shifting into or out of this class of product represent approximately 12 percent of the total 1967 shipments at the U.S. level.

[164]For 1972, product class 35229 was reclassified as product classes 35239 and 35249.

[165]For product class 3523A and 3523B, no data are available for prior years.

[166]For 1972, product class 35220 was reclassified as product classes 35230 and 35240.

[167]Parts and attachments for wheel and tracklaying tractor shovel loaders are included in product class 35313 beginning in 1965. In prior years, they were included in product class 35197. 1963 concentration ratios are not available on a basis comparable to 1967.

[168]For 1972, automatic stackers and parts and attachments are reclassified from product class 35370 to 35362. These products shifting into product class 35362 represent approximately 10 percent of the total 1972 shipments at the U.S. level. For 1967, data for these products were included in industry 3537, but were not available separately.

[169]The definitions of product classes 35441 and 35442 have been revised. Code 35442 11, Diecasting Dies (Molds), was included through 1966 in product class 35441, but is now included in product class 35442. 1963 concentration ratios are not available on a basis comparable to 1967.

[170]For 1972, old industry 3548 was split to form new industries 3546, 3547, and 3549.

[171]For 1977, chain saws and parts were classified in industry 3546. Prior to 1977, chain saws and parts were classified in industry 3353.

[172]Prior to 1977, hydraulic and internal combustion engine driven hand tools and parts (excluding chain saws and parts) were classified in industry 3546, but collected separately.

[173]For 1972, old product class 35480 was split to form product classes 35460, 35470, and 35490.

[174]For 1972, dairy packaging and bottling machinery has shifted from product class 35511 to product class 35514. These products shifting out of product class 35111 represent approximately 34 percent of the total 1972 shipments at the U.S. level.

[175]For 1972, wrapping machines have moved from product class 35512 to Product Class 35514, Wrapping Machines, shifting out of product class 35512 and represent approximately 5 percent of the total 1972 shipments at the U.S. level.

[176]For 1972, product class 35513 was reclassified as product classes 35513 and 35514.

[177]For 1972, industry 3561 was reclassified as industries 3561 and 3563.

[178]For 1972, vacuum pumps shifted from product class 35612 to product class 35631. Products shifting out of product class 35612 represent approximately 12 percent of the total 1967 shipments at the U.S. level.

[179]For 1972, industrial spraying equipment was reclassified as product class 35635; this product was formerly part of product class 35615. Industrial spraying equipment shifting out of product class 35615 represent more than 15 percent of the total shipments at the U.S. level.

[180]For 1972, parts for pumps and compressors (old product class 35616) has been split out to parts and attachments for pumps (product class 35616) and parts and attachments for air and gas compressors (product class 35632).

[181]Data for Product Class 35630, Air and Gas Compressors, N.S.K., were included in Product Class 35610, Pumps and Pumping Equipment, in 1972 and prior years.

[182]For 1967, taper roller bearings (product class 35622) has become a separate product class rather than included with roller bearings, complete (product class 35623). 1963 concentration ratios are not available on a basis comparable to 1967. The 1963 product class representing roller bearings, complete, had total shipments of 446.3 of which the 4 and 8 largest companies accounted for 80 and 93 percent, respectively.

[183]For 1972, industry 3566 was reclassified as industries 3566 and 3568.

[184]For 1972, the "not specified by kind" for product class 35680 is included with product class 35660.

[185]For 1977, data for product classes 35741 and 35743 were combined to avoid disclosing operations of individual companies.

[186]For 1972, product classes 35741 and 35743 are combined with product class 35745 in order to avoid disclosing operations of individual companies.

[187]For 1972, product class 35794 is combined with product class 35796 in order to avoid disclosing operations of individual companies.

[188]For 1972, product class 35797 is combined with product class 35798 in order to avoid disclosing operations of individual companies.

[189]For 1972, coin-operated washers and dryers, under 10-pound load, and parts and attachments for these products have been moved from product class 35820 to product class 36333. Products shifting out of product class 35820 represent more than 15 percent of the total value of shipments.

[190]For 1972, warm air furnaces were changed from product class 34332 to product class 35858. Parts for warm air furnaces moved from product class 34336 to 35858 for 1972. Parts for warm air furnaces shifting into product class 35858 represent approximately 4 percent of the total 1967 shipments at the U.S. level.

[191]For 1972, product classes 35851 and 35852 are reclassified as product classes 35851, 35852, and 35856.

[192]Product Class 36323, Parts for Household Refrigerators and Freezers, is new for 1977. Parts were previously included in product classes 36321 and 36322.

Footnotes are continued on next page.

Table 9. **Share of Value of Shipments of Each Class of Product Accounted for by the 4, 8, 20, and 50 Largest Companies: 1977 and Earlier Years**—Con.

[193]Product Class 36333, Other Household Laundry Equipment and Parts, was expanded from 1967 product class 36332 to include coin-operated washer-extractor combinations and coin-operated drying tumblers, both 10-pound maximum load and under. Both of these products were part of 1967 product class 35820. The value of these added products was $28.0 million in the 1972 Census of Manufactures.

[194]In 1972, Product Class 36457, Portable Residential Type Lighting Fixtures and parts and Accessories for Residential Lighting Fixtures, including 1967 Product Class 36427, Residential Type Electric Fixtures (Portable), includes part of 1967 Product Class 36426, Other Electric and Nonelectric Lighting Equipment (Including Hand Portable Equipment), and Parts and Accessories. The part of 1967 product class 36426 in 1972 product class 36457 had a value in 1972 of $15.1 million.

[195]Value of product class, not specified by kind, for industries 3646, 3647, and 3648 are included in industry 3645 prior to 1972. All products not specified by kind for administrative records and most for other records are included in industry 3645, in 1972.

[196]In 1972, Product Class 36463, Industrial-Type Electric Lighting Fixtures and Parts, Including 1967 Product Class 36423, Industrial Type Electric Fixtures, includes part of 1967 Product Class 36426, Other Electric and Nonelectric Lighting Equipment (Including Hand Portable Equipment) and Parts and Accessories. The part of 1967 product class 36426 in 1972 product class 36463 had a value in 1972 of $22.6 million.

[197]In 1972, parts and accessories for residential, commercial, industrial, institutional, and vehicular lighting fixtures was split out of 1972 Product Class 36489, Other Electric and Nonelectric Lighting Equipment and Parts. These products were part of this product class before 1972. The value of these products in the 1972 Census of Manufactures was $39.1 million.

[198]For Product Class 36710, Electron Tubes, N.S.K., no prior year data is shown due to incomparability.

[199]In 1967, product class 36795 was split into product classes 36780 and 36790 for 1972. In addition, 1967 product class 36790 was tabulated as part of 1972 product class 36790.

[200]Product Class 37161, Motor Homes Produced on Purchased Chassis, was created in 1977 from Product Class 37132, Complete Vehicles Produced on Purchased Chassis. Data for product class 37132 is not strictly comparable with prior years.

[201]For 1972, industry 3722 was split into two separate industries: 3724 and 3764. The historical data for industry 3722 in 1967 are presented with 1972 industry 3724.

[202]For 1972, industry 3729 was split into two separate industries: 3728 and 2769. The historical data for industry 3729 in 1967 are presented with 1972 industry 3728.

[203]This product class was identified as product class 37230 prior to 1967.

[204]For 1972, industry 3751 is not fully comparable with prior years. Self-propelled golf carts were moved from product class 37510 in 1967 to product class 37993 in 1972. The value of shipments for self-propelled golf carts was $36.3 million in 1967 and $54.1 million in 1972.

[205]Comparable data are not available for 1967 and earlier years due to a major revision in the 1972 SIC system. Parts of 1967 industry 3791 and Product Class 37910, Recreation Type Trailers, Pickup Campers, Truck Mounted Campers, and Pickup Box Covers or Caps, and industry 3799 and Product Class 37991, Collapsible Camping Trailers and Travel Trailers (less than 11 feet in length) make up industry 3792. Industry 3792 represents approximately 27 percent of the products of old industry 3791, plus 16 percent of old industry 3799.

[206]Comparable data are not available for 1967 and earlier years due to a major revision in the 1972 SIC system. Product class 37921 represents approximately 48 percent of 1967 product class 37910.

[207]Comparable data are not available for 1967 and earlier years due to a major revision in the 1972 SIC system. Product class 37922 represents approximately 21 percent of 1967 product class 37910, plus 47 percent of 1967 product class 37991.

[208]The 1967 Standard Industrial Classification Product Class 38213, Industrial Process Instruments, was split into three product classes in the 1972 Census of Manufactures: Product Class 38230, Process Control Instruments; Product Class 38292, Physical Properties Testing and Inspection Equipment; and Product Class 38293, Commercial Meteorological and General Purpose Instruments.

[209]The 1967 Product Class 38216, Other Mechanical Measuring and Controlling Instruments, was split into two product classes in the 1972 Census of Manufactures: Product Class 38243, Counting Devices; and Product Class 38294, Nuclear Radiation, Detection and Monitoring Instruments.

[210]A small part of 1967 Industry 3611, Instruments to Measure Electricity, was not moved to industry 3825 in 1972. Instrument transformers, part of 1967 Product Class 36113, Other Electrical Measuring Instruments, became part of 1972 product class 36125, Specialty Transformers, Except Fluorescent Lamp Ballast. The other part of 1967 product class 36113 became all of 38253, Other Electrical Measuring Instruments, in 1972.

[211]In 1972, Industry 3832, Optical Instruments and Lenses, is a combination of two 1967 industries: Industry 1941, Sighting and Fire-Control Equipment made from Purchased Lenses; and Industry 3831, Optical Instruments and Lenses, Except Sighting and Fire Control Equipment. Historical data for industry 1941 are not available.

[212]The figures for 1972 are not strictly comparable with those for prior years. The report form used for this industry in the 1972 Census of Manufactures contained an inquiry designed to identify establishments either grinding lenses or fitting glasses to prescription. Such establishments have been reclassified to trade industries.

[213]For 1977, product classes 38612, 38616, and 38610 were combined to avoid disclosing operations of individual companies.

[214]Industry 3873, Watches, Clocks, and Watchcases, was published as two separate industries in 1967: Industry 3871, Watches and Clocks; and Industry 3872, Watchcases.

[215]For 1967, golf equipment (product class 39492) has become a separate product class rather than being included with other sporting and athletic goods (product class 39493) as was done in prior years. 1963 concentration ratios are not available on a basis comparable to 1967. The 1963 product class representing other sporting and athletic goods (including golf equipment) had total shipments of $525.4 million of which the 4 and 8 largest companies accounted for 33 and 46 percent, respectively.

[216]Broad-tipped markers, formerly in industry 3953 (code 39530 43), are now included in industry 3951 (code 39510 43). This product code shift out of industry 3953 represents approximately 11 percent of the total 1967 shipments of products in industry 3953. The product code shift into industry 3951 is approximately 8 percent of the total 1967 shipments of products in industry 3951.

[217]Data for 1972 are not directly comparable to earlier data due to a revision in the SIC system. For 1972, data for embalming chemicals are included in product group 2899-; burial garments in product group 2389-; and innerliners, sold as such, in product group 2399-. The exact amount of these products included in product group 3994- for 1967 is unknown, but it is estimated to represent less than 7 percent of the total value of shipments at the U.S. level.

[218]Data for 1972 are not directly comparable to earlier years due to a significant revision in the SIC system. Children-sized caskets and coffins are now included in product class 39953, whereas in 1967, they were included in product classes 39941 and 39942. However, the effect of this change is unknown.

[219]Comparable data for 1967 and earlier years are not available, since the effects of the changes noted in footnotes 217 and 218 are estimated to be greater than 15 percent.

[220]The definition of industry 3999 has been revised for 1967. 1963 concentration ratios are not available on a basis comparable to 1967.

[221]Product Classes 39993, Matches; 39994, Candles; 39995, Lamp Shades; 39996, Furs, Dressed and Dyed, and 39997, Umbrellas, Parasols, and Canes, are part of industry 3999, rather than separate industries as they were in 1966 and prior years. The 1967 figures, therefore, are not directly comparable to 1963 because the administrative record cases (explained in the Introduction under "not specified by kind" classes) have been included in product class 39990 for increasing the associated concentration ratios to a level not comparable to previous years.

[222]Includes receipts for work done on materials owned by others.

Table 10. **Share of Value of Shipments of Selected Product Classes Primary to More Than One Industry Accounted for by the 4 and 8 Largest Companies: 1977 and Earlier Years**

1977 product code[1]	Class of product and year[1]	Value of shipments[2]		
		Total (million dollars)	Percent accounted for by[3]-- 4 largest companies	8 largest companies
20116 20136	Pork, processed or cured (not canned or made into sausage) 1977	3,778.6	18	30
	1972	2,413.5	22	32
	1967	2,008.0	22	37

	1958..	127.1	37	42

[1]Product classes (5-digit codes) are assigned to the industry to which they are primary. Products which are primary to more than one industry are split according to the industry codes of the establishment producing them. In this table, such products have been combined to yield a wherever-made total. See table 9 for the figures for each product class separately.

[2]Represents, for the combination of numerically coded product classes, the total value shipped by all producers in all industries.

[3]Company affiliation is determined from census reports and public records. The value of shipments of products falling within each combination of product codes was aggregated for plants under common ownership and company totals derived to determine the largest producers.

[4]For 1972, all data were collected and published under industry 2016, Poultry Dressing Plants, product codes only. However, industry 2016 products are defined to include only those porducts processed at slaughtering plants. Industry 2017, Poultry and Egg Processing, is defined to include the same products but processed from purchased carcasses. For 1977, comparable product classes were created for collecting products primary to both 2016 and 2017 industries.

[5]For 1963, one or more of the 1958 product classes have been redefined. Prior years' data and their associated concentration ratios are not available on a basis comparable to 1963.

[6]For 1977 and 1972, these data include product class 22219. In prior years, the manmade fiber sheets and pillowcases were included in product class 22118.

[7]For 1977, these data include product code 22210 15. In prior years, the manmade fiber towels and washcloths were included in product class 22119.

[8]For 1977, old product class 22824 was split into new product classes 22825 and 28246.

[9]Represents value of production rather than value of shipments.

[10]For 1967, one or more of the 1963 product classes have been redefined. Prior years' data and their associated concentration ratios are not available on a basis comparable to 1967.

Selected Metalworking Operations

Explanatory Text 2

TABLES

1. Summary of Employment in Selected Metalworking Operations: 1977 and 1972. 3
2. Selected Metalworking Operations by Industry and Operation: 1977 3
3. Number of Establishments and Production Workers for Selected Metalworking Operations by Industry: 1977 27
4. Coverage of Selected Metalworking Operations by Industry: 1977 38
5. Number of Production Workers Engaged in Selected Metalworking Operations by Geographic Areas: 1977 40

EXPLANATORY TEXT

The 1977 Census of Manufactures included a special inquiry on "selected metalworking and related operations" to provide a measurement of employment in certain metalworking and related facilities in manufacturing. The following operations were included in this inquiry: Foundry (iron or steel); foundry (nonferrous, except die casting); die casting (nonferrous metal only); forging—presses, hammers, or upsetters (excluding manufacture of nuts, bolts, etc.); electroplating and other plating; galvanizing and other hot-dip coating; heat treating of metals for production purposes; automatic screw machine department; machine shop; tool and die shop (if separate from machine shop) for jigs, fixtures, dies, and other special tooling; pattern shop (foundry patterns only—metal, wood, etc.); plate or structural fabrication; stamping, blanking, and forming of metals; painting, lacquering, and enameling on metals; plastics molding; assembly of product; shipping department (including packing and crating); hot forging—presses, hammers, or upsetters (excluding manufacture of nuts, bolts, etc.); cold forging; and powder metallurgy.

Information on selected metal working and related operations was obtained for practically all industries where such operations are important. For individual industries or groups of industries, the inquiry on metalworking and related operations was tailored to fit the principal operations that were characteristic of those industries. The information obtained in each inquiry included the number of production workers engaged in the specified operation.

Production workers are defined to include workers (up through the working supervisor level) engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping (but not delivering), maintenance, repair, janitorial and guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with these production operations at the establishment covered by the report. Supervisory employees above the working supervisor level are excluded from this category.

Table 1 summarizes the number of establishments and production workers engaged in specific metalworking and related operations for 1977 and 1972.

Data on the number of establishments and the number of production workers engaged in specific metalworking and related operations are shown in table 2 for each of the 146 industries included in this special inquiry. The size distribution data in table 2 is based on the number of production workers usually employed in the operation. The number of production workers engaged in these operations is shown for 18 selected operations by industry in table 3, and for 19 selected operations by State in table 5.

An approximation of the coverage for each industry is given in table 4. The coverage is generally highest in industries in which larger establishments have predominance. Similar percentages are not available for States.

Since establishments with less than 5 employees were typically excused from filing reports, these establishments are not included in the metalworking and related operations data. (See the introduction for further explanation.)

In addition, for selected industries, short forms which did not contain metalworking inquiries were mailed to small establishments (typically those with 5 to 20 employees). The special inquiry industries were:

3361	3498	3567
3362	3499	3569
3369	3541	3582
3441	3544	3589
3442	3545	3599
3444	3549	3645
3446	3551	3699
3449	3552	3732
3451	3555	3792
3469	3559	3799
3496	3565	3829

Also, a few larger establishments that filed standard forms did not report their metalworking and related operations. This has resulted in an understatement of the number of establishments performing specific operations, primarily in the smallest size class, and to a much smaller degree in an understatement of the number of production workers in the operation.

For the forging industries (SIC's 3462 and 3463), table 2 contains separate data for hot forging—presses, hammers, or upsetters (excluding manufacture of nuts, bolts, etc.), and cold forging. These data are included with operation entitled "forging—presses, hammers, or upsetters," in tables 3 and 5.

Since the report form used by respondents in Industry 3471, Plating and Polishing, did not include the metalworking and related operations inquiry, the total number of production workers for establishments classified in industry 3471 are shown separately in table 5. Plating and polishing operations performed by establishments classified in industry 3471 are excluded from tables 2, 3, and 4.

Table 1. **Summary of Employment in Selected Metalworking Operations: 1977 and 1972**

Metalworking operations	1977		1972		Metalworking operations	1977		1972	
	Establishments (number)	Production workers (number)	Establishments (number)	Production workers (number)		Establishments (number)	Production workers (number)	Establishments (number)	Production workers (number)
Ferrous foundry	1,225	185,469	1,350	176,639	Tool and die shop	7,530	124,070	8,590	130,263

Machine shop	15,744	553,383	18,828	569,200					

(D) Withheld to avoid disclosing operations of individual companies.

[1]Represents the total number of establishments and production workers classified in the plating and polishing industry (SIC 3471). Data are from table 1A of report MC77(2)-34D.

[2]For 1977, powder metallurgy was added to the metalworking and related operations inquiries on the census of manufactures forms of substantially more industries.

Table 2. **Selected Metalworking Operations by Industry and Operation: 1977**

SIC code	Industry and operation	Establishments[1]				Production workers in specified operation[1] (number)
		Number	Number of production workers[2]			
			1 to 4	5 to 19	20 or more	
3321	Gray iron foundries:

	Stamping, blanking, and forming of metals	31	9	15	7	406

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies.

[1]Establishments with less than 5 employees were typically excluded from the mail portion of the 1977 Census of Manufactures. Small establishments (typically between 5 to 20 employees) were mailed short forms for the 1977 Census of Manufactures for selected industries. These short forms did not contain a metalworking and related operations inquiry. See the explanatory text for a list of industries that received short forms. In some instances, a few larger establishments failed to report data for metalworking and related operations. The result is an understatement of the number of establishments performing specific operations, primarily in the smallest size class. This understatement exists to a much smaller degree in the number of production workers in the operation. The signifiance of the undercoverage is shown in table 4 in terms of total plant employment.

[2]These size groups are based on the number of employees engaged in each specific operation, not on the total employment in the establishment.

[3]The specific operation basically represents the major activity of the particular industry. A few respondents incorrectly reported that the item did not apply.

[4]Separate data cannot be published for Industry 3572, Typewriters, without revealing the operations of individuals companies. Therefore, industry 3572 has been combined with Industry 3579, Office Machines, N.E.C.

Table 3. **Number of Establishments and Production Workers for Selected Metalworking Operations by Industry: 1977**

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. n.e.c. Not elsewhere classified. (X) Not collected.

[1]Excludes data on forging operations used in the manufacture of bolts, nuts, and other related products.

[2]Excludes data for the 3,447 establishments classified in Industry 3471, Plating and Polishing, which are usually engaged in work on materials owned by others and generally perform electroplating operations.

[3]The specific operation basically represents the major activity of the particular industry. A few respondents incorrectly reported that the item did not apply.

[4]Separate data cannot be published for Industry 3572, Typewriters, without revealing the operations of individual companies. Therefore, industry 3572 has been combined with Industry 3579, Office Machines, N.E.C.

[5]Excludes data for establishments classified in Industry 3479, Metal Coating and Allied Services, which are primarily engaged in galvanizing and other hot-dip coating, usually on materials owned by others.

Table 4. **Coverage of Selected Metalworking Operations by Industry: 1977**

- Represents zero.

[1]Excludes establishments with less than 5 employees, which were typically not sent Census forms. Also, for selected industries, excludes small establishments (typically between 5 to 20 employees). See explanatory text for further explanation.

[2]The specific operation basically represents the major activity of the particular industry. A few respondents incorrectly reported that the item did not apply.

Table 5. **Number of Production Workers Engaged in Selected Metalworking Operations by Geographic Areas: 1977**

Division and State	Ferrous foundry	Nonferrous foundry (except die casting)	Nonferrous die casting	Forgings--presses, hammers or upsetters	Electro-plating and other plating	Plating and polishing industries	Galvanizing and other hot-dip coatings	Heat treating of metals	Automatic screw machine department	Machine shop

Note: Precise measurement of coverage percentages are not available for geographic divisions and States.

- Represents zero. (D) Withheld to avoid disclosure of operations for individual companies.

[1]Excludes data on forging operations used in the manufacture of bolts, nuts, and other related products.

[2]Excludes data for the 3,447 establishments classified in Industry 3471, Plating and Polishing, which are usually engaged in work on materials owned by others and generally perform electroplating operations.

[3]Represents the total number of production workers classified in the plating and polishing industry. Figure is rounded to the nearest hundred, as are State totals, to correspond with data shown for this industry in table 2 of report MC77(2)-34D.

[4]Excludes data for establishments classified in Industry 3479, Metal Coating and Allied Services, which are primarily engaged in galvanizing and other hot-dip coating, usually on materials owned by others.

SELECTED MATERIALS CONSUMED

GENERAL

In this section, summary data by industries are shown for all materials for which manufacturing consumption was reported in the census of manufactures. All materials collected in the census of manufactures are covered in this section and are segregated into two categories: Materials designated as "incomplete" coverage and those designated as "complete" coverage. "Incomplete" coverage materials are shown in chapter 2 and consist of commodities for which coverage as measured by the census of manufactures is limited; that is, appreciable amounts of these materials may be consumed in other manufacturing industries, but were not collected in the census of manufactures. "Complete" coverage materials are shown in chapters 3 through 8 and consist of those commodities for which data obtained in the census of manufactures represent about 90 percent or more of total consumption by manufacturing industries. There are about 200 "complete" coverage materials and they are divided into separate chapters: Foods; textiles; newsprint and paperboard containers; chemicals, rubber, and plastics; metals; and engines, motors, bearings, electron tubes, and semiconductors.

Chapter 1 shows the percentage that the cost of materials specifically reported is of the cost of all materials consumed by an industry, thus providing the degree to which materials data by industry were collected and compiled in the 1977 Census of Manufactures. Separate data for the specific purchased materials consumed by industry appear in the final industry series MC77(2).

Some additional data on materials consumed are collected and published in the Bureau of the Census' Current Industrial Reports. Selected consumption information, such as quantities produced and consumed, or paper purchased for specific products were also collected in the product and special inquiry sections of the census of manufactures report form. These data, generally, are not to be found in this chapter but appear in the appropriate industry reports.

In addition to the data referred to above, other related statistics were collected in the 1977 Census of Manufactures and 1977 Census of Mineral Industries. Table 3 of the final industry series contains information showing the cost of resales, fuels, electricity, and contract work. The statistics on detailed fuels and electric energy appear in MC77(SR)-4. The statistics on detailed water consumed appear in MC77(SR)-8. Data relating to materials mined by establishments classified in manufacturing, primarily those for Major Group 32, Stone, Clay, Glass, and Concrete Products, are included in the census of mineral industries publications.

ESTABLISHMENT BASIS OF DATA

With a few exceptions that are noted in the individual texts, the data shown are the total consumption by establishments classified in the specified industry rather than the total consumption in the manufacture of the products defined by the industry title. That is, all of the metal consumed by an establishment classified in Industry 3642, Iron and Steel Forgings, is included in the total for that industry. Consequently, the quantity of materials consumed by this industry includes not only that used in forgings, but also the quantities used in producing secondary products such as special dies, jigs, fixtures, and electrical appliances. The 1977 Census of Manufactures summary report (MC77-SR-1) Table 1 in chapter 2 entitled, Industry Statistics, shows: (a) the percentage of primary products shipped within an industry to the total of all products shipped for the industry (specialization ratio) and (b) the percentage of primary products shipped within an industry to the total of primary products shipped by all industries (coverage ratio).

COVERAGE

As noted in the introduction to the census volumes, some undercoverage exists in the statistics for most materials. This undercoverage results from the fact that very small establishments and establishments consuming negligible amounts of specific materials were not required to report these materials. While no precise measure of the effect of the undercoverage is available, it is believed that for most materials for which data are shown in this section, the understatement is insignificant. However, for some materials characterized by large numbers of small consumers, the undercoverage resulting from this factor may be of some consequence, especially in the smaller cells.

DEFINITION OF MATERIALS CONSUMED

Census respondents were requested to report the amounts actually paid or payable after discounts and to include freight and direct charges incurred in acquiring the materials consumed during 1977. For materials transferred from other establishments of the same company, respondents were requested to report the nearest approximation to the commercial value of the material. Where a question arose concerning such transfer values, respondents were requested to determine the value of the material reported in the census as a product by the producing plant and then to add only freight and other direct handling charges. Thus, the cost of materials consumed represents a "purchasers price" as contrasted to the value of the output of the material which may be termed a "producers price."

Consumption of any given item was defined as the quantity actually consumed or put into production by the establishment during the report year. Respondents were generally permitted to use purchase data where purchases closely approximated consumption. However, where inventory change was significant, respondents were requested to take this into account in determining consumption for major items.

RELATIONSHIP OF MATERIALS DATA TO OTHER STATISTICS

The materials consumed by manufacturers may have been obtained from any or all of a number of possible sources—imports as well as materials produced domestically. They may have been obtained directly from the manufacturer of the materials, from some trade channel such as wholesalers, or from the stocks of the consuming manufacturer. In some instances, previously held stocks of producers of the material and of trade channels were a significant source of individual materials consumed during the year.

The products produced from the materials consumed may have been shipped or added either to work in process or finished goods inventory as of the end of the year. Therefore, in relating material consumed data to shipment or value added data, it is necessary to take into account inventory changes in work in process and finished goods for the industry.

Cost of Materials, Parts, Supplies, and Containers Consumed by Each Industry

GENERAL

This chapter shows the percentage that the cost of materials specifically reported is of the total cost of all materials consumed by an industry; thus providing the degree to which materials data by industry were collected and compiled in the 1977 Census of Manufactures. Separate data for the specific purchased materials consumed by industry appear in table 7a of the 1977 Census of Manufactures final industry reports.

TOTAL COST OF MATERIALS

"Total cost of materials" is the cost of all materials consumed by the industry, including miscellaneous materials and materials not reported separately. This information was reported in item 5a of the 1977 Census of Manufactures reporting form. It represents the amounts paid or payable for materials, parts, containers, and supplies consumed or put into production during the year after discounts and including freight charges and other direct charges incurred by the establishment in acquiring these materials. It excludes the cost of items bought and resold in the same condition, cost of contract work, fuels, and electric energy.

COST OF SPECIFIED MATERIALS

"Cost of specified materials" is the total of only those specific materials reported by each industry on item 17 of the 1977 Census of Manufactures reporting form. In part, this figure and the resulting percentage is understated since small establishments were not required to report detailed materials. Further understatement is the result of non-response by larger establishments. The value of detailed materials not reported by both small and large establishments is shown in table 7a of the final industry series reports in Material Code 971000, Materials, N.S.K. The value of materials for which detail was not requested is shown in Material Code 970099, All Other Materials.

Table 1. **Cost of Materials, Parts, Supplies, and Containers Consumed, by Each Industry: 1977**

SIC code	Industry	Total cost of materials (million dollars) A	Cost of specified materials (million dollars) B	Percentage (B÷A) C

Materials Consumed (Incomplete Coverage)

This chapter presents data for those materials which were collected in the census of manufactures solely for their importance as material requirements in selected industries. These materials were consumed in other industries, but were not collected due to their insignificance relative to other materials consumed in those industries. Therefore, the data in this chapter do not reflect complete consumption of these materials in manufacturing, but only their consumption in the industries listed. Those materials for which coverage is deemed to be "complete"; that is, consumption by the listed industries, accounts for about 90 percent or more of total manufacturing consumption, are presented in chapters 3 through 8.

Table 2. **Materials Consumed by Industries (Incomplete Coverage): 1977 and 1972**

1977 material code	Material and consuming industry[1]	Unit of measure	1977		1972	
			Quantity	Delivered cost (million dollars)	Quantity	Delivered cost (million dollars)

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. [e]Estimated for 1972 quantities. (NA) Not available. (S) Withheld because the data did not meet publication standards. (X) Not applicable. (Z) Less than half the unit of measure shown.

[1]For some establishments, data have been estimated from central values, which are based on quantity-cost relationships of reported data. The following symbols are used when percentage of each quantity figure estimated in this manner equals or exceeds 10 percent of published figure: * indicates 10 to 19 percent estimated; ** indicates 20 to 29 percent estimated. If 30 percent or more is estimated, figure is replaced by (S).

Foods

GENERAL

This chapter presents data on selected important materials used primarily in the food manufacturing industries. Characteristically, many of these materials are used for similar purposes both in manufacturing and nonmanufacturing establishments. For example, flour is consumed in bakeries, which are classified in manufacturing, and also in retail bakery products stores, which are not classified in manufacturing. In addition, substantial quantities of many of these materials are consumed directly by households. The discussion and tables that follow relate only to industrial consumption; that is, consumption in the manufacturing sector as defined in the Standard Industrial Classification Manual.

SUGAR

In addition to the sugar consumed in manufacturing establishments, as shown in table 3c, substantial quantities are consumed in households, restaurants, hotels, retail bakeries, and wholesale trade establishments in making various food preparations.

DAIRY PRODUCTS

The data shown in table 3d represent only the quantity purchased (or transferred from one establishment to another). There is also a substantial production of skim milk produced and consumed in the same plant which is not reflected in these tables.

Textiles

GENERAL

This chapter includes data on materials primarily consumed by establishments classified in Major Group 22, Textile Mill Products, and for broad woven fabrics primarily consumed by establishments classified in Major Group 23, Apparel and Other Textile Products, as well as other industries consuming significant quantities of piece goods.

FIBER CONSUMPTION

The fiber consumption data shown are based on information collected in the census of manufactures. All industries consuming significant amounts of fiber reported these data, except for Industry Group 225, Knitting Mills, and Industry Group 227, Floor Covering Mills. Detailed consumption figures are published in the monthly Current Industrial Reports series, M22D, Consumption on the Woolen and Worsted Systems, and M22P, Cotton, Manmade Fiber Staple, and Linters.

BROAD WOVEN FABRICS (PIECE GOODS)

The statistics shown in table 4c, were previously published in the final industry series, Table 7a, Materials Consumed by Kind. In each of the individual tables 7a, detailed materials data were collected for piece goods and other materials. However, in each industry, a portion of the total cost of materials was not specified by kind. Part of this portion was the total cost of materials for small establishments reporting on "short forms" where separate figures for individual materials consumed were not requested. The rest was the total cost of materials reported for those establishments which failed to report cost of individual materials on the "standard forms." The "cost of materials not specified by kind" would, therefore, include the quantity and cost of piece goods consumed by a number of establishments.

For some industries, the quantity data for relatively small costs of fabrics were not available. Those quantities were estimated based on the unit value reported by a closely related industry.

For some industries, the materials consumed inquiries requested separate data by type of fiber, such as cotton fabrics or rayon fabrics. For other industries, the breakdown was by kind of fabric, such as upholstery material or bed ticking. Because of this varying collection measure, it is not possible to obtain a breakdown of the total fabric consumption in all industries by type of fiber or fabric consumed.

[1]10 to 29 percent of quantity was estimated.

Newsprint and Paperboard Containers

GENERAL

This chapter presents data on materials consumed by establishments classified in Major Group 26, Paper and Allied Products, and Major Group 27, Printing and Publishing industries, as well as data on industries consuming $1 million worth of boxes and containers. Comments on individual groups of materials are shown below. The two tables in this chapter have been prepared in the interest of presenting a more comprehensive picture of the consumption of "complete coverage" material.

NEWSPRINT

Table 5a shows the U.S. consumption of newsprint in 1977 and 1972 by industries and delivered cost. Where available, the corresponding tonnages purchased are also shown. Table 5a also presents newsprint consumed by the publishing industries as well as the book manufacturing industry during 1977 and 1972.

PAPER AND BOARD

Paper consumption statistics for the printing and publishing industries appear in the final industry series. Except for newsprint, grade detail was not collected from the printing industries, since printers generally have demonstrated their inability to furnish more detailed information. Therefore, with the exception of newsprint, quantity and cost information cannot be presented on a uniform basis for all consuming industries, for which consumption data were collected.

BOXES AND CONTAINERS

Table 5b presents the reported delivered cost of paperboard boxes and containers in 1977. Where available, the 1972 reported cost figures are also presented. The data in this table, which also appear in the final Industry series tables 7a, are shown in the interest of a more composite presentation of information on containers.

Chemicals, Rubber, and Plastics

GENERAL

This chapter includes data on materials primarily produced by establishments classified in Major Group 28, Chemicals and Allied Products; Major Group 29, Petroleum and Coal Products; and Major Group 30, Rubber and Miscellaneous Plastics Products. Comments on individual materials or groups of materials are shown below.

SULFUR, NATIVE AND RECOVERED

The sulfur consumption data shown in table 6a are less than the "apparent consumption" figures published by the Bureau of Mines, Department of the Interior, because Census information was not requested from certain manufacturing establishments, principally those classified in Major Group 30, Rubber and Plastics, and Industry Group 283, Drugs.

CHEMICALS

Consumption data shown for the specified chemicals in table 6a represent a varying proportion of the U.S. total production. The coverage for ammonia is relatively low because Census figures exclude quantities used for direct application to the soil. Coverage for sodium hydroxide (caustic soda) is low because information was not collected from plants classified in the textile, rubber reclaiming, vegetable oil refineries, and other miscellaneous industries.

In making any comparison of the quantity consumed with total supply of a specified chemical, account should be taken of the factors discussed in the text covering the materials consumption tables. Also, consideration should be given to the variations in handling consumption data for chemicals produced and consumed in the same establishment. The statistics showing "consumption" by industry indicate purchases or receipts from other establishments separate from the quantities produced and consumed.

RUBBER

The figures for natural and synthetic rubber shown in table 6b are limited to the establishments classified in the specified industries. Estimates of total rubber consumption for all industries are published by the Census Bureau in Current Industrial Reports series M30A, Rubber, Supply and Distribution for the United States.

PLASTICS

The data for plastics resins and plastics products shown in tables 6c and 6d are limited to the establishments classified in the specified industries. These tables do not reflect the amount of plastics produced and consumed within the same establishment.

Table 6a. Chemicals Consumed by Selected Industry: 1977 and 1972

1977 code	Industry	1977 Purchased quantity (1,000 s. tons)	1977 Delivered cost (mil. dol.)	1972 Purchased quantity (1,000 s. tons)	1972 Delivered cost (mil. dol.)

Metals

GENERAL

This chapter presents data on the consumption of selected metal mill shapes and forms, castings, forgings, refinery shapes, and scrap.

MILL SHAPES, CASTINGS, AND FORGINGS

The materials used by the metal fabricating industries in producing machinery, automobiles, and thousands of other products consist primarily of metal mill shapes and forms, castings, and forgings. The tables show the cost and quantity of consumption of the most important of these metals—iron and steel, aluminum and aluminum-base alloys, and copper and copper-base alloys. No data are available for copper and copper-base alloy forgings.

The steel mill shapes are shown separately for three grades of steel: carbon, alloy, and stainless. Carbon steel is subdivided into six shapes, alloy steel is divided in two shapes, while stainless steel is shown in total only.

The copper and copper-base alloy mill shapes are subdivided into bare wire for electrical conduction; insulated wire and cable; rod, bar, and mechanical wire; plate, sheet and strip; and pipe and tube. There is a degree of duplication in the consumption of copper and copper-base mill shapes because of the inclusion in these tables of both bare wire for electrical conduction and insulated wire and cable.

The aluminum and aluminum-base alloy mill shapes are subdivided into sheet, plate, and foil; extruded shapes; and all other mill shapes.

For castings, consumption data are shown separately for iron, steel, aluminum and aluminum-base alloy, and copper and copper-base alloy. Forgings are shown separately for iron and steel and aluminum and aluminum-base alloy.

PIG IRON, NONFERROUS REFINERY SHAPES, AND SCRAP

Consumption of materials by the primary metal industries is represented in the tables in this chapter by seven commodities: pig iron and iron and steel scrap (except home scrap), aluminum and aluminum-base alloy refinery shapes and scrap (except home scrap), copper and copper-base alloy refinery shapes and scrap (except home scrap), and zinc and zinc-base alloy refinery shapes. Consumption of these materials is also reported by metal fabricators which operate foundry departments or other activities involving such consumption.

INDUSTRY COVERAGE

The tables on consumption by industry include data for approximately 100 metal-fabricating industries. These represent all significant users of metal in manufacturing, and are covered by Major Group 34, Fabricated Metal Products, through Major Group 37, Transportation Equipment, and several additional miscellaneous industries, including Major Group 25, Furniture and Fixtures.

Although there were other metal consuming industries from which consumption data were either not collected or the quantities reported failed publication standards, the omission of these industries affects coverage only slightly.

To relieve very small metal consumers from reporting negligible amounts of total consumption, a minimum usage requirement was established: Expenditures of less than $10,000 for each shape or form were exempt.

When comparing consumption data with production figures, it should be noted that the consumption data cover manufacturing industries only. Consumption of these metal shapes in on-site construction, mining, farm uses, construction and maintenance of power lines, and in other nonmanufacturing areas, such as export, is not covered.

MILL SHAPES, CASTINGS, AND FORGINGS PRODUCED AND CONSUMED

Mill shapes and castings—Total consumption of mill shapes and forms, castings, and forgings in the manufacture of fabricated products must necessarily include the tonnages used by metal mills and foundries in their manufacture of fabricated products within the same establishment. These data on mill shapes and castings produced and consumed within the same establishment were obtained and are reported in quantity terms only. The consumption data on these items reported by producing establishments could not be shown either because of disclosure or because reporting was incomplete for some industries.

Forgings—To avoid duplication, data showing the consumption of iron and steel forgings are excluded from the totals for steel consumption since the quantities of forging stock, ingots, billets, and bars used by the forging plants are included in steel mill shapes and forms consumed.

DEFINITION OF METAL MILL SHAPES AND FORMS

Although the inquiry on metals consumed on the 1977 census schedules did not include a definition of the metal shapes specified, the metal fabricating companies' familiarity with the terms and their meaning provided a high degree of uniformity in reporting. The term "bars and bar shapes" appearing in the tables showing steel consumption, includes hot-rolled and cold-finished bars and tool-steel bars; "sheet and strip" includes hot- and cold-rolled, galvanized, and long ternes, but excludes tin plate, terne plate, and black plate; "wire and wire products" includes plain, galvanized, and other coated wire, as well as nails

and spikes and the like; "all other carbon steel mill shapes and forms" includes ingots, billets, wire rods, concrete reinforcing bars, tin plate, terne plate, black plate, pipe, tubing, and rails, but not forgings or materials fabricated beyond the steel mill level.

The terms copper and copper-base alloy and aluminum rolled, drawn, and extruded shapes are similar to the steel mill products listed above; i.e., sheets, bars, tubing, wire, etc. They do not include wire bars, ingots, or other unrolled forms of copper or aluminum.

The data for bare copper wire are limited to wire for electrical conduction. Data for nonelectrical copper wire are included with rod and bar. The data for copper and copper-base alloy place, sheet, and strip also include military cups and discs.

The castings (iron and steel, etc.) reported are only those in the rough and semifinished forms in which they are usually received from foundries. Castings, which had undergone extensive machining or other operations prior to their receipt at the consuming establishment, were considered as fabricated products rather than as rough castings, and are not included in these data. However, such castings are reported as consumed by the establishments performing the machining operations.

*Indicates more than 30 percent of the data has been estimated based on quantity-cost relationships of reported data. - Represents zero.
(D) Withheld to avoid disclosing operations of individual companies. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.
(Z) Less than half the unit of measure specified.

Engines, Motors, Bearings, Electron Tubes, and Semiconductors

This chapter presents data on gasoline and diesel engines, motors, and generators (timing, synchronous, subsynchronous, fractional, and integral horsepower), ball bearings, roller bearings, electron tubes, and solid state semiconductors consumed. The tables present data for consumption of these components by industry.

The consumption of parts and components account for most of the amounts used by establishments classified in manufacturing. The shipments figures for these items, however, also include amounts for exports, for use in nonmanufacturing activities, and for replacement and repair.

- Represents zero. *Indicates 10 to 19 percent estimated. (D) Withheld to avoid disclosing operations of individual companies. n.e.c. Not elsewhere classified. (S) Withheld because data did not meet publication standards. (X) Not applicable. (Z) Less than half of the unit of measure shown.

SELECTED MATERIALS CONSUMED BY KIND

Selected Materials Consumed in Manufacturing by Kind

GENERAL

The tables in this chapter present information on consumption of materials by manufacturing establishments in 1977 and 1972. The data are based on information obtained in a sample survey, MA-131, Consumption of Materials, Parts, Containers, and Supplies During 1977, and serve to supplement the data previously published in table 7 of the 1977 Census of Manufactures. The data are obtained, primarily, to facilitate the work of the Bureau of Economic Analysis, Department of Commerce, on national accounts and input-output studies. They also provide answers, in part, to increased demands for more detailed information on consumption of materials in the manufacturing sector of the economy.

SUMMARY DATA

As shown in the summary table 1a, the 19 manufacturing industries selected for this survey accounted for $149.9 billion of materials consumed or 21.6 percent of the total of $693.8 billion of materials consumed by all manufacturing establishments in 1977. Of this $149.9 billion, the category "all other materials, parts, containers, and supplies consumed" (code 970099), amounted to $88.4 billion or 59 percent. It was this latter figure which is distributed in table 1b, by class of material, on the basis of the data reported in the supplemental survey on form MA-131. As table 1 also indicates, the proportion of this cost of "all other materials" to "total cost of materials specified by kind" was reduced from approximately 61 to 7 percent as a result of the data obtained in this supplemental survey.

SAMPLE DESIGN

The 1977 MA-131 survey is a sample which includes only those establishments that account for 85 to 95 percent of the value of each industry's "all other materials consumed," (census code 970099) of item 17B. For industry 2899, where no item 17B detail was requested on the census form, the MA-131 survey sample included those establishments that accounted for 85 to 95 percent of the total materials, parts, containers, and supplies consumed (census item 5a). The response rate on this voluntary survey was approximately 75 percent.

COMPARABILITY OF DATA

Comparability of the 1972 and 1977 data presented in this report is approximate due to a difference in sample designs. The 1972 MA-131 survey was a probability survey and was collected from a smaller sample of establishments and tabulated on a "weighted sample basis." This sample resulted in the certainty selection of all plants reporting more than $4,200 thousand in unspecified materials costs. Other establishments were sampled with probabilities of 1.000 to .005 in accordance with the mathematical theory for optimum allocation of the sample. The sampling procedure for 1977, along with the expansion in census item 17B data, insured a marked increase in the accuracy of the specific material data, since both the census item 17B data and the MA-131 data would be tabulated on an "unweighted" basis.

The following industries are those for which data were obtained in the 1977 Census of Manufactures Supplemental Inquiry: MA-131, Consumption of Materials, Parts, Containers, and Supplies During 1977, and are shown in table 1b of this chapter:

2451	Mobile homes
2834	Pharmaceutical preparations
2843	Surface active agents
2869	Industrial organic chemicals, n.e.c.
2899	Chemical preparations, n.e.c.
3079	Miscellaneous plastics products
3312	Blast furnaces and steel mills
3662	Radio and TV communication equipment
3711	Motor vehicles and car bodies
3713	Truck and bus bodies
3714	Motor vehicle parts and accessories
3715	Truck trailers
3716	Mobile homes
3721	Aircraft
3724	Aircraft engines and engine parts
3728	Aircraft equipment, n.e.c.
3731	Ship building and repairing
3732	Boat building and repairing
3761	Guided missile and space vehicles

Table 1a. **Cost of Materials, Parts, Containers, and Supplies Consumed by Manufacturing Establishments, by Selected Industry: 1977 and 1972**

(Data are in millions of dollars except percent columns)

SIC code	Selected industry and year	Based on census of manufactures							Column indicated below as a percent of column G

35---	Machinery, except electrical, n.e.c.[2]	14	(NA)
36---	Electrical and electronic machinery, equipment and supplies, n.e.c.[2]	(2-5)	(NA)
38---	Measuring, analyzing, and controlling instruments; photographic, medical, and optical goods; watches and clocks, n.e.c.[2]	(5-10)	(NA)
90001	Metal scrap	(2-5)	(NA)
90005	Packing supplies	(5-10)	(5-10)
90006	Shipping supplies	(5-10)	(NA)
90007	Maintenance on machinery	47	17
90008	Operating supplies	41	7
99999	All other materials, parts, components, containers, and supplies not specified by kind[3]	1,660	(455-466)
	INDUSTRY 2899, CHEMICALS AND CHEMICAL PREPARATIONS, N.E.C.		
	Census of Manufactures		
	Materials, parts, containers, and supplies[1]	1,876	913
	Specified by kind	(4)	(NA)
	Not specified by kind (census code 97600)	(4)	(NA)
	All other materials, parts, containers, and supplies (census code 970099)	1,876	913
	MA-131 Survey		
	All other materials, parts, containers, and supplies (same as census code 970099 above)	1,876	913
	Materials requested on report form:		
14010	Crude nonmetallic minerals (clays, sand, gypsum, etc.) (except chemical)	85	35
20110	Clue stock and killing floor offal, scrap, and bones	14	54
20702	Fats, oils, greases, and tallow (animal, vegetable, and marine)	105	107
26000	Paper and paperboard products (except paperboard boxes and containers)	38	29
26500	Paperboard boxes and cabinets (including folding, corrugated, fiber, and set-up)	24	34
28120	Alkalies and chlorine	24	12
28160	Inorganic pigments	14	9
28190	Industrial inorganic chemicals (acids, sodium compounds, anhydrous ammonia, etc.) (except medicinals)	188	155
28210	Plastics and resin materials (synthetic)	76	42
28610	Wood rosin, turpentine, and other wood chemicals (including tall oil)	66	38
28692	Other synthetic organic chemicals	155	103
29000	Refined petroleum products (including naptha solvents, petrolatum, waxes, etc.)	103	42
34010	Metal containers (except collapsible tubes)	64	40
	Other important materials not specifically requested on report form, but identified by respondents (total costs of $2 million or more):		
10---	Metal mining products, n.e.c.[2]	5	(12-25)
1111-	Anthracite, n.e.c.[2]	(2-5)	(NA)
14---	Mining and quarrying of nonmetallic minerals products, except fuels, n.e.c.[2]	(10-20)	(NA)
27---	Printing and publishing products, n.e.c.[2]	(5-10)	(NA)
28---	Chemicals and allied products, n.e.c.[2]	19	(65-75)
284--	Soap, detergents, and cleaning preparations, perfumes, cosmetics, and other toilet preparations, n.e.c.[2]	7	(under 2)
286--	Industrial organic chemicals, n.e.c.[2]	16	(10-15)
287--	Agricultural chemicals, n.e.c.[2]	2	(NA)
2899-	Products of petroleum and coal, n.e.c.[2]	29	43
28992	Fatty acids	24	(NA)
28995	Essential oils, fireworks and pyrotechnics, sizes, and chemical preparations, n.e.c	60	(NA)
32---	Stone, clay, glass, and concrete products, n.e.c.[2]	9	(4-10)
33---	Primary metal products, n.e.c.[2]	96	(2-5)
34---	Fabricated metal products, except machinery and transportation equipment, n.e.c.[2]	4	(2-5)
349--	Miscellaneous fabricated metal products, n.e.c.[2]	3	(NA)
90001	Metal scrap	(5-10)	(NA)
90007	Maintenance on machinery	6	9
90008	Operating supplies	2	3
99999	All other materials, parts, components, containers, and supplies not specified by kind[3]	612	101

See footnotes at end of table.

Table 1b. **Materials Consumed, by Kind, for Selected Industries: 1977 and 1972**—Con.

(Data shown parenthetically are ranges expressed in millions of dollars)

1977 code	Industry and material	Delivered cost (million dollars) 1977	1972
	INDUSTRY 3079, MISCELLANEOUS PLASTICS PRODUCTS		
	Census of Manufactures		
	Materials, parts, containers, and supplies[1]	10,992	4,329
	Specified by kind	6,554	2,315
	Not specified by kind (census code 97600)	2,190	779
	All other materials, parts, containers, and supplies (census code 970099)	2,248	1,235
	MA-131 Survey		
	All other materials, parts, containers, and supplies (same as census code 970099 above)	2,248	1,235
	Materials requested on report form:		
24991	Hard-pressed fiberboard (purchased hardboard)	25	14
28100	Industrial inorganic chemicals, except inorganic pigments	52	(NA)
28160	Inorganic pigments	52	30
28600	Industrial organic and synthetic organic chemicals, except synthetic dyes, pigments, lakes, and toners	309	14
28654	Synthetic dyes, pigments, lakes, and toners	17	42
30799	Custom compounded resins (purchased)	107	74
35593	Parts and attachments specially designed for plastics-working machinery	48	35
	Other important materials not specifically requested on report form, but identified by respondents (total costs of $2 million or more):		
14---	Nonmetallic minerals products, except fuels, n.e.c.[2]	3	(NA)
22---	Textile mill products, n.e.c.[2]	17	23
2269-	Finishers of textile products, n.e.c.[2]	3	(NA)
229--	Miscellaneous textile goods, n.e.c.[2]	6	(NA)
239--	Miscellaneous fabricated textile products, n.e.c.[2]	(5-10)	(under 2)
24---	Lumber and wood products, except furniture, n.e.c.[2]	2	12
242--	Sawmill and planing mills products, n.e.c.[2]	4	(NA)
24315	Other wood doors, including garage, screen, storm, and combination screen and storm, and louvre	(2-5)	(NA)
249--	Miscellaneous wood products, n.e.c.[2]	2	4
26---	Paper and allied products, n.e.c.[2]	7	254
26112	Other pulp, including papermill byproducts, except tall oil	(20-50)	(NA)
2621-	Paper mills products, except building paper, n.e.c.[2]	(5-10)	(NA)
264--	Converted paper and paperboard products, except containers and boxes, n.e.c.[2]	6	(NA)
2641-	Paper coating and glazing, n.e.c.[2]	11	(NA)
265--	Paperboard containers and boxes, n.e.c.[2]	12	129
28---	Chemicals and allied products, n.e.c.[2]	14	(219-222)
282--	Plastics materials and synthetic resins, synthetic rubber, synthetic and other man-made fibers, except glass, n.e.c.[2]	18	49
28213	Thermoplastic resins and plastics materials	43	(NA)
2822-	Synthetic rubber (vulcanizable elastomers), n.e.c.[2]	38	19
2851-	Paints; varnishes, lacquers, enamels, and allied products, n.e.c.[2]	9	5
289--	Miscellaneous chemical products, n.e.c.[2]	4	14
2891-	Adhesives and sealants, n.e.c.[2]	5	5
28914	Synthetic resin and rubber adhesives, including all types of bonding and laminating adhesives	19	(NA)
2899-	Chemicals and chemical preparations, n.e.c.[2]	6	3
28995	Essential oils, fireworks and pyrotechnics, sizes, and chemical preparations, n.e.c.	3	(NA)
29---	Refined petroleum products and related industries, n.e.c.[2]	4	1
3069-	Fabricated rubber products, n.e.c.[2]	18	18
3079-	Miscellaneous plastics products, n.e.c.[2]	76	101
32---	Stone, clay, glass, and concrete products, n.e.c.[2]	13	17
3229-	Pressed and blown glass and glassware, n.e.c.[2]	6	(NA)
329--	Nonmetallic mineral products, n.e.c.[2]	14	7
33---	Primary metal products, n.e.c.[2]	20	42
331--	Blast furnaces, steel works, and rolling and finishing mills products, n.e.c.[2]	19	18
3312-	Blast furnaces (including coke ovens), steel works, and rolling mills, n.e.c.[2]	14	(NA)
333--	Primary smelting and refining of nonferrous metal products, n.e.c.[2]	7	(NA)
335--	Rolling, drawing, and extruding of nonferrous metals, n.e.c.[2]	5	16
3351-	Rolling, drawing, and extruding of copper, n.e.c.[2]	16	9
3353-	Aluminum sheet, plate, and foil, n.e.c.[2]	7	7
3357-	Drawing and insulating of nonferrous wire, n.e.c.[2]	2	(NA)
336--	Nonferrous foundry castings, n.e.c.[2]	3	(NA)
34---	Fabricated metal products, except machinery and transportation equipment, n.e.c.[2]	33	52
342--	Cutlery, hand tools, and general hardware, n.e.c.[2]	8	2
3429-	Hardware, n.e.c.[2]	6	(NA)
345--	Screw machine products, and bolts, nuts, screws, rivets, and washers, n.e.c.[2]	3	4
34511	Automotive screw machine products	5	(NA)
346--	Iron and steel forgings, n.e.c.[2]	2	16
3469-	Metal stampings, n.e.c.[2]	17	16
349--	Miscellaneous fabricated metal products, n.e.c.[2]	14	9
3497-	Metal foil and leaf, n.e.c.[2]	22	9
3519-	Internal combustion engines, n.e.c.[2]	5	(NA)
354--	Machine tools, metal cutting types, n.e.c.[2]	4	(NA)
36---	Electrical and electronic machinery, equipment, and supplies, n.e.c.[2]	4	17
362--	Electrical industrial apparatus, n.e.c.[2]	4	(NA)

See footnotes at end of table.

3674-	Semiconductors and related devices, n.e.c.[2]	57	(NA)
36749	Other semiconductor devices	5	(NA)
3675-	Electronic capacitors, n.e.c.[2]	3	(NA)
3679-	Electronic components, n.e.c.[2]	723	(NA)
3714-	Motor vehicle parts and accessories, n.e.c.[2]	25	(NA)
3811-	Engineering, laboratory, scientific, and research instruments and associated equipment, n.e.c.[2]	(10-20)	(NA)
382--	Measuring and controlling instruments, n.e.c.[2]	6	64
3823-	Instruments for measuring and testing of electrical signals, n.e.c.[2]	12	(NA)
38252	Test equipment for testing electrical, radio, and communication circuits, and motors	11	(NA)
3832-	Optical instruments and lenses, n.e.c.[2]	3	3
38325	Optical instruments and lenses, except sighting, tracking, and fire control equipment	(20-50)	(NA)
90003	Office supplies	3	(NA)
90004	Plating supplies	(2-5)	(NA)
90006	Shipping supplies	4	(NA)
90007	Maintenance on machinery	5	(NA)
90008	Operating supplies	6	(5-10)
99999	All other materials, parts, components, containers, and supplies not specified by kind[3]	168	428
	INDUSTRY 3711, MOTOR VEHICLES AND PASSENGER CAR BODIES		
	Census of Manufactures		
	Materials, parts, containers, and supplies[1]	57,415	30,792
	Specified by kind	6,011	1,455
	Not specified by kind (census code 97600)	154	36
	All other materials, parts, containers, and supplies (census code 970099)	51,250	29,301
	MA-131 Survey		
	All other materials, parts, containers, and supplies (same as census code 970099 above)	51,250	29,301
	Materials requested on report form:		
22701	Automotive carpeting	240	159
23962	Automotive trimmings, textile (panels, headliners, etc.)	844	1,380

See footnotes at end of table.

Table 1b. **Materials Consumed, by Kind, for Selected Industries: 1977 and 1972**—Con.

(Data shown parenthetically are ranges expressed in millions of dollars)

1977 code	Industry and material	Delivered cost (million dollars) 1977	1972
	INDUSTRY 3711, MOTOR VEHICLES AND PASSENGER CAR BODIES--Con.		
	MA-131 Survey--Con.		
	All other materials, parts, containers, and supplies (same as census code 970099 above)--Con.		
	Material requested on report form--Con.		
23990	Seat covers, seat belts, and shoulder harnesses	1,463	(NA)
25311	Seats (purchased separately) for autos, trucks, or buses	162	(NA)
28910	Glues and adhesives	(100-200)	(20-50)
32920	Gaskets, packing and sealing devices	200	(NA)
34296	Motor vehicle metal hardware (lock units, door and window handles, hinges, license plate brackets, panel knobs, etc.)	1,613	(NA)
34650	Automotive stampings, including body parts, hub caps, fenders, etc	6,638	(NA)
34901	Mechanical wire springs (including seat and back springs)	331	(NA)
34930	Steel springs (including leaf, helical, and torsion bar)	527	463
35192	Diesel engines and parts specially designed for diesel engines	895	543
35850	Refrigeration compressors, compressor units, condensing units, fin coils, and other refrigeration, air conditioning and heat-transfer equipment	(over 1,000)	143
35900	Pistons, piston rings, carburetors, and intake and exhaust valves	(200-500)	358
36410	Automotive lamps	(50-100)	(50-100)
36470	Motor vehicle lighting fixtures, including headlights, tail lights, and dome fixtures (except automotive lamps)	449	266
36510	Automotive radios, loudspeakers, microphones, and tuners	(500-1,000)	385
36910	Storage batteries	212	179
36940	Engine electrical equipment (spark plugs, generators, starting motors, distributors, ignition coils, ignition harness and cable sets, switches, etc.)	1,613	(NA)
37115	Passenger car bodies, not produced in same establishment	(over 1,000)	(NA)
37140	Other motor vehicle parts and accessories (except those listed elsewhere), not produced in same establishment	5,319	(NA)
37141	Gasoline engines and parts specially designed for gasoline engines, not produced in same establishment	7,152	4,704
37142	Fuel, water, and oil pumps, radiators, exhaust systems, and radiators, not produced in same establishment	(over 1,000)	(NA)
37149	Metal motor vehicle parts (except parts listed elsewhere) including axels, brakes, rims, wheels, shock absorbers, etc., not produced in same establishment	9,150	(2,000-5,000)
38244	Motor vehicle meters and gauges (except electrical) including speedometers, fuel level, oil pressure, etc., not produced in same establishment	413	224
38731	Automotive clocks and clock movements	(20-50)	(NA)
	Other important materials not specifically requested on report form, but identified by respondents (total costs of $2 million or more):		
2851-	Paints and allied products, n.e.c.[2]	(100-200)	186
29---	Refined petroleum and related products, n.e.c.[2]	(2-5)	(10-20)
30111	Passenger car pneumatic tires (casings)	108	(NA)
3079-	Miscellaneous plastics products, n.e.c.[2]	(2-5)	(200-500)
32---	Stone, clay, glass, and concrete products, n.e.c.[2]	268	(839-842)
332--	Iron and steel foundry products, n.e.c.[2]	(2-5)	(NA)
3361-	Aluminum foundry products (castings), n.e.c.[2]	(10-20)	(NA)
34446	Other sheet metal work	(2-5)	(NA)
34511	Automotive screw machine products	(10-20)	(NA)

	MA-131 Survey		
	All other materials, parts, containers, and supplies (same as census code 970099 above)	7,551	3,795
	Materials requested on report form:		
22701	Automotive carpeting	(under 2)	(NA)
23962	Automotive trimmings, textile (panels, headliners, etc.)	(under 2)	2
23990	Seat covers, seat belts, and shoulder harnesses	(under 2)	(NA)
25311	Seats (purchased separately) for autos, trucks, or buses	-	(NA)
28910	Glues and adhesives	27	(NA)
32930	Gaskets, packing and sealing devices	23	21
34296	Motor vehicle metal hardware (lock units, door and window handles, hinges, license plate brackets, panel knobs, etc.)	(5-10)	(NA)
34650	Automotive stampings, including body parts, hub caps, fenders, etc	79	(NA)
34901	Mechanical wire springs (including seat and back springs)	9	31
34930	Steel springs (including leaf, helical, and torsion bar)	13	10
35192	Diesel engines and parts specially designed for diesel engines	(20-50)	3
35850	Refrigeration compressors, compressor units, condensing units, fin coils, and other refrigeration, air conditioning and heat-transfer equipment	(5-10)	(NA)
35900	Pistons, piston rings, carburetors, and intake and exhaust valves	316	214
36410	Automotive lamps	(10-20)	(NA)
36470	Motor vehicle lighting fixtures, including headlights, tail lights, and dome fixtures (except automotive lamps)	(5-10)	1
36510	Automotive radios, loudspeakers, microphones, and tuners	(under 2)	(NA)
36910	Storage batteries	(under 2)	(NA)
36940	Engine electrical equipment (spark plugs, generators, starting motors, distributors, ignition coils, ignition harness and cable sets, switches, etc.)	254	(NA)
37115	Passenger car bodies, not produced in same establishment	-	(NA)
37140	Other motor vehicle parts and accessories (except those listed elsewhere) not produced in same establishment	455	(NA)
37141	Gasoline engines and parts specially designed for gasoline engines, not produced in same establishment	1,996	493
37142	Fuel, water, and oil pumps, radiators, exhaust systems, and radiators, not produced in same establishment	114	(NA)
37149	Metal motor vehicle parts (except parts listed elsewhere) including axels, brakes, rims, wheels, shock absorbers, etc., not produced in same establishment	867	128
38244	Motor vehicle meters and gauges (except electrical) including speedometers, fuel level, oil pressure, etc., not produced in same establishment	(20-50)	(10-20)
38731	Automotive clocks and clock movements	(2-5)	(NA)
	Other important materials not specifically requested on report form, but identified by respondents (total costs of $2 million or more):		
14---	Mining and quarrying of nonmetallic minerals, except fuels, n.e.c.[2]	(2-5)	(NA)
22---	Textile mill products, n.e.c.[2]	(2-5)	12
249--	Miscellaneous wood products, n.e.c.[2]	(5-10)	(NA)
26---	Paper and allied products, n.e.c.[2]	11	40
2621-	Paper mills, except building paper mills products, n.e.c.[2]	16	12
264--	Converted paper and paperboard products, except containers and boxes, n.e.c.[2]	6	(NA)

See footnotes at end of table.

Table 1b. **Materials Consumed, by Kind, for Selected Industries: 1977 and 1972**—Con.

(Data shown parenthetically are ranges expressed in millions of dollars)

- Represents materials data requested on the MA-131 survey but no data reported. (NA) Not available. N.E.C. Not elsewhere classified.
(Z) Represents materials data requested on the MA-131 survey but less than $500,000 reported.

[1]As published in table 7 of the 1977 Census of Manufactures industry series.

[2]Represents data that have been reported at a finer level of detail in the MA-131 survey but which have been aggregated to avoid disclosing operations of individual companies. This aggregated total excludes any data published at a finer level of detail in either the census or the MA-131 survey.

[3]Includes data for those material codes that were specified by kind but totaled less than $2 million. Also includes data for a small number of establishments whose reports were not received at the time the MA-131 data were tabulated.

[4]Detailed materials data (item 17B) not requested on census form.

Supplies Consumed in Mineral Industries by Kind

GENERAL

The tables in this chapter present information on consumption of supplies by mineral establishments in 1977 and 1972. The data are based on information obtained in a sample survey, MA-131, Consumption of Materials, Parts, Containers, and Supplies During 1977, and serve to supplement the data previously published in table 7 of the 1977 Census of Mineral Industries. The data are obtained, primarily, to facilitate the work of the Bureau of Economic Analysis, Department of Commerce, on national accounts and input-output studies. They also provide answers, in part, to increased demands for more detailed information on consumption of supplies in the mining sector of the economy.

SUMMARY DATA

As shown in the summary table 2a, the 6 mineral industries selected for this survey accounted for $17.3 billion of supplies consumed or 37.5 percent of the total of $46.1 billion of supplies consumed by all mineral establishments in 1977. Of this $17.3 billion, the category "all other supplies used" (code 970099), amounted to $5.1 billion. It is this latter figure which is distributed in table 2b by type of supply on the basis of the data reported in the supplemental survey on form MA-131. As table 1 also indicates, the proportion of this cost of "all other supplies" to "total cost of supplies specified by kind" was reduced from approximately 65 to 27 percent as a result of the data obtained in this supplemental survey.

SAMPLE DESIGN

The 1977 MA-131 survey is a sample which includes only those establishments that accounted for 85 to 95 percent of the value of each industry's "all other supplies used," (census code 970099) of Item 17B. The response rate on this voluntary survey was approximately 60 percent.

COMPARABILITY OF DATA

Comparability of the 1972 and 1977 data presented in this report is approximate due to a difference in sample designs. The 1972 MA-131 survey was a probability survey and was collected from a smaller sample of establishments and tabulated on a "weighted sample basis." This sample resulted in the certainty selection of all plants reporting more than $1,300 thousand in unspecified supply costs. Other establishments were sampled with probabilities of 1.000 to .005 in accordance with the mathematical theory for optimum allocation of the sample. The sampling procedure for 1977, along with the expansion in census item 17B data, insured a marked increase in the accuracy of the specific supplies consumed data, since both the census item 17B data and the MA-131 data are tabulated on an "unweighted" basis.

The following industries are those for which data were obtained in the 1977 Census of Mineral Industries Supplemental Inquiry: MA-131, Consumption of Materials, Parts, Containers, and Supplies During 1977, and are shown in table 2b of this chapter:

1011	Iron ores
1021	Copper ores
1211	Bituminous coal
1311	Crude petroleum and natural gas
1381	Drilling oil and gas wells
1389	Oil and gas field services, n.e.c.

Table 2a. **Cost of Supplies, Minerals Received for Preparation, and Purchased Machinery Installed by Mineral Industries, by Selected Industry: 1977 and 1972**

Estimating Direct Export-Related Employment	8
Indirect Requirements for Manufactured Exports	8

SUMMARY OF SURVEY RESULTS

General

There were 3.3 million jobs in the U.S. in 1977 related to the exports of manufactured goods. This accounts for 3.6 percent of the total civilian employment (4.4 percent of the private sector employment). Of the 3.3 million jobs, 2 million are included in manufacturing plants and 1.3 million in nonmanufacturing activities.

Within the manufacturing sector, exports accounted for 10 percent of total manufacturing employment. This included 1.1 million jobs producing products in manufacturing plants for direct export and 900 thousand jobs in manufacturing plants and administrative offices furnishing material inputs and administrative services to the exporting plants. The 1.3 million employees in nonmanufacturing industries that supply materials and services supporting manufactured exports included, employment in trade, business, transportation, communication and utilities, agriculture, mining, and other industries. Trade industries (wholesale and retail) accounted for half of a million jobs supporting the export of manufactured products, and business services accounted for one quarter of a million jobs. (See chart 1 for the number of export-related jobs by sector to the total U.S. employment related to manufactured exports.) The data shown do not include the jobs involved in the export of nonmanufactured goods, such as farm products or minerals, or of various services sold to foreigners, such as transportation, hotels, insurance, motion pictures, or financial services.

The 3.3 million jobs were generated by $85.8 billion of manufactured products exported in 1977, or 6.3 percent of manufacturers' total shipments. The value of exports ($85.8 billion) is the f.o.b. plant value. These data were derived from the official 1977 Foreign Trade figures which showed the port value of manufactured exports was $94.8 billion. The port values were adjusted to remove estimates of freight and other transportation costs, excise taxes, and insurance (see appendix K).

State Estimates

Of the 3.3 million jobs related to the exports of manufactured products, 329 thousand were in California, which had the largest number of export-related jobs. New York was second with 234 thousand jobs. Ohio, Illinois, and Pennsylvania were next in rank with 231 thousand, 221 thousand, and 221 thousand, respectively.

Although California had the largest number of jobs related to manufactured exports in 1977, export-related jobs accounted for only 3.6 percent of the State's civilian employment. Michigan and Connecticut led in the rate of such employment with 5.3 percent of its civilian employment, each involved directly or indirectly in manufactured exports in 1977. Other States with high export employment rates were Ohio, 5.2 percent; Indiana, 5.0 percent; Pennsylvania, 4.7 percent; and Illinois, 4.5 percent. (Maps showing the importance of each State's total export-related employment, manufacturing and nonmanufacturing, (chart 2) and total export-related manufacturing employment (chart 3) are shown on the following pages.)

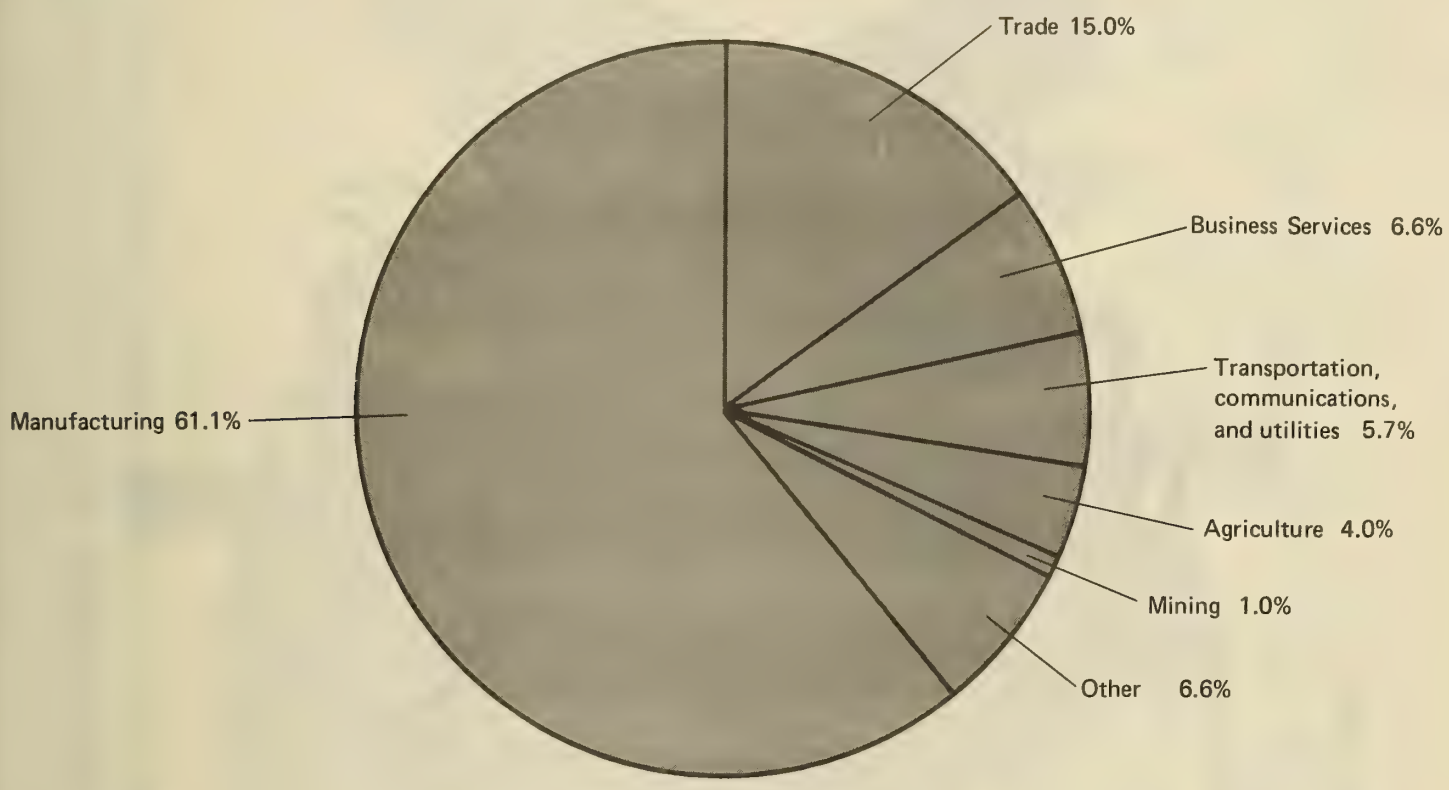
The proportion of private sector jobs (civilian employment less all government jobs) involved in the export of manufactured goods is shown in table 2. In Connecticut, Michigan, and Ohio, more than 6 percent of private-sector employment was related to manufactured exports. In Indiana, Illinois, Massachusetts, Pennsylvania, and South Carolina, the proportion was 5 percent or higher.

Major Industry Group Estimates

Of the 20 major industry groups classified in manufacturing, Major Group 35, Machinery, Except Electrical, had the largest number of export-related jobs with 384 thousand. Major Group 37, Transportation Equipment, ranked second with 248 thousand, followed closely by Major Group 36, Electric, Electronic Equipment, with 244 thousand.

The major industry group with the largest percentage of its employment associated with manufactured exports was, again, Major Group 35, Machinery, Except Electrical, with 18.4 percent. Others with large rates of export-related employment to total manufacturing employment were Major Group 12, Tobacco Products, with 17.8 percent; Major Group 38, Instruments and Related Products, with 17.6 percent; and Major Group 33, Primary Metal Industries with 15.4 percent.

The industry group most affected by the indirect estimates being included was Major Group 33, Primary Metal Industries. Employment directly related to exports accounted for 28 thousand employees. However, the employment supporting manufactured exports was five times higher (145 thousand) resulting in a total of 173 thousand export-related employees for the group.



Relative Importance of Export Trade

The direct export data shown in this report represent actual exports as reported or estimated by manufacturers. However, these estimates tend to underestimate the importance of export

CHART 1.

Employment Related to Manufactured Exports by Major Economic Sector: 1977

A. Contribution of each sector

B. Number of export-related jobs by sector

Sector	Number (1,000)	Sector	Number (1,000)
Manufacturing	1,990	Agriculture	129
Trade	489	Mining	34
Business services	215	Other	216
Transportation, communications, and utilities	185	Total	3,258

CHART 2.

Employment Related to Manufactured Exports for States: 1977

(Shading indicates export-related employment as a percentage of civilian employment. Numbers are export-related employment in thousands)

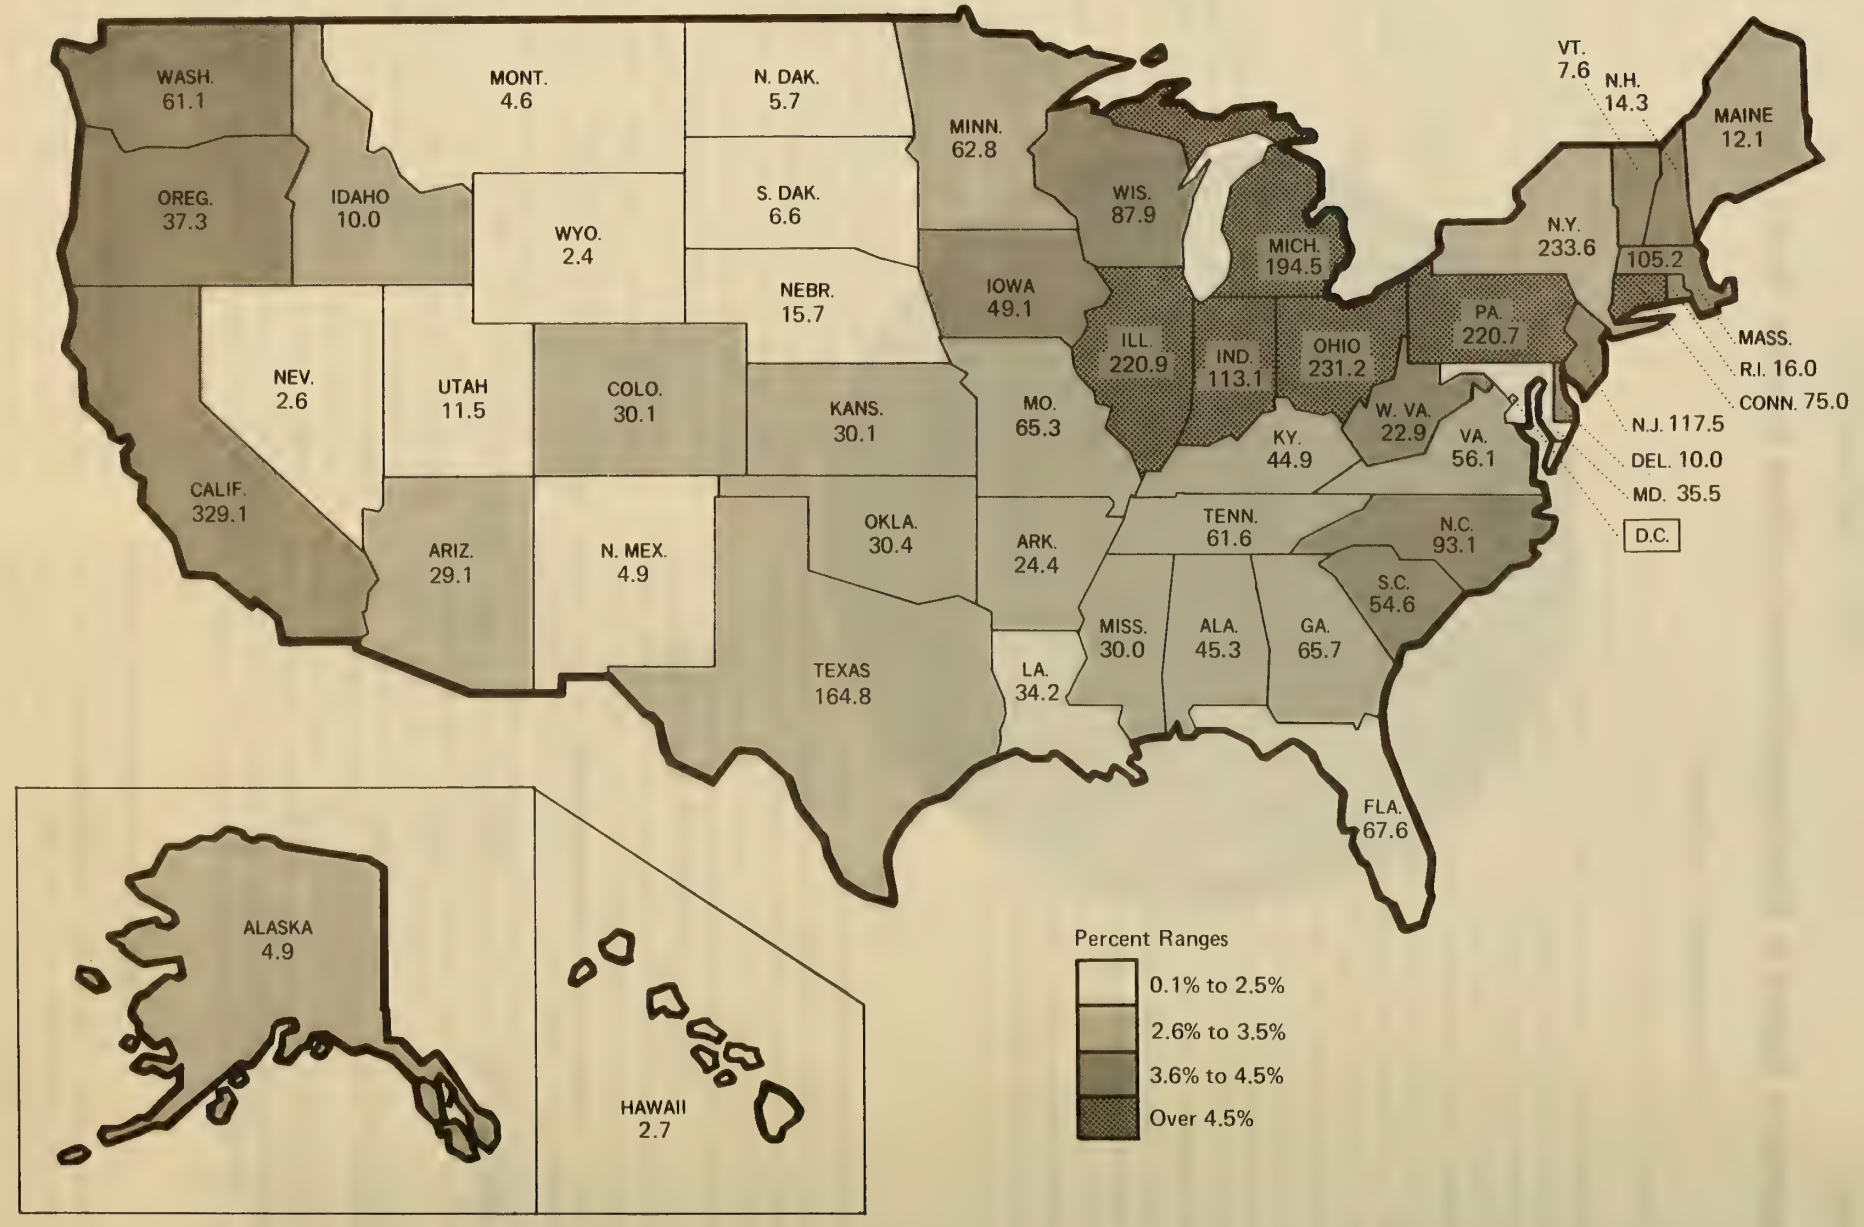


CHART 3.

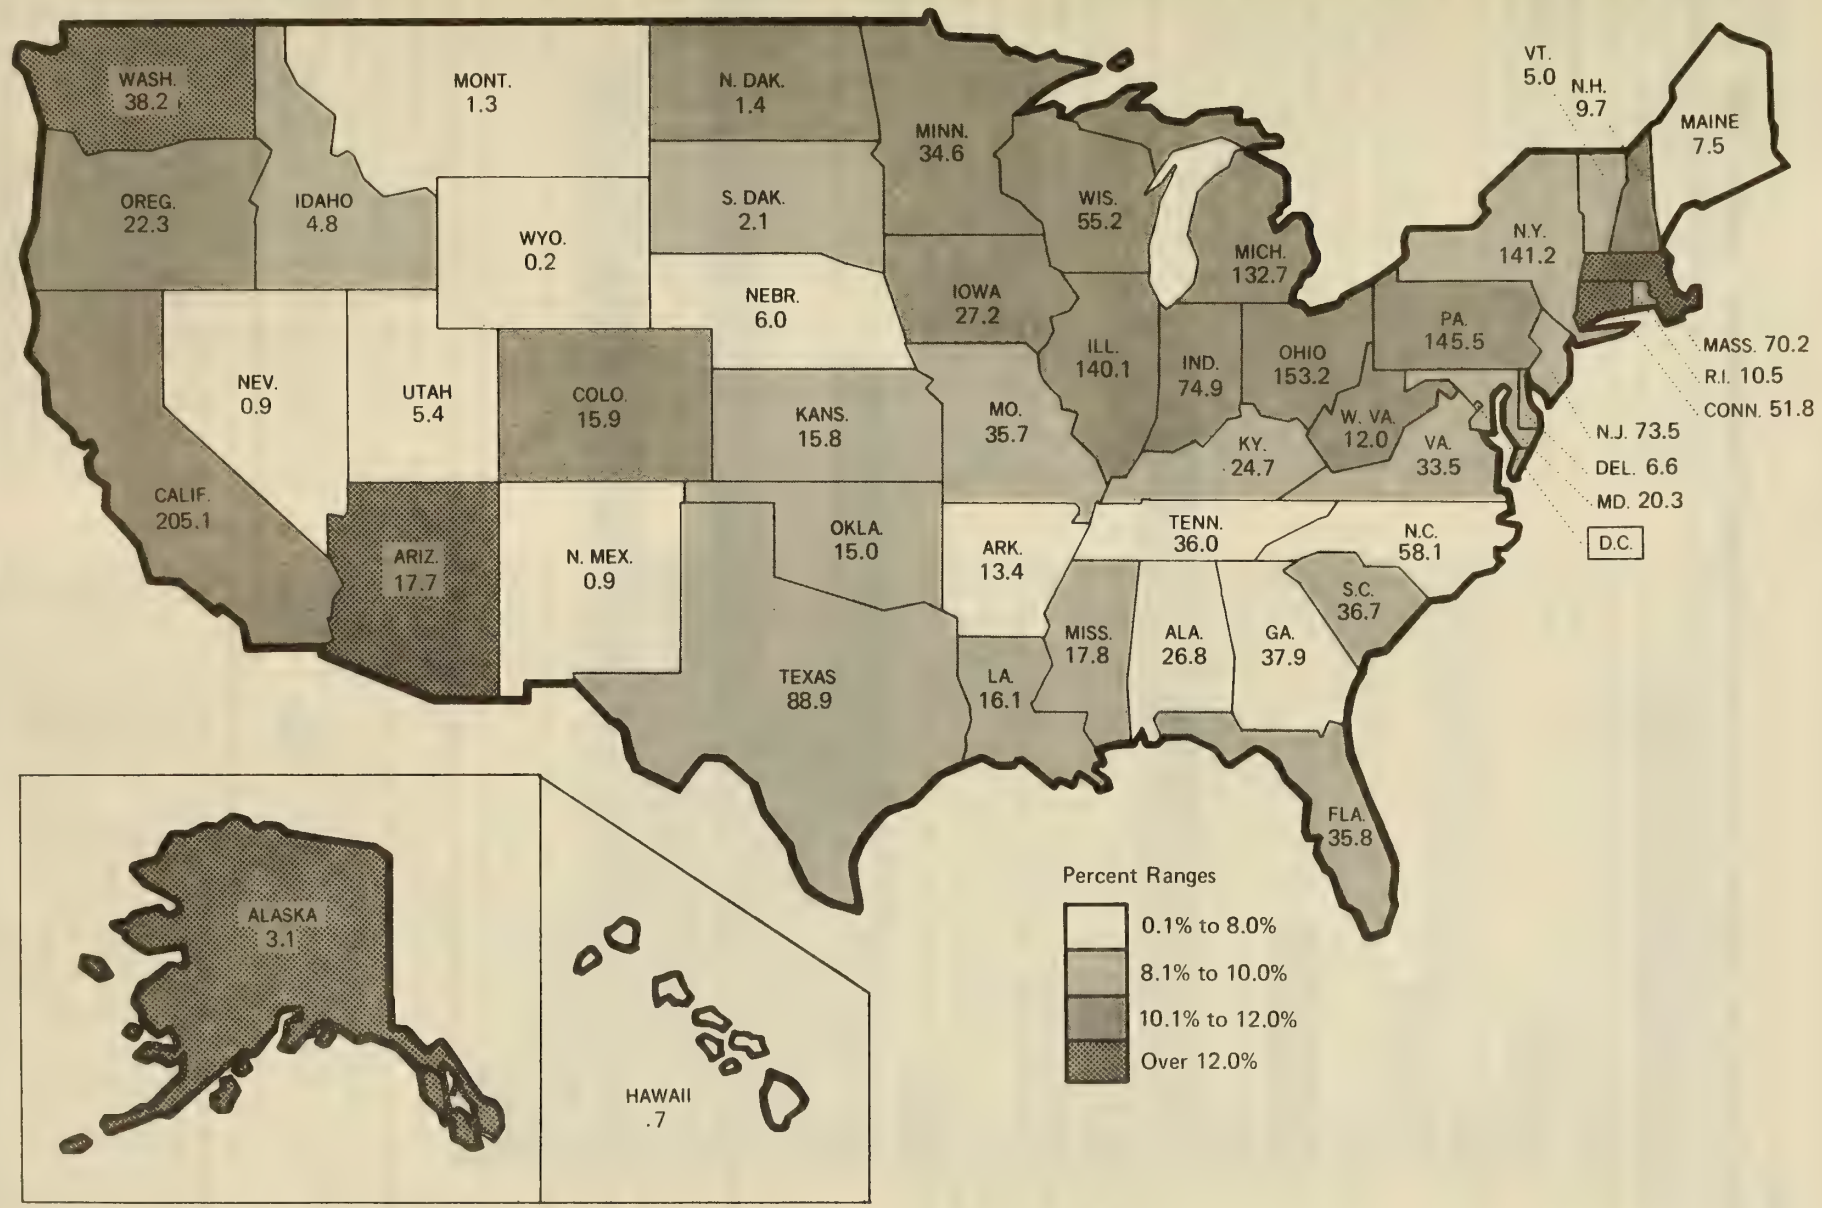
Manufacturing Employment Related to Manufactured Exports for States: 1977

(Shading indicates export-related employment as a percentage of manufacturing employment. Numbers are export-related employment in thousands)



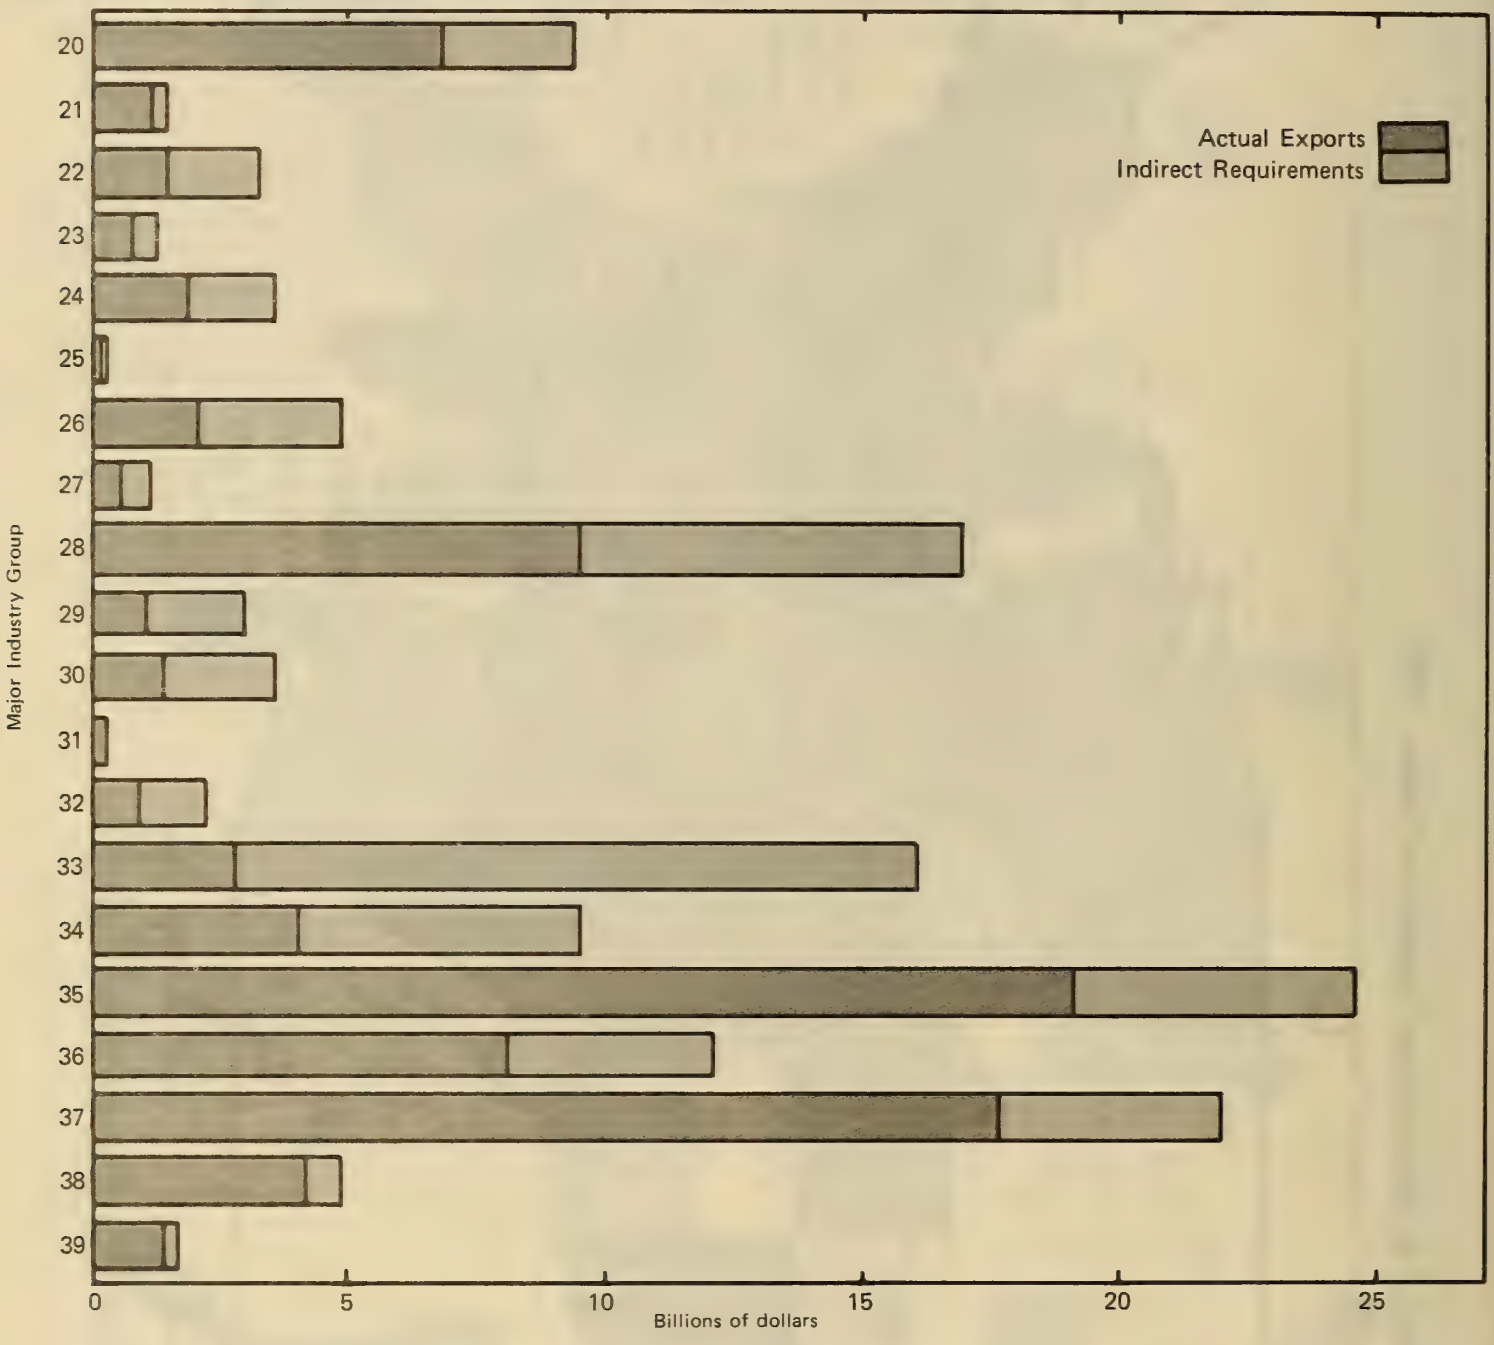


CHART 4.

Direct Exports and Indirect Requirements to Support Manufactured Exports: 1977

Major industry group	Direct exports	Indirect requirements	Total export related requirements
	Billions of dollars		
20 Food and kindred products	6.9	2.6	9.4
21 Tobacco products	1.2	0.3	1.5
22 Textile mill products	1.5	1.8	3.3
23 Apparel, other textile products	0.8	0.5	1.3
24 Lumber and wood products	1.9	1.7	3.6
25 Furniture and fixtures	0.2	0.1	0.3
26 Paper and allied products	2.1	2.8	4.9
27 Printing and publishing	0.6	0.5	1.2
28 Chemicals and allied products	9.5	7.5	17.0
29 Petroleum and coal products	1.1	1.9	3.0
30 Rubber, misc. plastic products	1.4	2.2	3.6
31 Leather and leather products	0.3	(Z)	0.3
32 Stone, clay, glass products	1.0	1.3	2.3
33 Primary metal industries	2.8	13.3	16.1
34 Fabricated metal products	4.1	5.4	9.5
35 Machinery, except electrical	19.1	5.5	24.6
36 Electric, electronic equipment	8.1	4.0	12.1
37 Transportation equipment	17.7	4.3	22.0
38 Instruments, related products	4.2	0.7	4.9
39 Misc. manufacturing industries	1.4	0.2	1.7

trade for the domestic economy when compared to the total value of shipments of all manufacturers. The direct export figures exclude the output of the supplying establishments that furnish parts or materials to the manufacturer producing the exported product. For example, while the automobile manufacturers reported their exports of cars, the establishments supplying the auto industry with steel, windshields, transmissions, etc., would not report these products as exports. Therefore, for these supplying industries, exports were more important in the domestic economy than indicated by the direct export data.

In order to put the importance of exports into proper perspective relative to their impact on all manufacturing industries, the value of the exports as reported by the industry performing the final stages of fabrication of the product was analyzed using the input/output information compiled by the Bureau of Economic Analysis (BEA). (In addition to making the computer runs, BEA also provided valuable technical assistance at various stages of the project. A comprehensive explanation of the BEA input-output model appears in the Input-Output Structure of the U.S. Economy, 1972 by Philip M. Ritz, Survey of Current Business, February 1979.)

The input-output analysis showed that the value of direct exports ($85.8 billion) required an additional $56.6 billion of supporting shipments from other manufacturing establishments. (A breakdown of the total $142.4 billion by major industry group is shown in chart 4.) As already noted, the impact on employment levels indicates an increase from the 1.1 million jobs estimated to be directly export-related, to a total of 2.0 million jobs directly and indirectly related to exports in manufacturing industries.

In addition to including employment in manufacturing establishments that supply materials and parts for the production of manufactured exports, the indirect estimates in this report include employees in nonmanufacturing; such as farms and mines that provide materials inputs to manufacturing, plus various types of services required of nonmanufacturing industries in producing the manufactured goods to be exported; such as electricity, repair services, business services, transportation, utilities, etc.

Also taken into account, as a result of the input-output analysis, are employees associated with inputs to the businesses supplying these goods and services to the final manufacturers of the exported goods, and so on. Thus, the indirect estimates include the employment associated with steel and electricity entering the production of an automobile for export, the coal used by the steel mill and electric utility, the transportation of the coal, the fuel and repair services used in transportation, the electricity required by the repair shops, etc. The data also include estimates of employment associated with transporting the manufactured goods from "plant to port" and the employment of exporting establishments that purchase and resell the goods to foreigners or arrange their sale abroad. It should be emphasized again that the employment estimates relate only to the export of manufactured goods and exclude employment related to the export of other goods and services. They do not, therefore, measure the full employment effect of all U.S. exports.

The indirect employment requirements could only be developed by an analytical approach, which is not typical of other census reports. Although a number of economic assumptions believed to be reasonable were used, the estimates are not considered to be as precise as customary census statistics. The various assumptions and further comments on the quality of the estimates are included in the detailed discussion that follows.

DETAILED DESCRIPTION OF SURVEY METHODS AND ESTIMATING PROCEDURES

The sections that follow describe the survey and other sources by which the estimates of the employment effect of manufactured exports on the whole economy and by State were derived. A description of the survey appears in appendix B. The methods used to derive the direct export data appear in the section Description of Survey. This is followed by a discussion of the input-output (I-O) calculations which provided dollar value estimates of the purchased goods and services required by each I-O industry to support the production of the manufactured goods exported. Next, the method by which these values, generally referred to as the indirect requirements, were converted to jobs is described. Then, the method of allocating jobs to States is discussed. These various steps are explained by showing samples of the actual calculations taken from worksheets. The text concludes with a discussion of the problems and shortcomings of the estimates.

Description of Survey

Directly Reported Exports—Manufacturers reporting on the more detailed ASM form in the census of manufactures were requested to report the value of products shipped for export, include direct exports and products shipped to exporters or others for export, and exclude products shipped for further manufacture, assembly, or fabrication in the United States. Such directly reported exports understate the true value of all exports because many respondents do not know the final destination of the products produced in their plants. This included cases where the export was actually made by an independent exporting firm, or where the actual shipments of the products are made from company-operated warehouses or other distribution points which did not allocate the export sales back to individual establishments. In addition, establishments exporting less than $25 thousand of exports were not asked to report their actual export sales.

Estimated Value of Exports—In order to provide a more complete measure of the overall importance of exports industrially and geographically, the directly reported values have been inflated to include estimates for the underreporting of exports, including exports of manufactured products by wholesalers, exporters, etc. Estimates for exports valued at the port of exportation were derived from official export data compiled by the Foreign Trade Division of the Bureau of the Census based on shippers' export declarations. These data are repre-

sented in column A of appendix K. The adjustments in column B are made to compensate for differences between the classification of products in the foreign trade statistics and the domestic Standard Industrial Classification system. Column C of appendix K shows the adjusted totals. These adjusted port values were reduced to f.o.b. plant values through the use of adjustment factors applied at the 3-digit SIC level. The implicit factor by 2-digit group is shown in column D. These adjustments account for such items as freight and transportation costs and trade margin, and were developed by the Bureau of Economic Analysis (BEA), Department of Commerce. The resulting estimated totals appear in column E. The total value of 85.8 billion includes the directly reported total (67.4 billion) of column F, as well as estimates of exports not reported in this survey.

The differences between these national estimates of export shipments and reported export shipments of manufacturing establishments (column F) were then allocated to geographic areas (see Allocation of Unreported Value of Exports), and added to the reported data to develop estimates of total f.o.b. value of exports of manufacturing establishments by State.

It should be noted that the official export data as compiled from the shippers' export declarations represent exports of commodities that have been regrouped into 2- and 3-digit SIC categories. The origin of export data were compiled on an industry basis. Each respondent in the survey reported a single value of exports for each plant. This export value was classified according to the primary manufacturing activity of the plant, although some products classified in other industries were probably also exported. While this may have affected the SIC classification of the exports for a specific area, it would probably not have an appreciable impact on any of the area totals. However, classification differences could result in apparent inconsistencies where the reported exports exceed the official export value.

Allocation of Unreported Values of Exports—Differences between the directly reported exports and the national export estimates f.o.b. plant have been allocated at 3-digit SIC levels to States. The estimating procedure assumes that export shipments not reported by manufacturing establishments are directly related to the geographic distribution of the total employment of the industry and the export shipments reported for specific States. For a more detailed description of this estimating technique, see Appendix J, Technical Notes. There are no measures available regarding the possible range of error associated with this estimating technique. To the extent that directly reported exports are a large proportion of the total exports, the geographic distribution of the total will be good. However, where the directly reported exports are a relatively small portion of total exports, then the geographic distribution may be subject to considerable error if the basic assumptions are not valid for a specific industry.

Estimating Direct Export-Related Employment

Employment related to direct exports was not reported in the ASM. However, the total value of shipments, as well as total employment, is reported for each establishment. Employment related to direct exports was then calculated for each establishment by multiplying the total employment by the ratio of export shipments to total shipments. These calculated export employment figures were then aggregated by industry and area to produce the directly reported export employment estimates that appear in the report. Since this estimate has the same weaknesses in underreporting as the export-shipment data, it was necessary to estimate total export employment by a procedure similar to the one employed in deriving export shipments. (See Appendix J, Technical Notes.)

Indirect Requirements for Manufactured Exports

The previous section and the related appendix K, describe how estimates of the f.o.b. plant value of exported manufactured goods were made, were converted to number of employees, and both the value and employment were allocated by State. This section describes how the indirect inputs to these exports were estimated and allocated by State. Also included is a description of how estimates of employment in the United States required to move the manufactured products from factory to port and of export wholesalers were made.

The Meaning of Indirect Requirements—Indirect requirements refer to all of the inputs acquired by the manufacturing establishments to produce the product being exported and the requirements of these suppliers, and so on. As an example, the export value of engines and turbines in 1977 amounted to $2.0 billion as goods left the manufacturing plant. To produce the $2.0 billion of engines and turbines, it was necessary for these plants to purchase steel and additional metals from other plants, various other materials, containers for shipping, electric energy from utility firms, oil and lubricants for maintenance, a variety of business and professional services, and so forth.

Producers of the various inputs and services, which are sold to engine and turbine producers, must also purchase inputs and various services from farms, mines, factories, utilities, transportation, and so forth. These secondary suppliers must, in turn, purchase inputs from their suppliers; and so on.

This lengthy chain of transactions, leading to production of engines and turbines, are referred to in aggregate as the indirect requirements. Estimates of these indirect requirements for engines and turbines (or for other final products) may be made by application of BEA's input-ouput model to the procduts for which a solution is sought.

Estimating Indirect Requirements for Manufactured Exports—The 1972 input-output matrix (I-O) was used to estimate the indirect requirements for the products of U.S. manufacturing establishments which were exported. The first step in this procedure was to reorganize the value of exports at the factory to the industrial coding structure of the I-O. The 85 industry level (51 manufacturing industries) of the I-O was used for this purpose. This was essentially an aggregation process of adding up the 3-digit SIC industry data on exports to the 51 I-O manufacturing industries, although in a few minor cases some 4-digit estimates of exports were required to arrive at the 51 I-O industries.

Exhibit A. Domestic Indirect Requirements for U.S. Manufactured Exports: 1977

(Values in millions)

Industry number and title	Related Census-SIC codes (1972 edition)	Domestic indirect requirements
Agriculture, forestry, and fishing		
1. Livestock and livestock products	pt. 01, pt. 02	2,375.0
2. Other agricultural products	pt. 01, pt. 02	2,050.0
3. Forestry and fishery products	081-4, 091, 097	306.8
4. Agricultural, forestry, and fishery services	0254, 07 (excl. 074), 085, 092	212.2
Mining		
5. Iron and ferroalloy ores mining	101, 106	334.3
6. Nonferrous metal ores mining	102-5, pt. 108, 109	474.3
7. Coal mining	1111, pt. 1112, 1211, pt. 1212	646.9
8. Crude petroleum and natural gas	131, 132, pt. 138	1,282.4

85. Inventory valuation adjustment	(NA)	(NA)

Source: Supplied by BEA computer calculations using input-output model.

(NA) Not available.

These 51 values, referred to in I-O terminology as a bill of goods, were run by BEA against the inverse I-O matrix to derive the aggregate indirect requirements. A dual run was necessary to remove competitive imports in arriving at domestic indirect requirements. To explain, suppose that engine and turbines manufacturers purchased $200 million of steel as inputs, and that when the inputs of steel for all manufacturing industries were accumulated there was a requirement for $10 billion worth of steel products. Some of this was imported so it was necessary to remove imports of steel and the iron ore, coal, and other materials required to make the steel, the indirect requirements for mining the iron ore, the transportation to move the ore to the steel mill, and so on. The resulting estimates are the domestic indirect requirements after imports are removed.

The BEA I-O work related to 1972 and the bill of goods was in 1977 values. Before entering the computer process, BEA staff deflated the bill of goods to 1972 prices and the computer output of indirect requirements was then reflated back to 1977 prices. Similarly, the I-O import proportions of total supply for each I-O manufacturing industry related to 1972, and it was necessary to update these import proportions to 1977. The latter step was based upon 1977 Census of Manufactures data and the 1977 census import figures.

The indirect requirements for the 85 I-O industries provided to Census by BEA appear as Exhibit A, which also includes a reconciliation of I-O and SIC codes. It should be noted that indirect requirements include the demands of an industry upon itself. Thus, the producer of a turbine may purchase components from another plant in the engine and turbine industry, or a cold rolling steel plant may purchase hot rolled sheet from another plant in primary iron and steel manufacturing.

Allocating Indirect Requirements on Manufacturing Industries by State—To describe this estimation process we are reproducing as Exhibit B, a part of the actual worksheet for I-O Industry 35, Glass and Glass Products. To simplify, only two States are shown, but the same process was applied to the other States. In lines A, B, and C, a ratio of about 7 percent is obtained for the industry, that is, after subtracting direct exports for the entire industry, about 7 percent of the supply is required to support of further exports.

On line D, the total shipments from each State in 1977 are aggregated to the I-O industry shown. On the next line, the direct exports from each State are given and line F shows the available supply for domestic uses produced in each State. The industry ratio of indirect requirements to total supply is applied to each State on line 1. This assumes that each State contributes an equal proportion of its domestic supply to the product of finished manufactured goods to be exported. For I-O Industry 35, 7 percent of the domestic supply of each State is allocated to export.

In the remaining lines of the exhibit, the values of goods are converted to employment. For each State, the value of shipments per employee is obtained from 1977 Census of Manufactures data, line H. This value is then divided into the indirect requirements to arrive at the number of employees involved in production of goods for export, line J. The total indirect employment in manufacturing for each State is obtained by summing the employment in each I-O manufacturing industry.

In each of these steps, the basic source data from the census and the import data were in more detailed coding structures and had to be reorganized to the 51 I-O manufacturing industries to compile these estimates.

Exhibit B. **Estimating Indirect Requirements by State, BEA Industry 35, Glass and Glass Products**

(Money figures in million dollars, except where noted)

Industry ratios	Estimates	
A. Indirect requirements (See exhibit A).	626.2	
B. Total value of shipments (1977 census) less direct exports	8,751.1	
C. Ratio A - B	.0716	
State calculations	**New York**	**New Jersey**
D. Value of shipments	479.0	798.7
E. Direct exports	23.3	26.2
F. Domestic supply (D - E)	455.7	772.5
G. Employment (thousands)	8.5	16.4
H. Shipments per employee (D ÷ G) (thousands)	56.4	48.7
I. Indirect exports (F x C)	32.5	55.4
J. Indirect employment (I ÷ H) (number)	576	1,137

Additional sources: Lines D, E, and G were obtained by accumulation of 3-digit data from the 1976 ASM.

Estimating Export-Related Employment for Central Administrative Offices and Auxiliaries—Large firms in manufacturing often have central administrative offices, warehouses, garages, repair shops, research centers, etc. which support or provide services to the manufacturing plants. These establishments, usually referred to as CAO's, also contribute indirectly to the production of merchandise for export. A special tabulation of the employment of CAO's by manufacturing industry by State was prepared and estimates made of the proportion of employment attributable to exports. The procedure provided an estimate of 116,900 employees as export-related.

The export-related employment estimates for CAO's were based on the ratio of the total export-related manufacturing employment at the 2-digit national level to the total manufacturing employment at the 2-digit national level (see table 4, column J). The numerator of this ratio includes the estimates for both direct and indirect export-related manufacturing employment. Each of the ratios was applied to the CAO employment, at the corresponding 2-digit level within a State and the resulting figures summed to a total for the State.

For example, assume that State X includes only two different industry groups as shown below:

CAO ratios	Industry group 25	Industry group 39
1. Total CAO employment	3,000	10,000
2. Two-digit national ratio from table 4, column J	.020	.075
3. Export-related CAO employment (1 x 2)	60	750

Thus, the total export-related employment for CAO's for State X is the sum of the two figures in line 3 above, or 810.

Indirect Requirements on Nonmanufacturing Industries—In exhibit A, the estimates of requirements on nonmanufacturing industries as inputs to manufactured goods for export obtained from the I-O computer operation are shown. These include materials inputs from farms and mines and a wide variety of services. It should be pointed out that in the BEA I-O model, estimates are made at producers' prices and the contribution of wholesale and retail trade are treated as margins paid for by the purchasers. Hence, the $5,011.8 million shown for trade is the difference between the producers' price and the purchasers' price for goods passing through trade for use by manufacturers. This is often referred to as the trade margin.

The next operation was to convert these values to estimates of employment. The first step was to estimate the compensation of employees. This was accomplished by using data on compensation as a proportion of requirements which appeared in the 1972 I-O matrix, table 3, line EC, beginning on page 57 of the February 1979 Survey of Current Business. Exhibit C is an illustration of the actual calculations for I-O Industry 65, Transportation and Warehousing.

The next source of data to be used was from the annual national income accounts. The 30 I-O industries had to be regrouped slightly to 25 nonmanufacturing industries to match the industry disaggregation of the national income accounts. Then, data on compensation and employment in the accounts were used to convert export-related compensation to employment, as shown for I-O Industry 65, Transportation, in exhibit C. The data in the exhibit come directly from worksheets. The specific data sources used are given in the exhibit.

There are further steps in the exhibit by which number of employees (line G) is converted to all persons engaged (line K) using data from the national income accounts. In some industries, especially agriculture, working proprietors and partners are a significant share of the labor force, and it was considered necessary that they also be included in these estimates. In the transportation industry, the increase to take account of working proprietors and partners was 9 percent (see line J).

Exhibit C. **Estimating Employment for Indirect Nonmanufacturing Requirements**

Nonmanufacturing ratios	Transportation
A. Domestic indirect requirements (See exhibit A)....	4,095.0
B. Compensation ratio (I-O table, Feb. 1979, Survey of Current Business).....	.40647
C. Compensation related to exports (A x B).....	1,664.5
D. Compensation, 1977 (table 6.5).....	50,674
E. Employment, 1977 (table 6.7).....	2,763
F. Compensation per employee (D ÷ E).....	18,340
G. Employment related to exports (C ÷ F).....	90,758
H. Hours worked by employees (table 6.10).....	5,266
I. Hours worked by persons engaged (table 6.11).....	5,716
J. Adjustment ratio for proprietors and partners (I ÷ H).....	1.09
K. Persons engaged (G x J).....	98,926

Notes and sources: Lines A, C, and D are in million dollars. Line E is in thousands. Lines H and I are in million hours. Table references are the July 1978, Survey of Current Business, National Income Table, Transportation Industry.

The Plant to Port Indirect Requirements—Exports of manufactured goods amounted to $95.5 billion in 1977, and it was estimated that the f.o.b. plant value of these goods amounted to $85.8 billion. The difference of $9.8 billion represents transportation costs of moving these goods, mainly to seaports, but also to airports, or to rail or truck border crossing points. In addition, there is the margin, or markup of exporters, a component of wholesale trade. BEA provided I-O data which permitted the allocation of the $9.8 billion to transportation and wholesale trade. These values were then converted to estimates of persons engaged by essentially the same procedures described above for other nonmanufacturing industries. It was estimated that 260,718 persons were engaged in these plant to port operations, with 53,234 in transportation and 207,484 in wholesale.

Allocating Nonmanufacturing Employment by State—The statistical procedures described above resulted in national estimates of persons engaged in nonmanufacturing industries induced by U.S. manufacturing exports. These are industries supplying materials to manufacturing for further processing and services and supplies of all kinds to manufacturing industries.

It remained to allocate these persons engaged estimates by State. Procedures used for this purpose were the following: For agriculture, where about 129,000 persons were estimated to be supplying food and fiber for processing to manufactured goods which were later exported, the State distribution of all agriculture workers for 1977 as reported by the U.S. Department of Agriculture, Crop Reporting board in Farm Labor, February 1978 was used. For mining, with only 34,000 persons engaged to be allocated, the State distribution of employment for 1977 reported by the Bureau of the Census in County Business Patterns, was used.

There were 282,000 persons engaged in trade (not including the plant-to-port exporters) estimated to be supporting production of manufactured export goods. These are persons purchasing agricultural goods, steel, ores, and various other materials and supplies from producers and selling them to manufacturers for further processing into goods which were exported. An assumption, based upon review of more detailed I-O data, was made that 85 percent of this employment was in wholesale trade and 15 percent was in retail. The amounts of employment resulting were than allocated by State on the basis of the State distributions for wholesale and retail, respectively, in 1977 County Business Patterns. Possible errors in the 85/15 allocation has a negligible effect on the State by State results.

The "plant to port" 207,484 persons engaged in wholesale trade were allocated by State on the basis of the 1977 County Business Patterns estimates for merchant wholesalers. The remaining nonmanufacturing employment (mostly in transportation, utilities, and business services) were judged to be closely allied in terms of location to the State distribution of manufacturing. That is, they supply services in the sense of statellites to manufacturing plants in the vicinity. This employment was, therefore, allocated by State proportionately based upon the State distribution of export induced manufacturing employment.

Quality of the Estimates—As previously mentioned, many of the statistical processing steps, beyond the collection of the data on the direct value of exports, involved a series of assumptions so that the final estimates of indirect export-related employment by State are not of the usual Census quality; that is, these estimates go beyond the customary Bureau of the Census function of collecting and compiling data in a carefully designed survey. Estimation methods for the survey of direct exports are described in appendix C.

The estimates published in June 1978, of the State distribution of jobs directly related to exports, were criticized as being incomplete because of the omission of indirect employment, and the Bureau was urged to expand the estimates to measure the full impact by State.

The task could only be undertaken because of the availability of BEA's input-output model of interindustry relations and transactions between producing industries and final purchases. The BEA I-O matrix is a powerful analytical tool, useful for all sorts of intricate economic analysis. It is, however, a construct of estimates of relationships between million of buyers and sellers and is, therefore, subject to estimation error. Flaws in the estimated relationships might carry over to this project. However, it should be recognized that the I-O matrix is compiled by highly skilled technicians with painstaking caution and further, that the interlocking system provides careful cross-checks on itself.

At a number of later stages in the process, assumptions were required on how various estimates or allocations were to be made. These were carefully weighed and methods developed which took account of quality requirements and feasibility. For example, suppose a manufactured raw material was made in 20 States and 10 percent of the domestic sales went to producers of finished products for export. It was not feasible or even possible to estimate specifically how much of the raw material from each State found its way into exported manufactured goods; each State was assumed to have 10 percent of its domestic sales going to exports indirectly. One might even argue that, for a given State, even if it could be determined that 12 percent was actually going to exports indirectly in a physical sense, that for economic purposes 10 percent was preferable because the manufacturer of the finished product would be indiferrent as to where the supply came from. In any case, if there are errors due to the assumption of proportionally, they are considered to be relatively minor.

There are other specific flaws in the process which may be pointed out. An I-O computer run on the plant-to-port services for electricity, office supplies, etc. was not made. This results in an estimated understatement of 50 to 75 thousand export-related workers.

Secondly, in the census surveys of the manufacturing sector working proprietors and partners are omitted by convention and are, therefore, omitted from these export-related job estimates. They are basically omitted because they are judged to be a negligible volume. That is also the case here, as it is estimated that about 10 thousand jobs are omitted on this account.

Furthermore, the procedure for converting the estimates for the effect of manufactured indirect inputs is judged to be an underestimate of employment by about 40 to 50 thousand. This comes about because shipments of a parts supplier were deflated to obtain employment by an aggregate which sometimes included finished goods producers in the same State and industry. The parts producers tend to require more employment per dollar of shipments than the finished goods producing firm in the same industry. Since the conversion ratio for the parts shipments was based upon aggregates for both types of plants, the resulting estimate of the export-related employment is a bit low.

All three of the comments above described underestimates of export-related employment. Working in the opposite direction are advances in productivity (more output per unit of labor input). The I-O data used were for 1972, the latest available. For this problem the relevant area of concern is the nonmanufacturing industries, where an important step was conversion of the value of indirect requirements to compensation of labor by use of the 1972 I-O ratios.

While these nonmanufacturing industries are the least susceptible to labor productivity advances, they are almost surely positive overall from 1972 to 1977 and, therefore, result in too high an estimate of compensation and of employment. In this case, an estimate of the overstatement in number of jobs is not feasible.

Finally, not part of the basic work but worthy of comment, are the percentages calculated from the civilian employment and private sector employment shown in table 2. The export-related jobs are estimates of the States in which the jobs are located. The civilian and private sector employment come from the Bureau's Current Population Survey (CPS). This is a household survey so that the State aggregates concern where the people live. An attempt was made to adjust the CPS household data by shifting estimates from a where-live basis to a where-work basis, but the resulting percentages turned out to be so slightly changed that it did not seem necessary to make the adjustments.

Table 1. **Employment Related to Manufactured Exports by Major Economic Sector: 1977 and 1976**

Industries	1977			1976		
		Employment related to manufactured exports[2]			Employment related to manufactured exports[2]	
	Civilian employment[1] (1,000)	Number (1,000)	Percent of civilian employment	Civilian employment[3] (1,000)	Number (1,000)	Percent of civilian employment
United States	89,369	3,258	3.6	86,892	3,452	4.0
Manufacturing industries	19,590	1,990	10.2	18,753	2,125	11.3

Agriculture	3,044	129	4.2	3,403	137	4.0
Mining	747	34	4.6	688	35	5.1
Other	27,788	216	.8	30,588	218	.7

[1]Civilian employment is the sum of manufacturing employment estimates from the 1977 Census of Manufactures and nonmanufacturing employment estimates from the 1977 Current Population Survey, Bureau of the Census, Table 5a, Employed Persons by Industry Group, Class of Worker, and Color for the United States.

[2]Total employment related to manufactured exports is the sum of employment directly calculated for the plants shipping the exported product, the supplying industries and service organizations, and the central administrative offices and auxiliaries. For manufacturing industries, employment is limited to paid employees in manufacturing plants, while for nonmanufacturing it includes an estimate for working proprietors and partners.

[3]Civilian employment is the sum of manufacturing employment estimates from the 1976 Annual Survey of Manufactures and nonmanufacturing employment estimates from the 1976 Current Population Survey, Bureau of the Census, Table 5a, Employed Persons by Industry Group, Class of Worker, and Color for the United States.

(Z) Less than one-half of the unit of measurement shown.

[1]Civilian employment is the sum of manufacturing employment estimates from the 1977 Census of Manufactures and nonmanufacturing employment estimates from the 1977 Current Population Survey, Bureau of the Census, Table 5a, Employed Persons by Industry Group, Class of Worker, and Color for the United States.

[2]Private sector employment is the civilian employment (column A) less the Federal, State, and local government estimates from the source noted in the previous footnote.

[3]Total employment related to manufactured exports is the sum of employment directly calculated for the plants shipping the exported products, the supplying industries and service organizations, and the central administrative offices and auxiliaries. For manufacturing industries, employment is limited to paid employees in manufacturing plants, while for nonmanufacturing industries, employment includes an estimate for working proprietors and partners.

Table 2b. **Employment Related to Manufactured Exports, by Major Economic Sector, for States: 1976**

(Z) Less than one-half of the unit of measurement shown.

[1]Includes total domestic and export shipments for all manufacturing establishments.

[2]Includes only the value of manufactured products exported by the producing plants.

[3]Includes shipments of components, parts, supplies, etc., used by plants producing the export product. Supporting shipments were estimated for the 51 Bureau of Economic Analysis (BEA) input-output industries, allocated to States, and aggregated into State Standard Industrial Classification (SIC) totals.

[4]Total export related shipments are the sum of columns B and C.

[5]Includes employees of central administrative offices (CAO's) and auxiliaries (warehouses, garages, repair shops, etc.) serving operating manufacturing establishments.

[6]Employment is limited to paid employees in manufacturing plants producing the export product. The number of employees related to export shipments was calculated for each establishment, aggregated by industry and by State, and inflated to a level comparable to the plant value of exports reported in the official foreign trade statistics at port value.

[7]Manufacturing employment at establishments producing components, parts, supplies, etc. for use by plants producing for export. The employment was estimated for 51 Bureau of Economic Analysis (BEA) input-output industries, allocated to States, and aggregated into State Standard Industrial Classification totals. This column also includes an estimate of 116.9 thousand employees in central administrative offices and auxiliary units that service manufacturing establishments.

[8]The employment totals shown are the sum of columns G and H.

Table 3b. **Manufacturing Industries—Shipments and Employment Related to Manufactured Exports for States: 1976**

rRevised. (X) Not applicable.

[1]Includes total domestic and export shipments for all manufacturing establishments.

[2]Includes only the value of manufactured products exported by the producing plants.

[3]Includes shipments of components, parts, supplies, etc., used by plants producing the export product. Supporting shipments were estimated for the 51 Bureau of Economic Analysis (BEA) input-output industries, allocated to States, and aggregated into State Standard Industrial Classification (SIC) totals.

[4]Total export related shipments are the sum of columns B and C.

[5]Includes employees of central administrative offices (CAO's) and auxiliaries (warehouses, garages, repair shops, etc.) serving operating manufacturing establishments.

[6]Employment is limited to paid employees in manufacturing plants producing the export product. The number of employees related to export shipments was calculated for each establishment, aggregated by industry and by State, and inflated to a level comparable to the plant value of exports reported in the official foreign trade statistics at port value.

[7]Manufacturing employment at establishments producing components, parts, supplies, etc. for use by plants producing for export. The employment was estimated for 51 Bureau of Economic Analysis (BEA) input-output industries, allocated to States, and aggregated into State Standard Industrial Classification totals. This column also includes an estimate of 131.0 thousand employees in central administrative offices and auxiliary units that service manufacturing establishments.

[8]The employment totals shown are the sum of columns G and H.

Table 5a. **Manufacturing Industries — Shipments and Employment Related to Manufactured Exports for States by Major Industry Group: 1977**

Note: Certain data lines have been withheld to avoid disclosing operations of individual companies. The data however are included in higher level totals.

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (S) Withheld because the estimate did not meet publication standards. (X) Not applicable. (Z) Less than one-half of the unit of measurement shown.

[1]Includes total domestic and export shipments for all manufacturing establishments.

[2]Includes only the value of manufactured products exported by the producing plants.

[3]Includes shipments of components, parts, supplies, etc., used by plants producing the export product. Supporting shipments were estimated for the 51 Bureau of Economic Analysis (BEA) input-output industries, allocated to States and aggregated into State Standard Industrial Classification (SIC) totals.

[4]Total export related shipments are the sum of columns B and C.

[5]Includes employees of central administrative offices (CAO's) and auxiliaries (warehouses, garages, repair shops, etc.) serving operating manufacturing establishments.

[6]Employment is limited to paid employees in manufacturing plants producing the export product. The number of employees related to export shipments was calculated for each establishment, aggregated by industry and by States, and inflated to a level comparable to the plant value of exports reported in the official foreign trade statistics at port value.

[7]Manufacturing employment at establishments producing components, parts, supplies, etc. for use by plants producing for export. The employment was estimated for 51 Bureau of Economic Analysis (BEA) input-output industries, allocated to States, and aggregated into State Standard Industrial Classification totals. This column also includes an estimate of 116.9 thousand employees in central administrative offices and auxiliary units that service manufacturing establishments.

[8]The employment totals shown are the sum of columns G and H.

[9]A description of the standard error of estimate is given in appendix B under Qualifications of the Data. The percentage standard errors shown are the approximate relative standard errors of the estimates of that level.

Note: Certain data lines have been withheld to avoid disclosing operations of individual companies. The data, however, are included in higher level totals.

- Represents zero. (D) Withheld to avoid disclosing operations of individual companies. (S) Withheld because the estimate did not meet publication standards. (X) Not applicable. (Z) Less than one-half of the unit of measurement shown.

[1] Includes total domestic and export shipments for all manufacturing establishments.

[2] Includes only the value of manufactured products exported by the producing plants.

[3] Includes shipments of components, parts, supplies, etc., used by plants producing the export product. Supporting shipments were estimated for the 51 Bureau of Economic Analysis (BEA) input-output industries, allocated to States, and aggregated into State Standard Industrial Classification (SIC) totals.

[4] Total export related shipments are the sum of columns B and C.

[5] Includes employees of central administrative offices (CAO's) and auxiliaries (warehouses, garages, repair shops, etc.) serving operating manufacturing establishments.

[6] Employment is limited to paid employees in manufacturing plants producing the export product. The number of employees related to export shipments was calculated for each establishment, aggregated by industry and by States, and inflated to a level comparable to the plant value of exports reported in the official foreign trade statistics at port value.

[7] Manufacturing employment at establishments producing components, parts, supplies, etc. for use by plants producing for export. The employment was estimated for 51 Bureau of Economic Analysis (BEA) input-output industries, allocated to States, and aggregated into State Standard Industrial Classification totals. This column also includes an estimate of 131.0 thousand employees in central administrative offices and auxiliary units that service manufacturing establishments.

[8] The employment totals shown are the sum of columns G and H.

TABLE

Manufacturers' Shipments by Product Group and Class of Customer: 1977 5

EXPLANATORY TEXT

GENERAL

This special report provides information on the primary channels through which manufacturers distributed their products in 1977, based on a survey conducted as part of the census of manufactures for that year. It is the fourth comprehensive survey of this type, the first three of which covered 1939, 1958, and 1967.

Excluded from the survey were products of the cut-and-sew apparel industries, standard industrial classification (SIC) Major Industry Group 23, and printing and publishing, Major Industry Group 27. Also, not all product groups could be shown because of the unreliability of the data tabulated, or because data were suppressed to avoid disclosing figures for individual companies. (See appendix L for a list of product groups that were not covered in the table.)

SCOPE OF THE SURVEY

While conducted as part of the 1977 Census of Manufactures, the survey was directed only to the Annual Survey of Manufactures (ASM) panel, excluding establishments classified in Major Groups 23 and 27. The 1977 ASM is a sample of 70,000 establishments selected from a universe of 312,000 establishments included in the 1972 Census of Manufactures. (See Introduction for relationship between Annual Survey of Manufactures and Census of Manufactures.)

Data were requested on a company basis. Thus, companies with more than one manufacturing establishment were requested to report for all manufacturing plants taken together. Companies with a single operating manufacturing location reported for that one establishment. The total number of companies mailed forms for this survey was 23,000, of which 8,100 were multiestablishment companies.

Companies were asked to include, in addition to products of their own manufacture, those bought and sold without further processing (resales). Manufacturers' shipments were to be valued at f.o.b. producing plant, and sales by sales branches and offices at sales price to customer. If the data could not be obtained from available records, except at considerable expense, or if existing sales records for product groupings differed significantly from the information requested in the survey, reasonable estimates were acceptable from reporting companies. Companies were informed that estimates were acceptable to a greater extent than in other census surveys.

Two report forms were employed for securing the data: NC-K4M and NC-K4S. (See appendix D for copies of the report forms.) Report form NC-K4M was mailed to all multiestablishment companies and to single-establishment companies with at least 1,000 employees, where such companies were included in the ASM sample panel. NC-K4S was mailed to single-establishment companies with less than 1,000 manufacturing employees, when similarly part of the ASM reporting panel.

Companies asked to report on form NC-K4M also received a booklet, Product Group Reference List (reproduced in appendix L). The booklet lists some 450 product groups, each carrying a "form NC-K4M code." Respondents were asked to report separately the distribution, by customer class, of shipments and sales for each product group, as applicable to the company's manufacture. Each such product group represented one 5-digit product class or more, as reported by the establishments of the company in the 1977 ASM.

Product classes are groupings of products coded within the SIC framework and, in the first four of their five digits, coded to the SIC 4-digit industry in which the products are primary. The coding system defined in the SIC Manual, 1972 edition, provided the basis for classification of establishments and products in the survey on distribution by class of customer as it did for the 1977 census and ASM. (See further description of product group codes and their relationship to the SIC system in the Introduction.)

Companies reporting on form NC-K4S were not required to supply information in terms of product group codes, but to furnish a single report covering all of the product shipments from their establishments, without regard to product diversity. Each NC-K4S report was coded to the SIC 4-digit industry assigned to the establishment in the 1977 Census of Manufactures; that is, the products of the establishment were assumed to be entirely primary to the SIC industry of the establishment's classification.

SAMPLING METHOD

As noted in Scope of the Survey, information for this survey on distribution of manufacturers' shipments and sales by class of customer was collected from a subsample of the 1977 ASM sample panel. The ASM sample panel, a probability sample, was selected from the 1972 Census of Manufactures list supplemented by Social Security Administration (SSA) lists of new manufacturers beginning operations after 1972. As in earlier ASM's, companies, rather than establishments, were defined as sampling units. The selected companies were required to report for all of their plants, therefore, new establishments of existing companies also were represented in the sample.

The probabilities of selection assigned to the smaller companies were proportional to measures of size determined for each company. For companies included in the 1972 Census of Manufactures, the measures of size depended directly upon each company's 1972 product-class values and the historic variability of the year-to-year shipments of each product class. Roughly equivalent measures of size were assigned to the post-census companies based on their industry codes and anticipated

employment. (More specific information was not available for them in the SSA lists used for sampling.) This method of assigning measures of size was used in order to maximize the precision (i.e., minimize the variance) of estimates.

ESTIMATING AND TABULATING PROCEDURES

Table totals—For the table presented, there are two values shown for product shipment totals. The first is the value as published in chapter 3, table 1, in the 1977 Census of Manufactures General Summary. This figure represents the value of product shipments as reported by the universe of manufacturing establishments in the 1977 Census of Manufactures. The second value, as reported in the class-of-customer survey, was derived by inflating each value reported for a given class of customer by the reciprocal of the company's probability of selection in the ASM sample, and summing the inflated values to produce the distribution of sales by class-of-customer totals and the product group totals.

The product groups shown in the table are those with a coverage ratio generally 60 percent or more and exhibiting a pattern of distribution by class of customer considered reasonable for that product group. A product group with a coverage ratio of less than 60 percent did not contain enough reported data to furnish a reliable base to present a pattern of distribution.

The sums of values and of percentages shown in the tables for classes of customer may not add to totals because of independent rounding.

Standard error of estimate—The estimates developed in the sample are apt to differ somewhat from the results of a survey covering all companies in the sampled lists, but otherwise conducted under essentially the same conditions as the actual sample survey. The sampling errors—the differences between the estimates obtained and the results theoretically obtainable from a comparable complete-coverage survey—are unknown. Guides to the potential sizes of sampling errors, however, are provided by the standard errors of the estimates.

The particular sample selected for the ASM is one of a large number of similar probability samples that, by chance, might have been selected under the same specifications. Each of the possible samples would yield somewhat different sets of results and the standard errors are measures of the variation of all the possible sample estimates around the theoretical, comparable complete-coverage values.

Estimates of the standard errors have been computed from the sample data. They are presented in the form of relative standard errors (the standard errors divided by the estimated values to which they refer).

In conjunction with its associated estimate, the relative standard error may be used to define confidence intervals of the value items, ranges that would include the comparable complete-coverage value for specified percentages of all the possible samples. The complete-coverage value would be included in the range:

1. From one standard error below to one standard error above the derived estimate for about two-thirds of all possible samples.
2. From two standard errors below to two standard errors above the derived estimate for about 19 out of 20 of all possible samples.
3. From three standard errors below to three standard errors above the derived estimate for nearly all samples.

An inference that the comparable complete survey result would be within the indicated ranges would be correct in approximately the relative frequencies shown. These proportions, therefore, may be interpreted as defining approximate probabilities that the estimates shown would differ from complete coverage results by as much as one, two, or three standard errors, respectively.

For example, if an estimated total is shown as 50,000 with an associated relative standard error of 2 percent, the chances are roughly two out of three that the complete coverage total would lie between 49,000 and 51,000; the chances are roughly 19 out of 20 that the complete coverage total would lie between 48,000 and 52,000; and it is almost certain that the complete coverage total would lie between 47,000 and 53,000. The absolute standard error also may be used directly to define confidence intervals of the percent items. For example, if a percent figure is shown as 50 percent with an associated absolute standard error of 2 percent, the chances are roughly 2 out of 3 that the complete coverage percent would lie between 49 and 51 percent; the chances are roughly 19 out of 20 that the complete coverage percent would be between 48 and 52 percent; and it is almost certain that the complete coverage percent would be between 47 and 53 percent.

In addition to sampling errors, the estimates are subject to various operational errors: errors of collection, response, coding, transcription, etc. These operational errors would also occur if a complete canvass were to be conducted under the same conditions as the survey. Explicit measures of their effects are generally not available. However, it is believed that most of the important operational errors were detected and corrected in the course of the Bureau's review of the data for reasonableness and consistency. The small operational errors usually remain. To some extent, they are compensating in the aggregated totals shown.

As derived, the estimated standard errors include part of the effect of the operational errors. The total error, which depends upon the joint effect of the sampling and operational error, is usually of the order of size indicated by the standard error or only moderately higher. For particular estimates, however, the total error may considerably exceed the standard errors shown.

Those figures for which the potential sampling error is very large, should be used with caution, or should be combined with a value figure or value figures for other classes of customer with less error rates. Where a value figure has been suppressed (marked (D)), to avoid disclosing data for individual companies, the standard error has been marked (X) as not applicable.

DEFINITIONS OF CLASSES OF CUSTOMER

Wholesale establishments of the same company (Including sales offices)—These are separately operated wholesale establishments owned by or affiliated with manufacturing companies. Included are all sales branches and offices operated as seperate establishments owned by manufacturing companies, utilized primarily for selling at wholesale the products manufactured by other establishments of the same company; although they deal to some extent, in products manufactured by other companies. Shipments by manufacturing establishments to or via such outlets include shipments made either directly to such branches and offices or to outside customers, on order, from such branches and offices.

Other wholesalers—This category comprises independent wholesalers purchasing primarily for resale to other businesses; that is, to retailers, to industrial, commercial, institutional, or professional customers, and to other wholesalers. Wholesalers typically do not sell directly to household consumers and farmers. Included as wholesalers are industrial distributors, drop shippers or desk jobbers, voluntary group wholesalers, and retail cooperative warehouses. For the purpose of this report, shipments by meat and poultry manufacturers to meat jobbers and retailers were to be reported as shipments to wholesalers. Textile mill products, other than knitting mill products, shipped to piece goods converters were to be reported as shipments to wholesalers. Shipments and sales to domestic exports were also treated as shipments to wholesalers.

Retailers—This category comprises establishments reselling merchandise at retail; that is, for personal, household, or farm consumption. This customer class includes chain stores, mail order houses, department stores, independent retailers, including independent route salesmen such as bakery and dairy truck distributors selling directly to households. Retail stores operated by a manufacturing company were reported separately from independent retailers.

Manufacturers—For other manufacturing plants of the same company, this item represents interplant transfers (for further processing or manufacture) from one manufacturing plant of the same company to another. For manufacturers outside the company, it represents shipments or sales to other company manufacturing establishments. Manufacture, in addition to activities commonly recognized as such, includes such activities as meatpacking, bakeries and bottling plants, jobbers and converters of knit goods, sheet metal fabricators fabricating products away from construction sites, feed mixers, logging camps, sawmills, machine shops, and lapidary work.

Federal government—This category includes shipments and sales to branches and agencies of the Federal Government, including military post exchanges, ship's stores, and similar units. Corporations owned by the Federal Government are similarly included as are shipments and sales under the Mutual Security Program and the Military Defense Assistance Program. Only direct shipments and sales to the Federal Government are covered in this customer class; that is, indirect sales by subcontractors were treated as the class of customer of the prime contractor, usually as a manufacturer.

State and local governments, construction companies, and other users—Aside from State and local governments and construction companies, this catergory includes private firms and businesses and institutions not considered manufacturers, wholesalers, or retailers. Included are mining establishments, transportation, utilities, and hotels, restaurants, and other service-type businesses. Hospitals and schools are similarly included. Also included are export shipments and sales directly to foreign customers and sales to the company's foreign subsidiaries and affiliates. Shipments and sales to domestic exports were treated as shipments to wholesalers. Shipments to State and local governments include shipments to agencies of State and local governments.

Footnotes are on next page.

- Represents zero. (A) Indicates standard errors of 100 percent or more. The estimates are of limited reliability and should be used with caution. (D) Withheld to avoid disclosing operations of individual companies. n.e.c. Not elsewhere classified. (X) Not applicable. (Z) Less than half the unit of measure specified.

[1]Standard error of column A represents the relative standard error; that of column B the absolute standard error.
[2]As published in chapter 3, table 1, of the 1977 Census of Manufactures General Summary, and in table 6C of the final 1977 Census of Manufactures Industry reports.
[3]Includes only the data for those establishments reporting on class of customer report forms NC-K4S and NC-K4M.
[4]Includes sales branches, sales offices, and administrative offices.
[5]Data for resales are included in the categories above. Figure shown represents total resales, as a percent of total product shipments, that was reported on class of customer survey.
[6]Establishments classified in major groups 23 and 27 were not mailed class of customer report forms.

APPENDIX A. Explanation of Terms

This appendix is in three sections. Section 1 includes items for which all establishments that were mailed census of manufactures forms were requested to supply information. Section 2 covers supplementary items for which only establishments included in the annual survey of manufactures (ASM) sample were requested to supply information. Section 3 covers items collected on the water use report forms.

SECTION 1. ITEMS COLLECTED ON ALL CENSUS OF MANUFACTURES REPORT FORMS

Employment and related items—The regular report forms requested separate information on production workers as of a payroll period for each quarter of the year and on other employees as of the payroll period which included the 12th of March.

All employees—This item includes all full-time and part-time employees on the payrolls of operating manufacturing establishments during any part of the pay period ending nearest the 12th of the months specified on the report form. Included are all persons on paid sick leave, paid holidays and paid vacations during these pay periods. Officers of corporations are included as employees; proprietors and partners of unincorporated firms are excluded. The "all employees" number is the average number of production workers plus the number of other employees in mid-March. The number of production workers is the average for the mid-month payroll periods of March, May, August, and November.

Production workers—This item includes workers (up through the working foreman level) engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping (but not delivering), maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with these production operations at the establishment covered by the report. Supervisory employees above the working foreman level are excluded from this category.

All other employees—This item covers nonproduction personnel of the manufacturing establishment, including those engaged in factory supervision above the working foreman level, sales (including driver salesmen), sales delivery (highway truck drivers and their helpers), advertising, credit, collection, installation and servicing of own products, clerical and routine office functions, executive, purchasing, financing, legal, personnel (including cafeteria, medical, etc.), professional, and technical. Also included are employees on the payroll of the manufacturing establishment who are engaged in the construction of major additions or alterations to the plant and who are utilized as a separate work force.

In addition to reports sent to operating manufacturing establishments, information on employment during the payroll period which included March 12 and annual payrolls was also requested of administrative offices or auxiliary units (e.g., warehouses and research and development laboratories) of multiestablishment companies. However, these figures are not included in the totals for individual industries shown in this report. They are included in the Summary and Geographic Area reports and in the final bound volumes as a separate category.

Administrative office and auxiliary unit employees—As noted in the Introduction, companies were asked to file a special report form for any administrative office that was at a different location than the establishments managed or served, or at the same location as one of the establishments but not operated as an integral part of the establishment. Employees in **administrative offices** are concerned with the general management of multiestablishment companies, i.e., with the general supervision and control of two units or more, such as manufacturing plants, mines, sales branches, or stores. The functions of these employees may include (1) program planning, including sales research and coordination of purchasing, production, and distribution; (2) company purchasing, including general contracts and purchasing methods; (3) company financial policy and accounting, tax accounting, company sales and profits reports, and personnel accounting; (4) general engineering, including design of product machinery and equipment, and direction of engineering effort conducted at the individual operation locations; (5) direction of company personnel matters; and (6) legal and patent matters. **Auxiliaries** are separate storage facilities, garages, repair shops, purchasing offices, sales promotion offices, research and development organizations, etc., serving the plants or central management of the company.

The employment and payrolls of the administrative offices and auxiliaries serving manufacturing establishments are included in all tables at the "all industries" level. In tables where industry detail is shown, the data for these units appear as a separate industry group.

Payrolls—This item includes the gross earnings paid in the calendar year 1977 to all employees on the payroll of operating

manufacturing establishments. Respondents were told they could follow the definition of payrolls used for calculating the Federal withholding tax. It includes all forms of compensation such as salaries, wages, commissions, dismissal pay, all bonuses, vacation and sick leave pay, and compensation in kind, prior to such deductions as employees' Social Security contributions, withholding taxes, group insurance, union dues, and savings bonds. The total includes salaries of officers of corporations, but excludes payments to proprietors or partners of unincorporated concerns. Also excluded are payments to members of Armed Forces and pensioners carried on the active payroll of manufacturing establishments.

The census definition of payrolls is identical to that recommended to all Federal statistical agencies by the Office of Federal Statistical Policy and Standards. It should be noted that this definition does not include employers' Social Security contributions or other nonpayroll labor costs such as employees' pension plans, group insurance premiums, and workers' compensation.

The ASM provides estimates of employers' supplemental labor costs, both those required by Federal and State laws and those incurred voluntarily or as part of collective bargaining agreements. (Supplemental labor costs are explained later in this appendix.)

As in the case of employment figures, the payrolls of separate administrative offices and auxiliary units of multi-establishment companies are included in all tables at the "all industries" level. In tables where industry detail is shown, the data for these units appear as a separate industry group.

Production worker hours—This item covers hours worked or paid for at the plant, including actual overtime hours (not straight-time equivalent hours). It excludes hours paid for vacations, holidays, or sick leave when the employee was not at the plant.

Cost of materials—This item refers to direct charges actually paid or payable for items consumed or put into production during the year, including freight charges and other direct charges incurred by the establishment in acquiring these materials. It includes the cost of materials or fuel consumed, regardless of whether what was consumed was purchased by the individual establishment from other companies, transferred to it from other establishments of the same company, or withdrawn from inventory during the year.

The important components of this cost item are (1) all raw materials, semifinished goods, parts, components, containers, scrap, and supplies put into production or used as operating supplies and for repair and maintenance during the year; (2) electric energy purchased; (3) fuels consumed for heat, power, or generating electricity; (4) work done by others on materials or parts furnished by manufacturing establishments (contract work); and (5) products bought and resold in the same condition. (See discussion of duplication of data.)

Value of shipments—This item covers the received or receivable net selling values, f.o.b. plant (exclusive of freight and taxes), of all products shipped, both primary and secondary, as well as all miscellaneous receipts, such as receipts for contract work performed for others, installation and repair, sales of scrap, and sale of products bought and resold without further processing. Included are all items made by or for the establishments from materials owned by it whether sold, transferred to other plants of the same company, or shipped on consignment. The net selling value of products made in one plant on a contract basis from materials owned by another was reported by the plant providing the materials.

In the case of multiunit companies, the manufacturer was requested to report the value of products transferred to other establishments of the same company at full economic or commercial value, i.e., including not only the direct costs of production but also a reasonable proportion of "all other costs" (including company overhead) and profit. (See discussion of duplication of data.)

Duplication in cost of materials and value of shipments—The aggregate of the cost of materials and value of shipments figures for industry groups and for all manufacturing industries includes large amounts of duplication, since the products of some industries are used as materials by others. With some important exceptions, such as for motor vehicles and parts, this duplication is not significant at the 4-digit industry level. However, it is significant at the 2-digit and 3-digit industry group level because these totals often include industries which represent successive stages in the production of a finished manufactured product. Examples are the addition of flour mills to bakeries in the "Food" group and the addition of pulp mills to paper mills in the "Paper and Allied Products" group of industries. Estimates of the overall extent of this duplication indicate that the value of manufactured products exclusive of such duplication—the value of finished manufactures—tends to approximate two-thirds of the total value of products reported in the census of manufactures.

Value added by manufacture—This measure of manufacturing activity is derived by subtracting the cost of materials, supplies, containers, fuel, purchased electricity, and contract work from the value of shipments (products manufactured plus receipts for services rendered). The result of this calculation is then adjusted by the addition of value added by merchandising operations (i.e., the difference between the sales value and the cost of merchandise sold without further manufacture, processing, or assembly) plus the net change in finished goods and work-in-process inventories between the beginning and end of the year.

"Value added" avoids the duplication in the figure for value of shipments which results from the use of products of some establishments as materials by others. Value added is considered to be the best value measure available for comparing the relative economic importance of manufacturing among industries and geographic areas.

New and used capital expenditures—For establishments in operation and establishments under construction but not yet in operation, manufacturers were asked to report their new expenditures for (1) permanent additions and major alterations to manufacturing establishments, and (2) machinery and equip-

ment used for replacement and additions to plant capacity if they were of the type for which depreciation accounts were ordinarily maintained.

The totals for new expenditures exclude that portion of expenditures leased from nonmanufacturing concerns, new facilities owned by the Federal Government but operated under contract by private companies, and plant and equipment furnished to the manufacturer by communities and nonprofit organizations. Also excluded are expenditures for used plant and equipment (although reported in the census), expenditures for land, and cost of maintenance and repairs charged as current operating expenses.

Manufacturers were also requested to report the value of all used buildings and equipment purchased during the year at the purchase price. For any equipment or structure transferred to the use of the reporting establishment by the parent company or one of its subsidiaries, the value at which it was transferred to the establishment was to be reported. Furthermore, if the establishment changed ownership during the year, the cost of the fixed assets (building and equipment) was to be reported under used capital expenditures.

Total expenditures for used plant and equipment is a universe figure; i.e., it is collected on all census forms. However, the breakdown of this figure between expenditures for used buildings and other structures and expenditures for used machinery and equipment is collected only on the ASM form and is subject to sampling error (see table 3b, chapters 2 and 4).

End-of-year inventories—Respondents were asked to report their 1977 and 1976 end-of-year inventories at approximate current costs, if feasible; otherwise, at book values. Since different methods of inventory valuation are used (last-in-first-out (LIFO), first-in-first-out (FIFO), etc.), the definition of the value of inventories aggregate for all establishments in an industry is not precise. The change in inventory between years is of considerably greater significance.

In using inventory data by stage of fabrication for "all industries" and at the 2-digit industry level, it should be noted that an item treated as a finished product by an establishment in one industry may be reported as a raw material by another establishment in a different industry. For example, the finished product inventories of a steel mill would be reported as raw materials by a stamping plant. Such differences are present in the inventory figures by stage of fabrication shown for individual industries, industry groups, and "all manufacturing" which are aggregates of figures reported by establishments in specified industries.

SECTION 2. ITEMS COLLECTED ONLY ON ASM REPORT FORM

Cost of purchased services—ASM establishments were requested to provide information on the cost of purchased services for the repair of buildings and other structures, the repair of machinery and communication services. Included in the cost of purchased services for the repair of building and machinery are payments made for all maintenance and repair work on buildings and equipment such as painting, roof repairs, replacing parts, and overhauling equipment. Such payments made to other establishments of the same company and for repair and maintenance of any leased property are also included. Extensive repairs or reconstruction that were capitalized are considered capital expenditures for used buildings and machinery and are, therefore, excluded from this item. Repair and maintenance costs provided by an owner as part of a rental contract and incurred directly by an establishment in using its own work force are also excluded.

The response coverage ratio for each of the three types of purchased services listed above is a measure of the extent to which respondents reported for each item. It is derived for each item by calculating the ratio of the weighted employment (establishment data multiplied by sample weight; see appendix B) for those ASM establishments that reported the specific inquiry to the weighted total employment for all ASM establishments classified in the industry (see table 3c, chapters 2 and 4).

Rental payments—This item includes rental payments for the use of all items for which depreciation reserves would be maintained if they were owned by the establishment, e.g., structures and buildings, and production, office, and transportation equipment. Excluded are royalties and other payments for the use of intangibles and depletable assets, and land rents where separable.

When an establishment of a multiestablishment company was charged rent by another part of the same company for the use of assets owned by the company, it was instructed to exclude that cost from rental payments. However, the book value (original cost) of these company-owned assets were to be reported as assets of the establishment at the end of the year.

If there were assets at an establishment rented from another company, and the rents were paid centrally by the head office of the establishment, the company was instructed to report these rental payments as if they were paid directly by the establishment.

Supplemental labor costs—Supplemental labor costs are divided into legally required expenditures and payments for voluntary programs. The legally required portion consists primarily of Federal old age and survivors' insurance, unemployment compensation, and workers' compensation. Payments for voluntary programs include all programs not specifically required by legislation whether they were employer initiated or the result of collective bargaining. They include the employer portion of such plans as insurance premiums, premiums for supplemental accident and sickness insurance, pension plans, supplemental unemployment compensation, welfare plans, stock purchase plans on which the employer payment is not subject to withholding tax, and deferred profit-sharing plans. They exclude such items as company-operated cafeterias, in-plant medical services, free parking lots, discounts on employee purchases, and uniforms and work clothing for employees. While the excluded items do benefit employees, and all or part of their cost is generally similar to the items covered in the annual survey labor costs statistics, accounting records do not generally provide reliable figures on net employee benefits of these types.

Beginning and end-of-year depreciable assets—The data encompass all fixed depreciable assets on the books of establishments at the beginning and at the end of the year. The values shown represent the actual cost of assets at the time they were acquired, including all costs incurred in making the assets usable (such as transportation and installation). Included are all buildings, structures, machinery, and equipment (production, office, and transportation equipment) for which depreciation reserves are maintained. Excluded are nondepreciable capital assets, including inventories and intangible assets such as patent rights and royalties. Also excluded are land and depletable assets such as timber and mineral rights.

The definition of fixed depreciable assets is consistent with the definition of capital expenditures. For example, expenditures include actual capital outlays during the year, rather than the final value of equipment put in place and buildings completed during the year. Accordingly, the value of assets at the end of the year includes the value of construction in progress. In addition, respondents were requested to make certain that assets at the beginning of the year plus new and used capital expenditures, less retirements, equaled assets at the end of the year.

New and used capital expenditures—The data for total new capital expenditures, new building expenditures, new machinery expenditures, and total used capital expenditures are collected on all census forms. However, the breakdown between expenditures for used buildings and other structures and expenditures for used machinery and equipment is collected only on the ASM form. (See further explanation on capital expenditures in section 1.)

Breakdown of new capital expenditures for machinery and equipment—ASM establishments were requested to separate their capital expenditures for new machinery and equipment into (1) automobiles, trucks, etc., for highway use; (2) computers and peripheral data processing equipment; and (3) all other.

The category "automobiles, trucks, etc., for highway use" is intended to measure expenditures for vehicles designed for highway use which were acquired through a purchase of lease-purchase agreement. Vehicles normally operating off public highways—vehicles specifically designed to transport materials, property, or equipment on mining, construction, logging, and petroleum development projects—are excluded from this item.

The "not specified by kind" or n.s.k. item for expenditures for new machinery and buildings shown in table 3b represents the total machinery and equipment expenditures for establishments that did not break down their expenditures for the three specific categories. This means that for most industries the specific categories are understated.

Retirements—Included in this item is the gross value of assets sold, retired, scrapped, destroyed, etc., during 1977. When a complete operation or establishment changed ownership, the respondent was instructed to report the value of the assets sold at the original cost as recorded in the books of the seller. The respondent was also requested to report retirements of equipment or structures owned by a parent company that the establishment was using as if it were a tenant.

Depreciation charges—This item includes depreciation and amortization charged during the year against assets. Depreciation charged against fixed assets acquired since the beginning of the year and against assets sold or retired during the year are components of this category. Respondents were requested to make certain that they did not report accumulated depreciation.

Natural gas—Natural gas excludes manufactured gas, mixed gas, blast furnace gas, still gas, coke-oven gas, etc.

Bituminous coal, lignite, and anthracite—Most coal of metallurgical grade (coking coal) is not included in this survey because it is considered a material for consumption rather than a fuel. Consequently, the average cost of coal purchased by manufacturing establishments is lower than it would be if coking coal were classified as a fuel.

Residual fuel oil—Residual fuel oil includes grades 5 and 6 fuel oils, heavy diesel type fuel oil, bunker "C" fuel oils, heavy gas-enrichment oil, etc. Quantities are published in barrels (42 gallons).

Distillate fuel oil—Distillate fuel oil includes grades 1, 2, and 4 fuel oils, light diesel-type fuel oil, light gas-enrichment oil, etc. Quantities are published in barrels (42 gallons).

Coke and breeze—The quantity of coke covered by this survey represents only a small fraction of coke consumed in manufacturing. Most metallurgical coke is produced and consumed at the same establishment and is therefore excluded from this report. Breeze (coke fines) are included here even though their unit cost is considerably lower than beehive or slot oven coke.

Other fuels—Other fuels consists mainly of purchased steam, liquified petroleum gases, and gasoline, it also includes mixed gases, coke-oven gases, still gases, blast furnace gases, wood, and small amounts of other miscellaneous fuels.

Fuels not specified by kind—Some small establishments reported total cost of fuels but failed to report the cost and quantity of specified fuels used. Estimates of their total cost of fuels are included in the tables under Fuels not specified by kind. To the extent that information on detailed fuels consumed was not given, data shown for individual fuels in this report tend to be understated.

Further limitations apply to the estimates of cost of fuels, not specified by kind. They are residual balancing figures derived by subtraction the sum of the linear estimates for the specified fuels from the total cost of fuels, which is a census total. They include the cost not allocated by kind because of nonresponse, additional adjustment for unresolved imbalances between the sum of the detail and the total in individual reports, and the statistical deviation resulting from the use of two methods of compilation.

SECTION 3. ITEMS COLLECTED ON THE WATER USE REPORT FORM

Water Intake by Source

Public water system—Water supplied by a water system (whether municipally or privately owned) whose primary purpose is to supply water to the general public. The data also include water supplied by systems whose principal function is to supply water to industrial users.

Company water system—Water supplied from a company's water supply system or obtained from another company where the supplying company is not primarily a water supplier to the general public and/or industrial users. The data also include that portion of water obtained from a joint water supply system operated by the reporting company.

Brackish water—Water with 1,000 to 10,000 parts per million of dissolved solids.

Salt water—Water with more than 10,000 parts per million of dissolved solids.

Water Intake by Purpose

Process—Water that comes directly in contact with products and/or materials, including water which is consumed in production.

Sanitary service—Water used for drinking, lunchrooms or cafeterias, and domestic sewage.

Public utility sewer—Water discharged to public utility sewer systems, whether municipally or privately owned.

Ground—Quantities of water which seep into the ground from collection basins, such as ponds and lagoons.

Transferred to other users—Quantities of water transferred, after use, to another establishment of either the same company or another company.

Treated water—Includes a wide variety of techniques used to cool, detoxify, decompose, separate-to-store, or ameliorate effluent as it reaches the discharge point.

Gross Water Used

Total—Estimated quantity of water that would have been required if no water had been recirculated or reused. For example, if total water intake was 400 million gallons and, of these 400 million gallons, 100 million gallons were used twice for cooling purposes and once for washing products or materials, the total water required would be 300 million gallons, plus the 300 million gallons not recirculated, for a total of 600 million gallons (less consumption and evaporation loss).

Water Discharged

Total—Quantity of water brought to ultimate discharge point. The data exclude quantities of water held in ponds, lagoons, or basins, for reuse or treatment, or water discharged by evaporation processes.

APPENDIX B. Annual Survey of Manufactures

DESCRIPTION OF SURVEY SAMPLE

The annual survey of manufactures (ASM) is a survey based on a probability sample of about 70,000 manufacturing establishments selected from the census of manufactures universe. The current sample was selected from the manufacturing establishments included in the 1972 Census of Manufactures supplemented by Social Security Administration (SSA) files of manufacturers that opened after 1972. As in the earlier surveys, companies rather than establishments were defined as the sampling units. The selected companies were required to report for all of their plants, so that new establishments of existing companies also were represented in the sample.

All companies that had any manufacturing establishments with 250 employees or more in the 1972 census were included in the survey sample. These large companies, included with certainty, collectively account for more than two-thirds of total manufacturing employment.

Smaller companies were selected for the ASM in accordance with mathematical theory for optimum allocation of a sample. Their probabilities of inclusion ranged from 1.000 to 0.005 and were proportional to measures of size determined for each company. The measures of size of companies included in the 1972 Census of Manufactures depended directly upon each company's 1972 product class values and the historic variability of the year-to-year shipments of each product class. Roughly equivalent measures of size were assigned to the postcensus companies based on their industry codes and anticipated employment. (More specific information was not available for them in the SSA files used for sampling.)

To improve the reliability of the industry statistics for geographic areas, two features were incorporated into the sample design. First, some weight was given to the total value of shipments of each establishment relative to the total value of shipments for the State in which the establishment was located. Second, product class values for establishments in those States in which the total level of manufacturing was relatively low or was rapidly expanding (but for which the reliability of estimates was not expected to be much improved by the first sample design feature) were multiplied by factors ranging from 1.15 to 1.25 before measures of size were developed.

This method of assigning measures of size was used to maximize the precision (i.e., minimize the variance) of estimates of the year-to-year change in the value of product class shipments. Implicitly, it also gave weight to differences in employment, value added, and other industry statistics. These items are highly correlated with total value of shipments, and the assigned size measures varied directly with that total for each company.

The cost of collecting and processing data for a company is roughly proportional to the number of its establishment reports. To maximize the sample information obtained for a fixed total cost, each company's initial size measure was divided by the square root of its number of establishments. Sample selection probabilities then were obtained by multiplying each company's final measure of size by an overall sampling fraction calculated to yield the total expected sample size.

The sample selection procedure gave each company in the sampling frame an independent chance of selection. This method of selection differs from the method of systematic selection used in annual surveys prior to 1959. (With systematic selection, only certain combinations of companies can fall into the sample depending on the order in which they are arrayed at the time the sample is drawn.) Independent selection permits the rotation of the smaller companies into and out of a given sample panel without introducing a bias into the survey estimates.

ESTIMATING PROCEDURES

Most of the historical data compiled from the annual survey of manufactures sample were computed by the "difference estimate formula." For each item, linear estimates of the totals for both the most recent census of manufactures year and the ASM year were developed by multiplying each sample establishment's data by its sample weight (the reciprocal of its probability of selection) and summing the weighted values to publication levels. Then the difference between the two linear estimates was added to the complete (universe) total for the census year to produce the estimate for the ASM year. Estimates developed by the difference estimate formula usually are far more reliable than the comparable linear estimates developed from the current sample data alone.

The 1977 sample data were also developed using difference estimates. However, since the universe totals for the census year (either 1972 or 1977) were not known, a modification of the procedure described above was necessary. For each item, except purchased services and the breakdown of expenditures for new machinery and equipment (see further description in appendix A), linear estimates of the publication totals from the ASM sample were adjusted by the difference between imputed census totals and the corresponding ASM sample estimates of these imputed totals. These imputed totals are obtained by applying industry average ratios to control item values at the establishment level. For example, an imputed total beginning assets figure is obtained by multiplying each establishment's total value of shipments by the industry (4-digit SIC) average for the ratio of beginning assets to shipments.

QUALIFICATIONS OF THE DATA

The estimates developed from the sample are apt to differ somewhat from the results of a survey covering all companies in the sampled lists but otherwise conducted under essentially the same conditions as the actual sample survey. The sampling errors—the differences between the estimates obtained and the results theoretically obtainable from a comparable complete coverage survey—are unknown. Guides to the potential size of the sampling errors, however, are provided by the standard errors of the estimates.

The particular sample selected for the ASM is one of a large number of similar probability samples that, by chance, might have been selected under the same specifications. Each of the possible samples would yield somewhat different sets of results, and the standard errors are measures of the variation of all the possible sample estimates around the theoretical, comparable, complete coverage values.

Estimates of the standard errors have been computed from the sample data for the current statistics, as well as the historical ASM data. They are presented in the form of relative standard errors, i.e., the standard errors divided by the estimated values to which they refer.

In conjunction with its associated estimate, the relative standard error may be used to define confidence intervals—ranges that would include the comparable complete coverage value for specified percentages of all the possible samples. The complete coverage value would be included in the range:

a. From one standard error below to one standard error above the derived estimate for about two-thirds of all possible samples.
b. From two standard errors below to two standard errors above the derived estimate for about 19 out of 20 of all possible samples.
c. From three standard errors below to three standard errors above the derived estimate for nearly all possible samples.

An inference that the comparable complete survey result would be within the indicated ranges would be correct in approximately the relative frequencies shown. Those proportions, therefore, may be interpreted as defining the confidence with which the estimates from a particular sample would differ from complete coverage results by as much as one, two, or three standard errors, respectively.

For example, suppose an estimated total is shown as 50,000 with an associated relative standard error of 2 percent, i.e., a standard error of 1,000 (2 percent of 50,000). Then there is approximately 67 percent confidence that the interval 49,000 to 51,000 includes the complete coverage total, about 95 percent confidence that the interval 48,000 to 52,000 includes the complete coverage total, and almost certain confidence that the interval 47,000 to 53,000 includes the complete coverage total.

In addition to the sample errors, the estimates are subject to various operational errors (errors of collection, reporting, coding, transcription, imputation for nonresponse, etc.). These errors would also occur if a complete canvass were to be conducted under the same conditions as the survey. Explicit measures of their effects generally are not available. However, it is believed that most of the important operational errors were detected and corrected in the course of the Bureau's review of the data for reasonableness and consistency. When they were detected too late to correct, the data were suppressed or were specifically qualified in the tables. The small operational errors usually remain; to some extent, they are compensating in the aggregated totals shown.

As derived, the estimated standard errors include part of the effect of the operational errors. The total error, which depends upon the joint effect of the sampling and operation errors, is usually of the order of size indicated by the standard error or only moderately higher. For particular estimates, however, the total error may considerably exceed the standard errors shown.

The concept of complete coverage under the conditions prevailing for the annual surveys of manufactures is not identical to the complete coverage of the censuses of manufactures as conducted. Nearly all types of operational errors that affect the surveys also occur in the censuses. The surveys and the censuses, however, are conducted under quite different conditions, and operational errors can be controlled more tightly in the surveys than in the censuses. As a result, errors in many of the census figures are of the same order of size as the total errors in the corresponding annual survey estimates. The differences between the census and the survey operating conditions also disturb, to some degree, the comparability of the census and annual survey data.

Any figure shown in the tables in this publication having an associated standard error exceeding 15 percent may be of limited reliability. However, the figure may be combined with other totals, creating a broader aggregate, which may then be of acceptable reliability.

APPENDIX C. Industry Descriptions

This appendix contains descriptions of the 450 4-digit industries for which data were compiled and published in the 1977 Census of Manufactures. With two exceptions, the industries are the same as those described in the 1972 edition of the Standard Industrial Classification (SIC) Manual. SIC Industry 3572, Typewriters, was combined with Industry 3579, Office Machines, N.E.C., in the census tabulations and SIC Industry 3716, Motor Homes Produced on Purchased Chassis, was added

The industry titles and descriptions, in general, agree with those appearing in the SIC Manual, but the descriptions have been expanded, in some instances, to include references to additional products classified in other industries.

20 FOOD AND KINDRED PRODUCTS

This major group includes establishments manufacturing or processing foods and beverages for human consumption, and certain related products, such as manufactured ice, chewing gum, vegetable and animal fats and oils, and prepared feeds for animals and fowls.

201 MEAT PRODUCTS

2011 Meatpacking Plants.—Establishments primarily engaged in the slaughtering, for their own account or on a contract basis for the trade, of cattle, hogs, sheep, lambs, and calves for meat to be sold or to be used on the same premises in canning and curing, and in making sausage, lard and other products. Establishments primarily engaged in killing, dressing, and packing poultry, rabbits, and other small game are classified in industry 2016; and those primarily engaged in killing and processing horses and other nonfood animals are classified in industry 2047. Establishments primarily engaged in manufacturing sausages and meat specialties from purchased meats are classified in industry 2013; and establishments primarily engaged in canning meat for baby food are classified in industry 2032.

2013 Sausages and Other Prepared Meat Products.—Establishments primarily engaged in manufacturing sausages, cured meats, smoked meats, canned meats, frozen meats, natural sausage casings, and other prepared meats and meat specialties from purchased carcasses and other materials. Sausage kitchens and other prepared meat plants operated by packing houses as separate establishments are also included in this industry. Establishments primarily engaged in canning or otherwise processing poultry, rabbits, and other small game are classified in industries 2016 and 2017. Establishments primarily engaged in the cutting up and resale of purchased fresh carcasses are classified in trade industries. Establishments primarily engaged in canning meat for baby food are classified in industry 2032.

2016 Poultry Dressing Plants.—Establishments primarily engaged in slaughtering and dressing poultry for their own account or on a contract basis for the trade for meat to be sold or to be used on the same premises in further processing, including cooking, smoking, raw-boning, canning, freezing, and dehydrating. This industry also includes the killing, dressing, and packing of rabbits and other small game. Establishments primarily engaged in processing purchased carcasses are classified in industry 2017.

2017 Poultry and Egg Processing.—Establishments primarily engaged in the preparation of processed poultry products from purchased carcasses, including cooking, smoking, raw-boning, canning, freezing, and dehydrating, for their own account or on a contract basis for the trade; or in the drying, freezing, and breaking of eggs. The cleaning, oil treating, packing, and grading of eggs are classified in industry 5144. Establishments primarily engaged in the cutting up and resale of purchased fresh carcasses are classified in the trade industries.

202 DAIRY PRODUCTS

This group includes establishments primarily engaged in (1) manufacturing creamery butter, natural cheese, condensed and evaporated milk, ice cream and frozen desserts, and special dairy products such as processed cheese and malted milk and (2) processing (pasteurizing, homogenizing, vitaminizing, bottling) fluid milk and cream for wholesale or retail distribution. Independently operated milk receiving stations primarily engaged in the assembly and reshipment of bulk milk for the use of manufacturing or processing plants are classified in industry 5143.

2021 Creamery Butter.—Establishments primarily engaged in manufacturing creamery butter.

2022 Cheese, Natural and Processed.—Establishments primarily engaged in manufacturing all types of natural cheese (except cottage cheese—industry 2026), processed cheese, cheese foods, and cheese spreads.

2023 Condensed and Evaporated Milk.—Establishments primarily engaged in manufacturing condensed and evaporated milk and related products, including ice-cream mix and ice-milk mix made for sale as such, and dry milk products. Also included in the manufacture of nondairy-base cream substitutes and dietary supplements.

2024 Ice Cream and Frozen Desserts.—Establishments primarily engaged in manufacturing ice cream and other frozen desserts.

2026 **Fluid Milk.**—Establishments primarily engaged in processing (pasteurizing, homogenizing, vitaminizing, bottling) and distributing fluid milk and cream, and related products, including cottage cheese.

203 CANNED AND PRESERVED FRUITS AND VEGETABLES

2032 **Canned Specialties.**—Establishments primarily engaged in canning specialty products, such as baby foods, "native foods," health foods, and soups except seafood. Establishments primarily engaged in canning seafoods other than frozen are classified in industry 2091, frozen seafoods in industry 2092, and those primarily engaged in quick freezing canned specialties in industry 2038.

2033 **Canned Fruits, Vegetables, Preserves, Jams, and Jellies.**—Establishments primarily engaged in canning fruits and vegetables, and fruit and vegetable juices; and manufacturing catsup and similar tomato sauces, preserves, jams, and jellies. Establishments primarily engaged in canning seafoods (except frozen) are classified in industry 2091; and canned specialties, baby foods, and soups (except seafood) in industry 2032.

2034 **Dried and Dehydrated Fruits, Vegetables, and Soup Mixes.**—Establishments primarily engaged in sun drying or artificially dehydrating fruits and vegetables, or in manufacturing packaged soup mixes from dehydrated ingredients. Establishments primarily engaged in the grading and marketing of farm dried fruits, such as prunes and raisins, are classified in industry 5149.

2035 **Pickled Fruits and Vegetables, Vegetable Sauces and Seasonings, and Salad Dressings.**—Establishments primarily engaged in pickling and brining fruits and vegetables, and in manufacturing salad dressings, vegetable relishes, sauces, and seasonings. Establishments primarily engaged in manufacturing catsup and similar tomato sauces are classified in industry 2033, and those packing purchased pickles and olives in trade industries.

2037 **Frozen Fruits, Fruit Juices and Vegetables.**—Establishments primarily engaged in freezing and coldpacking (freezing) fruits, fruit juices, and vegetables.

2038 **Frozen Specialties.**—Establishments primarily engaged in freezing and coldpacking (freezing) food specialties such as frozen dinners and frozen pizza.

204 GRAIN MILL PRODUCTS

2041 **Flour and Other Grain Mill Products.**—Establishments primarily engaged in milling flour or meal from grain, except rice. The products of flour mills may be sold plain or in the form of prepared mixes or doughs for specific purposes. Establishments primarily engaged in manufacturing prepared flour mixes or doughs from purchased ingredients are classified in industry 2045, and rice milling in industry 2044.

2043 **Cereal Breakfast Foods.**—Establishments primarily engaged in manufacturing cereal breakfast foods and related preparations.

2044 **Rice Milling.**—Establishments primarily engaged in cleaning and polishing rice, and in manufacturing rice flour or meal. Other important products of this industry include brown rice, milled rice (including polished rice), rice polish, and rice bran.

2045 **Blended and Prepared Flour.**—Establishments primarily engaged in the preparation of blended flours and flour mixes or doughs from purchased flour. Establishments primarily engaged in milling flour from grain are classified in industry 2041.

2046 **Wet Corn Milling.**—Establishments primarily engaged in milling corn or sorghum grain (milo) by the wet process, and producing starch, sirup, oil, sugar, and byproducts such as gluten feed and meal. Establishments primarily engaged in manufacturing starch from other vegetable sources (potato, wheat, etc.) are also included. Establishments primarily engaged in manufacturing table sirups from corn sirup and other ingredients and those manufacturing starch-base dessert powders are classified in industry 2099.

2047 **Dog, Cat and Other Pet Food.**—Establishments primarily engaged in manufacturing dog, cat, and other pet food from cereal, meat, and other ingredients. These preparations may be canned, frozen, or dry. This industry also includes establishments slaughtering animals for pet food. Establishments primarily engaged in manufacturing feed for animals, other than pets, are classified in industry 2048.

2048 **Prepared Feeds and Feed Ingredients for Animals and Fowls, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing prepared feeds and feed ingredients and adjuncts, for animals and fowls, not elsewhere classified. This industry in-

cludes poultry and livestock feed and feed ingredients, such as alfalfa meal, feed supplements, feed concentrates, and feed premixes. Establishments primarily engaged in manufacturing pet foods are classified in industry 2047.

205 BAKERY PRODUCTS

2051 **Bread and Other Bakery Products, Except Cookies and Crackers.**—Establishments primarily engaged in manufacturing bread, cakes, and other "perishable" bakery products. Establishments manufacturing bakery products for sale primarily for home service delivery, or through one or more non-baking retail outlets, are included in this industry. Establishments primarily engaged in producing "dry" bakery products, such as biscuits, crackers, and cookies, are classified in industry 2052. Establishments producing bakery products primarily for direct sale on the premises to household consumers are classified in Retail Trade, industry 5462.

2052 **Cookies and Crackers.**—Establishments primarily engaged in manufacturing cookies, crackers, pretzels, and similar "dry" bakery products. Establishments primarily engaged in producing "perishable" bakery products are classified in industry 2051.

206 SUGAR AND CONFECTIONERY PRODUCTS

2061 **Cane Sugar, Except Refining Only.**—Establishments primarily engaged in manufacturing raw sugar, sirup, or finished (granulated or clarified) cane sugar from sugarcane. Establishments primarily engaged in refining sugar from purchased raw cane sirup or sugar sirups are classified in industry 2062.

2062 **Cane Sugar Refining.**—Establishments primarily engaged in refining purchased raw cane sugar and sugar sirup.

2063 **Beet Sugar.**—Establishments primarily engaged in manufacturing sugar from sugar beets.

2065 **Candy and Other Confectionery Products.**—Establishments primarily engaged in manufacturing candy, including chocolate candy, salted nuts, other confections, and related products. Establishments primarily engaged in manufacturing solid chocolate bars are classified in industry 2066 and chewing gum in industry 2067. Establishments primarily engaged in manufacturing confectionery for direct sale on the premises are classified in industry 5441, and those primarily engaged in shelling and roasting nuts are classified in industry 5145.

2066 **Chocolate and Cocoa Products.**—Establishments primarily engaged in shelling, roasting, and grinding cacao beans for the purpose of making chocolate liquor, from which cocoa powder and cocoa butter are derived, and in the further manufacture of solid chocolate bars and chocolate coatings. Establishments primarily engaged in manufacturing products, except candy, from purchased chocolate and cocoa are classified in industry 2099, and chocolate candy in industry 2065.

2067 **Chewing Gum.**—Establishments primarily engaged in manufacturing chewing gum or chewing gum base.

207 FATS AND OILS

2074 **Cottonseed Oil Mills.**—Establishments primarily engaged in manufacturing cottonseed oil and byproduct cake, meal, and linters. Establishments primarily engaged in refining cottonseed oil into edible cooking oils are classified in industry 2079.

2075 **Soybean Oil Mills.**—Establishments primarily engaged in manufacturing soybean oil and byproduct cake and meal. Establishments primarily engaged in refining soybean oil into edible cooking oils are classified in industry 2079.

2076 **Vegetable Oil Mills, Except Corn, Cottonseed, and Soybean.**—Establishments primarily engaged in manufacturing vegetable oils and byproduct cake and meal, except corn, cottonseed, and soybean. Establishments primarily engaged in manufacturing corn oil and its byproducts are classified in industry 2046, those which are refining vegetable oils into edible cooking oils are classified in industry 2079, and those refining these oils for medicinal purposes in industry 2833.

2077 **Animal and Marine Fats and Oils.**—Establishments primarily engaged in manufacturing animal oils, including fish oil and other marine animal oils and fish and animal meal; and those rendering inedible grease and tallow from animal fat, bones, and meat scraps. Establishments primarily engaged in manufacturing lard and edible tallow and stearin are classified in group 201; those refining marine animal oils for medicinal purposes in industry 2833; and those manufacturing fatty acids in industry 2899.

2079 **Shortening, Table Oils, Margarine and Other Edible Fats and Oils, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing shortening, table oils, margarine, and other edible fats and oils, not elsewhere classified, by further processing of purchased animal and vegetable oils. Establishments primarily engaged in producing corn oil are classified in industry 2046.

208 BEVERAGES

2082 **Malt Beverages.**—Establishments primarily engaged in manufacturing all kinds of malt beverages. Establishments primarily engaged in bottling purchased malt beverages are classified in industry 5181.

2083 **Malt.**—Establishments primarily engaged in manufacturing malt or malt byproducts from barley or other grains.

2084 **Wines, Brandy, and Brandy Spirits.**—Establishments primarily engaged in manufacturing wines, brandy, and brandy spirits. This industry also includes bonded storerooms which are engaged in blending wines. Establishments primarily bottling purchased wines, brandy, and brandy spirits, but which do not manufacture wines and brandy, are classified in industry 5182.

2085 **Distilled, Rectified, and Blended Liquors.**—Establishments primarily engaged in manufacturing alcoholic liquors by distillation and rectification and in manufacturing cordials and alcoholic cocktails by blending processes or by mixing liquors and other ingredients. Establishments primarily engaged in manufacturing industrial alcohol are classified in industry 2869, and those only bottling purchased liquors in industry 5182.

2086 **Bottled and Canned Soft Drinks and Carbonated Waters.**—Establishments primarily engaged in manufacturing soft drinks (nonalcoholic beverages) and carbonated waters. Establishments primarily engaged in manufacturing fruit and vegetable juices are classified in group 203, fruit sirups for flavoring in industry 2087, and cider in industry 2099. Establishments primarily engaged in bottling natural spring waters are classified in industry 5149.

2087 **Flavoring Extracts and Flavoring Sirups, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing flavoring extracts, sirups, and fruit juices, not elsewhere classified, for soda fountain use or for the manufacture of soft drinks, and colors for bakers' and confectioners' use. Establishments primarily engaged in manufacturing chocolate sirup are classified in industry 2066 if from cacao beans and in industry 2099 if from purchased chocolate.

209 MISCELLANEOUS FOOD PREPARATIONS AND KINDRED PRODUCTS

2091 **Canned and Cured Fish and Seafoods.**—Establishments primarily engaged in cooking and canning fish, shrimp, oysters, clams, crabs, and other seafoods, including soups; and those engaged in smoking, salting, drying, or otherwise curing fish for the trade. Establishments primarily engaged in shucking and packing fresh oysters in nonsealed containers, or in freezing and packaging fresh fish, are classified in industry 2092.

2092 **Fresh or Frozen Packaged Fish and Seafoods.**—Establishments primarily engaged in preparing fresh and raw or cooked frozen packaged fish and other seafood, including soups. This industry also includes establishments primarily engaged in the shucking and packing of fresh oysters in nonsealed containers.

2095 **Roasted Coffee.**—Establishments primarily engaged in roasting coffee and in manufacturing coffee concentrates and extracts in powdered, liquid, or frozen form, including freeze-dried.

2097 **Manufactured Ice.**—Establishments primarily engaged in manufacturing ice for sale. Ice plants operated by public utility companies are included in this industry when separate reports are available. When separate reports are not available, they should be classified in SIC Major Group 49. Establishments primarily engaged in manufacturing dry ice are classified in industry 2813.

2098 **Macaroni, Spaghetti, Vermicelli, and Noodles.**—Establishments primarily engaged in manufacturing dry macaroni, spaghetti, vermicelli, and noodles. Establishments primarily engaged in manufacturing canned macaroni, spaghetti, etc., are classified in industry 2032.

2099 **Food Preparations, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing prepared foods and miscellaneous food specialties, not elsewhere classified, such as baking powder, yeast, and other leavening compounds; chocolate and cocoa products, except confectionery, made from purchased materials; peanut butter; packaged tea including instant; ground spices; potato, corn, and other chips; and vinegar and cider.

21 TOBACCO MANUFACTURES

This major group includes establishments engaged in manufacturing cigarettes, cigars, smoking and chewing tobacco, and snuff, and in stemming and redrying tobacco. The manufacture of insecticides from tobacco byproducts is included in SIC Major Group 28.

211 CIGARETTES

2111 **Cigarettes.**—Establishments engaged in manufacturing cigarettes.

212 CIGARS

2121 **Cigars.**—Establishments engaged in manufacturing cigars. Retail stores producing cigars are classified in trade industries.

213 TOBACCO (CHEWING AND SMOKING) AND SNUFF

2131 **Tobacco (Chewing and Smoking) and Snuff.**—Establishments engaged in manufacturing smoking and chewing tobaccos, and snuff.

214 TOBACCO STEMMING AND REDRYING

2141 **Tobacco Stemming and Redrying.**—Establishments primarily engaged in the stemming and redrying of tobacco. Establishments which sell leaf tobacco as merchant wholesalers, agents, or brokers, and which may be also engaged in stemming tobacco, are classified in SIC Major Group 51. Leaf tobacco warehouses which may be also engaged in stemming tobacco are classified in SIC Major Group 42.

22 TEXTILE MILL PRODUCTS

This major group includes establishments engaged in performing any of the following operations: (1) Preparation of fiber and subsequent manufacturing yarn, thread, braids, twine, and cordage; (2) manufacturing broadwoven fabric, narrow woven fabric, knit fabric, and carpets and rugs from yarn; (3) dyeing and finishing fiber, yarn, fabric, and knit apparel; (4) coating, waterproofing, or otherwise treating fabric; (5) the integrated manufacture of knit apparel and other finished articles from yarn; and (6) the manufacture of felt goods, lace goods, nonwoven fabrics, and miscellaneous textiles.

This classification makes no distinction between the two types of organizations which operate in the textile industry: (1) The "integrated" mill which purchases materials, produces textiles and related articles within the establishment, and sells the finished products; and (2) the "contract" or "commission" mill which processes materials owned by others. Converters or other nonmanufacturing establishments which assign materials to contract mills for processing (other than knitting) are classified in nonmanufacturing industries; establishments which assign yarns to outside contractors or commission knitters for the production of knit products are classified in group 225.

221 BROADWOVEN FABRIC MILLS, COTTON

2211 **Broadwoven Fabric Mills, Cotton.**—Establishments primarily engaged in weaving fabrics over 12 inches in width, wholly or chiefly by weight of cotton. Establishments primarily engaged in weaving cotton carpets and rugs are classified in industry 2271; those tufting carpets and rugs in industry 2272; those making tire cord and fabric in industry 2296; and finishers of cotton broadwoven fabrics in industry 2261.

222 BROAD WOVEN FABRIC MILLS, MANMADE FIBER AND SILK

2221 **Broadwoven Fabric Mills, Manmade Fiber and Silk.**—Establishments primarily engaged in weaving fabrics over 12 inches in width, wholly or chiefly by weight of silk and manmade fibers, including glass. Establishments primarily engaged in weaving carpets and rugs from these fibers are classified in industry 2271; those tufting carpets and rugs from these fibers in industry 2272; those making tire cord and fabric in industry 2296; and finishers of manmade fiber and silk broadwoven goods in industry 2262.

223 BROADWOVEN FABRIC MILLS, WOOL (INCLUDING DYEING AND FINISHING)

2231 **Broadwoven Fabric Mills, Wool (Including Dyeing and Finishing).**—Establishments primarily engaged in

weaving fabrics over 12 inches in width, wholly or chiefly by weight of wool, mohair, or similar animal fibers; those dyeing and finishing all woven wool fabrics or dyeing wool, tops, or yarn; and those shrinking and sponging wool goods for the trade. Establishments primarily engaged in weaving wool carpets and rugs are classified in industry 2271, and those tufting wool carpets and rugs in industry 2272.

224 NARROW FABRICS AND OTHER SMALLWARES MILLS: COTTON, WOOL, SILK, AND MANMADE FIBER

2241 Narrow Fabrics and Other Smallwares Mills: Cotton, Wool, Silk, and Manmade Fiber.—Establishments primarily engaged in weaving or braiding fabrics 12 inches or narrower in width of cotton, wool, silk, and manmade fibers, including glass fibers. Establishments primarily engaged in producing fabric-covered elastic yarn or thread are also included in this industry.

225 KNITTING MILLS

This group includes three types of organizations which operate in the knitting mill industry: (1) The "integrated" mill which purchases materials, produces textiles and related articles within the establishment, and sells the finished products; (2) the "contract" or "commission" mill which processes materials owned by others; and (3) establishments commonly known as jobbers or converters of knit goods which perform the entrepreneurial functions of a manufacturing company, such as buying the raw material, designing and preparing samples, and assigning yarns to others for knitting products on their account.

2251 Women's Full Length and Knee Length Hosiery.—Establishments primarily engaged in knitting, dyeing, or finishing women's and misses' full length and knee length hosiery, both seamless and full-fashioned, and panty hose.

2252 Hosiery, Except Women's Full Length and Knee Length Hosiery.—Establishments primarily engaged in knitting, dyeing, or finishing hosiery except women's and misses' full length and knee length seamless and full-fashioned hosiery and panty hose.

2253 Knit Outerwear Mills.—Establishments primarily engaged in knitting outerwear from yarn or in manufacturing outerwear from knit fabric produced in the same establishment. Establishments primarily engaged in handknitting outerwear for the trade are included in this industry. Establishments primarily engaged in knitting gloves and mittens are classified in industry 2259, and those manufacturing outerwear from purchased knit fabric in SIC Major Group 23.

2254 Knit Underwear Mills.—Establishments primarily engaged in knitting underwear and nightwear from yarn or in manufacturing underwear and nightwear from knit fabric produced in the same establishment. Establishments primarily engaged in manufacturing underwear and nightwear from purchased knit fabric are classified in SIC Major Group 23.

2257 Circular Knit Fabric Mills.—Establishments primarily engaged in knitting circular (tubular) fabric or in dyeing or finishing circular (tubular) knit fabric. Establishments primarily engaged in knitting, dyeing, or finishing warp fabric are classified in industry 2258.

2258 Warp Knit Fabric Mills.—Establishments primarily engaged in knitting warp (flat) fabric or in dyeing or finishing warp (flat) knit fabric. Establishments primarily engaged in knitting, dyeing, or finishing circular fabric are classified in industry 2257.

2259 Knitting Mills, Not Elsewhere Classified.—Establishments primarily engaged in knitting gloves and other articles not elsewhere classified. Establishments primarily engaged in manufacturing woven or knit fabric gloves and mittens from purchased fabrics are classified in industry 2381.

226 DYEING AND FINISHING TEXTILES, EXCEPT WOOL FABRICS AND KNIT GOODS

2261 Finishers of Broadwoven Fabrics of Cotton.—Establishments primarily engaged in finishing purchased cotton broadwoven fabrics or finishing such fabrics on a commission basis. These finishing operations include bleaching, dyeing, printing (roller, screen, flock, plisse), and other mechanical finishing such as preshrinking, calendering, and napping. This industry also includes the shrinking and sponging of cloth for the trade, and chemical finishing for water repellency, fire resistance, and mildew proofing. Establishments primarily engaged in finishing wool broadwoven fabrics are classified in industry 2231; knit goods in group 225; and those coating or impregnating fabrics in industry 2295.

2262 **Finishers of Broadwoven Fabrics of Manmade Fiber and Silk.**—Establishments primarily engaged in finishing purchased manmade fiber and silk broadwoven fabrics or finishing such fabrics on a commission basis. These finishing operations include bleaching, dyeing, printing (roller, screen, flock, plisse), and other mechanical finishing such as preshrinking, calendering, and napping. Establishments primarily engaged in finishing wool broadwoven fabrics are classified in industry 2231; knit goods in group 225; and those coating or impregnating fabrics in industry 2295.

2269 **Finishers of Textiles, Not Elsewhere Classified.**—Establishments primarily engaged in dyeing and finishing textiles, not elsewhere classified, such as bleaching, dyeing, printing, and finishing of raw stock, yarn, braided goods, and narrow fabrics, except wool and knit fabrics. These establishments perform finishing operations on purchased textiles or on a commission basis.

227 FLOOR COVERING MILLS

2271 **Woven Carpets and Rugs.**—Establishments primarily engaged in weaving carpets and rugs from any textile yarn. Important products of this industry include Axminster, Wilton, velvet, and similar woven carpets and rugs; and woven automobile and aircraft floor coverings.

2272 **Tufted Carpets and Rugs.**—Establishments primarily engaged in tufting carpets and rugs from any textile fiber. Important products of this industry include tufted carpets, rugs, scatter rugs, and bathmats and bathmat sets except terry woven. Finishers of these products are also included in this industry.

2279 **Carpets and Rugs, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing rugs, carpets, art squares, floor mattings, needle punch carpeting, and doormats and mattings from twisted paper, grasses, reeds, coir, sisal, jute, or rags. Establishments primarily engaged in manufacturing hard-surface floor coverings, except rubber and cork, are classified in industry 3996.

228 YARN AND THREAD MILLS

2281 **Yarn Spinning Mills: Cotton, Manmade Fibers and Silk.**—Establishments primarily engaged in spinning yarn wholly or chiefly by weight of cotton, manmade fibers, or silk. Establishments primarily engaged in dyeing or finishing purchased yarns or finishing yarns on a commission basis are classified in industry 2269.

2282 **Yarn Texturizing, Throwing, Twisting, and Winding Mills: Cotton, Manmade Fibers and Silk.**—Establishments primarily engaged in texturizing, throwing, twisting, winding or spooling yarn wholly or chiefly by weight of cotton, manmade fibers, or silk. Establishments primarily engaged in dyeing or finishing purchased yarns or finishing yarns on a commission basis are classified in industry 2269.

2283 **Yarn Mills, Wool, Including Carpet and Rug Yarn.**—Establishments primarily engaged in spinning, twisting, winding, or spooling yarn (including carpet and rug yarn) wholly or chiefly by weight of wool, mohair, or similar animal fibers. Establishments primarily engaged in dyeing or finishing purchased wool yarn or finishing wool yarn on a commission basis are classified in industry 2231.

2284 **Thread Mills.**—Establishments primarily engaged in manufacturing thread from natural or manmade fiber except flax (industry 2299) and wool (industry 2283). Important products of this industry include sewing, crochet, darning, embroidery, tatting, handknitting, and other handicraft threads.

229 MISCELLANEOUS TEXTILE GOODS

2291 **Felt Goods, Except Woven Felts and Hats.**—Establishments primarily engaged in manufacturing pressed felt, regardless of fiber, by means of heat, moisture, and pressure; and those making punched felt for rugs, cushions, and other products from hair, jute, wool, or other fibers by the needle loom process. Establishments primarily engaged in manufacturing woven wool felts and wool haircloth are classified in industry 2231, those manufacturing felt hats in group 235, and those manufacturing needle punch carpeting in industry 2279.

2292 **Lace Goods.**—Establishments primarily engaged in manufacturing lace machine products, and those primarily engaged in dyeing and finishing lace goods. Establishments primarily engaged in manufacturing Schiffli machine embroideries are classified in industry 2397. Establishments primarily engaged in manufacturing knitted lace and netting are classified in industry 2258.

2293 Paddings and Upholstery Filling.—Establishments primarily engaged in manufacturing batting, padding, wadding, and filling for upholstery, pillows, quilts, and apparel, from curled hair, cotton-mill waste, moss, hemp tow, flax tow, kapok, and related materials. Establishments primarily engaged in manufacturing wood excelsior pads and wrappers are classified in industry 2429.

2294 Processed Waste and Recovered Fibers and Flock.—Establishments primarily engaged in processing textile mill waste for spinning, padding, batting, or other uses; in recovering textile fibers from clippings and rags; in cutting flock from waste, recovered fibers, or new fiber stock; and in manufacturing oakum and twisted jute packing. Establishments primarily engaged in cleaning and sorting wiping rags or waste are classified in industry 5093.

2295 Coated Fabrics, Not Rubberized.—Establishments primarily engaged in manufacturing coated and impregnated textiles and in the special finishing of textiles, such as varnishing and waxing. Establishments primarily engaged in rubberizing purchased fabrics are classified in industry 3069, and those primarily engaged in dyeing and finishing textiles in group 226.

2296 Tire Cord and Fabric.—Establishments primarily engaged in manufacturing cord and fabric for use in reinforcing rubber tires, industrial belting, fuel cells, and similar uses.

2297 Nonwoven Fabrics.—Establishments primarily engaged in manufacturing nonwoven fabrics (by bonding and/or interlocking of fibers) by mechanical, chemical, thermal, or solvent means or by combinations thereof. Establishments primarily engaged in producing fabrics by the wool felting process are classified in other industries in this major group.

2298 Cordage and Twine.—Establishments primarily engaged in manufacturing rope, cable, cordage, twine, and related products from abaca (Manila), sisal, henequen, hemp, cotton, paper, jute, flax, manmade fibers including glass, and other fibers.

2299 Textile Goods, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing linen goods, jute goods except felt, and other textile goods not elsewhere classified. Establishments primarily engaged in processing textile fibers to prepare them for spinning, such as wool scouring and carbonizing and combing and converting tow to top, are also classified here. Establishments primarily engaged in manufacturing woven felts are classified in industry 2231, nonwoven felts in industry 2291, nonwoven textiles in industry 2297, and cordage and twine in industry 2298.

23 APPAREL AND OTHER FINISHED PRODUCTS MADE FROM FABRICS AND SIMILAR MATERIALS

This major group, known as the cutting-up and needle trades, includes establishments producing clothing and fabricating products by cutting and sewing purchased woven or knit textile fabrics and related materials such as leather, rubberized fabrics, plastics, and furs.

Included in the apparel industries are three types of establishments: (1) The "regular" or inside factories, (2) contract factories, and (3) apparel jobbers. The regular factories perform all of the usual manufacturing functions within their own plant; the contract factories manufacture apparel from materials owned by others; and apparel jobbers perform the entrepreneurial functions of a manufacturing company, such as buying raw materials, designing and preparing samples, arranging for the manufacture of the garments from their materials, and selling of the finished apparel.

Custom tailors and dressmakers not operating on a factory basis are classified in industry 5699; establishments which purchase and resell finished garments but do not perform the functions of the apparel jobbers are classified in group 513.

231 MEN'S, YOUTHS', AND BOYS' SUITS, COATS, AND OVERCOATS

2311 Men's, Youths', and Boys' Suits, Coats, and Overcoats.—Establishments primarily engaged in manufacturing men's, youths', and boys' tailored suits, coats, and overcoats. Establishments primarily engaged in manufacturing uniforms (except athletic uniforms) are also included in this industry. Establishments primarily engaged in manufacturing men's work garments are classified in industry 2328.

232 MEN'S, YOUTHS', AND BOYS' FURNISHINGS, WORK CLOTHING, AND ALLIED GARMENTS

2321 Men's, Youths', and Boys' Shirts (Except Work Shirts) and Nightwear.—Establishments primarily

engaged in manufacturing men's, youths', and boys' shirts (including polo and sports shirts) and nightwear, cut and sewed from purchased woven or knit fabric. Establishments primarily engaged in manufacturing work shirts are classified in industry 2328. Knitting mills primarily engaged in manufacturing nightwear are classified in industry 2254, and outerwear in industry 2253.

2322 **Men's, Youths', and Boys' Underwear.**—Establishments primarily engaged in manufacturing men's, youths', and boys' underwear, cut and sewed from purchased woven or knit fabric. Knitting mills primarily engaged in manufacturing underwear are classified in industry 2254.

2323 **Men's, Youths', and Boys' Neckwear.**—Establishments primarily engaged in manufacturing men's, youths', and boys' neckties, scarfs, and mufflers, cut and sewed from purchased woven or knit fabric. Knitting mills primarily engaged in manufacturing neckties, scarfs, and mufflers are classified in industry 2253.

2327 **Men's, Youths', and Boys' Separate Trousers.**—Establishments primarily engaged in manufacturing men's, youths', and boys' separate trousers and slacks. Establishments primarily engaged in manufacturing complete suits are classified in industry 2311, and work pants and jeans in industry 2328.

2328 **Men's, Youths', and Boys' Work Clothing.**—Establishments primarily engaged in manufacturing men's, youths', and boys' work shirts, pants, jeans, and other work clothing and washable service apparel.

2329 **Men's, Youths', and Boys' Clothing, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing men's, youths', and boys' clothing not elsewhere classified. Establishments primarily engaged in manufacturing polo and sport shirts from purchased woven or knit materials are classified in industry 2321; separate trousers in industry 2327; work clothing in industry 2328; and leather and sheep lined garments in industry 2386. Knitting mills primarily engaged in manufacturing outerwear are classified in industry 2253.

233 WOMEN'S, MISSES', AND JUNIORS' OUTERWEAR

2331 **Women's, Misses', and Juniors' Blouses, Waists, and Shirts.**—Establishments primarily engaged in manufacturing women's, misses', and juniors' blouses, waists, and shirts. Knitting mills primarily engaged in manufacturing outerwear are classified in industry 2253. Establishments primarily engaged in manufacturing girls', children's, and infants' blouses, waists, and shirts are classified in industry 2361.

2335 **Women's, Misses', and Juniors' Dresses.**—Establishments primarily engaged in manufacturing women's, misses', and juniors' dresses, including ensemble dresses and pants dresses, whether sold by the piece or by the dozen. Establishments primarily engaged in manufacturing girls', children's, and infants' dresses are classified in industry 2361.

2337 **Women's, Misses', and Juniors' Suits, Skirts, and Coats.**—Establishments primarily engaged in manufacturing women's, misses', and juniors' suits, pantsuits, skirts, and coats except furcoats and raincoats. These garments are generally tailored and usually lined. Establishments primarily engaged in manufacturing fur garments are classified in industry 2371, raincoats in industry 2385, and knitting mills primarily engaged in manufacturing knit outerwear in industry 2253.

2339 **Women's, Misses', and Juniors' Outerwear, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing women's, misses', and juniors' outerwear, not elsewhere classified, cut and sewed from purchased woven or knit fabric. Knitting mills primarily engaged in manufacturing outerwear are classified in industry 2253.

234 WOMEN'S, MISSES', CHILDREN'S, AND INFANTS' UNDERGARMENTS

2341 **Women's, Misses', Children's, and Infants' Underwear and Nightwear.**—Establishments primarily engaged in manufacturing women's, misses', children's, and infants' underwear and nightwear, cut and sewed from purchased woven or knit fabric. Knitting mills primarily engaged in manufacturing underwear and nightwear are classified in industry 2254.

2342 **Brassieres, Girdles, and Allied Garments.**—Establishments primarily engaged in manufacturing brassieres, girdles, corsets, corset accessories, and allied garments. Establishments primarily engaged in manufacturing surgical and orthopedic appliances are classified in industry 3842.

235 HATS, CAPS, AND MILLINERY

2351 Millinery.—Establishments primarily engaged in manufacturing women's, misses', children's, and infants' millinery. Establishments primarily engaged in manufacturing millinery braid and trimmings are classified in industry 2396.

2352 Hats and Caps, Except Millinery.—Establishments primarily engaged in manufacturing hats and caps (except millinery) and all hat bodies. Knitting mills primarily engaged in manufacturing caps are classified in industry 2253.

236 GIRLS', CHILDREN'S, AND INFANTS' OUTERWEAR

2361 Girls', Children's, and Infants' Dresses, Blouses, Waists, and Shirts.—Establishments primarily engaged in manufacturing girls', children's, and infants' dresses, blouses, waists, and shirts, cut and sewed from purchased woven or knit fabric. Knitting mills primarily engaged in manufacturing outerwear are classified in industry 2253.

2363 Girls', Children's, and Infants' Coats and Suits.—Establishments primarily engaged in manufacturing girls', children's, and infants' coats and suits, cut and sewed from purchased woven or knit fabric. Knitting mills primarily engaged in manufacturing outerwear are classified in industry 2253.

2369 Girls', Children's, and Infants' Outerwear, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing girls', children's, and infants' outerwear, not elsewhere classified, cut and sewed from purchased woven or knit fabric. Knitting mills primarily engaged in manufacturing outerwear are classified in industry 2253.

237 FUR GOODS

2371 Fur Goods.—Establishments primarily engaged in manufacturing furcoats, and other garments, accessories, and trimmings made of fur. Establishments primarily engaged in manufacturing sheep lined clothing are classified in industry 2386, and those engaged in dyeing and dressing of furs in industry 3999.

238 MISCELLANEOUS APPAREL AND ACCESSORIES

2381 Dress and Work Gloves, Except Knit and All-Leather.—Establishments primarily engaged in manufacturing dress, semidress, and work gloves and mittens, cut and sewed from purchased woven or knit fabric, or these materials combined with leather or plastic. Knitting mills primarily engaged in manufacturing gloves and mittens are classified in industry 2259, establishments primarily engaged in manufacturing leather gloves in industry 3151, those manufacturing rubber gloves in industry 3069, and plastic gloves in industry 3079.

2384 Robes and Dressing Gowns.—Establishments primarily engaged in manufacturing men's and women's robes and dressing gowns.

2385 Raincoats and Other Waterproof Outer Garments.—Establishments primarily engaged in manufacturing raincoats from purchased rubberized fabrics and other waterproof outer garments made from such material as pliofilm and cellophane. Establishments primarily engaged in manufacturing oiled fabric work garments are classified in industry 2328, and those manufacturing vulcanized rubber garments and garments made from rubberized fabrics produced in the same establishment are classified in industry 3069.

2386 Leather and Sheep Lined Clothing.—Establishments primarily engaged in manufacturing leather and sheep lined garments. Establishments primarily engaged in manufacturing leather gloves and mittens are classified in industry 3151, and fur garments in industry 2371.

2387 Apparel Belts.—Establishments primarily engaged in manufacturing men's and women's apparel belts, regardless of material.

2389 Apparel and Accessories, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing suspenders, garters, handkerchiefs, and other apparel, not elsewhere classified, such as academic caps and gowns, vestments, and theatrical costumes.

239 MISCELLANEOUS FABRICATED TEXTILE PRODUCTS

2391 Curtains and Draperies.—Establishments primarily engaged in manufacturing curtains and draperies from

purchased materials. Establishments primarily engaged in manufacturing lace curtains on lace machines are classified in industry 2292.

2392 **Housefurnishings, Except Curtains and Draperies.**—Establishments primarily engaged in manufacturing housefurnishings, such as blankets, bedspreads, sheets, tablecloths, and towels from purchased materials. Establishments primarily engaged in manufacturing curtains and draperies are classified in industry 2391. Establishments producing housefurnishings primarily of fabric woven at the same establishment are classified according to fiber in industries 2211, 2221, or 2231.

2393 **Textile Bags.**—Establishments primarily engaged in manufacturing shipping and other industrial bags from purchased fabric. Establishments primarily engaged in manufacturing plastic bags are classified in industry 2643; laundry, wardrobe, shoe, and other textile housefurnishing bags in industry 2392; and luggage in industry 3161.

2394 **Canvas and Related Products.**—Establishments primarily engaged in manufacturing awnings, tents, and related products from purchased fabric. Establishments primarily engaged in manufacturing canvas bags are classified in industry 2393.

2395 **Pleating, Decorative and Novelty Stitching, and Tucking for the Trade.**—Establishments primarily engaged in pleating, decorative and novelty stitching, and tucking for the trade. Establishments primarily engaged in performing similar services for individuals are classified in service industries. Establishments primarily engaged in manufacturing trimmings are classifled in industry 2396.

2396 **Automotive Trimmings, Apparel Findings, and Related Products.**—Establishments primarily engaged in manufacturing automotive trimmings and apparel findings and related products.

2397 **Schiffli Machine Embroideries.**—Establishments primarily engaged in manufacturing Schiffli machine embroideries.

2399 **Fabricated Textile Products, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing fabricated textile products not elsewhere classified.

24 LUMBER AND WOOD PRODUCTS, EXCEPT FURNITURE

This major group includes logging camps engaged in cutting timber and pulpwood; merchant sawmills, lath mills, shingle mills, cooperage stock mills, planing mills, and plywood mills and veneer mills engaged in producing lumber and wood basic materials; and establishments engaged in manufacturing finished articles made entirely or mainly of wood or wood substitutes. Certain types of establishments producing wood products are classified elsewhere. For example, furniture and office and store fixtures are classified in SIC Major Group 25; musical instruments, toys, playground equipment, and caskets in SIC Major Group 39. Woodworking in connection with construction in the nature of reconditioning and repair or performed to individual order, is classified in nonmanufacturing industries.

241 LOGGING CAMPS AND LOGGING CONTRACTORS

2411 **Logging Camps and Logging Contractors.**—Logging camps and logging contractors primarily engaged in cutting timber and in producing rough, round, hewn, or riven primary forest or wood raw materials. Independent contractors engaged in estimating or trucking timber, but who perform no cutting operations, are classified in nonmanufacturing industries. Logging and woods operations conducted in combination with sawmills, pulpmills, or other converting establishments, and not separately reported, are classified in their respective industry groups; namely, with sawmills in SIC group 242, veneer and plywood mills in SIC group 243, pulpmills in SIC Major Group 26, and charcoal and wood distillation plants in SIC group 286. Establishments primarily engaged in the collection of bark, sap, gum, and other forest byproducts are classified in SIC Major Group 08.

242 SAWMILLS AND PLANING MILLS

2421 **Sawmills and Planing Mills, General.**—Establishments primarily engaged in sawing rough lumber and timber from logs and bolts, or resawing cants and flitches into lumber, including box lumber and softwood cut stock; planing mills combined with sawmills; and separately operated planing mills which are engaged primarily in producing surfaced

lumber and standard workings or patterns of lumber. This industry includes establishments primarily engaged in sawing lath and railroad ties and in producing tobacco hogshead stock, wood chips, and snow fence lath. Establishments primarily engaged in manufacturing box shook or boxes are classified in SIC group 244; sash, doors, wood molding, window and door frames, and other fabricated millwork in SIC group 243; and hardwood dimension and flooring in industry 2426. Logging camps combined with sawmills, when not separately reported, are included in this industry.

2426 **Hardwood Dimension and Flooring Mills.**—Establishments primarily engaged in manufacturing hardwood dimension lumber and workings therefrom; other hardwood dimension, semifabricated or ready for assembly; hardwood flooring; and wood frames for household furniture. Establishments primarily engaged in manufacturing stairwork, molding, and trim are classified in industry 2431; and those manufacturing textile machinery bobbins, picker sticks, and shuttles in industry 3552.

2429 **Special Product Sawmills, Not Elsewhere Classified.**—Mills primarily engaged in manufacturing excelsior, wood shingles, and cooperage stock; and in sawing special products not elsewhere classified.

243 MILLWORK, VENEER, PLYWOOD, AND STRUCTURAL WOOD MEMBERS

2431 **Millwork.**—Establishments primarily engaged in manufacturing fabricated millwork. Planing mills primarily engaged in producing millwork are included in this industry, but planing mills primarily producing standard workings or patterns of lumber are classified in industry 2421. Establishments primarily manufacturing wood kitchen cabinets and bathroom vanities are classified in industry 2434.

2434 **Wood Kitchen Cabinets.**—Establishments primarily engaged in manufacturing wood kitchen cabinets and wood bathroom vanities.

2435 **Hardwood Veneer and Plywood.**—Establishments primarily engaged in producing commercial hardwood veneer, either face or technical, and those primarily engaged in manufacturing commercial plywood or prefinished hardwood plywood. This includes nonwood backed or faced veneer and nonwood faced plywood from veneer produced in the same establishment or from purchased veneer. Establishments primarily engaged in the production of veneer which is used in the same establishment for the manufacture of end products such as fruit and vegetable baskets and wood boxes are classified in industries 2441 and 2449.

2436 **Softwood Veneer and Plywood.**—Establishments primarily engaged in producing commercial softwood veneer and plywood from veneer produced in the same establishment or from purchased veneer. Establishments primarily engaged in producing commercial hardwood veneer and plywood are classified in industry 2435. Establishments primarily engaged in the production of veneer which is used in the same establishment for the manufacture of end products such as fruit and vegetable baskets and wood boxes are classified in industries 2441 and 2449.

2439 **Structural Wood Members, Not Elsewhere Classified.**—Establishments primarily engaged in producing laminated or fabricated trusses, arches, and other structural members of lumber. Establishments primarily engaged in fabrication on the site of construction are classified in Division C, Construction. Establishments primarily engaged in producing prefabricated wooden buildings, sections, and panels are classified in industry 2452.

244 WOOD CONTAINERS

2441 **Nailed and Lock Corner Wood Boxes and Shook.**—Establishments primarily engaged in manufacturing nailed and lock corner wood boxes (lumber or plywood) and those which also may produce shook for nailed and lock corner boxes.

2448 **Wood Pallets and Skids.**—Establishments primarily engaged in manufacturing wood and wood-metal combination pallets and skids.

2449 **Wood Containers, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing wood containers, not elsewhere classified, such as cooperage, wirebound boxes and crates, and other veneer and plywood containers. Establishments primarily engaged in manufacturing tobacco hogshead stock are classified in industry 2421, and those manufacturing cooperage stock in industry 2429.

245 WOOD BUILDINGS AND MOBILE HOMES

2451 Mobile Homes.—Establishments primarily engaged in manufacturing mobile homes. These mobile homes are generally over 35 feet long, at least 8 feet wide, do not have facilities for storage of water or waste, and are equipped with wheels. These products may also have nonresidential uses such as classrooms or offices. Trailers that are generally 35 feet long or less, 8 feet wide or less, and with self-contained facilities are classified in industry 3792. Portable buildings not equipped with wheels are classified in industry 2452.

2452 Prefabricated Wood Buildings and Components.—Establishments primarily engaged in manufacturing prefabricated wood buildings, sections, and panels. Establishments primarily engaged in fabricating buildings on the site of construction are classified in Division C, Construction.

249 MISCELLANEOUS WOOD PRODUCTS

2491 Wood Preserving.—Establishments primarily engaged in treating wood, sawed or planed in other establishments, with creosote or other preservatives to prevent decay and to protect against fire and insects. This industry also includes the cutting, treating, and selling of poles, posts, and piling, but establishments primarily engaged in manufacturing other wood products, which they may also treat with preservatives, are not included.

2492 Particleboard.—Establishments primarily engaged in manufacturing wood panel products from small wood particles. This includes preparation of small particles of wood, drying, mixing with a synthetic resin binder, and compressing. Pressing may take place in hydraulic presses with heated platens or by extrusion.

2499 Wood Products, Not Elsewhere Classified.—Establishments primarily engaged in turning and shaping wood and manufacturing miscellaneous wood products, not elsewhere classified, from rattan, reed, splint, straw, veneer, veneer strips, wicker, and willow. This industry also includes establishments manufacturing lasts and related products, cork products, hardboard, and wood or metal mirror and picture frames. Establishments primarily engaged in manufacturing particleboard are classified in industry 2492, and those manufacturing pallets and skids in industry 2448.

25 FURNITURE AND FIXTURES

This major group includes establishments engaged in manufacturing household, office, public building, and restaurant furniture; and office and store fixtures. Establishments primarily engaged in the production of millwork are classified in industry 2431; wood kitchen cabinets in industry 2434; cut stone and concrete furniture in SIC Major Group 32; laboratory and hospital furniture in SIC Major Group 38; beauty and barber shop furniture in SIC Major Group 39; and woodworking to individual order or in the nature of reconditioning and repair in nonmanufacturing industries.

251 HOUSEHOLD FURNITURE

2511 Wood Household Furniture, Except Upholstered.—Establishments primarily engaged in manufacturing wood household furniture commonly used in dwellings. This industry also includes establishments manufacturing camp furniture. Establishments primarily engaged in manufacturing upholstered furniture are classified in industry 2512; reed and rattan furniture in industry 2519; television, radio, phonograph, and sewing machine cabinets in industry 2517; and kitchen cabinets and bathroom vanities in industry 2434.

2512 Wood Household Furniture, Upholstered.—Establishments primarily engaged in manufacturing upholstered furniture on wood frames. Shops primarily engaged in reupholstering furniture, or upholstering frames to individual order, are classified in nonmanufacturing industries. Establishments primarily engaged in manufacturing dual-purpose sleep furniture, such as studio couches, sofa beds, and chair beds, are classified in industry 2515, regardless of the material used in the frame. Establishments primarily engaged in manufacturing wood frames for upholstered furniture are classified in industry 2426.

2514 Metal Household Furniture.—Establishments primarily engaged in manufacturing padded or plain metal household furniture of a type commonly used in dwellings. Establishments primarily engaged in manufacturing dual-purpose sleep furniture, such as studio couches, sofa beds, and chair beds, are classified in industry 2515, regardless of the material used in the frame.

2515 **Mattresses and Bedsprings.**—Establishments primarily engaged in manufacturing innerspring mattresses, box spring mattresses, and noninnerspring mattresses containing felt, form rubber, urethane, hair, or any other filling material; and assembled wire springs (fabric, coil, or box) for use on beds, couches, and cots. This industry also includes establishments primarily engaged in manufacturing dual-purpose sleep furniture, such as studio couches, sofa beds, and chair beds, regardless of the material used in the frame. Establishments primarily engaged in manufacturing automobile seats and backs are classified in industry 2531; individual wire springs in industry 3495; and paddings and upholstery filling in industry 2293.

2517 **Wood Television, Radio, Phonograph, and Sewing Machine Cabinets.**—Establishments primarily engaged in manufacturing wood cabinets for radios, television sets, phonographs, and sewing machines.

2519 **Household Furniture, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing reed, rattan, and other wicker furniture, plastics and fiberglass household furniture and cabinets, and household furniture not elsewhere classified.

252 OFFICE FURNITURE

2521 **Wood Office Furniture.**—Establishments primarily engaged in manufacturing wood office furniture, whether padded, upholstered, or plain.

2522 **Metal Office Furniture.**—Establishments primarily engaged in manufacturing metal office furniture, whether padded or plain. Establishments primarily engaged in manufacturing safes and vaults are classified in industry 3499.

253 PUBLIC BUILDING AND RELATED FURNITURE

2531 **Public Building and Related Furniture.**—Establishments primarily engaged in manufacturing furniture for schools, theaters, assembly halls, churches, and libraries. Establishments primarily engaged in manufacturing seats for public conveyances, as well as seats for automobiles and aircraft, are included in this industry. Establishments primarily engaged in manufacturing stone furniture are classified in industry 3281, and concrete furniture in industry 3272.

254 PARTITIONS, SHELVING, LOCKERS, AND OFFICE AND STORE FIXTURES

2541 **Wood Partitions, Shelving, Lockers, and Office and Store Fixtures.**—Establishments primarily engaged in manufacturing wood shelving, lockers, office and store fixtures, prefabricated partitions, plastic laminated fixture tops, and related fabricated products. Establishments primarily engaged in manufacturing refrigerated cabinets, show cases, and display cases are classified in industry 3585, and safes and vaults in industry 3499.

2542 **Metal Partitions, Shelving, Lockers, and Office and Store Fixtures.**—Establishments primarily engaged in manufacturing metal shelving, storage racks, lockers, office and store fixtures, prefabricated partitions, and related fabricated products. Establishments primarily engaged in manufacturing refrigerated cabinets, show cases, and display cases are classified in industry 3585, and safes and vaults in industry 3499.

259 MISCELLANEOUS FURNITURE AND FIXTURES

2591 **Drapery Hardware and Window Blinds and Shades.**—Establishments primarily engaged in manufacturing curtain and drapery rods, poles, and fixtures; and venetian blinds and other window blinds and shades, regardless of the materials used, except canvas shades and awnings (industry 2394).

2599 **Furniture and Fixtures, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing furniture and fixtures, not elsewhere classified, including furniture specially designed for use in restaurants, bars, cafeterias, bowling establishments, and ships.

26 PAPER AND ALLIED PRODUCTS

This major group includes the manufacture of pulps from wood and other cellulose fibers, and from rags; the manufacture of paper and paperboard; and the manufacture of paper and paperboard into converted products such as paper coated off the paper machine, paper bags, paper boxes and envelopes. Certain types of converted paper products are classified elsewhere, such as abrasive paper in industry 3291, carbon paper in industry 3955, and photosensitized and blueprint paper in industry 3861.

261 PULPMILLS

2611 Pulpmills.—Establishments primarily engaged in manufacturing pulp from wood or from other materials such as rags, linters, wastepaper, and straw. Logging camps operated by pulpmills, and not separately reported, are also included in this industry. Establishments primarily engaged in cutting pulpwood are classified in industry 2411; and pulpmills combined with papermills or paperboard mills, and not separately reported, are classified with the latter in industries 2621 and 2631, respectively.

262 PAPERMILLS, EXCEPT BUILDING PAPERMILLS

2621 Papermills, Except Building Papermills.—Establishments primarily engaged in manufacturing paper (except building paper—industry 2661) from woodpulp and other fibers, and which may also manufacture converted paper products. Pulpmills combined with papermills, and not separately reported, are also included in this industry; where separately reported, they are classified in industry 2611. Establishments primarily engaged in manufacturing converted paper products from purchased paper stock are classified in SIC groups 264 or 265.

263 PAPERBOARD MILLS

2631 Paperboard Mills.—Establishments primarily engaged in manufacturing paperboard, including paperboard coated on the paperboard machine, from woodpulp and other fibers; and which may also manufacture converted paperboard products. Pulpmills combined with paperboard mills, and not separately reported, are also included in this industry; where separately reported, they are classified in industry 2611. Establishments primarily engaged in manufacturing converted paperboard products from purchased paperboard are classified in SIC groups 264 or 265, and building board in industry 2661.

264 CONVERTED PAPER AND PAPERBOARD PRODUCTS, EXCEPT CONTAINERS AND BOXES

2641 Paper Coating and Glazing.—Establishments primarily engaged in manufacturing coated, glazed, or varnished paper from purchased paper. Also included are establishments primarily manufacturing pressure sensitive tape with backing of any material other than rubber. Establishments primarily engaged in manufacturing carbon paper are classified in industry 3955, and photographic and blueprint paper in industry 3861.

2642 Envelopes.—Establishments primarily engaged in manufacturing envelopes of any description from purchased paper and paperboard. Establishments primarily engaged in manufacturing papeteries (boxed stationery) are classified in industry 2648.

2643 Bags, Except Textile Bags.—Establishments primarily engaged in manufacturing bags from purchased paper, cellophane, acetate, polyethylene, polypropylene, pliofilm, foil, and similar sheet or film materials.

2645 Die-Cut Paper and Paperboard and Cardboard.—Establishments primarily engaged in diecutting purchased paper and paperboard; and in manufacturing cardboard by laminating, lining, or surface coating paperboard. Establishments primarily engaged in laminating building paper or building board from purchased paper or board are classified in industry 2649.

2646 Pressed and Molded Pulp Goods.—Establishments primarily engaged in manufacturing all kinds of pressed and molded pulp goods, including papier-mache articles other than statuary and art goods (industry 3299). Establishments primarily engaged in manufacturing plates and utensils from paper are classified in industry 2654.

2647 Sanitary Paper Products.—Establishments primarily engaged in manufacturing, from purchased paper, sanitary paper products, such as facial tissues and handkerchiefs, table napkins, toilet paper, towels, disposable diapers, and sanitary napkins and tampons.

2648 Stationery, Tablets, and Related Products.—Establishments primarily engaged in manufacturing stationery, tablets, looseleaf fillers, and related items from purchased paper. Establishments primarily engaged in manufacturing envelopes are classified in industry 2642.

2649 Converted Paper and Paperboard Products, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing from purchased paper or paperboard miscellaneous converted paper or paperboard

products not elsewhere classified. Establishments primarily engaged in manufacturing sanitary paper products from purchased paper are classified in industry 2647. The paper stock used for wallpaper, called "hanging paper," is classified in industry 2621. Establishments primarily engaged in manufacturing stationery, tablets, and related products are classified in industry 2648.

265 PAPERBOARD CONTAINERS AND BOXES

2651 Folding Paperboard Boxes.—Establishments primarily engaged in manufacturing folding paperboard boxes from purchased paperboard.

2652 Set-up Paperboard Boxes.—Establishments primarily engaged in manufacturing set-up paperboard boxes from purchased paperboard.

2653 Corrugated and Solid Fiber Boxes.—Establishments primarily engaged in manufacturing corrugated and solid fiber boxes and related products from purchased paperboard of fiber stock. Important products of this industry include corrugated and solid fiberboard boxes, pads, partitions, display items, pallets, single-face products, and corrugated sheets.

2654 Sanitary Food Containers.—Establishments primarily engaged in manufacturing food containers from special food board. Important products of this industry include fluid milk containers; folding paraffined cartons for butter, margarine, and shortening; ice cream containers; frozen food containers; liquid tight containers; round nested food containers; paper cups for hot or cold drinks; pails for food and ice cream; and stamped plates, dishes, spoons, and similar products. Establishments primarily engaged in manufacturing similar items of plastics materials are classified in industry 3079.

2655 Fiber Cans, Tubes, Drums, and Similar Products.—Establishments primarily engaged in manufacturing from purchased materials fiber cans, cones, drums, similar products with or without metal ends, and vulcanized fiber boxes.

266 BUILDING PAPER AND BUILDING BOARD MILLS

2661 Building Paper and Building Board Mills.—Establishments primarily engaged in manufacturing building paper and building board from woodpulp and other fibrous materials. Pulpmills combined with building paper and building board mills, and not separately reported, are also included in this industry; where separately reported, they are classified in industry 2611.

27 PRINTING, PUBLISHING, AND ALLIED INDUSTRIES

This major group includes establishments engaged in printing by one or more of the common processes, such as letterpress, lithography, gravure, or screen; and those establishments which perform services for the printing trade, such as bookbinding, typesetting, engraving, photoengraving, and electrotyping. This major group also includes establishments engaged in publishing newspapers, books, and periodicals, regardless of whether or not they do their own printing. News syndicates are classified in service industries, (industry 7351) and textile printing and finishing in SIC Major Group 22.

271 NEWSPAPERS: PUBLISHING, PUBLISHING AND PRINTING

2711 Newspapers: Publishing, Publishing and Printing.—Establishments primarily engaged in publishing newspapers or in publishing and printing newspapers. These establishments carry on the various operations necessary for issuing newspapers, including the gathering of news and the preparation of editorials and advertisements, but may or may not perform their own printing. Commercial printing is frequently carried on by establishments engaged in publishing and printing newspapers, but, even though the commercial printing may be of major importance, such establishments are included in this industry. Establishments not engaged in publishing newspapers, but which print or lithograph newspapers for publishers, are classified in SIC group 275. News syndicates are classified in service industries (industry 7351).

272 PERIODICALS: PUBLISHING, PUBLISHING AND PRINTING

2721 Periodicals: Publishing, Publishing and Printing.—Establishments primarily engaged in publishing periodicals or in preparing, publishing, and printing

periodicals. These establishments carry on the various operations necessary for issuing periodicals, but may or may not perform their own printing. Establishments not engaged in publishing periodicals, but which print or lithograph periodicals for publishers, are classified in SIC group 275.

273 BOOKS

2731 Books: Publishing, Publishing and Printing.—Establishments primarily engaged in publishing only, or in publishing and printing books and pamphlets. Establishments primarily engaged in printing or in printing and binding (but not publishing) books and pamphlets are classified in industry 2732.

2732 Book Printing.—Establishments primarily engaged in printing only or in printing and binding books and pamphlets, but not engaged in publishing. Establishments primarily engaged in publishing, or in publishing and printing books and pamphlets, are classified in industry 2731. Establishments engaged in both printing and binding books, but primarily binding books printed elsewhere, are classified in industry 2789.

274 MISCELLANEOUS PUBLISHING

2741 Miscellaneous Publishing.—Establishments primarily engaged in miscellaneous publishing activities, not elsewhere classified, whether or not engaged in printing. Establishments primarily engaged in offering financial, credit, or other business services, and which may publish directories as part of this service, are not included in this industry but are classified in service industries.

275 COMMERCIAL PRINTING

2751 Commercial Printing, Letterpress and Screen.—Establishments primarily engaged in letterpress and screen commercial or job printing, including flexographic. This industry includes general printing shops, as well as shops specializing in printing newspapers and periodicals for others, and those which specialize in screen printing. Establishments primarily engaged in printing books, without publishing, are classified in industry 2732, and greeting cards in industry 2771. Establishments primarily engaged in printing from lithographic plates are classified in industry 2752, and gravure and rotogravure printing in industry 2754.

2752 Commercial Printing, Lithographic.—Establishments primarily engaged in printing by the lithographic process. The greater part of the work in this industry is performed on a job or custom basis; but, in some cases, lithographed calendars, maps, posters, decalcomanias, etc., are made for sale. Offset printing, photo-offset printing, and photolithographing are also included in this industry. Establishments primarily engaged in lithographing books and pamphlets, without publishing, are classified in industry 2732, and greeting cards in industry 2771. Establishments primarily engaged in preparing lithographic plates and in related services are classified in industry 2795.

2753 Engraving and Plate Printing.—Establishments primarily engaged in engraving and etching steel, copper, wood, or rubber plates; in using these plates to print stationery, visiting and other cards, invitations, maps, etc.; and in making woodcuts for use in printing illustrations, posters, etc. Engraving for purposes other than printing is classified in industry 3479.

2754 Commercial Printing, Gravure.—Establishments primarily engaged in gravure printing.

276 MANIFOLD BUSINESS FORMS

2761 Manifold Business Forms.—Establishments primarily engaged in designing and printing, by any process, special forms for use in the operation of a business, in single and multiple sets, including carbonized or interleaved with carbon or otherwise processed for multiple reproduction.

277 GREETING CARD PUBLISHING

2771 Greeting Card Publishing.—Establishments primarily engaged in the designing, publishing, and printing by any process of greeting cards for all occasions.

278 BLANKBOOKS, LOOSELEAF BINDERS, AND BOOKBINDING AND RELATED WORK

2782 Blankbooks, Looseleaf Binders, and Devices.—Establishments primarily engaged in manufacturing blankbooks, looseleaf devices, and library binders; and in ruling paper.

2789 Bookbinding and Related Work.—Establishments primarily engaged in edition, trade, job, and library bookbinding; in book or paper bronzing, gilding, and edging; in map and sample mounting; and other services related to bookbinding. Establishments primarily binding books printed elsewhere are classified in this industry, but those primarily binding books printed in the same establishment are classified in SIC group 273.

279 SERVICE INDUSTRIES FOR THE PRINTING TRADE

2791 Typesetting.—Establishments primarily engaged in typesetting for the trade, including advertisement typesetting.

2793 Photoengraving.—Establishments primarily engaged in preparing photoengraved plates (halftones and linecuts). These establishments do not, as a rule, print from the plates which they make, but prepare them for use by others.

2794 Electrotyping and Stereotyping.—Establishments primarily engaged in preparing electrotype and stereotype plates. These establishments do not, as a rule, print from the plates which they make, but prepare them for use by others.

2795 Lithographic Platemaking and Related Services.—Establishments primarily engaged in making lithographic plates and positives or negatives from which lithographic plates are made, and in related services. Establishments primarily engaged in printing by the lithographic process are classified in industry 2752.

28 CHEMICALS AND ALLIED PRODUCTS

This major group includes establishments producing basic chemical and establishments manufacturing products by predominantly chemical processes. Establishments classified in this major group manufacture three general classes of products: (1) Basic chemicals such as acids, alkalies, salts, and organic chemicals; (2) chemical products to be used in further manufacture such as synthetic fibers, plastics materials, dry colors, and pigments; (3) finished chemical products to be used for ultimate consumption such as drugs, cosmetics, and soaps; or to be used as materials or supplies in other industries, such as paints, fertilizers, and explosives. The mining of natural rock salt is classified in mining industries. Establishments primarily engaged in manufacturing nonferrous metals and high-percentage ferroalloys are classified in SIC Major Group 33; silicon carbide in SIC Major Group 32; baking powder, other leavening compounds, and starches in SIC Major Group 20; and artists' colors in SIC Major Group 39. Establishments primarily engaged in packaging, repackaging, and bottling of purchased chemical products, but not engaged in manufacturing chemicals and allied products, are classified in trade industries.

281 INDUSTRIAL INORGANIC CHEMICALS

This group includes establishments primarily engaged in manufacturing basic industrial inorganic chemicals. Establishments primarily engaged in manufacturing formulated agricultural pesticides are classified in industry 2879; medicinal chemicals, drugs, and medicines in industry 2833; and soap and cosmetics in SIC group 284.

2812 Alkalies and Chlorine.—Establishments primarily engaged in manufacturing alkalies and chlorine.

2813 Industrial Gases.—Establishments primarily engaged in manufacturing gases for sale in compressed, liquid, and solid forms. Establishments primarily engaged in manufacturing fluorine and sulfur dioxide are classified in industry 2819; household ammonia in industry 2842, and other ammonia in industry 2873; and cholorine in industry 2812. Distributors of industrial gases and establishments primarily engaged in shipping liquid oxygen are classified in trade.

2816 Inorganic Pigments.—Establishments primarily engaged in manufacturing inorganic pigments. Important products of this industry include black pigments (except carbon black, industry 2895), white pigments, and color pigments. Organic color pigments, except animal black and bone black, are classified in industry 2865.

2819 Industrial Inorganic Chemicals, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing industrial inorganic chemicals not elsewhere classified. Important products of this industry include inorganic salts of sodium (excluding refined sodium chloride), potassium, aluminum, calcium, chromium, magnesium, mercury, nickel, silver, tin; inorganic compounds such as alums, calcium carbide, hydrogen peroxide, sodium silicate,

ammonia compounds (except fertilizers), rare earth metal salts and elemental bromine, fluorine, iodine, phosphorus, and alkali metals (sodium, potassium, lithium, etc.). Establishments primarily engaged in mining, milling, or otherwise preparing natural potassium, sodium, or boron compounds (other than common salt) are classified in industry 1474. Establishments primarily engaged in manufacturing household bleaches are classified in industry 2842; phosphoric acid in industry 2874; and nitric acid, anhydrous ammonia, and other nitrogenous fertilizer materials in industry 2873.

282 PLASTICS MATERIALS AND SYNTHETIC RESINS, SYNTHETIC RUBBER, SYNTHETIC AND OTHER MANMADE FIBERS, EXCEPT GLASS

This group includes chemical establishments primarily engaged in manufacturing plastics materials and synthetic resins, synthetic rubbers, and cellulosic and manmade organic fibers. Establishments primarily engaged in the manufacture of rubber products and those primarily engaged in the compounding of purchased resins or the fabrication of plastics sheets, rods, and miscellaneous plastics products are classified in SIC Major Group 30; and textile mills primarily engaged in throwing, spinning, weaving, or knitting textile products from manufactured fibers are classified in SIC Major Group 22.

2821 **Plastics Materials, Synthetic Resins, and Nonvulcanizable Elastomers.**—Establishments primarily engaged in manufacturing synthetic resins, plastics materials, and nonvulcanizable elastomers. Important products of this industry include: Cellulose plastic materials; phenolic and other tar acid resins; urea and melamine resins; vinyl resins; styrene resins; alkyd resins; acrylic resins; polyethylene resins; polypropylene resins; rosin modified resins; coumarone-indene and petroleum polymer resins; and miscellaneous resins including polyamide resins, silicones, polyisobutylenes, polyesters, polycarbonate resins, acetal resins, fluorohydrocarbon resins; and casein plastics. Establishments primarily engaged in manufacturing fabricated plastics products or plastics film, sheet, rod, nontextile monofilaments and regenerated cellulose products, and vulcanized fiber are classified in industry 3079, whether from purchased resins or from resins produced in the same plant. Establishments primarily engaged in compounding purchased resins are also classified in industry 3079. Establishments primarily manufacturing adhesives are classified in industry 2891.

2822 **Synthetic Rubber (Vulcanizable Elastomers).**—Establishments primarily engaged in manufacturing synthetic rubber by polymerization or copolymerization. An elastomer for the purpose of this classification is a rubber-like material capable of vulcanization, such as copolymers of butadiene and styrene, or butadiene and acrylonitrile, polybutadienes, chloroprene rubbers, and isobutylene-isoprene copolymers. Butadiene copolymers containing less than 50% butadiene are classified in industry 2821. Natural chlorinated rubbers and cyclized rubbers are considered as semifinished products and are classified in industry 3069.

2823 **Cellulosic Manmade Fibers.**—Establishments primarily engaged in manufacturing cellulosic fibers (including cellulose acetate and regenerated cellulose such as rayon by the viscose or cuprammonium process) in the form of monofilament, yarn, staple, or tow suitable for further manufacturing on spindles, looms, knitting machines, or other textile processing equipment. Establishments primarily engaged in manufacturing textile glass fibers are classified in industry 3229.

2824 **Synthetic Organic Fibers, Except Cellulosic.**—Establishments primarily engaged in manufacturing synthetic organic fibers, except cellulosic (including those of regenerated proteins, and of polymers or copolymers of such components as vinyl chloride, vinylidene chloride, linear esters, vinyl alcohols, acrylonitrile, ethylenes, amides, and related polymeric materials) in the form of monofilament, yarn, staple, or tow suitable for further manufacturing on spindles, looms, knitting machines, or other textile processing equipment. Establishments primarily engaged in manufacturing textile glass fibers are classified in industry 3229.

283 DRUGS

This group includes establishments primarily engaged in manufacturing, fabricating, or processing medicinal chemicals and pharmaceutical products. Also included in this group are establishments primarily engaged in the grading, grinding, and milling of botanicals.

2831 **Biological Products.**—Establishments primarily engaged in the production of bacterial and virus vaccine, toxoids and analogous products (such as allergenic extracts), serums, plasmas, and other blood derivatives for human or veterinary use.

2833 **Medicinal Chemicals and Botanical Products.**—Establishments primarily engaged in (1) manufacturing bulk organic and inorganic medicinal chemicals and their derivatives; and (2) processing (grading, grinding, and milling) bulk botanical drugs and herbs. Establishments primarily engaged in manufacturing agar-agar and similar products of natural origin, endocrine products, manufacturing or isolating basic vitamins, and isolating active medicinal principals such as alkaloids from botanical drugs and herbs are also included in this industry.

2834 **Pharmaceutical Preparations.**—Establishments primarily engaged in manufacturing, fabricating, or processing drugs in pharmaceutical preparations for human or veterinary use. The greater part of the products of these establishments are finished in the form intended for final consumption, such as ampoules, tablets, capsules, vials, ointments, medicinal powders, solutions, and suspensions. Products of this industry consist of two important lines, namely: (1) Pharmaceutical preparations promoted primarily to the dental, medical, or veterinary professions; and (2) pharmaceutical preparations promoted primarily to the public.

284 SOAP, DETERGENTS, AND CLEANING PREPARATIONS, PERFUMES, COSMETICS, AND OTHER TOILET PREPARATIONS

This group includes establishments primarily engaged in manufacturing soap and other detergents and in producing glycerin from vegetable and animal fats and oils; specialty cleaning, polishing, and sanitation preparations; and surface active preparations used as emulsifiers, wetting agents, and finishing agents, including sulfonated oils; and perfumes, cosmetics, and other toilet preparations.

2841 **Soap and Other Detergents, Except Specialty Cleaners.**—Establishments primarily engaged in manufacturing soap, synthetic organic detergents, inorganic alkaline detergents, or any combination thereof, and establishments producing crude and refined glycerin from vegetable and animal fats and oils. Establishments primarily engaged in manufacturing shampoos or shaving products, whether from soap or synthetic detergents, are classified in industry 2844; and synthetic glycerin in industry 2869.

2842 **Specialty Cleaning, Polishing, and Sanitation Preparations.**—Establishments primarily engaged in manufacturing furniture, metal, and other polishes; waxes and dressings for fabricated leather and other materials; household, institutional and industrial plant disinfectants, deodorants; dry cleaning preparations; household bleaches; and other sanitation preparations. Establishments primarily manufacturing household pesticidal preparations are classified in industry 2879.

2843 **Surface Active Agents, Finishing Agents, Sulfonated Oils and Assistants.**—Establishments primarily engaged in producing surface active preparations for use as wetting agents, emulsifiers, and penetrants. Establishments engaged in producing sulfonated oils and fats and related products are also included.

2844 **Perfumes, Cosmetics, and Other Toilet Preparations.**—Establishments primarily engaged in manufacturing perfumes (natural and synthetic), cosmetics, and other toilet preparations. This industry also includes establishments primarily engaged in blending and compounding perfume bases; and those manufacturing shampoos and shaving products, whether from soap or synthetic detergents. Establishments primarily engaged in manufacturing synthetic perfume and flavoring materials are classified in industry 2869, and essential oils in industry 2899.

285 PAINTS, VARNISHES, LACQUERS, ENAMELS, AND ALLIED PRODUCTS

2851 **Paints, Varnishes, Lacquers, Enamels, and Allied Products.**—Establishments primarily engaged in manufacturing paints (in paste and ready-mixed form); varnishes; lacquers; enamels and shellac; putties, wood fillers and sealers; paint and varnish removers; and paint brush cleaners and allied paint products. Establishments primarily engaged in manufacturing carbon black are classified in industry 2895; boneblack, lampblack, and inorganic color pigments in industry 2816; organic color pigments in industry 2865; plastics materials in industry 2821; printing ink in industry 2893; calking compounds and sealants in industry 2891; and artists' paints in industry 3952.

286 INDUSTRIAL ORGANIC CHEMICALS

Establishments primarily engaged in manufacturing industrial organic chemicals. Important products of this group include: (1) Noncyclic organic chemicals such as

acetic, chloroacetic, adipic, formic, oxalic and tartaric acids and their metallic salts; chloral, formaldehyde, and methylamine; (2) solvents such as amyl, butyl, and ethyl alcohols; methanol; amyl, butyl and ethyl acetates; ethel ether, ethylene glycol ether and diethylene glycol ether; acetone, carbon disulfide, and chlorinated solvents such as carbon tetrachloride, perchloroethylene and trichloroethylene; (3) polyhydric alcohols such as ethylene glycol, sorbitol, pentaerythritol, synthetic glycerin; (4) synthetic perfume and flavoring materials such as coumarin, methyl salicylate, saccharin, citral, citronellal, synthetic geraniol, ionone, terpineol, and synthetic vanillin; (5) rubber processing chemicals such as accelerators and antioxidants, both cyclic and acyclic; (6) plasticizers, both cyclic and acyclic, such as esters of phosphoric acid, phthalic anhydride, adipic acid, lauric acid, oleic acid, sebacic acid, and stearic acid; (7) synthetic tanning agents such as naphthalene sulfonic acid condensates, (8) chemical warfare gases; (9) esters, amines, etc., of polyhydric alcohols and fatty and other acids; (10) cyclic crudes and intermediates; (11) cyclic dyes and organic pigments; and (12) natural gum and wood chemicals. Establishments primarily engaged in manufacturing plastics materials and nonvulcanizable elastomers are classified in industry 2821; synthetic rubber in industry 2822; essential oils in industry 2899; rayon and other synthetic fibers in industries 2823 and 2824; specialty cleaning, polishing and sanitation preparations in industry 2842; paints in industry 2851; and inorganic pigments in industry 2816. Distilleries engaged in the manufacture of grain alcohol for beverage purposes are classified in industry 2085.

2861 **Gum and Wood Chemicals.**—Establishments primarily engaged in manufacturing hardwood and softwood distillation products, wood and gum naval stores, charcoal, natural dyestuffs, and natural tanning materials. Establishments primarily engaged in manufacturing synthetic tanning materials and synthetic organic chemicals are classified in industry 2869, and synthetic organic dyes in industry 2865.

2865 **Cyclic (Coal Tar) Crudes, and Cyclic Intermediates, Dyes, and Organic Pigments (Lakes and Toners).**—Establishments primarily engaged in manufacturing coal tar crudes and cyclic organic intermediates, dyes, color lakes, and toners. Important products of this industry include: (1) Derivatives of benzene, toluene, naphthaline, anthracene, pyridine, carbazole, and other cyclic chemical products; (2) synthetic organic dyes; (3) synthetic organic pigments; and (4) cyclic (coal tar) crudes, such as light oils and light oil products; coal tar acids; and products of medium and heavy oil such as creosote oil, naphthalene, anthracene, and their higher homologues, and tar. Establishments primarily engaged in manufacturing coal tar crudes in chemical recovery ovens are classified in industry 3312, and petroleum refineries which produce such products in industry 2911.

2869 **Industrial Organic Chemicals, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing industrial organic chemicals not elsewhere classified. Important products of this industry include: (1) Noncyclic organic chemicals such as acetic, chloroacetic, adipic, formic, oxalic and tartaric acids and their metallic salts; chloral, formaldehyde and methylamine; (2) solvents such as amyl, butyl, and ethyl alcohols; methanol; amyl, butyl and ethyl acetates; ethel ether, ethylene glycol ether and diethylene glycol ether; acetone, carbon disulfide and chlorinated solvents such as carbon tetrachloride, perchloroethylene and trichloroethylene; (3) polyhydric alcohols such as ethylene glycol, sorbitol, pentaerythritol, synthetic glycerin; (4) synthetic perfume and flavoring materials such as coumarin, methyl salicylate, saccharin, citral, citronellal, synthetic geraniol, ionone, terpineol, and synthetic vanillin; (5) rubber processing chemicals such as accelerators and antioxidants, both cyclic and acyclic; (6) plasticizers, both cyclic and acyclic, such as esters of phosphoric acid, phthalic anhydride, adipic acid, lauric acid, oleic acid, sebacic acid, and stearic acid; (7) synthetic tanning agents such as naphthalene sulfonic acid condensates; (8) chemical warfare gases; and (9) esters, amines, etc., of polyhydric alcohols and fatty and other acids. Establishments primarily engaged in manufacturing plastics materials and nonvulcanizable elastomers are classified in industry 2821; synthetic rubber in industry 2822; essential oils in industry 2899; wood distillation products, naval stores, and natural dyeing and tanning materials in industry 2861; rayon and other synthetic fibers in industries 2823 and 2824; specialty cleaning, polishing, and sanitation preparations in industry 2842; paints in industry 2851; urea in industry 2873; organic pigments in industry 2865; and inorganic pigments in industry 2816. Distilleries engaged in the manufacture of grain alcohol for beverage purposes are classified in industry 2085.

287 AGRICULTURAL CHEMICALS

This group includes establishments primarily engaged in manufacturing nitrogenous and phosphatic basic fertilizers, mixed fertilizers, pesticides, and other agricultural chemicals. Establishments primarily engaged in manufacturing basic chemicals which require further processing or formulation before use as agricultural pest-control agents are classified in SIC group 281 or 286.

2873 Nitrogenous Fertilizers.—Establishments primarily engaged in manufacturing nitrogenous fertilizer material or mixed fertilizers from nitrogenous materials produced in the same establishment. Included are ammonia fertilizer compounds and anhydrous ammonia, nitric acid, ammonium nitrate, ammonium sulfate and nitrogen solutions, urea, and natural organic fertilizers (except compost) and mixtures.

2874 Phosphatic Fertilizers.—Establishments primarily engaged in manufacturing phosphatic fertilizer materials or mixed fertilizers from phosphatic materials produced in the same establishment. Included are phosphoric acid; normal, enriched, and concentrated superphosphates; ammonium phosphates; nitrophosphates; and calcium metaphosphates.

2875 Fertilizers, Mixing Only.—Establishments primarily engaged in mixing fertilizers from purchased fertilizer materials.

2879 Pesticides and Agricultural Chemicals, Not Elsewhere Classified.—Establishments primarily engaged in the formulation and preparation of ready-to-use agricultural and household pest-control chemicals, including insecticides, fungicides, and herbicides from technical chemicals or concentrates; and the production of concentrates which require further processing before use as agricultural pesticides. This industry also includes establishments primarily engaged in manufacturing or formulating agricultural chemicals, not elsewhere classified, such as minor or trace elements and soil conditioners. Establishments primarily engaged in manufacturing basic or technical agricultural pest-control chemicals including insecticides, fungicides, and herbicides such as lead and calcium arsenates, and copper sulfate are classified in SIC group 281, and DDT, BHC, 2,4-D carbamates, etc., in SIC group 286. Establishments primarily engaged in manufacturing agricultural lime products are classified in SIC Major Group 32.

289 MISCELLANEOUS CHEMICAL PRODUCTS

2891 Adhesives and Sealants.—Establishments primarily engaged in manufacturing industrial and household adhesives, glues, calking compounds, sealants, and linoleum, tile, and rubber cements from vegetable, animal, or synthetic plastics materials, purchased or produced in the same establishment. Establishments primarily engaged in manufacturing gelatin and sizes are classified in industry 2899, and vegetable gelatin or agar-agar in industry 2833.

2892 Explosives.—Establishments primarily engaged in manufacturing explosives. Establishments primarily engaged in manufacturing ammunition for small arms are classified in industry 3482, and fireworks in industry 2899.

2893 Printing Ink.—Establishments primarily engaged in manufacturing printing ink, gravure ink, screen process ink, and lithographic ink.

2895 Carbon Black.—Establishments primarily engaged in manufacturing carbon black (channel and furnace black).

2899 Chemicals and Chemical Preparations, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing miscellaneous chemical preparations, not elsewhere classified, such as fatty acids, essential oils, gelatin (except vegetable), sizes, bluing, laundry sours, writing and stamp pad inks; industrial compounds, such as boiler and heat insulating compounds, metal, oil and water treating compounds, and waterproofing compounds and chemical supplies for foundries. Establishments primarily engaged in manufacturing vegetable gelatin (agar-agar) are classified in industry 2833; and dessert preparations based on gelatin in industry 2099.

29 PETROLEUM REFINING AND RELATED INDUSTRIES

This major group includes establishments primarily engaged in petroleum refining, manufacturing paving and roofing materials, and compounding lubricating oils and greases from purchased materials. Establishments manufacturing and distributing gas to consumers are classified in public utilities industries, and those primarily engaged in producing coke and byproducts in SIC Major Group 33.

291 PETROLEUM REFINING

2911 Petroleum Refining.—Establishments primarily engaged in producing gasoline, kerosene, distillate fuel oils, residual fuel oils, lubricants, and other products from crude petroleum and its fractionation products, through straight distillation of crude oil, redistillation of unfinished petroleum derivatives, cracking, or other processes. Establishments primarily engaged in producing natural gasoline from natural gas are classified in mining industries. Those manufacturing lubricating oils and greases by blending and compounding purchased materials are included in industry 2992. Establishments primarily re-refining used lubricating oils are classified in industry 2992.

295 PAVING AND ROOFING MATERIALS

2951 Paving Mixtures and Blocks.—Establishments primarily engaged in manufacturing asphalt and tar paving mixtures; and paving blocks made of asphalt, creosoted wood, and various compositions of asphalt or tar with other materials. Establishments primarily engaged in manufacturing brick, concrete, granite, and stone paving blocks are classified in SIC Major Group 32.

2952 Asphalt Felts and Coatings.—Establishments primarily engaged in manufacturing asphalt and other saturated felts in roll or shingle form, either smooth or faced with grit, and in manufacturing roofing cements and coatings. Establishments primarily engaged in manufacturing paint are classified in industry 2851, and linoleum and tile cement in industry 2891.

299 MISCELLANEOUS PRODUCTS OF PETROLEUM AND COAL

2992 Lubricating Oils and Greases.—Establishments primarily engaged in blending, compounding, and re-refining lubricating oils and greases from purchased mineral, animal, and vegetable materials. Petroleum refineries engaged in the production of lubricating oils and greases are classified in industry 2911.

2999 Products of Petroleum and Coal, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing fuel briquettes, boulets, packaged fuel, powdered fuel, and other products of petroleum and coal not elsewhere classified.

30 RUBBER AND MISCELLANEOUS PLASTICS PRODUCTS

This major group includes establishments manufacturing from natural, synthetic, or reclaimed rubber, gutta percha, balata, or gutta siak, rubber products such as tires, rubber footwear, mechanical rubber goods, heels and soles, flooring, and rubber sundries. This group also includes establishments primarily manufacturing tires, but establishments primarily recapping and retreading automobile tires are classified in industry 7534. This group also includes establishments engaged in molding primary plastics for the trade and manufacturing miscellaneous finished plastics products. The manufacture of elastic webbing is classified in SIC Major Group 22; products made of elastic webbing and garments made from rubberized fabrics in SIC Major Group 23; and synthetic rubber in industry 2822.

301 TIRES AND INNER TUBES

3011 Tires and Inner Tubes.—Establishments primarily engaged in manufacturing pneumatic casings, inner tubes, and solid and cushion tires for all types of vehicles, airplanes, farm equipment, and children's vehicles; tiring; and camelback, and tire repair and retreading materials. Establishments primarily engaged in retreading tires are classified in industry 7534.

302 RUBBER AND PLASTICS FOOTWEAR

3021 Rubber and Plastics Footwear.—Establishments primarily engaged in manufacturing all rubber and plastics footwear, waterproof fabric upper footwear, and other fabric upper footwear having rubber or plastic soles vulcanized to the uppers. Establishments primarily engaged in manufacturing rubber, composition, and fiber heels, soles, soling strips, and related shoemaking and repairing materials are classified in industry 3069; plastic soles and soling strips in industry 3079.

303 RECLAIMED RUBBER

3031 Reclaimed Rubber.—Establishments primarily engaged in reclaiming rubber from scrap rubber tires, tubes, and miscellaneous waste rubber articles by processes which result in devulcanized, depolymerized, or regenerated replasticized products containing added ingredients. These products are sold

for use as a raw material in the manufacture of rubber goods with or without admixture with crude rubber or synthetic rubber. Establishments primarily engaged in the assembly and wholesale sale of scrap rubber are classified in trade industries.

304 RUBBER AND PLASTICS HOSE AND BELTING

3041 Rubber and Plastics Hose and Belting.—Establishments primarily engaged in manufacturing rubber and plastics hose and belting, including garden hose. Establishments primarily engaged in manufacturing rubber tubing are classified in industry 3069; plastic tubing in industry 3079; and flexible metallic hose in industry 3599.

306 FABRICATED RUBBER PRODUCTS, NOT ELSEWHERE CLASSIFIED

3069 Fabricated Rubber Products, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing industrial and mechanical rubber goods, rubberized fabrics, vulcanized rubber clothing, and miscellaneous rubber specialties and sundries. Establishments primarily engaged in rebuilding and retreading tires are classified in industry 7534; and gaskets and packing in industry 3293.

307 MISCELLANEOUS PLASTICS PRODUCTS

3079 Miscellaneous Plastics Products.—Establishments primarily engaged in molding primary plastics for the trade, and fabricating miscellaneous finished plastics products. Establishments primarily engaged in manufacturing fabricated plastics products or plastics film, sheet, rod, nontextile monofilaments and regenerated cellulose products, and vulcanized fiber are classified in this industry, whether from purchased resins or from resins produced in the same plant. Establishments primarily engaged in compounding purchased resins are also classified in this industry. Establishments primarily engaged in manufacturing artificial leather are classified in industry 2295.

31 LEATHER AND LEATHER PRODUCTS

This major group includes establishments engaged in tanning, currying, and finishing hides and skins, and establishments manufacturing finished leather, artificial leather products, and some similar products made of other materials. Leather converters are also included.

311 LEATHER TANNING AND FINISHING

3111 Leather Tanning and Finishing.—Establishments primarily engaged in tanning, currying, and finishing hides and skins into leather. This industry also includes leather converters who buy hides and skins and have them processed into leather on a contract basis by others.

313 BOOT AND SHOE CUT STOCK AND FINDINGS

3131 Boot and Shoe Cut Stock and Findings.—Establishments primarily engaged in manufacturing leather soles, inner soles, and other boot and shoe cut stock and findings. This industry also includes finished wood heels. Establishments primarily engaged in manufacturing heels, soling strips, and soles made of rubber, composition, plastics, and fiber are classified in SIC Major Group 30.

314 FOOTWEAR, EXCEPT RUBBER

3142 House Slippers.—Establishments primarily engaged in manufacturing house slippers of leather or other materials.

3143 Men's Footwear, Except Athletic.—Establishments primarily engaged in the production of men's footwear designed primarily for dress, street, and work. Establishments primarily engaged in the production of such protective footwear as rubbers, rubber boots, storm shoes, galoshes, and other footwear with rubber soles vulcanized to the uppers are classified in industry 3021. Establishments primarily engaged in the production of athletic shoes and youths' and boys' shoes are classified in industry 3149.

3144 Women's Footwear, Except Athletic.—Establishments primarily engaged in the production of women's footwear designed primarily for dress, street, and work. Establishments primarily engaged in the production of athletic shoes and misses', children's, infants', and babies' footwear are classified in industry 3149 Establishments primarily engaged in the production of rubber or plastics footwear are classified in industry 3021.

3149 Footwear, Except Rubber, Not Elsewhere Classified.—Establishments primarily engaged in the production of shoes, not elsewhere classified, such as misses', youths', boys', children's, infants', and babies' footwear, and athletic footwear. Establishments primarily engaged in the production of rubber or plastics footwear are classified in industry 3021.

315 LEATHER GLOVES AND MITTENS

3151 Leather Gloves and Mittens.—Establishments primarily engaged in manufacturing dress, semidress, and work gloves exclusively of leather or leather with lining of other material. Establishments primarily engaged in manufacturing sporting and athletic gloves are classified in industry 3949; and dress, semidress, and work gloves and mittens of cloth or cloth and leather combined in industry 2381.

316 LUGGAGE

3161 Luggage.—Establishments primarily engaged in manufacturing luggage of leather or other materials.

317 HANDBAGS AND OTHER PERSONAL LEATHER GOODS

3171 Women's Handbags and Purses.—Establishments primarily engaged in manufacturing women's handbags and purses of leather or other materials, except precious metal (industry 3911).

3172 Personal Leather Goods, Except Women's Handbags and Purses.—Establishments primarily engaged in manufacturing small articles, such as billfolds, key cases, and coin purses of leather or other materials, except precious metal (industry 3911).

319 LEATHER GOODS, NOT ELSEWHERE CLASSIFIED

3199 Leather Goods, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing leather goods, not elsewhere classified, such as saddlery, harness, whips, embossed leather goods, leather desk sets, razor strops, and leather belting. Establishments primarily engaged in manufacturing gaskets and packing are classified in industry 3293.

32 STONE, CLAY, GLASS, AND CONCRETE PRODUCTS

This major group includes establishments engaged in manufacturing flat glass and other glass products, cement, structural clay products, pottery, concrete and gypsum products, cut stone, abrasive and asbestos products, etc., from materials taken principally from the earth in the form of stone, clay, and sand. When separate reports are available for mines and quarries operated by manufacturing establishments classified in this major group, the mining and quarrying activities are classified in Division B. When separate reports are not available, the mining and quarrying activities other than those of industry 3295 are classified herein with the manufacturing operations.

If separate reports are not available for crushing, grinding, and other preparation activities of industry 3295, these establishments are classified in Division B.

321 FLAT GLASS

3211 Flat Glass.—Establishments primarily engaged in manufacturing flat glass. This industry also produces laminated glass, but establishments primarily engaged in manufacturing laminated glass from purchased flat glass are classified in industry 3231.

322 GLASS AND GLASSWARE, PRESSED OR BLOWN

This group includes establishments primarily engaged in manufacturing glass and glassware, pressed, blown, or shaped from glass produced in the same establishment. Establishments primarily engaged in manufacturing glass products from purchased glass are classified in industry 3231.

3221 Glass Containers.—Establishments primarily engaged in manufacturing glass containers for commercial packing and bottling and for home canning.

3229 Pressed and Blown Glass and Glassware, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing glass and glassware, not elsewhere classified, pressed, blown, or shaped from glass produced in the same establishment. Establishments primarily engaged in manufacturing textile glass fibers are also included in this industry, but establishments primarily engaged in manufacturing glass wool insulation products are classified in industry

3296. Establishments primarily engaged in the production of pressed lenses for vehicular lighting, beacons, and lanterns are also included in this industry, but establishments primarily engaged in the production of optical lenses are classified in industry 3832. Establishments primarily engaged in manufacturing glass containers are classified in industry 3221, and complete electric light bulbs in industry 3641.

323 GLASS PRODUCTS, MADE OF PURCHASED GLASS

3231 Glass Products, Made of Purchased Glass.—Establishments primarily engaged in manufacturing glass products from purchased glass. Establishments primarily engaged in manufacturing optical lenses and ophthalmic lenses are classified in SIC Major Group 38.

324 CEMENT, HYDRAULIC

3241 Cement, Hydraulic.—Establishments primarily engaged in manufacturing hydraulic cement, including portland, natural, masonry, and pozzolan cements.

325 STRUCTURAL CLAY PRODUCTS

3251 Brick and Structural Clay Tile.—Establishments primarily engaged in manufacturing brick and structural clay tile. Establishments primarily engaged in manufacturing clay firebrick are classified in industry 3255, nonclay firebrick in industry 3297, sand lime brick in industry 3299, and glass brick in industry 3229.

3253 Ceramic Wall and Floor Tile.—Establishments primarily engaged in manufacturing ceramic wall and floor tile. Establishments primarily engaged in manufacturing structural clay tile are classified in industry 3251, and drain tile in industry 3259.

3255 Clay Refractories.—Establishments primarily engaged in manufacturing clay firebrick and other heat-resisting clay products. Establishments primarily engaged in manufacturing nonclay refractories, as well as all graphite refractories whether of carbon bond or ceramic bond, are classified in industry 3297.

3259 Structural Clay Products, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing clay sewer pipe and structural clay products not elsewhere classified.

326 POTTERY AND RELATED PRODUCTS

3261 Vitreous China Plumbing Fixtures and China and Earthenware Fittings and Bathroom Accessories.—Establishments primarily engaged in manufacturing china plumbing fixtures and china and earthenware fittings and bathroom accessories.

3262 Vitreous China Table and Kitchen Articles.—Establishments primarily engaged in manufacturing vitreous china table and kitchen articles for use in households and in hotels, restaurants, and other commercial institutions for preparing, serving, or storing food or drink. Establishments primarily engaged in manufacturing fine (semivitreous) types of earthenware (whiteware) table and kitchen articles are classified in industry 3263.

3263 Fine Earthenware (Whiteware) Table and Kitchen Articles.—Establishments primarily engaged in manufacturing fine (semivitreous) types of earthenware table and kitchen articles for preparing, serving, or storing food or drink. Establishments primarily engaged in manufacturing vitreous china table and kitchen articles are classified in industry 3262.

3264 Porcelain Electrical Supplies.—Establishments primarily engaged in manufacturing porcelain electrical insulators, molded porcelain parts for electrical devices, spark plug and steatitic porcelain, and other electrical supplies from clay and other ceramic materials.

3269 Pottery Products, Not Elsewhere Classified.—Establishments primarily engaged in firing and decorating white china and earthenware for the trade and manufacturing art and ornamental pottery, industrial and laboratory pottery, stoneware and coarse earthenware table and kitchen articles, unglazed red earthenware florists' articles, and other pottery products, not elsewhere classified.

327 CONCRETE, GYPSUM, AND PLASTER PRODUCTS

3271 Concrete Block and Brick.—Establishments primarily engaged in manufacturing concrete building block and brick from a combination of cement and aggregate. Contractors engaged in concrete construction work are classified in the construction industries, and establishments primarily engaged in mixing and delivering ready-mixed concrete in industry 3273.

3272 **Concrete Products, Except Block and Brick.**—Establishments primarily engaged in manufacturing concrete products, except block and brick, from a combination of cement and aggregate. Contractors engaged in concrete construction work are classified in the construction industries, and establishments primarily engaged in mixing and delivering ready-mixed concrete in industry 3273.

3273 **Ready-Mixed Concrete.**—Establishments primarily engaged in manufacturing portland cement concrete manufactured and delivered to a purchaser in a plastic and unhardened state. This industry includes production and sale of central-mixed concrete, shrink-mixed concrete, and transit-mixed concrete.

3274 **Lime.**—Establishments primarily engaged in manufacturing quicklime, hydrated lime, and "dead-burned" dolomite from limestone, dolomite shells, or other substances.

3275 **Gypsum Products.**—Establishments primarily engaged in manufacturing plaster, plasterboard, and other products composed wholly or chiefly of gypsum.

328 CUT STONE AND STONE PRODUCTS

3281 **Cut Stone and Stone Products.**—Establishments primarily engaged in cutting, shaping, and finishing marble, granite, slate, and other stone for building and miscellaneous uses. Establishments primarily engaged in buying or selling partly finished monuments and tombstones, but performing no work on the stones other than lettering, finishing, or shaping to custom order, are classified in trade industries. The cutting of grindstones, pulpstones, and whetstones at the quarry is classified in Division B.

329 ABRASIVE, ASBESTOS, AND MISCELLANEOUS NONMETALLIC MINERAL PRODUCTS

3291 **Abrasive Products.**—Establishments primarily engaged in manufacturing abrasive grinding wheels of natural or synthetic materials and other abrasive products. The cutting of grindstones, pulpstones, and whetstones at the quarry is classified in mining industries.

3292 **Asbestos Products.**—Establishments primarily engaged in manufacturing asbestos textiles, asbestos building materials, except asbestos paper (industry 2661), insulating materials for covering boilers and pipes, and other commodities composed wholly or chiefly of asbestos. Establishments primarily engaged in manufacturing gaskets and steam and other packing are classified in industry 3293.

3293 **Gaskets, Packing, and Sealing Devices.**—Establishments primarily engaged in manufacturing gaskets, gasketing materials, compression packings, molded packings, oil seals, and mechanical seals. Included are gaskets, packing, and sealing devices made of leather, rubber, metal, asbestos, and plastics.

3295 **Minerals and Earths, Ground or Otherwise Treated.**—Establishments operating without a mine or quarry and primarily engaged in the crushing, grinding, pulverizing, or otherwise preparing clay, ceramic, and refractory minerals; barite; and miscellaneous nonmetallic minerals, except fuels. These minerals are the crude products mined by establishments of SIC groups 145 and 149 and industry 1472. Also included are establishments primarily crushing slag and preparing roofing granules. The beneficiation or preparation of other minerals and metallic ores, and the cleaning and grading of coal, are classified in the mining industries, whether or not the operation is associated with a mine.

3296 **Mineral Wool.**—Establishments primarily engaged in manufacturing mineral wool and mineral wool insulation products made of such siliceous materials as rock, slag, and glass, or combinations thereof. Establishments primarily engaged in manufacturing asbestos insulation products are classified in industry 3292, and textile glass fibers in industry 3229.

3297 **Nonclay Refractories.**—Establishments primarily engaged in manufacturing refractories and crucibles made of materials other than clay. This industry also includes establishments primarily engaged in manufacturing all graphite refractories, whether of carbon bond or ceramic bond. Establishments primarily engaged in manufacturing clay refractories are classified in industry 3255.

3299 **Nonmetallic Mineral Products, Not Elsewhere Classified.**—Establishments primarily engaged in the factory production of statuary and art goods made of plaster of paris and papier mache, and in manufacturing sand lime products and other nonmetallic mineral products not elsewhere classified.

33 PRIMARY METAL INDUSTRIES

This major group includes establishments engaged in the smelting and refining of ferrous and nonferrous metals from ore, pig, or scrap; in the rolling, drawing, and alloying of ferrous and nonferrous metals; in the manufacture of castings and other basic products of ferrous and nonferrous metals; and in the manufacture of nails, spikes, and insulated wire and cable. This major group also includes the production of coke. Establishments primarily engaged in manufacturing metal forgings or stampings are classified in SIC group 346.

331 BLAST FURNACES, STEELWORKS, AND ROLLING AND FINISHING MILLS

3312 Blast Furnaces (Including Coke Ovens), Steelworks, and Rolling Mills.—Establishments primarily engaged in manufacturing hot metal, pig iron, silvery pig iron, and ferroalloys from iron ore and iron and steel scrap; converting pig iron, scrap iron, and scrap steel into steel; and in hot rolling iron and steel into basic shapes such as plates, sheets, strips, rods, bars, and tubing. Merchant blast furnaces and byproduct or beehive coke ovens are also included in this industry. Establishments primarily engaged in manufacturing ferro and nonferrous additive alloys by electrometallurgical processes are classified in industry 3313.

3313 Electrometallurgical Products.—Establishments primarily engaged in manufacturing ferro and nonferrous additive alloys by electrometallurgical or metallothermic processes, including high percentage ferroalloys and high percentage nonferrous additive alloys.

3315 Steel Wiredrawing and Steel Nails and Spikes.—Establishments primarily engaged in drawing wire from purchased iron or steel rods, bars, or wire, and which may be engaged in the further manufacture of products made from wire; establishments primarily engaged in manufacturing steel nails and spikes from purchased materials are also included in this industry. Rolling mills engaged in the production of ferrous wire from wire rods or hot rolled bars produced in the same establishment are classified in industry 3312. Establishments primarily engaged in drawing nonferrous wire are classified in SIC group 335.

3316 Cold Rolled Steel Sheet, Strip, and Bars.—Establishments primarily engaged in (1) cold rolling steel sheets and strip from purchased hot rolled sheets; (2) cold drawing steel bars and steel shapes from purchased hot rolled steel bars; and (3) producing other cold finished steel. Establishments primarily engaged in the production of steel, including hot rolled steel sheets, and further cold rolling such sheets are classified in industry 3312.

3317 Steel Pipe and Tubes.—Establishments primarily engaged in the production of welded or seamless steel pipe and tubes and heavy riveted steel pipe from purchased materials. Establishments primarily engaged in the production of steel, including steel skelp or steel blanks, tube rounds, or pierced billets, are classified in industry 3312.

332 IRON AND STEEL FOUNDRIES

This group includes establishments primarily engaged in manufacturing iron and steel castings. These establishments generally operate on a job or order basis, manufacturing castings for sale to others or for interplant transfer. Establishments which produce iron and steel castings and which are also engaged in fabricating operations, such as machining, assembling, etc., in manufacturing a specified product are classified in the industry of the specified product. Iron and steel castings are made to a considerable extent by establishments classified in other industries, that operate foundry departments for the production of castings for incorporation, in the same establishment, into such products as stoves, furnaces, plumbing fixtures, motor vehicles, etc. Establishments primarily engaged in the manufacture and rolling of steel and also making steel castings are classified in industry 3312. Establishments primarily engaged in manufacturing nonferrous castings are classified in SIC group 336.

3321 Gray Iron Foundries.—Establishments primarily engaged in manufacturing gray iron castings, including cast iron pressure and soil pipes and fittings.

3322 Malleable Iron Foundries.—Establishments primarily engaged in manufacturing malleable iron castings.

3324 Steel Investment Foundries.—Establishments primarily engaged in manufacturing steel investment castings.

3325 **Steel Foundries, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing steel castings not elsewhere classified.

333 PRIMARY SMELTING AND REFINING OF NONFERROUS METALS

3331 **Primary Smelting and Refining of Copper.**—Establishments primarily engaged in smelting copper from the ore, and in refining copper by electrolytic or other processes. Establishments primarily engaged in rolling, drawing, or extruding copper are classified in industry 3351.

3332 **Primary Smelting and Refining of Lead.**—Establishments primarily engaged in smelting lead from the ore and in refining lead by any process. Establishments primarily engaged in rolling, drawing, or extruding lead are classified in industry 3356.

3333 **Primary Smelting and Refining of Zinc.**—Establishments primarily engaged in smelting zinc from the ore and in refining zinc by any process. Establishments primarily engaged in rolling, drawing, or extruding zinc are classified in industry 3356.

3334 **Primary Production of Aluminum.**—Establishments primarily engaged in producing aluminum from aluminua and in refining aluminum by any process. Establishments primarily engaged in rolling, drawing, or extruding aluminum are classified in industries 3353, 3354, and 3355.

3339 **Primary Smelting and Refining of Nonferrous Metals, Not Elsewhere Classified.**—Establishments primarily engaged in smelting and refining nonferrous metals not elsewhere classified. Establishments primarily engaged in rolling, drawing, and extruding these nonferrous primary metals are classified in industry 3356, and the production of bullion at the site of the mine is classified in the mining industries.

334 SECONDARY SMELTING AND REFINING OF NONFERROUS METALS

3341 **Secondary Smelting and Refining of Nonferrous Metals.**—Establishments primarily engaged in recovering nonferrous metals and alloys from new and used scrap and dross. This industry includes establishments engaged in both the recovery and alloying of precious metals. Plants engaged in the recovery of tin through secondary smelting and refining, as well as by chemical processes, are included in this industry. Establishments primarily engaged in assembling, sorting, and breaking up scrap metal, without smelting and refining, are classified in trade industries.

335 ROLLING, DRAWING, AND EXTRUDING OF NONFERROUS METALS

3351 **Rolling, Drawing, and Extruding of Copper.**—Establishments primarily engaged in rolling, drawing, and extruding copper, brass, bronze, and other copper base alloy basic shapes, such as plate, sheet, strip, bar, and tubing. Establishments primarily engaged in recovering copper and its alloys from scrap or dross are classified in industry 3341.

3353 **Aluminum Sheet, Plate, and Foil.**—Establishments primarily engaged in flat rolling aluminum and aluminum base alloy basic shapes such as sheet, plate, and foil, including establishments producing welded tube. Also included are establishments primarily producing similar products by continuous casting.

3354 **Aluminum Extruded Products.**—Establishments primarily engaged in extruding aluminum and aluminum base alloy basic shapes such as rod and bar, pipe and tube, and tube blooms, including establishments producing tube by drawing.

3355 **Aluminum Rolling and Drawing, Not Elsewhere Classified.**—Establishments primarily engaged in rolling, drawing, and other operations resulting in the production of aluminum ingot, including extrusion ingot, and aluminum and aluminum base alloy basic shapes, not elsewhere classified, such as rolled and continuous cast rod and bar. Establishments primarily engaged in producing aluminum powder, flake, and paste are classified in industry 3399, and those producing aluminum wire and cable from purchased wire bars, rods, or wire are classified in industry 3357.

3356 **Rolling, Drawing, and Extruding of Nonferrous Metals, Except Copper and Aluminum.**—Establishments primarily engaged in rolling, drawing, and extruding nonferrous metals other than copper (industry 3351) and aluminum (industries 3353, 3354, and 3355). The products of this industry are

produced in the form of basic shapes such as plate, sheet, strip, bar, and tubing. Establishments primarily engaged in recovering nonferrous metals and alloys from scrap or dross are classified in industry 3341; in manufacturing gold, silver, tin, and other foils except aluminum in industry 3497; and aluminum foil in industry 3353.

3357 **Drawing and Insulating of Nonferrous Wire.**—Establishments primarily engaged in drawing and insulating, and insulating wire and cable of nonferrous metals from purchased wire bars, rods, or wire.

336 NONFERROUS FOUNDRIES (CASTINGS)

This group includes establishments primarily engaged in manufacturing castings and die castings of aluminum, brass, bronze and other nonferrous metals and alloys. These establishments generally operate on a job or order basis, manufacturing castings for sale to others or for interplant transfer. Establishments which produce nonferrous castings and which are also engaged in fabricating operations, such as machining, assembling, etc., in manufacturing a specified product are classified in the industry of the specified product. Nonferrous castings are made to a considerable extent by establishments classified in other industries that operate foundry departments for the production of castings for incorporation, in the same establishment, into such products as machinery, motor vehicles, etc. Establishments primarily engaged in manufacturing iron and steel castings are classified in SIC group 332.

3361 **Aluminum Foundries (Castings).**—Establishments primarily engaged in manufacturing castings and die castings of aluminum and aluminum-base alloys.

3362 **Brass, Bronze, Copper, Copper Base Alloy Foundries (Castings).**—Establishments primarily engaged in manufacturing castings and die castings of copper and copper-base alloys.

3369 **Nonferrous Foundries (Castings), Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing castings and die castings of nonferrous materials except aluminum, copper, and copper base alloys.

339 MISCELLANEOUS PRIMARY METAL PRODUCTS

3398 **Metal Heat Treating.**—Establishments primarily engaged in heat treating of metal for the trade.

3399 **Primary Metal Products, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing primary metal products, not elsewhere classified, such as nonferrous nails, brads, and spikes; and metal powder, flakes, and paste.

34 FABRICATED METAL PRODUCTS, EXCEPT MACHINERY AND TRANSPORTATION EQUIPMENT

This major group includes establishments engaged in fabricating ferrous and nonferrous metal products such as metal cans, tinware, handtools, cutlery, general hardware, nonelectric heating apparatus, fabricated structural metal products, metal forgings, metal stampings, ordnance (except vehicles and guided missiles), and a variety of metal and wire products not elsewhere classified. Certain important segments of the metal fabricating industries are classified in other major groups such as machinery in SIC Major Groups 35 and 36; transportation equipment, including tanks, in SIC Major Group 37; professional scientific and controlling instruments, watches, and clocks in SIC Major Group 38; and jewelry and silverware in SIC Major Group 39. Establishments primarily engaged in producing ferrous and nonferrous metals and their alloys are classified in SIC Major Group 33.

341 METAL CANS AND SHIPPING CONTAINERS

3411 **Metal Cans.**—Establishments primarily engaged in manufacturing metal cans from purchased materials. Establishments primarily engaged in manufacturing foil containers are classified in industry 3497.

3412 **Metal Shipping Barrels, Drums, Kegs, and Pails.**—Establishments primarily engaged in manufacturing ferrous and nonferrous metal shipping barrels, drums, kegs, and pails.

342 CUTLERY, HANDTOOLS, AND GENERAL HARDWARE

3421 **Cutlery.**—Establishments primarily engaged in manufacturing cutlery. Establishments primarily engaged in manufacturing table cutlery made entirely of metal are classified in industry 3914; those manufacturing electric razors in industry 3634; and those manufacturing hair clippers for human use in industry 3999, and for animal use in industry 3523.

3423 **Hand and Edge Tools, Except Machine Tools and Handsaws.**—Establishments primarily engaged in manufacturing files and other hand and edge tools for metalworking, woodworking, and general maintenance. Establishments primarily engaged in manufacturing saws are classified in industry 3425; and metal-cutting dies, power-driven handtools, and attachments and accessories for machine tools in SIC Major Group 35.

3425 **Handsaws and Saw Blades.**—Establishments primarily engaged in manufacturing handsaws and saw blades for hand and power-driven saws. Establishments primarily engaged in manufacturing power-driven sawing machines are classified in SIC Major Group 35.

3429 **Hardware, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing miscellaneous metal products usually termed "hardware," not elsewhere classified. Establishments primarily engaged in manufacturing bolts and nuts are classified in industry 3452, nails and spikes in SIC Major Group 33, cutlery in industry 3421, handtools in industry 3423, and pole line and transmission hardware in SIC Major Group 36.

343 HEATING EQUIPMENT, EXCEPT ELECTRIC AND WARM AIR; AND PLUMBING FIXTURES

3431 **Enameled Iron and Metal Sanitary Ware.**—Establishments primarily engaged in manufacturing enameled iron, cast iron, or pressed metal sanitary ware. Establishments primarily engaged in manufacturing vitreous and semivitreous pottery sanitary ware are classified in industry 3261; and those manufacturing porcelain enameled kitchen, household, and hospital ware in industry 3469.

3432 **Plumbing Fixture Fittings and Trim (Brass Goods).**—Establishments primarily engaged in manufacturing plumbing fixture fittings and trim (brass goods). Establishments primarily engaged in the manufacture of steam or water line valves are classified in industry 3494.

3433 **Heating Equipment, Except Electric and Warm Air Furnaces.**—Establishments primarily engaged in manufacturing heating equipment, except electric and warm air furnaces, including gas, oil, and stoker coal-fired equipment for the automatic utilization of gaseous, liquid, and solid fuels. Establishments primarily engaged in manufacturing warm air furnaces are classified in industry 3585; cooking stoves and ranges in industry 3631; boiler shops primarily engaged in the production of industrial, power and marine boilers in industry 3443; and industrial process furnaces and ovens in industry 3567.

344 FABRICATED STRUCTURAL METAL PRODUCTS

3441 **Fabricated Structural Metal.**—Establishments primarily engaged in manufacturing fabricated iron and steel or other metal for structural purposes, such as bridges, buildings, and sections for ships, boats, and barges. Establishments primarily engaged in manufacturing metal doors, sash, frames, molding, and trim are classified in industry 3442; and establishments doing fabrication work at the site of construction are classified in Division C.

3442 **Metal Doors, Sash, Frames, Molding, and Trim.**—Establishments primarily engaged in manufacturing ferrous and nonferrous metal and metal covered doors and sash, window and door frames and screens, molding, and trim.

3443 **Fabricated Platework (Boiler Shops).**—Establishments primarily engaged in manufacturing power and marine boilers, pressure and nonpressure tanks, processing and storage vessels, heat exchangers, weldments, and similar products by the process of cutting, forming, and joining metal plates, shapes, bars, sheet, pipe mill products, and tubing to custom or standard design for factory or field assembly. Establishments primarily engaged in manufacturing warm air heating furnaces are classified in industry 3585, other nonelectric heating apparatus except power boilers in industry 3433, and household cooking apparatus in industry 3631.

3444 **Sheet Metalwork.**—Establishments primarily engaged in manufacturing sheet metalwork for buildings (not including fabrication work done by construction contractors at the place of construction), and manufacturing sheet metal stovepipes, light tanks, etc.

3446 **Architectural and Ornamental Metalwork.**—Establishments primarily engaged in manufacturing architectural and ornamental metalwork of ferrous and nonferrous metals, such as stairs and staircases, open

steel flooring (grating), fire escapes, grilles, railings, and fences and gates, except those made from wire. Establishments primarily engaged in manufacturing prefabricated and portable metal buildings and parts are classified in industry 3448, and miscellaneous metalwork in industry 3449.

3448 **Prefabricated Metal Buildings and Components.**—Establishments primarily engaged in manufacturing prefabricated and portable metal buildings and parts, and prefabricated exterior metal panels.

3449 **Miscellaneous Metalwork.**—Establishments primarily engaged in manufacturing miscellaneous ferrous and nonferrous metalwork, such as metal plaster bases, fabricated bar joists, and concrete reinforcing bars.

345 SCREW MACHINE PRODUCTS, AND BOLTS, NUTS, SCREWS, RIVETS, AND WASHERS

3451 **Screw Machine Products.**—Establishments primarily engaged in manufacturing automatic or hand screw machine products from rod, bar, or tube stock of metal, fiber, plastics, or other material. The products of this industry consist of a wide variety of unassembled parts and are usually manufactured on a job or order basis. Establishments primarily engaged in manufacturing standard bolts, nuts, rivets, screws, and other industrial fasteners on headers, threaders, and nut forming machines are classified in industry 3452.

3452 **Bolts, Nuts, Screws, Rivets, and Washers.**—Establishments primarily engaged in manufacturing bolts, nuts, screws, rivets, washers, formed and threaded wire goods, and special industrial fasteners. Rolling mills engaged in manufacturing similar products are classified in SIC Major Group 33, and establishments primarily engaged in manufacturing screw machine products in industry 3451.

346 METAL FORGINGS AND STAMPINGS

This group includes establishments primarily engaged in manufacturing metal forgings or metal stampings. These establishments generally operate on a job or order basis, manufacturing metal stampings or forgings for sale to others or for interplant transfer. Establishments which produce metal stampings or forgings for incorporation in end products produced in the same establishment are classified on the basis of the end product.

3462 **Iron and Steel Forgings.**—Establishments primarily engaged in manufacturing iron and steel forgings, with or without the use of dies.

3463 **Nonferrous Forgings.**—Establishments primarily engaged in manufacturing nonferrous forgings, with or without the use of dies.

3465 **Automotive Stampings.**—Establishments primarily engaged in manufacturing automotive stampings such as body parts, hubs, and trim.

3466 **Crowns and Closures.**—Establishments primarily engaged in manufacturing metal crowns and closures.

3469 **Metal Stampings, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing metal stampings and spun products, not elsewhere classified, including porcelain enameled products such as household appliance housings and parts; utensils and consumer stamped and spun products such as cooking and kitchen utensils; and other nonautomotive job stampings.

347 COATING, ENGRAVING, AND ALLIED SERVICES

3471 **Electroplating, Plating, Polishing, Anodizing, and Coloring.**—Establishments primarily engaged in all types of electroplating, plating, anodizing, coloring, and finishing of metals and formed products for the trade. Most of the work done in this industry is done on materials owned by others.

3479 **Coating, Engraving, and Allied Services, Not Elsewhere Classified.**—Establishments primarily engaged in performing the following types of services on metals: (1) Enameling, lacquering, and varnishing metal products for the trade; (2) hot-dip galvanizing of mill sheets, plates and bars, castings, and formed products fabricated of iron and steel; hot-dip coating such items with aluminum, lead, or zinc; retinning cans and utensils; (3) engraving, chasing and etching jewelry, silverware, notarial and other seals, and other metal products for the trade and for job contracting for purposes other than printing; and (4) other metal services, not elsewhere classified. Establishments primarily engaged in electroplating, plating, polishing, anodizing, coloring, and finishing of metals and formed products for the trade are classified in industry 3471; and those producing porcelain enameled products in industry 3469.

348 ORDNANCE AND ACCESSORIES, EXCEPT VEHICLES AND GUIDED MISSILES

3482 Small Arms Ammunition.—Establishments primarily engaged in manufacturing ammunition for small arms having a bore of 30 mm (or 1.18 inch) and below. Establishments primarily engaged in manufacturing ammunition except for small arms are classified in industry 3483, blasting and detonating caps and safety fuses in industry 2892, and fireworks in industry 2899.

3483 Ammunition, Except for Small Arms, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing ammunition, not elsewhere classified, or in loading and assembling ammunition over 30 mm (or over 1.18 inch) for naval, aircraft, antiaircraft, tank, coast, and field artillery; including component parts. This industry also includes establishments primarily engaged in manufacturing bombs, mines, torpedoes, grenades, depth charges, chemical warfare projectiles, and their component parts. Establishments primarily engaged in manufacturing small arms ammunition are classified in industry 3482, explosives in industry 2892, and military pyrotechnics in industry 2899.

3484 Small Arms.—Establishments primarily engaged in manufacturing small firearms having a bore 30 mm (or 1.18 inch) and below, and parts for small firearms. Also included in this industry are establishments primarily engaged in manufacturing certain weapons over 30 mm which are carried and employed by the individual, such as grenade launchers and heavy field machine guns. Establishments primarily engaged in manufacturing artillery and mortars having a bore over 30 mm (or over 1.18 inch) and component parts are classified in industry 3489.

3489 Ordnance and Accessories, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing ordnance and accessories, not elsewhere classified, such as naval, aircraft, antiaircraft, tank, coast, and field artillery having a bore over 30 mm (or over 1.18 inch) and components. Establishments primarily engaged in manufacturing small arms and parts 30 mm (or 1.18 inch) and below are classified in industry 3484; tanks in industry 3795; and guided missiles in SIC group 376.

349 MISCELLANEOUS FABRICATED METAL PRODUCTS

3493 Steel Springs, Except Wire.—Establishments primarily engaged in manufacturing leaf springs, hot wound springs, and coiled flat springs. Establishments primarily engaged in manufacturing wire springs are classified in industry 3495.

3494 Valves and Pipe Fittings, Except Plumbers' Brass Goods.—Establishments primarily engaged in manufacturing pipe fittings and valves for controlling the flow of liquids or gases in pipes and mains, and for machinery. Establishments primarily engaged in manufacturing faucets, spigots, and similar plumbers' brass goods and fittings are classified in industry 3432, flexible metal hose and tubing in industry 3599, and fittings and couplings for garden hose in industry 3429.

3495 Wire Springs.—Establishments primarily engaged in manufacturing wire springs. Establishments primarily engaged in assembling wire bedsprings or seats are classified in SIC Major Group 25.

3496 Miscellaneous Fabricated Wire Products.—Establishments primarily engaged in manufacturing miscellaneous fabricated wire products from purchased wire, such as noninsulated wire rope and cable; fencing; screening, netting, paper machine wire cloth; and hangers, paper clips, kitchenware, and wire carts. Rolling mills engaged in manufacturing wire products are classified in SIC Major Group 33; establishments manufacturing nonferrous wire nails and spikes in industry 3399; those drawing and insulating nonferrous wire in industry 3357; and those manufacturing wire springs in industry 3495.

3497 Metal Foil and Leaf.—Establishments primarily engaged in manufacturing gold, silver, tin, and other metal foil (including converted metal foil) and leaf. Also included are establishments primarily engaged in converting metal foil (including aluminum) into wrappers, cookware, dinnerware, and containers, except bags and liners. Establishments primarily engaged in manufacturing plain aluminum foil are classified in industry 3353.

3498 Fabricated Pipe and Fabricated Pipe Fittings.—Establishments primarily engaged in fabricating pipe and pipe fittings from purchased pipe, by cutting,

threading, bending, etc. Establishments primarily engaged in manufacturing cast iron pipe and fittings, including cast and forged pipe fittings which have been machined and threaded, are classified in industry 3321; and welded and heavy riveted pipe and seamless steel pipe in industry 3317. Establishments primarily engaged in manufacturing products such as bannisters, railings, and guards from pipe are classified in industry 3446.

3499 **Fabricated Metal Products, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing fabricated metal products, not elsewhere classified, such as fire or burglary resistive steel safes and vaults and similar fire or burglary resistive products; and collapsible tubes of thin flexible metal. Also included are establishments primarily engaged in manufacturing metal boxes, metal ladders, and metal household articles such as ice cream freezers and ironing boards. Establishments primarily engaged in manufacturing concrete grave vaults are classified in industry 3722, and metal grave vaults in industry 3995. Establishments primarily engaged in manufacturing advertising novelties are classified in industry 3993.

35 MACHINERY, EXCEPT ELECTRICAL

This major group includes establishments engaged in manufacturing machinery and equipment other than electrical equipment (SIC Major Group 36) and transportation equipment (SIC Major Group 37). Machines powered by built-in or detachable motors are ordinarily included in this major group, with the exception of electrical household appliances (SIC Major Group 36). Portable tools, both electric and pneumatic powered, are included in this major group, but handtools are classified in SIC Major Group 34.

351 ENGINES AND TURBINES

3511 **Steam, Gas, and Hydraulic Turbine Generator Set Units.**—Establishments primarily engaged in manufacturing steam turbines; hydraulic turbines; gas turbines, except aircraft; complete steam, gas, and hydraulic turbine generator set units; and steam engines. Establishments primarily engaged in building or rebuilding locomotives are classified in industry 3743; and those manufacturing nonautomotive type generators which are not part of a turbine generator set in industry 3621.

3519 **Internal Combustion Engines, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing diesel, semi-diesel, or other internal combustion engines, not elsewhere classified, for stationary, marine, traction, and other uses. Establishments primarily engaged in manufacturing aircraft engines are classified in industry 3724; automotive engines (except diesel) in industry 3714; engine generator sets in industry 3621; and guided missile and space vehicle propulsion units in industry 3764.

352 FARM AND GARDEN MACHINERY AND EQUIPMENT

3523 **Farm Machinery and Equipment.**—Establishments primarily engaged in manufacturing farm machinery and equipment, including wheel tractors, for use in the preparation and maintenance of the soil; planting and harvesting of the crop; preparing crops for market, on the farm; or for use in performing other farm operations and processes. Establishments primarily engaged in manufacturing industrial trucks, tractors, and trailers used for handling materials in industrial plants, depots, and docks are classified in industry 3537; contractors' off-highway tractors are classified in industry 3531; farm handtools in SIC group 342; and garden tractors, lawn mowers and other lawn and garden equipment in industry 3524.

3524 **Garden Tractors and Lawn and Garden Equipment.**—Establishments primarily engaged in manufacturing lawn mowers, garden tractors, and other lawn and garden equipment used for home lawn and garden care. Also included are establishments primarily manufacturing snow blowers and throwers for residential use. Establishments primarily engaged in manufacturing farm machinery and equipment are classified in industry 3523; hand lawn and garden shears and pruners in industry 3421; and other garden handtools in industry 3423.

353 CONSTRUCTION, MINING, AND MATERIALS HANDLING MACHINERY AND EQUIPMENT

3531 **Construction Machinery and Equipment.**—Establishments primarily engaged in manufacturing heavy machinery and equipment used by the construction industries, such as bulldozers; concrete mixers; cranes, except industrial plant type; dredging machinery; pavers; and power shovels. Establish-

ments primarily engaged in manufacturing mining equipment are classified in industry 3532, and well-drilling machinery in industry 3533.

3532 **Mining Machinery and Equipment, Except Oilfield Machinery and Equipment.**—Establishments primarily engaged in manufacturing heavy machinery and equipment used by the mining industries, such as coal breakers, mine cars, mineral cleaning machinery, concentration machinery, core drills, coal cutters, portable rock drills, and rock crushing machinery. Establishments primarily engaged in manufacturing construction machinery are classified in industry 3531; well-drilling machinery in industry 3533; and coal and ore conveyors in industry 3535.

3533 **Oilfield Machinery and Equipment.**—Establishments primarily engaged in manufacturing machinery and equipment for use in oil and gas fields or for drilling water wells.

3534 **Elevators and Moving Stairways.**—Establishments primarily engaged in manufacturing passenger or freight elevators, automobile lifts, dumbwaiters, and moving stairways. Establishments primarily engaged in manufacturing commercial conveyor systems and equipment are classified in industry 3535, and farm elevators in industry 3523.

3535 **Conveyors and Conveying Equipment.**—Establishments primarily engaged in manufacturing conveyors and conveying equipment for installation in factories, warehouses, mines, and other industrial and commercial establishments. Establishments primarily engaged in manufacturing passenger or freight elevators, dumbwaiters, and moving stairways are classified in industry 3534; and overhead traveling cranes and monorail systems in industry 3536.

3536 **Hoists, Industrial Cranes, and Monorail Systems.**—Establishments primarily engaged in manufacturing overhead traveling cranes, hoists, and monorail systems for installation in factories, warehouses, and other industrial and commercial establishments.

3537 **Industrial Trucks, Tractors, Trailers, and Stackers.**—Establishments primarily engaged in manufacturing industrial trucks, tractors, trailers, stackers (truck type), and related equipment, used for handling materials on floors and paved surfaces in and around industrial and commercial plants, depots, docks, and terminals. Establishments primarily engaged in manufacturing motor vehicles and motor vehicle type trailers are classified in SIC group 371; farm-type wheel tractors in industry 3523; wheel tractor shovel loaders and tracklaying tractors in industry 3531; and wood pallets and skids in industry 2448.

354 METALWORKING MACHINERY AND EQUIPMENT

3541 **Machine Tools, Metal-Cutting Types.**—Establishments primarily engaged in manufacturing machines, not supported in the hands of an operator when in use, that shape metal by cutting or use of electrical techniques; the rebuilding of such machine tools; and the manufacture of replacement parts for them. Metalworking, or primarily metalworking, machine tools designed primarily for home workshops are also included. Establishments primarily engaged in the manufacture of electric welding equipment are classified in industry 3623; portable power-driven handtools in industry 3546; and gas welding and cutting equipment and automotive maintenance equipment in industry 3549.

3542 **Machine Tools, Metal-Forming Types.**—Establishments primarily engaged in manufacturing machines, not supported in the hands of an operator while in use, for pressing, hammering, extruding, shearing, die-casting, or otherwise forming metal into shape. This industry also includes rebuilding such machine tools and manufacturing repair parts for them. Establishments primarily engaged in the manufacture of electric welding equipment are classified in industry 3623; portable power-driven handtools in industry 3546; rolling mill machinery and equipment in industry 3547; and gas welding and cutting equipment and automotive maintenance equipment in industry 3549.

3544 **Special Dies and Tools, Die Sets, Jigs and Fixtures, and Industrial Molds.**—Establishments commonly known as contract tool and die shops and primarily engaged in manufacturing, on a job or order basis, special tools and fixtures for use with machine tools, hammers, die-casting machines, and presses. The products of establishments classified in this industry include a wide variety of special toolings, such as dies; punches; die sets and components and subpresses; jigs and fixtures; and special checking devices. Establishments primarily engaged in manufacturing molds for die casting and foundry casting; metal molds for plasterworking, rubber working,

plastic working, glassworking and similar machinery are also included. Establishments primarily engaged in manufacturing molds for heavy steel ingots are classified in industry 3321.

3545 Machine Tool Accessories and Measuring Devices.—Establishments primarily engaged in manufacturing cutting tools, machinist's precision measuring tools, and attachments and accessories for machine tools and for other metalworking machinery not elsewhere classified. Establishments primarily engaged in manufacturing handtools, except power-driven types, are classified in SIC group 342.

3546 Power-Driven Handtools.—Establishments primarily engaged in manufacturing power-driven handtools, such as drills and drilling tools, pneumatic and snagging grinders, and electric hammers. Establishments primarily engaged in manufacturing automotive maintenance equipment are classified in industry 3549; those primarily manufacturing machine tools for metal cutting and metal forming (including home workshop tools) which are not supported in the hands of an operator, are classified in industries 3541 and 3542; and those primarily manufacturing power-driven heavy construction or mining handtools in SIC group 353.

3547 Rolling Mill Machinery and Equipment.—Establishments primarily engaged in manufacturing rolling mill machinery and processing equipment for metal production such as cold forming mills, structural mills, and finishing equipment.

3549 Metalworking Machinery, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing metalworking machinery, not elsewhere classified, such as gas cutting and welding equipment, wire fabricating machinery and equipment, except wire-drawing dies, and automotive maintenance machinery and equipment. Establishments primarily engaged in manufacturing metal-cutting machine tools are classified in industry 3541; metal-forming machine tools in industry 3542; power-driven handtools in industry 3546; and rolling mill machinery in industry 3547.

355 SPECIAL INDUSTRY MACHINERY, EXCEPT METALWORKING MACHINERY

3551 Food Products Machinery.—Establishments primarily engaged in manufacturing machinery for use by the food products and beverage manufacturing industries in the preparation, canning, or packaging of food products; and parts and attachments for such machinery. Establishments primarily engaged in manufacturing industrial refrigeration machinery are classified in SIC group 358.

3552 Textile Machinery.—Establishments primarily engaged in manufacturing machinery for the textile industries, including parts, attachments, and accessories. Establishments primarily engaged in manufacturing domestic or industrial sewing machines are classified in industry 3636.

3553 Woodworking Machinery.—Establishments primarily engaged in manufacturing machinery for sawmills, planing mills, cabinet and furniture makers, patternmakers, and veneer workers. Establishments primarily engaged in manufacturing handtools such as planes, axes, drawknives, and handsaws are classified in SIC group 342; and portable power-driven handtools in industry 3546.

3554 Paper Industries Machinery.—Establishments primarily engaged in manufacturing machinery for the pulp, paper, and paper product industries. Establishments primarily engaged in manufacturing printing trades machinery are classified in industry 3555.

3555 Printing Trades Machinery and Equipment.—Establishments primarily engaged in manufacturing machinery and equipment used by the printing and bookbinding trades. Establishments primarily engaged in manufacturing textile printing machinery are classified in industry 3552.

3559 Special Industry Machinery, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing special industry machinery, not elsewhere classified, such as smelting and refining equipment, cementmaking, clayworking, cotton ginning, glassmaking, hatmaking, incandescent lampmaking, leatherworking, paintmaking, rubberworking, cigar and cigarette making, tobacco working, shoemaking, and stoneworking machinery.

356 GENERAL INDUSTRIAL MACHINERY AND EQUIPMENT

3561 Pumps and Pumping Equipment.—Establishments primarily engaged in manufacturing pumps and pumping equipment for general industrial use. Establish-

ments primarily engaged in manufacturing measuring and dispensing pumps for gasoline service station use are classified in industry 3586; and air and gas compressors in industry 3563.

3562 **Ball and Roller Bearings.**—Establishments primarily engaged in manufacturing ball and roller bearings (including ball or roller bearing pillow block, flange, take-up cartridge, and hanger units) and parts. Establishments primarily engaged in manufacturing bearings, except ball and roller, are classified in industry 3568.

3563 **Air and Gas Compressors.**—Establishments primarily engaged in manufacturing air and gas compressors for general industrial use. Establishments primarily engaged in manufacturing refrigeration compressors and compressing units are classified in industry 3585; and pumps and pumping equipment in industry 3561.

3564 **Blowers and Exhaust and Ventilation Fans.**—Establishments primarily engaged in manufacturing industrial and commercial blowers, industrial and commercial exhaust and ventilating fans, and attic fans. Establishments primarily engaged in manufacturing air-conditioning units are classified in industry 3585, and free air-circulating fans for use on desks, pedestals, or wall brackets as well as household window-type fans and roll-abouts, kitchen and household ventilating and exhaust fans in industry 3634.

3565 **Industrial Patterns.**—Establishments primarily engaged in manufacturing industrial patterns.

3566 **Speed Changers, Industrial High Speed Drives, and Gears.**—Establishments primarily engaged in manufacturing speed changers, industrial high-speed drives, and gears. Establishments primarily engaged in manufacturing these items for motor vehicles are classified in industry 3714, and for aircraft in industry 3728.

3567 **Industrial Process Furnaces and Ovens.**—Establishments primarily engaged in manufacturing industrial process furnaces, ovens, induction and dielectric heating equipment, and related devices.

3568 **Mechanical Power Transmission Equipment, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing mechanical power transmission equipment and parts for industrial machinery. Establishments primarily engaged in manufacturing automotive, tank, and tractor power transmission equipment are classified in industry 3714; aircraft power transmission equipment in industry 3728; ball and roller bearings in industry 3562; and speed changers, industrial high speed drives, and gears in industry 3566.

3569 **General Industrial Machinery and Equipment, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing machinery, equipment, and components for general industrial use, and for which no special classification is provided. Machine shops primarily engaged in producing machine and equipment parts, usually on a job or order basis, are classified in industry 3599.

357 OFFICE, COMPUTING, AND ACCOUNTING MACHINES

3572 and 3579 **Typewriters and Office Machines, Not Elsewhere Classified.**—The Typewriters Industry includes establishments primarily engaged in manufacturing typewriters and parts, including coded media typewriters and specialized composing typewriters. This industry is combined with the Office Machines, N.E.C., Industry which includes establishments primarily engaged in manufacturing office machines and devices not elsewhere classified. Establishments primarily engaged in manufacturing computing machines are classified in industry 3573, cash registers in industry 3574, and photocopy and microfilm equipment in industry 3861 (Photographic Equipment and Supplies).

The classification of establishments for which data are tabulated in this report is based upon the definitions and coding structure contained in the 1972 edition of the Standard Industrial Classification (SIC) Manual, published by the Office of Management and Budget, Executive Office of the President. The statistics for these industries as classified under the 1972 edition of the SIC manual were unchanged as to code number or content from the previous classification system. However, it was necessary to combine industry 3572, Typewriters, with industry 3579, Office Machines, N.E.C., to avoid disclosing the operation of individual companies.

3573 **Electronic Computing Equipment.**—Establishments primarily engaged in manufacturing electronic computers and peripheral equipment and/or major

logical components intended for use in electronic computer systems. Included are general-purpose electronic analog computers, electronic digital computers, military, ruggedized, and special purpose computers. The electronic computers may be used for data processing or may be incorporated as components of control equipment for industrial use, and as components of equipment used in weapons and weapons systems, space and oceanographic exploration, and transportation and other systems. Electronic computer systems contain high-speed arithmetic and program control units, on-line information storage devices, input/output equipment, terminals, data communication devices, and punched card equipment. Examples of input/output equipment are converters (card and/or tape) and readers and printers. Examples of storage devices are magnetic drums and disks magnetic cores and magnetic film memories. In addition to providing technical manuals necessary for the operation and maintenance of the equipment, establishments in this industry usually furnish general-purpose computer programs and basic operating systems programs needed for effective use of the computer system. Establishments primarily producing rebuilt electronic computers are also included in this industry. Establishments primarily engaged in manufacturing desk calculators, cash registers, accounting machines and similar equipment that are operator-paced are classified in industry 3574; electrical and electronic test equipment in industry 3825; industrial controls, including electronic, in industry 3622; and industrial process instruments in industry 3823.

3574 Calculating and Accounting Machines, Except Electronic Computing Equipment.—Establishments primarily engaged in manufacturing desk calculators, adding and accounting machines, cash registers, and similar equipment. Included are electronic calculating and accounting machines which, even when augmented by attachments or which include program control or have input/output capabilities, must be paced by operator intervention. Establishments primarily engaged in manufacturing electronic computing equipment are classified in industry 3573; typewriters in industry 3572; and office duplicating machines and devices, autographic registers, and other office machines in industry 3579.

3576 Scales and Balances, Except Laboratory.—Establishments primarily engaged in manufacturing weighing and force measuring machines and devices of all types, except those regarded as scientific apparatus for laboratory and experimental work, which are classified in industry 3811.

3579 Typewriters and Office Machines, Not Elsewhere Classified.—(See 3572.)

358 REFRIGERATION AND SERVICE INDUSTRY MACHINERY

3581 Automatic Merchandising Machines.—Establishments primarily engaged in manufacturing automatic merchandising units, also referred to as vending machines (excluding music, amusement, or gaming machines), and coin-operated mechanisms for such machines.

3582 Commercial Laundry, Dry Cleaning, and Pressing Machines.—Establishments primarily engaged in manufacturing laundry and dry cleaning equipment and pressing machines for commercial and industrial use. Establishments primarily engaged in manufacturing household laundry equipment, including coin-operated washers and driers, are classified in industry 3633.

3585 Air-Conditioning and Warm-Air Heating Equipment and Commercial and Industrial Refrigeration Equipment.—Establishments primarily engaged in manufacturing refrigeration equipment and systems and similar equipment for commercial and industrial use; complete air-conditioning units for domestic, commercial, and industrial use; and warm-air furnaces, except electric. Establishments primarily engaged in manufacturing soda fountains and beer dispensing equipment and humidifiers and dehumidifiers, except for rooms, are also classified in this industry. Establishments primarily engaged in manufacturing household refrigerators and home and farm freezers are classified in industry 3632; electric air space heaters in industry 3634; and electric warm-air furnaces and other electric comfort heating equipment in industry 3699.

3586 Measuring and Dispensing Pumps.—Establishments primarily engaged in manufacturing measuring and dispensing pumps commonly used in service and filling stations for dispensing gasoline, oil, and grease, including grease guns. Establishments primarily engaged in manufacturing pumps and pumping equipment for general industrial use are classified in industry 3561.

3589 **Service Industry Machines, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing machines and equipment, not elsewhere classified, for use in service industries, such as floor sanding machines, industrial vacuum cleaners, scrubbing machines, commercial cooking and food warming equipment, and commercial dishwashing machines. Establishments primarily engaged in manufacturing household electrical appliances are classified in group 363.

359 MISCELLANEOUS MACHINERY, EXCEPT ELECTRICAL

3592 **Carburetors, Pistons, Piston Rings, and Valves.**—Establishments primarily engaged in manufacturing carburetors, pistons, piston rings, and valves. Establishments primarily engaged in manufacturing metallic packing are classified in industry 3293; and those primarily engaged in manufacturing machine repair and equipment parts (except electric), on a job or order basis for others, are classified in industry 3599.

3599 **Machinery, Except Electrical, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing machinery and parts except electrical, not elsewhere classified, such as amusement park equipment, pneumatic and hydraulic cylinders, and flexible metal hose and tubing. This industry also includes establishments primarily engaged in producing or repairing machine and equipment parts, not elsewhere classified, on a job or order basis for others.

36 ELECTRICAL AND ELECTRONIC MACHINERY, EQUIPMENT, AND SUPPLIES

This major group includes establishments engaged in manufacturing machinery, apparatus, and supplies for the generation, storage, transmission, transformation, and utilization of electrical energy. The manufacture of household appliances is included in this group, but industrial machinery and equipment powered by built-in or detachable electric motors is classified in SIC Major Group 35. Establishments primarily engaged in manufacturing instruments for indicating, measuring, and recording electrical quantities are classified in industry 3825.

361 ELECTRIC TRANSMISSION AND DISTRIBUTION EQUIPMENT

3612 **Power, Distribution, and Specialty Transformers.**—Establishments primarily engaged in manufacturing power, distribution, instrument, and specialty transformers. Establishments primarily engaged in manufacturing radio frequency or voice frequency transformers, coils, or chokes are classified in industry 3677, and resistance welder transformers in industry 3623.

3613 **Switchgear and Switchboard Apparatus.**—Establishments primarily engaged in manufacturing switchgear and switchboard apparatus. Important products of this industry include power switches, circuit breakers, power switching equipment, and similar switchgear for general industrial application; switchboards and cubicles, control and metering panels, power fuse mountings, and similar switchboard apparatus and supplies. Establishments primarily engaged in manufacturing industrial controls are classified in industry 3622, and those manufacturing current-carrying wiring devices in industry 3643.

362 ELECTRICAL INDUSTRIAL APPARATUS

3621 **Motors and Generators.**—Establishments primarily engaged in manufacturing electric motors (except starting motors) and power generators; motor generator sets; railway motors and control equipment; and motors, generators, and control equipment for gasoline, electric, and oil-electric buses and trucks. Establishments primarily engaged in manufacturing turbo-generators are classified in industry 3511, and starting motors and battery charging generators for internal combustion engines in industry 3694.

3622 **Industrial Controls.**—Establishments primarily engaged in manufacturing motor starters and controllers; control accessories, electronic controls, and other industrial controls. Establishments primarily engaged in manufacturing automatic temperature controls are classified in industry 3822, and industrial process instruments in industry 3823.

3623 **Welding Apparatus, Electric.**—Establishments primarily engaged in manufacturing electric welding apparatus and accessories. Establishments primarily engaged in coating welding wire from purchased wire or from wire drawn in the same establishment are also included. Establishments primarily engaged

in manufacturing gas welding apparatus are classified in industry 3549, and laser, electron beam, and ultrasonic welding machines and equipment in industry 3662.

3624 **Carbon and Graphite Products.**—Establishments primarily engaged in manufacturing lighting carbons; carbon, graphite, and metal-graphite brushes and brush stock; carbon or graphite electrodes for thermal and electrolytic uses; and other carbon, graphite, and metal-graphite products.

3629 **Electrical Industrial Apparatus, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing industrial and commercial electric apparatus and equipment, not elsewhere classified, such as blasting machines, and fixed and variable capacitors, condensers, and rectifiers for industrial applications. Establishments primarily engaged in manufacturing condensers, capacitors, and rectifiers for electronic end products are classified in SIC group 367.

363 HOUSEHOLD APPLIANCES

3631 **Household Cooking Equipment.**—Establishments primarily engaged in manufacturing household cooking equipment, such as stoves, ranges, and ovens, including both electric and nonelectric types. Establishments primarily engaged in manufacturing household cooking appliances, such as hot plates, grills, percolators, and toasters, are classified in industry 3634. Establishments primarily engaged in manufacturing commercial cooking equipment are classified in industry 3589.

3632 **Household Refrigerators and Home and Farm Freezers.**—Establishments primarily engaged in manufacturing household refrigerators and home and farm freezers. Establishments primarily engaged in manufacturing commercial and industrial refrigeration equipment, packaged room coolers, and all refrigeration compressor and condenser units are classified in industry 3585, and room dehumidifiers are classified in industry 3634.

3633 **Household Laundry Equipment.**—Establishments primarily engaged in manufacturing laundry equipment, such as washing machines, wringers, driers, and ironers, for household use. This industry also includes coin-operated washers and driers. Establishments primarily engaged in manufacturing commercial laundry equipment are classified in industry 3582.

3634 **Electric Housewares and Fans.**—Establishments primarily engaged in manufacturing electric housewares for heating, cooking, and other purposes; and electric fans, including ventilating and exhaust household-type fans. Important products of this industry include electric air heaters, electrically heated bed coverings, blenders, broilers, deep-fat fryers, flat irons, food mixers, hot plates, percolators and coffeemakers, roasters, toasters, desk and bracket fans, hassock or floor fans, window-type propeller fans, roll-about fans and household and kitchen ventilating and exhaust fans. Establishments primarily engaged in manufacturing industrial and commercial blowers, industrial and commercial exhaust and ventilating fans, and attic fans are classified in industry 3564.

3635 **Household Vacuum Cleaners.**—Establishments primarily engaged in manufacturing vacuum cleaners for household use. Establishments primarily engaged in manufacturing vacuum cleaners for industrial use are classified in industry 3589, and built-in vacuum cleaner systems in industry 1796.

3636 **Sewing Machines.**—Establishments primarily engaged in manufacturing sewing machines for domestic and industrial use.

3639 **Household Appliances, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing household appliances, not elsewhere classified, such as water heaters, dishwashers, and food waste disposal units.

364 ELECTRIC LIGHTING AND WIRING EQUIPMENT

3641 **Electric Lamps.**—Establishments primarily engaged in manufacturing electric bulbs, tubes, and related light sources. Important products of this industry include incandescent filament lamps, vapor and fluorescent lamps, photoflash and photoflood lamps, electrotherapeutic lamp units for ultra-violet and infra-red radiation, and other electric light sources. Establishments primarily engaged in manufacturing glass blanks for bulbs are classified in industry 3229; and lamp components, such as supports, filaments, lead-in wires, and cold cathode fluorescent lamp electrodes, in industry 3699.

3643 Current-Carrying Wiring Devices.—Establishments primarily engaged in manufacturing current-carrying wiring devices. Important products of this industry include attachment plugs and caps, convenience outlets, lamp sockets and receptacles, snap switches, conductor connectors, overhead trolley line material, rail bonds for both propulsion and signal circuits, lightning arrestors, and other lightning protective equipment.

3644 Noncurrent-Carrying Wiring Devices.—Establishments primarily engaged in manufacturing noncurrent-carrying wiring devices. Important products of this industry include conduits and fittings; electrical insulators and insulation materials, except porcelain insulators (industry 3264) and glass insulators (industry 3229); outlet, switch and fuse boxes; and pole line hardware.

3645 Residential Electric Lighting Fixtures.—Establishments primarily engaged in manufacturing residential electric lighting fixtures and equipment, fixed or portable. Establishments primarily engaged in producing glassware for lighting fixtures are classified in SIC Major Group 32; electric light bulbs, tubes, and related light sources in industry 3641; lampshades except glass and metal in industry 3999; and nonelectric fixtures and portable electric flashlights, lanterns, and similar lamps in industry 3648.

3646 Commercial, Industrial, and Institutional Electric Lighting Fixtures.—Establishments primarily engaged in manufacturing commercial, industrial, and institutional electric lighting fixtures. Establishments primarily engaged in producing glassware for lighting fixtures are classified in SIC Major Group 32; residential lighting fixtures in industry 3645; and vehicular lighting fixtures in industry 3647.

3647 Vehicular Lighting Equipment.—Establishments primarily engaged in manufacturing vehicular lighting equipment.

3648 Lighting Equipment, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing lighting fixtures and equipment, electric and nonelectric, not elsewhere classified, including flashlights and similar portable lamps, searchlights, ultraviolet lamp fixtures, and infra-red lamp fixtures. Establishments primarily engaged in manufacturing electric light bulbs, tubes, and related light sources are classified in industry 3641, and those producing glassware for lighting fixtures are classified in SIC Major Group 32.

365 RADIO AND TELEVISION RECEIVING EQUIPMENT, EXCEPT COMMUNICATION TYPES

3651 Radio and Television Receiving Sets, Except Communication Types.—Establishments primarily engaged in manufacturing electronic equipment for home entertainment, including auto radios and tape players. This industry also includes establishments primarily engaged in manufacturing public address systems and music distribution apparatus. Establishments primarily engaged in manufacturing phonograph records and prerecorded tape are classified in industry 3652. Establishments primarily engaged in manufacturing separate cabinets for home electronic equipment are classified in SIC Major Group 25.

3652 Phonograph Records and Prerecorded Magnetic Tape.—Establishments primarily engaged in manufacturing phonograph records and prerecorded magnetic tape. Establishments primarily engaged in manufacturing electronic equipment for home entertainment, except records and prerecorded magnetic tape, are classified in industry 3651.

366 COMMUNICATION EQUIPMENT

3661 Telephone and Telegraph Apparatus.—Establishments primarily engaged in manufacturing wire telephone and telegraph equipment and parts especially designed for telephone and telegraph use.

3662 Radio and Television Transmitting, Signaling, and Detection Equipment and Apparatus.—Establishments primarily engaged in manufacturing (1) radio and television broadcasting equipment; (2) electric communication equipment and parts, except telephone and telegraph; (3) electronic field detection apparatus, light and heat emission operating apparatus, object detection apparatus and navigational electronic equipment, and aircraft and missile control systems; (4) high-energy particle accelerator systems and equipment designed and sold as a complete package for radiation therapy, irradiation, radiographic inspection, and research (linear accelerators, betatrons, dynamotrons, Vandergraff generators, resonant transformers, insulating core transformers, etc.); (5) high-energy particle electronic equipment and accessories sold separately for the construction of linear accelerators, cyclotrons, synchrotrons, and other high-energy research installations (transmitters/modulators, accelerating wave-

guide structures, pulsed electron guns, vacuum systems, cooling systems, etc.); and (6) other electric and electronic communication and signaling products not elsewhere classified. Establishments primarily engaged in manufacturing transmitting tubes are classified in industry 3673.

367 ELECTRONIC COMPONENTS AND ACCESSORIES

3671 Radio and Television Receiving-Type Electron Tubes, Except Cathode Ray.—Establishments primarily engaged in manufacturing radio and television receiving-type electron tubes, except cathode ray tubes. Establishments primarily engaged in manufacturing television receiving-type cathode ray tubes are classified in industry 3672; transmitting tubes in industry 3673; and X-ray tubes in industry 3693.

3672 Cathode Ray Television Picture Tubes.—Establishments primarily engaged in manufacturing television receiving-type cathode ray tubes. Establishments primarily engaged in manufacturing other radio and television receiving-type electron tubes are classified in industry 3671; and transmitting tubes in industry 3673.

3673 Transmitting, Industrial, and Special Purpose Electron Tubes.—Establishments primarily engaged in manufacturing transmitting, industrial, and special purpose electron tubes. Establishments primarily engaged in manufacturing radio and television receiving tubes are classified in industry 3671; television receiving-type cathode ray tubes in industry 3672; and X-ray tubes in industry 3693.

3674 Semiconductors and Related Devices.—Establishments primarily engaged in manufacturing semiconductor and related solid state devices, such as semiconductor diodes and stacks, including rectifiers, integrated microcircuits (semiconductor networks), transistors, solar cells, and light sensing and emitting semiconductor (solid state) devices.

3675 Electronic Capacitors.—Establishments primarily engaged in manufacturing electronic capacitors.

3676 Resistors, for Electronic Applications.—Establishments primarily engaged in manufacturing resistors for electronic end products. Establishments primarily engaged in manufacturing resistors for telephone and telegraph apparatus are classified in industry 3661.

3677 Electronic Coils, Transformers, and Other Inductors.—Establishments primarily engaged in manufacturing electronic coils, transformers, and inductors. Establishments primarily engaged in manufacturing transformers and inductors for telephone and telegraph apparatus are classified in industry 3661; electric lamps in industry 3641; and semiconductor (solid state) and related devices in industry 3674.

3678 Connectors, for Electronic Applications.—Establishments primarily engaged in manufacturing electronic connectors. Establishments primarily engaged in manufacturing electronic capacitors are classified in industry 3675; and electronic coils, transformers, and other inductors in industry 3677.

3679 Electronic Components, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing electronic components, not elsewhere classified, such as receiving antennas, printed circuits, switches, and wave guides.

369 MISCELLANEOUS ELECTRICAL MACHINERY, EQUIPMENT, AND SUPPLIES

3691 Storage Batteries.—Establishments primarily engaged in manufacturing storage batteries.

3692 Primary Batteries, Dry and Wet.—Establishments primarily engaged in manufacturing primary batteries, dry or wet.

3693 Radiographic X-ray, Fluoroscopic X-ray, Therapeutic X-ray, and Other X-ray Apparatus and Tubes; Electromedical and Electrotherapeutic Apparatus.—Establishments primarily engaged in manufacturing radiographic X-ray, fluoroscopic X-ray, and therapeutic X-ray apparatus and tubes for medical, industrial, research and control applications. This industry also includes establishments primarily engaged in manufacturing electromedical and electrotherapeutic apparatus except electrotherapeutic lamp units for ultra-violet and infra-red radiation (industry 3641). Establishments primarily engaged in manufacturing radio receiving-type tubes are classified in industry 3671; television receiving cathode ray tubes in industry 3672; and transmitting tubes in industry 3673.

3694 Electrical Equipment for Internal Combustion Engines.—Establishments primarily engaged in manufacturing electrical equipment for internal combustion engines. Important products of this industry

include armatures, starting motors, alternators, and generators for automobiles and aircraft; and ignition apparatus for internal combustion engines, including spark plugs, magnetos, coils, and distributors.

3699 **Electrical Machinery, Equipment, and Supplies, Not Elsewhere Classified.**—Establishments primarily in manufacturing electrical machinery, equipment, and supplies, not elsewhere classified, such as appliance and extension cords, bells and chimes, and insect traps.

37 TRANSPORTATION EQUIPMENT

This major group includes establishments engaged in manufacturing equipment for transportation of passengers and cargo by land, air, and water. Important products produced by establishments classified in this major group include motor vehicles, aircraft, guided missiles and space vehicles, ships, boats, railroad equipment, and miscellaneous transportation equipment such as motorcycles, bicycles, and snowmobiles. Establishments primarily engaged in manufacturing mobile homes are classified in industry 2451.

371 MOTOR VEHICLES AND MOTOR VEHICLE EQUIPMENT

3711 **Motor Vehicles and Car Bodies.**—This industry comprises establishments primarily engaged in the manufacture of passenger cars, passenger car bodies, trucks, buses, and wheeled combat vehicles. Complete car chassis and complete truck chassis, with or without cab, are also included in this industry. Establishments primarily engaged in the manufacture of trucks or buses on purchased chassis are classified in industry 3713; tanks, self-propelled weapons, and other military vehicles in industry 3795; and motor homes produced on purchased chassis in industry 3716.

3713 **Truck and Bus Bodies.**—Establishments primarily engaged in manufacturing truck and bus bodies for sale separately or for assembly on purchased chassis. Establishments primarily engaged in manufacturing complete trucks and buses are classified in industry 3711, stamped body parts for trucks and buses in industry 3465, and truck trailers and demountable cargo containers in industry 3715.

3714 **Motor Vehicle Parts and Accessories.**—Establishments primarily engaged in manufacturing motor vehicle parts and accessories, but not engaged in manufacturing complete motor vehicles or passenger car bodies. Establishments primarily engaged in manufacturing or assembling complete automobiles and trucks are classified in industry 3711, tires and tubes in industry 3011, automobile glass in SIC Major Group 32, automobile stampings in industry 3465, ignition systems in industry 3694, storage batteries in industry 3691, and carburetors, pistons, rings, and valves in industry 3592.

3715 **Truck Trailers.**—Establishments primarily engaged in manufacturing truck trailers, truck trailer chassis for sale separately, detachable trailer bodies (cargo containers) for sale separately, and detachable trailer (cargo container) chasis for sale separately.

3716 **Motor Homes Produced on Purchased Chassis.**—This industry comprises establishments primarily engaged in the manufacture of motor homes produced on purchased chassis. Establishments primarily engaged in the manufacture of motor homes produced on chassis of own manufacture are classified in industry 3711.

The Motor Homes Produced on Purchased Chassis is included for the first time in the 1977 census.

372 AIRCRAFT AND PARTS

3721 **Aircraft.**—Establishments primarily engaged in manufacturing or assembling complete aircraft. This industry also includes establishments primarily engaged in research and development on aircraft or in factory-type aircraft modification on a contract or fee basis. Establishments primarily engaged in manufacturing engines, propellers, and other aircraft parts and auxiliary equipment are classified in industries 3724 and 3728; and those producing guided missiles and space vehicles and parts are classified in SIC group 376.

3724 **Aircraft Engines and Engine Parts.**—Establishments primarily engaged in manufacturing aircraft engines and engine parts. Research and development on aircraft engines is included in this industry. Establishments primarily engaged in manufacturing guided missile and space vehicle propulsion units and parts are classified in industry 3764.

3728 **Aircraft Parts and Auxiliary Equipment, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing aircraft parts and auxiliary equip-

ment not elsewhere classified. Research and development on aircraft parts is included in this industry. Establishments primarily engaged in manufacturing or assembling complete aircraft are classified in industry 3721, aircraft engines and parts in industry 3724, aeronautical instruments in industry 3811, aeronautical electrical equipment in industry 3694, and guided missile and space vehicle parts and auxiliary equipment in industry 3769.

373 SHIP AND BOAT BUILDING AND REPAIRING

3731 Ship Building and Repairing.—Establishments primarily engaged in building and repairing all types of ships, barges, and lighters, whether propelled by sail or motor power or towed by other craft. This industry also includes the conversion and alteration of ships. Establishments primarily engaged in fabricating structural assemblies or components for ships, or subcontractors engaged in ship painting, joinery, carpentry work, electrical wiring installation, etc., are classified in other industries.

3732 Boat Building and Repairing.—Establishments primarily engaged in building and repairing all types of boats. Establishments primarily engaged in cleaning and storing boats and in the rental of dock space and yacht clubs are classified in nonmanufacturing industries. Establishments primarily engaged in manufacturing rubber and nonrigid plastic boats are classified in SIC Major Group 30.

374 RAILROAD EQUIPMENT

3743 Railroad Equipment.—Establishments primarily engaged in building and rebuilding locomotives (including frames and parts not elsewhere classified) of any type or gage; and railroad, street, and rapid transit cars and car equipment for operation on rails for freight and passenger service. This industry also includes establishments primarily engaged in manufacturing trackless trolley buses. Establishments primarily engaged in manufacturing mining cars are classified in industry 3532. Repair shops, owned and operated by railroads or local transit companies, rebuilding or repairing locomotives or cars, or building new locomotives or cars for their own account, are classified in SIC Major Groups 40 and 41.

375 MOTORCYCLES, BICYCLES, AND PARTS

3751 Motorcycles, Bicycles, and Parts.—Establishments primarily engaged in manufacturing motorcycles, bicycles, and similar equipment and parts. Establishments primarily engaged in assembling motorcycles or bicycles from purchased parts are also included in this industry. Establishments primarily engaged in manufacturing children's vehicles, except bicycles, are classified in industry 3944. Establishments primarily engaged in manufacturing golf carts and other similar personnel carriers are classified in industry 3799.

376 GUIDED MISSILES AND SPACE VEHICLES AND PARTS

3761 Guided Missiles and Space Vehicles.—Establishments primarily engaged in manufacturing complete guided missiles and space vehicles. Research and development and other services on or for guided missiles and space vehicles are included in this industry. Establishments primarily engaged in manufacturing guided missile and space vehicle propulsion units and propulsion unit parts are classified in industry 3764; space satellite and guided missile and space vehicle airborne and ground guidance, checkout, and launch electronic systems and components in industry 3662; and guided missile and space vehicle airframes, nose cones, and space capsules in industry 3769.

3764 Guided Missile and Space Vehicle Propulsion Units and Propulsion Unit Parts.—Establishments primarily engaged in manufacturing guided missile propulsion units and propulsion unit parts. Research and development on guided missile and space vehicle propulsion units and propulsion unit parts is also included in this industry.

3769 Guided Missile and Space Vehicle Parts and Auxiliary Equipment, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing guided missile and space vehicle parts and auxiliary equipment not elsewhere classified. Research and development on guided missile and space vehicle parts and auxiliary equipment, not elsewhere classified, is also included in this industry. Establishments primarily engaged in manufacturing navigational and guidance systems are classified in industry 3662.

379 MISCELLANEOUS TRANSPORTATION EQUIPMENT

3792 **Travel Trailers and Campers.**—Establishments primarily engaged in manufacturing travel trailers for attachment to passenger cars or other vehicles, pickup coaches (campers) or caps (covers) for mounting on pickup trucks and self-contained motor homes. Travel trailers are generally 35 feet long or less, 8 feet wide or less, and have storage facilities for water and waste. Establishments primarily engaged in manufacturing mobile homes are classified in industry 2451.

3795 **Tanks and Tank Components.**—Establishments primarily engaged in manufacturing or assembling complete tanks and specialized components for tanks. Establishments primarily engaged in manufacturing military vehicles other than tanks are classified in SIC group 371, and tank engines in industry 3519.

3799 **Transportation Equipment, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing transportation equipment not elsewhere classified. Establishments primarily engaged in manufacturing industrial trucks, tractors, trailers, and stackers are classified in industry 3537, and children's vehicles except bicycles in industry 3944.

38 MEASURING, ANALYZING, AND CONTROLLING INSTRUMENTS; PHOTOGRAPHIC, MEDICAL, AND OPTICAL GOODS; WATCHES AND CLOCKS

This major group includes establishments engaged in manufacturing instruments (including professional and scientific) for measuring, testing, analyzing, and controlling, and their associated sensors and accessories; optical instruments and lenses; surveying and drafting instruments; surgical, medical, and dental instruments, equipment, and supplies; opthalmic goods; photographic equipment and supplies; and watches and clocks.

381 ENGINEERING, LABORATORY, SCIENTIFIC, AND RESEARCH INSTRUMENTS AND ASSOCIATED EQUIPMENT

3811 **Engineering, Laboratory, Scientific, and Research Instruments and Associated Equipment.**—Establishments primarily engaged in manufacturing engineering, laboratory, and scientific instruments, including nautical, navigational, aeronautical, surveying, and drafting equipment and instruments for laboratory work and scientific research (except optical instruments—industry 3832). Establishments primarily engaged in manufacturing surgical and medical instruments are classified in industry 3841; dental instruments and equipment in industry 3843; measuring, analyzing, and controlling instruments, including instruments for measuring electrical quantities and characteristics, in SIC group 382; watches and clocks in industry 3873; machinists' precision measuring tools in industry 3545; and measuring and dispensing pumps in industry 3586.

382 MEASURING AND CONTROLLING INSTRUMENTS

3822 **Automatic Controls for Regulating Residential and Commercial Environments and Appliances.**—Establishments primarily engaged in manufacturing temperature and related controls for heating and air-conditioning installations and refrigeration applications, which are electrically, electronically, or pneumatically actuated, and which measure and control variables such as temperature and humidity; and automatic regulators used as components of household appliances. Establishments primarily engaged in manufacturing industrial process controls are classified in industry 3823; motor control switches in industry 3622, switches for household appliances in industry 3643, and appliance timers in industry 3873.

3823 **Industrial Instruments for Measurement, Display, and Control of Process Variables; and Related Products.**—Establishments primarily engaged in manufacturing industrial instruments and related products for measuring, displaying (indicating and/or recording), transmitting, and controlling process variables in manufacturing, energy conversion, and public service utilities. These instruments operate mechanically, pneumatically, electronically, or electrically to measure process variables such as temperature, humidity, pressure, vacuum, combustion, flow, level, viscosity, density, acidity, alkalinity, specific gravity, gas and liquid concentration, sequence, time interval, mechanical motion, and rotation. Establishments primarily engaged in manufacturing electrical integrating meters are classified in industry 3825; residential and commercial comfort controls in industry 3822; all liquid-in-glass and bimetal thermometers and glass hydrometers in industry 3829; recorder charts in SIC group 275, and optical instruments in industry 3832.

3824 **Totalizing Fluid Meters and Counting Devices.**—Establishments primarily engaged in manufacturing totalizing (registering) meters, monitoring fluid flows, such as watermeters and gasmeters; and producers of mechanical and electromechanical counters and associated metering devices. Establishments primarily engaged in manufacturing electricity integrating meters and electronic frequency counters are classified in industry 3825; and industrial process instruments in industry 3823.

3825 **Instruments for Measuring and Testing of Electricity and Electrical Signals.**—Establishments primarily engaged in manufacturing instruments for measuring the characteristics of electricity and electrical signals, such as voltmeters, ammeters, watt-meters, watt-hour meters, demand meters, and equipment for testing the electrical characteristics of electrical, radio, and communication circuits and of internal combustion engines. Establishments primarily engaged in the manufacturing of electronic checkout, monitoring, evaluating, and other electronic support equipment for electronic navigational, radar, sonar, and other communications systems are classified in industry 3662.

3829 **Measuring and Controlling Devices, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing measuring and controlling devices, not elsewhere classified, including testing instruments to determine the physical properties of materials, nuclear instruments, aircraft engine instruments, and liquid-in-glass and bimetal thermometers.

383 OPTICAL INSTRUMENTS AND LENSES

3832 **Optical Instruments and Lenses.**—Establishments primarily engaged in manufacturing instruments that measure an optical property; apparatus, except photographic, that projects or magnifies, such as binoculars, prisms, and lenses; optical sighting and fire control equipment; and related analytical instruments. Establishments primarily engaged in manufacturing eyeglass lenses, frames, or fittings are classified in industry 3851; separate computers in industry 3573; and electronic tracking and fire control systems in industry 3662.

384 SURGICAL, MEDICAL, AND DENTAL INSTRUMENTS AND SUPPLIES

3841 **Surgical and Medical Instruments and Apparatus.**—Establishments primarily engaged in manufacturing medical, surgical, ophthalmic, and veterinary instruments and apparatus. Establishments primarily engaged in manufacturing surgical and orthopedic appliances are classified in industry 3842; and electrotherapeutic, electromedical, and X-ray apparatus in industry 3693.

3842 **Orthopedic, Prosthetic, and Surgical Appliances and Supplies.**—Establishments primarily engaged in manufacturing orthopedic, prosthetic, and surgical appliances and supplies, arch supports, and other foot appliances; fracture appliances, elastic hosiery, abdominal supporters, braces, and trusses; bandages; surgical gauze and dressings; sutures; adhesive tapes and medicated plasters; and personal safety appliances and equipment. Establishments primarily engaged in manufacturing surgical and medical instruments are classified in industry 3841. Establishments primarily engaged in manufacturing appliances and in the personal fitting to the individual prescription of a physician are classified in trade industries.

3843 **Dental Equipment and Supplies.**—Establishments primarily engaged in manufacturing artificial teeth, dental metals, alloys and amalgams, and a wide variety of equipment, instruments, and supplies used by dentists, dental laboratories, and dental colleges. Dental laboratories constructing artificial dentures, bridges, inlays, and other dental restorations on specifications from dentists are classified in industry 8072.

385 OPHTHALMIC GOODS

3851 **Ophthalmic Goods.**—Establishments primarily engaged in manufacturing opthalmic frames, lenses, and sunglass lenses. Establishments primarily engaged in manufacturing slit lamps are classified in industry 3841, and molded glass blanks in industry 3229. Establishments primarily engaged in grinding lenses and fitting glasses to prescription are classified in trade.

386 PHOTOGRAPHIC EQUIPMENT AND SUPPLIES

3861 **Photographic Equipment and Supplies.**—Establishments primarily engaged in manufacturing (1) photographic apparatus, equipment, parts, attachments, and accessories, such as still and motion

picture cameras and projection apparatus; photocopy and microfilm equipment; blueprinting and diazotype (white printing) apparatus and equipment; and other photographic equipment; and (2) sensitized film, paper, cloth, plates, and prepared photographic chemicals for use therewith. Establishments primarily engaged in manufacturing photographic paper stock (unsensitized), and paper mats, mounts, easels, and folders for photographic use are classified in SIC Major Group 26; photographic lenses in industry 3832; photographic glass in SIC Major Group 32; chemicals for technical purposes, not specifically prepared and packaged for use in photography, in SIC Major Group 28; and photographic flash, flood enlarger, and projection lamps in industry 3641.

387 WATCHES, CLOCKS, CLOCKWORK OPERATED DEVICES, AND PARTS

3873 **Watches, Clocks, Clockwork Operated Devices, and Parts.**—Establishments primarily engaged in manufacturing clocks (including electric), watches, watchcases, mechanisms for clockwork operated devices, and clock and watch parts. This industry includes establishments primarily engaged in assembling clocks and watches from purchased movements and cases. Establishments primarily engaged in manufacturing time clocks are classified in industry 3579, glass crystals in industry 3231, and unbreakable crystals in industry 3079.

39 MISCELLANEOUS MANUFACTURING INDUSTRIES

This major group includes establishments primarily engaged in manufacturing products not classified in any other manufacturing group. Industries in this group fall into the following categories: Jewelry, silverware and plated ware; musical instruments; toys, sporting and athletic goods; pens, pencils, and other office and artists' materials; buttons, costume novelties, miscellaneous notions; brooms and brushes; caskets; and other miscellaneous manufacturing industries.

391 JEWELRY, SILVERWARE, AND PLATED WARE

3911 **Jewelry, Precious Metal.**—Establishments primarily engaged in manufacturing jewelry and other articles worn on or carried about the person, made of precious metals with or without stones (including the setting of stones where used), including cigarette cases and lighters, vanity cases and compacts; trimmings for umbrellas and canes; and jewel settings and mountings. Establishments primarily engaged in manufacturing costume jewelry from nonprecious metals and other materials are classified in industry 3961.

3914 **Silverware, Plated Ware, and Stainless Steel Ware.**—Establishments primarily engaged in manufacturing flatware (including knives, forks, and spoons), hollowware, toiletware, ecclesiastical ware, and related products made of sterling silver; of metal plated with silver, gold, or other metal; of nickel silver; of pewter; or of stainless steel.

3915 **Jewelers' Findings and Materials and Lapidary Work.**—Establishments primarily engaged in manufacturing unassembled jewelry parts, and stock shop products such as sheet, wire, and tubing; and establishments of lapidaries primarily engaged in cutting, slabbing, tumbling, carving, engraving, polishing, or faceting stones from natural or manmade precious or semiprecious gem raw materials, either for sale or on a contract basis for the trade; in recutting, repolishing, and setting gem stones; or in cutting, drilling, and otherwise preparing jewels for instruments, dies, watches, chronometers, and other industrial uses. This industry includes the drilling, sawing, and peeling of real or cultured pearls, but does not include the manufacture of artificial pearls (industry 3961).

393 MUSICAL INSTRUMENTS

3931 **Musical Instruments.**—Establishments primarily engaged in manufacturing pianos, with or without player attachments; organs; other musical instruments; and parts and accessories for musical instruments.

394 TOYS AND AMUSEMENT, SPORTING, AND ATHLETIC GOODS

3942 **Dolls.**—Establishments primarily engaged in manufacturing dolls, doll parts, and doll clothing. Establishments primarily engaged in manufacturing stuffed toy animals are also included in this industry.

3944 Games, Toys, and Children's Vehicles; Except Dolls and Bicycles.—Establishments primarily engaged in manufacturing games and game sets for adults and children, and mechanical and nonmechanical toys. Important products of this industry include games such as chess, checkers, dominoes, puzzles, and other indoor games; and toys, such as toy furniture, doll carriages and carts, construction sets, mechanical trains, toy guns and air rifles, and other mechanical games and toys; baby carriages and strollers; children's velocipedes and tricycles, coaster wagons, play cars, sleds, and other children's outdoor wheel goods and vehicles, except bicycles (industry 3751). Establishments primarily engaged in manufacturing dolls are classified in industry 3942; and sporting and athletic goods for children and adults in industry 3949.

3949 Sporting and Athletic Goods, Not Elsewhere Classified.—Establishments primarily engaged in manufacturing sporting and athletic goods, not elsewhere classified, such as fishing tackle; golf and tennis goods; baseball, football, basketball, and boxing equipment; roller skates and ice skates; gymnasium and playground equipment; billiard and pool tables; and bowling alleys and equipment. Establishments primarily engaged in manufacturing athletic apparel are classified in SIC Major Group 23, small arms ammunition in industry 3482, and firearms in industry 3484.

395 PENS, PENCILS, AND OTHER OFFICE AND ARTISTS' MATERIALS

3951 Pens, Mechanical Pencils, and Parts.—Establishments primarily engaged in manufacturing pens, pen points, fountain pens, ballpoint pens, refill cartridges, porous-tipped felt tip markers, and parts.

3952 Lead Pencils, Crayons, and Artists' Materials.—Establishments primarily engaged in manufacturing lead pencils, pencil leads, and crayons; and materials and equipment for artwork, such as airbrushes, drawing tables and boards, palettes, sketch boxes, pantographs, artists' colors and waxes, pyrography goods, drawing inks, and drafting materials. Establishments primarily engaged in manufacturing mechanical pencils are classified in industry 3951, and drafting instruments in industry 3811.

3953 Marking Devices.—Establishments primarily engaged in manufacturing rubber and metal hand stamps, dies, and seals; steel letters and figures; and stencils for use in painting or marking. Establishments primarily engaged in manufacturing felt tip markers are classified in industry 3951.

3955 Carbon Paper and Inked Ribbons.—Establishments primarily engaged in manufacturing carbon paper for business machines, sales books, etc.; spirit or gelatin process and other stencil paper; and inked or carbon ribbons for business machines.

396 COSTUME JEWELRY, COSTUME NOVELTIES, BUTTONS, AND MISCELLANEOUS NOTIONS, EXCEPT PRECIOUS METAL

3961 Costume Jewelry and Costume Novelties, Except Precious Metal.—Establishments primarily engaged in manufacturing costume jewelry, costume novelties, and ornaments made of all materials, except precious metal, precious or semiprecious stones, and rolled gold plate and gold filled materials (industry 3911).

3962 Feathers, Plumes, and Artificial Trees and Flowers.—Establishments primarily engaged in manufacturing artificial trees (including Christmas trees), flowers, fruits, and foliage made from all materials except glass; in producing fancy feathers, plumes, and articles made principally of feathers and plumes. Establishments primarily engaged in manufacturing artificial flowers, fruits, and foliage from glass are classified in industry 3231.

3963 Buttons.—Establishments primarily engaged in manufacturing buttons, button parts, and button blanks and molds, of all materials except precious metal and precious or semiprecious stones (industry 3911).

3964 Needles, Pins, Hooks and Eyes, and Similar Notions.—Establishments primarily engaged in manufacturing notions, such as machine and hand needles, pins, hooks and eyes, eyelets, buckles, and slide and snap fasteners.

399 MISCELLANEOUS MANUFACTURING INDUSTRIES

3991 Brooms and Brushes.—Establishments primarily engaged in manufacturing household, industrial, and street sweeping brooms; and brushes, such as paintbrushes, toothbrushes, toilet brushes, and household and industrial brushes.

3993 **Signs and Advertising Displays.**—Establishments primarily engaged in manufacturing electrical, mechanical, cutout, or plate signs and advertising displays, including neon signs and advertising novelties. Sign painting shops doing business on a custom basis are classified in industry 7399. Establishments primarily engaged in manufacturing electric signal equipment are classified in industry 3662, and commercial lighting fixtures in industry 3646.

3995 **Burial Caskets.**—Establishments primarily engaged in manufacturing burial caskets and cases including shipping cases of wood or other material except concrete. Establishments primarily engaged in producing other goods for use by morticians are classified on the basis of the product, such as burial garments in SIC Major Group 23.

3996 **Linoleum, Asphalted-Felt-Base, and Other Hard-Surface Floor Coverings, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing linoleum, asphalted-felt-base, and other hard-surface floor coverings not elsewhere classified. Establishments primarily engaged in manufacturing rubber floor coverings are classified in industry 3069, and cork floor and wall tile in industry 2499.

3999 **Manufacturing Industries, Not Elsewhere Classified.**—Establishments primarily engaged in manufacturing miscellaneous fabricated products, including beauty shop and barbershop equipment; hairwork; tobacco pipes and cigarette holders; coin-operated amusement machines; matches; candles; lampshades; dressed and dyed furs; umbrellas; parasols and canes; and other articles not elsewhere classified.

APPENDIX D. Reporting Forms

This appendix contains reproductions of a representative selection of reporting forms used in the 1977 economic censuses, with emphasis on the census of manufactures.

These forms are described in section 7 of the Introduction.

DUE DATE: February 15, 1978

Form Approved: O.M.B. No. 41-R2751

FORM NC-X1 (Items 1–4)
(4-27-77)

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

1977 ECONOMIC CENSUSES

REPORT OF ORGANIZATION

NOTICE – Response to this inquiry is **required by law (title 13, U.S. Code).** By the same law, your report to the Census Bureau is **confidential.** It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are **immune from legal process.**

Refer to this CENSUS FILE NUMBER in any correspondence pertaining to this report

Jeffersonville, Indiana 47132

***NOTE** – Shaded boxes are for Bureau of the Census use only*

Item 1 – COMPANY OWNERSHIP OR CONTROL (DOMESTIC)

Does another U.S. (domestic) company own more than 50 percent of the voting stock of your company OR have the power to control the management and policies of your company?

1 ☐ YES – *Enter the following information on the owning or controlling company and go to item 2.*

2 ☐ NO – *Go to item 2*

Name of owning or controlling company	Home office address *(Number and street, city, State, and ZIP code)*	Employer Identification Number of owning or controlling company
		–

Percent of voting stock owned – *Mark (X) one* → 1 ☐ **Less than 50%** 2 ☐ **50%** 3 ☐ **More than 50%**

Item 2 – COMPANY OWNERSHIP OR CONTROL (FOREIGN)

Does a foreign entity (company, individual, government, etc.) own 10 percent or more of the voting stock or other equity rights of your company?

1 ☐ YES – *Enter the following information on the owning entity and go to item 3.*

2 ☐ NO – *Go to item 3*

Name of owning entity	Home office address *(City, country)*

Percent of ownership – *Mark (X) one* → 1 ☐ **Less than 10%** 2 ☐ **10–24%** 3 ☐ **25–49%** 4 ☐ **50%** 5 ☐ **51–99%** 6 ☐ **100%**

Item 3 – FOREIGN AFFILIATES

Does this enterprise alone, or with its domestic affiliates, own 10 percent or more of the voting stock of an incorporated foreign business enterprise, or an equivalent interest in an unincorporated foreign business enterprise, including ownership of real estate?

1 ☐ YES – *Go to item 4*

2 ☐ NO – *Go to item 4*

Item 4 – CERTIFICATION

Name of person to contact regarding this report	Address (if different from above address)	Telephone: Area code	Number	Extension

This report is substantially accurate.

Signature of authorized person	Title	Date

_____

Item 5B – YOUR LISTING OF ADDITIONAL ESTABLISHMENTS AND SUBSIDIARIES

- **Column (a)** – List separately any establishments of your company and its subsidiaries located in the U.S. or any of its territories which are not accounted for on other report forms in this mailing package.
- **Instructions for questions (e) and (f)** – Answer question (e) for acquired establishments. Complete question (f) entering the date the establishment opened. If not yet in operation, enter the expected opening date and the expected employment.
- **Column (b)** – Complete this column for each listed establishment.
- **Column (c)** – Mark (X) the box which best describes the activity of each establishment. *See box codes*
- **Column (d)** – Describe major activity or list principal products or services.
- **NOTE:** Additional copies of **Item 5B** are available upon request to Bureau of the Census, 1201 East Tenth Street, Jeffersonville, Indiana 47132. If you prefer, you may use your own paper to list additional establishments; however, please **follow the same format** as shown on the report form. Be sure to **enter** the item number, your company's name and address, and the Census File Number in the upper right-hand corner of each additional sheet.

DESCRIPTION AND CODES FOR COLUMN (c)

1 – Agricultural production
2 – Agricultural services
3 – Mining
4 – Construction
5 – Merchant wholesalers
6 – Commission agent/broker
7 – Communications
8 – Manufacturers' sales branches, manufacturers' sales offices
9 – Manufacturing
10 – Retail
11 – Retail concessions/departments in retail stores
12 – Transportation and public utilities
13 – Finance, insurance, or real estate
14 – Services
15 – Medical, legal, or educational
16 – Auxiliary establishments primarily providing service to your own or affiliated company rather than customers or clients such as storage warehouses and research laboratories
17 – Central Administrative Office: accounting, purchasing, legal activities for your own company
18 – Other – *Specify major activity in column (d) below*

Employer Identification Number

NOTE – Additional copies of this form are available upon request. If you prefer, list additional establishments on your own paper. BE SURE TO ENTER THE CENSUS FILE NUMBER in the upper right-hand corner of each additional sheet.

Please correct errors in name, address and ZIP code. ENTER street and number if not shown.

Census use only	Unit No.	Item code	Unit No.	Item code	Unit No.	Item code	ACT	CCS	DOC

Item 1 – Does your organization or any of its subsidiaries have any establishments located in the United States or any of its territories which are not accounted for on other report forms in this mailing package?

☐ YES – *Go to item 2*
☐ NO – *Complete CERTIFICATION on reverse side and return report*

Item 2 – LISTING OF ADDITIONAL ESTABLISHMENTS

INSTRUCTIONS

Column (a) – Complete this column for each establishment that you list.

Column (b) – Mark (X) the box which best describes the principal activity of each establishment using the following code box descriptions:

1 – Agricultural production
2 – Agricultural services
3 – Mining
4 – Construction
5 – Merchant wholesaler
6 – Commission agent/broker
7 – Communications
8 – Manufacturers' sales branch/office
9 – Manufacturing
10 – Retail
11 – Retail concessions/departments in retail stores
12 – Transportation and public utilities
13 – Finance, insurance, or real estate
14 – Services
15 – Medical, legal, or educational
16 – Auxiliary establishments such as storage warehouses and research laboratories primarily providing service to your own or affiliated company rather than customers or clients
17 – Central administrative office, accounting, purchasing, legal activities for your own company
18 – Other – *Specify in column (c) below*

Column (c) – List in order of importance the principal products mined or made; kinds of wholesale or retail business; types of services provided; kinds of construction work done; or the types of crops grown or animals raised, etc.

Column (d) – Complete as indicated.

NOTE – Please return this report form whether or not you report additional establishments.

1977 ECONOMIC CENSUSES

GENERAL SCHEDULE

In correspondence pertaining to this report, please refer to this Census File Number

NC-X3

Employer Identification Number

Please complete this form and RETURN TO

BUREAU OF THE CENSUS
1201 East Tenth Street
Jeffersonville, Indiana 47132

Census use only	Unit No.	Item code	Unit No.	Item code	Unit No.	Item code

KEEP THIS COPY FOR YOUR FILES

PLEASE COMPLETE AND RETURN THE FORM WHICH SHOWS YOUR NAME AND ADDRESS

Please correct errors in name, address and ZIP code. ENTER street and number if not shown.

Important–Please read

The data reported on this form should cover only the establishment shown on the address label. However, if more than one establishment (location) was operated under the same Employer Identification Number in 1977, consolidate data for all such locations in items 5 and 6. In item 1 enter the location of the MAIN establishment. In item 12c provide information separately for each location, INCLUDING the main establishment.

Item 1 – PHYSICAL LOCATION OF ESTABLISHMENT – In order to assign this establishment to the correct geographic area, the Bureau of the Census must know the actual location **which may differ from the mailing address.** *Complete items a through g.*

a. Address number and street name of physical location – *If not known, enter building name, shopping center name, or other physical location description. Do not enter P.O. box or rural route.*
Mark (X) for a, b, c, and d if same as mailing label; if different show corrections.
Same as mailing label ☐ OR ▶

b. Name of city, town, village, borough, etc. of physical location
Same as mailing label ☐ OR ▶

c. State
Same as mailing label ☐ OR ▶

d. ZIP code
Same as mailing label ☐ OR ▶

e. Type of municipality indicated in 1b – ***Mark (X) one***
1 ☐ City 2 ☐ Town 3 ☐ Village 4 ☐ Borough 5 ☐ Township 6 ☐ Unincorporated 7 ☐ Other – *Specify* _____ 8 ☐ Don't know

f. **Is this establishment located inside the legal boundaries of the city, town, village, etc., indicated in 1b?**
1 ☐ Yes 2 ☐ No 3 ☐ No legal boundaries 4 ☐ Don't know
NOTE – The area served by a post office generally does not coincide with the legal boundaries of the municipality from which the post office takes its name.

g. Name of county (Louisiana parish) of physical location

Item 2 – EMPLOYER IDENTIFICATION NUMBER
Is the Employer Identification (EI) Number printed in the upper right of the address box the SAME as that used for this establishment on its latest 1977 Employer's Quarterly Federal Tax Return, Treasury Form 941?
☐ YES
☐ NO – *Enter current EI number* ▶ (9 digits)

Item 3 – OPERATIONAL STATUS
a. Mark (X) the **ONE** box which best describes this establishment at the end of 1977.
001
1 ☐ In operation
2 ☐ Temporarily or seasonally inactive
3 ☐ Ceased operation – *Give date* ▶
4 ☐ Sold or leased to another operator – *Give date AND name, etc.* ▶

Figures only

Month	Day	Year

Name of new owner or operator

Number and street

City | State | ZIP code

b. **How many months during 1977 did your firm or organization actively operate this establishment?**
Number of months: 002

Item 4 – ORGANIZATIONAL STATUS
a. Mark (X) the **ONE** box which best describes this establishment during 1977.
003
1 ☐ Individual proprietorship
2 ☐ Partnership
8 ☐ Cooperative association
5 ☐ Governmental – *Specify* _____
0 ☐ Corporation (other than specified above)
9 ☐ Other – *Specify* _____

b. **Was all or part of the income of this establishment or organization exempt from Federal income taxes under Section 501 or 521 of the Internal Revenue Code?**
004
1 ☐ YES
2 ☐ NO

Important–Please read

Dollar figures should be reported as illustrated. Please be careful to enter the figures in the **correct columns.** See example below:

EXAMPLE: If figure is **$1,125,628.28** ▶

	Millions (000)	Thousands (000)	Dollars (000)
• PREFERRED method	1	125	
Acceptable method	1	125	628

Item 5 – DOLLAR VOLUME

		Mil.	Thou.	Dol.
a. Sales of merchandise and other operating receipts or total revenue in 1977 **EXCLUDING** sales (or other) taxes collected	010			
b. Were sales (or other) taxes collected from customers and forwarded to taxing authorities?	011 1 ☐ YES 2 ☐ NO			
If "YES," report the amount of such taxes (***DO NOT*** *include taxes in 5a above*)	012			
c. **TOTAL DOLLAR VOLUME** including sales (or other) taxes (Sum of 5a and 5b above) ▶	013			
d. Expenses in 1977	040			

Item 6 – PAYROLL AND EMPLOYMENT

		Mil.	Thou.	Dol.
a. Payroll (1) Total **ANNUAL** payroll in 1977 before deductions	030			
(2) Payroll for the **FIRST QUARTER** of 1977	031			

b. **Employment** – Number of paid employees for the pay period including the 12th of the month (Include both full- and part-time employees)

032 MAR	033 MAY	034 AUG	035 NOV

Item 7 – SOURCE OF SALES, RECEIPTS, OR REVENUE – List below the principal lines of merchandise sold, kinds of construction work done, products produced, or services provided and indicate the approximate percentage each was of the total receipts or revenue in 1977.

Source	Percentage of receipts or revenue	Source	Percentage of receipts or revenue
	%		%
	%		%
	%		%
	%		%

Make sure all items on this page have been completed and continue to ***NEXT PAGE***

Item 8 – BUSINESS OR ACTIVITY – Mark (X) the **ONE** box which best describes the **principal** activity during the past year. 070 **Census use only**

- ☐ **AGRICULTURAL PRODUCTION**
- ☐ **MINERALS EXTRACTION OR ORE PROCESSING**
- ☐ **MANUFACTURING**
- ☐ **MOTOR CARRIER (ICC REGULATED)**
- ☐ **MOTOR CARRIER (EXCEPT ICC REGULATED)**
- **CONSTRUCTION**
  - ☐ Building construction – General contractor
  - ☐ Other construction – General contractor
  - ☐ Special trade contractor (electricians, carpenters, painters, etc.)
  - ☐ Land developer and subdivider
  - ☐ Real estate – *Specify activity* _____
- **WHOLESALE TRADE**
  - ☐ Merchant wholesaler
  - ☐ Agent or broker
  - ☐ Other type of wholesaler – *Specify* _____
- **RETAIL TRADE**
  - ☐ Selling at this establishment
  - ☐ Mail order (catalog selling)
  - ☐ House-to-house (direct selling)
  - ☐ Operating merchandise vending machines
  - ☐ Other type of retailer – *Specify* _____
- ☐ **Other – *Specify activity*** _____

Item 9 – If "Manufacturing" is marked in item 8, list the primary materials consumed in producing the manufactured products.

Item 10 – CLASS OF CUSTOMER

To whom do you sell most of your products or provide your services?

- ☐ Retail or wholesale establishments
- ☐ Construction contractors
- ☐ General public (household consumers and individuals)
- ☐ Institutional, industrial, commercial, professional, government, and farm users
- ☐ Other – *Specify* _____

Item 11 – OWNERSHIP OR CONTROL

Enter the company name and address (street name and number, city, State, ZIP code) and EI Number. If more space is needed to list companies, attach a separate sheet.

a. Is this company owned or controlled by another company? 1 ☐ YES → 2 ☐ NO

Owning or controlling company

EI No. *(9 digits)* ☐☐☐–☐☐☐☐☐☐

b. Does this company own or control any other company or companies? 1 ☐ YES → 2 ☐ NO

Owned or controlled company

EI No. *(9 digits)* ☐☐☐–☐☐☐☐☐☐

Item 12 – LOCATIONS OF OPERATION

a. Were the operations under the EI Number shown in the mailing label (or as corrected in item 2) conducted at more than one location during 1977? (Including all selling or service locations and any other facilities such as warehouses, administrative offices, etc.)

1 ☐ YES – *Answer (b) and (c)*
2 ☐ NO – *SKIP to Item 13*

b. At how many separate locations were these operations conducted during 1977? — Number of locations

c. List each location – including main location. If more space is needed, attach a separate sheet providing the same information required below.

Census use only	Physical location of each operation *Name, address and ZIP code* (a)			1977 sales and receipts and annual and 1st quarter payrolls *Totals should equal items 5a and 6a(1) and (2)* (b)		Mil.	Thou.	Dol.	Number of paid employees for the pay period including the 12th of each month *Totals should equal corresponding entries in item 6b* (c)		Primary kind of business or activity of each location *Describe* (d)
080	Name			Sales and receipts	081				084 MAR	085 MAY	
	Number and street of physical location			Total annual payroll	082				086 AUG	087 NOV	
	City	State	ZIP code	1st quarter payroll	083						088 **Census use only**
080	Name			Sales and receipts	081				084 MAR	085 MAY

(3) TOTAL (Sum of lines (1) and (2)) →				
c. Gross value of depreciable assets, end of 1977	124			
(1) Buildings and structures	125			
(2) Machinery and equipment	126			
(3) TOTAL (Sum of lines (1) and (2)) →				

Item 13 – DEPRECIATION CHARGES (130)

a. Did this establishment maintain depreciation accounts during 1977? 1 YES – *Go to b* 2 NO – *SKIP to item 14*

		Mil.	Thou.	Dol.
b. TOTAL depreciation charges against assets during 1977 →	131			

Item 14 – SELECTED OPERATING EXPENSES (140)

		Mil.	Thou.	Dol.
(1) Cost of purchased electricity	140			
(2) Cost of fuels consumed	141			
(3) Cost of purchased communication services	142			
(4) Cost of purchased repair services for buildings and structures	143			
(5) Cost of purchased repair services for machinery and equipment	144			

Item 15 – RENTAL PAYMENTS (EXCLUDE LAND) (150)

a. Did this establishment make rental payments during 1977? 1 YES – *Go to b* 2 NO – *SKIP to item 16*

b. Rental payments made for this establishment		Mil.	Thou.	Dol.
(1) For use of buildings and structures	151			
(2) For use of machinery and equipment	152			
(3) TOTAL rental payments (Sum of lines (1) and (2)) →	153			

Item 16 – COST OF RESEARCH AND DEVELOPMENT (160)

a. Did this establishment perform research and development during 1977? 1 YES – *Go to b* 2 NO – *SKIP to item 17*

b. Type of research and development performed		Mil.	Thou.	Dol.
(1) Federal contracts and subcontracts	161			
(2) With own funds and nonfederal sources	162			
(3) TOTAL cost of research and development (Sum of lines (1) and (2)) →	163			

Item 17 – INVENTORIES AND METHOD OF VALUATION (170)

a. Did this establishment have inventories during 1977? 1 YES – *Go to b* 2 NO – *SKIP to item 18*

b. Value of inventories of this establishment		Mil.	Thou.	Dol.
(1) End of 1976	171			
(2) End of 1977	172			

c. If the dollar value of inventories at the end of 1977 exceeds $25(000), report the method of valuation below –		Inventories end of 1977 Whole percent
(1) Cost		
(a) First-in, First-out (FIFO)	180	%
(b) Last-in, First-out (LIFO)	181	%
(c) Average cost	182	%
(d) Specific or actual cost	183	%
(e) Standard cost	184	%
(f) Other – *Specify*	185	%
(2) Market	186	
(a) Market used because lower than cost	187	%
(b) Market always used		%
(3) Other – *Specify*	188	%
(4) TOTAL (Sum of lines (1) through (3)) →		100%

Item 18 – CONSISTENCY CHECK (190)

a. Were any of the above data (items 6–17) also reported in any other 1977 Census establishment report form of this company, i.e., in the Census Forms MA-, MC-, CB-, or CC- series? 1 YES – *Go to b* 2 NO – *SKIP to item 19*

b. Please give the 10-digit CENSUS FILE NUMBER of that report (191) CFN

Remarks *This space may be used for any explanation that may be essential in understanding your reported data.*

Important – *Please read instructions before completing report*

Report the following items on a consolidated basis for the domestic activities of your enterprise. An enterprise is a business organization (i.e., company, service organization, membership organization, association, etc.) consisting of one or more establishments under common ownership or control. Furthermore, if an enterprise owns or controls other entities, all establishments of its subsidiaries are to be included as part of the owning or controlling enterprise. For purposes of this report, "domestic" activities include all 50 States and the District of Columbia. Do not include foreign activities, if any, except for reporting foreign assets in item 9. Consolidate all domestic activities, whether or not covered in the 1977 Economic Censuses by individual report forms.

If book records are not available, enter your best estimate. **Before completing these items, please read the detailed instructions.**

Item 1 – CERTIFICATION

Name of person to contact regarding this report	Telephone: Area code	Number	Extension

Address – *Number and street*

City	State	ZIP code

This report is substantially accurate and has been prepared in accordance with instructions.

Period covered → From: Mo. 010 Day 011 Year 012 To: Mo. 013 Day 014 Year 015

Signature of authorized person

Title — Date

Important - Please read

Dollar figures should be reported as illustrated. Please be careful to enter your figures in the correct columns. See example below:

EXAMPLE: If figure is $1,125,628.28

	Mil.	Thou.	Dol.
	000	000	000
• PREFERRED method	1	126	
Acceptable method	1	125	628

Item 2 – TOTAL EMPLOYMENT

Number of paid employees for the pay period including March 12, 1977 — Number of employees 020

Item 3 – TOTAL PAYROLL

	Mil.	Thou.	Dol.
	000	000	000
a. Payroll for the **FIRST QUARTER** of 1977, before deductions (030)			
b. **TOTAL ANNUAL** payroll in 1977, before deductions (031)			

Item 4 – EMPLOYER COSTS FOR FRINGE BENEFITS

a. Required by law (040)			
b. Other fringe benefits (041)			
c. Total fringe benefits *(Sum of lines a and b)* (042)			

Item 5 – SALES AND RECEIPTS

a. Sales and other operating receipts (exclude sales or other taxes collected) (050)			
b. Were sales (or other) taxes collected from customers and forwarded to taxing authorities? (051) 1 ☐ YES 2 ☐ NO			
	Mil.	Thou.	Dol.
If "Yes," report amount of taxes. *Do not include in 5a.* (052)			
c. **TOTAL sales and other operating receipts (including sales or other taxes collected)** *(Sum of lines a and b)* (053)			

PLEASE CONTINUE ON REVERSE SIDE

Item 6 – CAPITAL EXPENDITURES (Exclude land and mineral rights)		Millions	Thousands	Dollars
		000	000	000
a. New structures and additions to plant	060			
b. New automobiles, trucks, trailers, etc., for highway use	061			
c. New computers and peripheral data processing equipment	062			
d. All other expenditures for new machinery and equipment	063			
e. Used plant and used equipment acquired from others	064			
f. Capitalized development and exploration of mineral properties	065			
g. **Total capital expenditures** *(Sum of lines a through f)*	066			

Item 7 – GROSS VALUE OF DEPRECIABLE ASSETS				
a. Gross depreciable assets, end of **1976**	070			
(1) For machinery and equipment	071			
(2) For buildings and structures	072			
(3) **Total** *(Sum of lines (1) and (2))*	073			
b. Total capital expenditures during 1977 (should equal line 6g)	074			
c. Other acquisitions by your company during 1977	075			
d. Deductions from depreciable assets during 1977	076			
e. Gross depreciable assets, end of **1977**	077			
(1) For machinery and equipment	078			
(2) For buildings and structures				
(3) **Total** *(Sum of lines (1) and (2))*				

Item 8 – CHANGES IN DEPRECIATION RESERVES				
a. Accumulated depreciation as of end of **1976**	080			
b. Depreciation charged against assets during 1977	081			
c. Additions charged to other accounts during 1977	082			
d. Deductions from reserves for retirements, renewals, and replacements during 1977	083			
e. Accumulated depreciation as of end of **1977** *(Sum of lines a through c minus line d)*	084			

Item 9 – TOTAL ASSETS, AS OF END OF 1977				
a. Net value of depreciable assets (should equal line 7c(3) minus line 8e)	090			
b. All other domestic assets, including inventories	091			
c. Net foreign assets	092			
d. **Total assets, as of end of 1977** *(Sum of lines a through c)*	093			

Item 10 – INVENTORIES AND METHOD OF VALUATION		Millions	Thousands	Dollars
		000	000	000
a. All inventories, as of end of **1976**	100			
b. All inventories, as of end of **1977**	101			

c. **METHOD OF INVENTORY VALUATION**

EXAMPLE FOR REPORTING PERCENTS	If figure is **38.76%** of total receipts:	Percent
	Report whole percents →	39%
	Not acceptable →	38.76%

Method of inventory		Whole percents: End of 1977	Whole percents: End of 1976
(1) **Cost**	(a) First-in, First-out (FIFO)	102	114
	(b) Last-in, First-out (LIFO)	103	115
	(c) Average cost	104	116
	(d) Specific or actual cost	105	117
	(e) Standard cost	106	118
	(f) Other – *Specify*	107	119
(2) **Market**	(a) Market used because lower than cost	108	120
	(b) Market always used	109	121
(3) **Retail method**	(a) Approximating lower of cost or market	110	122
	(b) Approximating cost	111	123
	(c) LIFO retail	112	124
(4) Other – *Specify*		113	125
(5) **TOTAL**		**100%**	**100%**

Item 11 – SELECTED OPERATING EXPENSES		Millions	Thousands	Dollars
		000	000	000
a. Did this enterprise make royalty payments for the use of intangible property rights during 1977?	126 1 ☐ YES – *Report value of payments* → 2 ☐ NO – *GO to b*	127		
b. Did this enterprise purchase advertising services during 1977?	128 1 ☐ YES – *Report cost of purchased services* → 2 ☐ NO – *GO to c*	129		
c. Did this enterprise make rental payments during during 1977?	130 1 ☐ YES – *GO to d* 2 ☐ NO – *SKIP to Item 12*			
d. Rental payments, excluding land		131		
(1) For use of buildings and structures		132		
(2) For machinery and equipment		133		
(3) Total rental payments *(Sum of lines (1) and (2))*				

Item 12 – CONSISTENCY CHECK

Is the gross value of depreciable assets at the end of the year minus total capital expenditures during the year within 5% of the gross value of depreciable assets at the beginning of the year? 140 1 ☐ YES 2 ☐ NO – *Explain in Remarks*

REMARKS – *Please use this space for any explanation that may be essential in understanding your reported data.*

FORM NC-K1 (5-25-77)

PENALTY FOR FAILURE TO REPORT — DUE DATE: FEBRUARY 15, 1978 — Form Approved: O.M.B. No. 41-S77035

FORM MC-36B (Rev.) — U.S. DEPARTMENT OF COMMERCE, BUREAU OF THE CENSUS

1977 CENSUS OF MANUFACTURES

SWITCHGEAR AND SWITCHBOARD APPARATUS AND INDUSTRIAL CONTROLS

Please complete this form and RETURN TO: BUREAU OF THE CENSUS, 1201 East Tenth Street, Jeffersonville, Indiana 47132

NOTICE – Response to this inquiry is required by law (title 13, U.S. Code). By the same law, your report to the Census Bureau is confidential. It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are immune from legal process.

In correspondence pertaining to this report, please refer to this Census File Number

Employer Identification Number

Please read ...

A separate census report must be filed for each manufacturing establishment which your company operated in 1977. A manufacturing establishment is defined as a single physical location where products are manufactured, processed, or assembled.

Please read the instructions for each item before completing it. If book figures are not available, carefully prepared estimates are acceptable.

If filing by due date causes an undue burden, a time extension request should be sent to the above address. Please enter your 11-digit Census File Number on each page of this report and on any correspondence with us regarding this report.

Please correct errors in name, address and ZIP code. ENTER street and number if not shown.

110 | | | | | | | | | | 111 | | | | | | | |

ITEM 1A Physical location of establishment

In order to assign this establishment to the correct geographic area, the Bureau of the Census must know the actual location which may differ from the mailing address. *Complete items a through g.*

a. Address number and street name of physical location – *If not known, enter building name, shopping center name, or other physical location description. Do not enter P.O. box or rural route.*
Mark (X) for a, b, c, and d if same as mailing label; if different enter corrections.
Same as mailing label ☐ OR ▶

b. Name of city, town, village, borough, etc. of physical location
Same as mailing label ☐ OR ▶

c. State
Same as mailing label ☐ OR ▶

d. ZIP code
Same as mailing label ☐ OR ▶

e. Type of municipality indicated in 1Ab
1 ☐ City 2 ☐ Town 3 ☐ Village 4 ☐ Borough 5 ☐ Township 6 ☐ Unincorporated 7 ☐ Other – *Specify* _____ 8 ☐ Don't know

f. **Is this establishment located inside the legal boundaries of the city, town, village, etc., indicated in 1Ab?**
1 ☐ Yes 2 ☐ No 3 ☐ No legal boundaries 4 ☐ Don't know
NOTE – The area served by a post office generally does not coincide with the legal boundaries of the municipality from which it takes its name.

g. Name of county (Louisiana parish) of physical location

ITEM 1B Employer identification number(s)

Is the Employer Identification (EI) Number printed in the upper right of the address box the SAME as that used for this establishment on its latest 1977 Employer's Quarterly Federal Tax Return, Treasury Form 941? 108
☐ YES ☐ NO – *Enter current EI number* ▶ (9-digits) – | | | | | | | | | |

ITEM 1C Organizational status

Mark (X) the **ONE** box which best describes this establishment during 1977
109
1 ☐ Individual proprietorship
2 ☐ Partnership
0 ☐ Corporation (Do not mark if any form of cooperative association)
8 ☐ Cooperative association, corporate or non-corporate
9 ☐ Other – *Specify*

Important – Please read

Dollars, hours worked, and kilowatt-hour figures should be reported in thousands. If you wish, you may report to the nearest unit. Please be careful to enter your figures in the **correct columns.**

EXAMPLE: If figure is $1,125,628.28 ▶

	Millions	Thousands	Dollars
	000	000	000
• PREFERRED method	1	126	
Acceptable method	1	125	628

REFER TO SPECIAL INSTRUCTIONS ON REVERSE SIDE FOR ITEMS 2–8

• Complete each item and enter "0" when appropriate.

ITEM 2 Number of employees

	Key	Number
Number of production workers during pay period including the 12th of month: a. March	301	
b. May	302	
c. August	303	
d. November	304	
e. Sum of lines a–d	305	
f. Average number (divide line e by 4, omit fractions)	306	
g. All other employees (pay period including March 12th)	307	
h. TOTAL EMPLOYMENT (Sum of lines f and g, item 2) ▶	308	

ITEM 3A Annual payrolls

	Key	Mil.	Thou.	Dol.
a. Production workers' wages (for employees reported in item 2f)	309	$		
b. All other salaries and wages (for employees reported in item 2g)	310			
c. TOTAL PAYROLL (item 3A) ▶	311	$		

ITEM 3B – Not applicable to this form

ITEM 3C First quarter payroll

	Key	Mil.	Thou.	Dol.
TOTAL PAYROLL FOR THE FIRST QUARTER (JANUARY–MARCH) ▶	315	$		

ITEM 4 Plant hours worked by production workers by quarter

	Key	Mil.	Thou.	Hrs.
a. January through March	316			
b. April through June	317			
c. July through September	318			
d. October through December	319			
e. TOTAL HOURS WORKED (item 4) ▶	320			

ITEM 5 Cost of materials, resales, fuels, electricity, and contract work

	Key	Mil.	Thou.	Dol.
a. Cost of materials, parts, supplies, containers, etc., which were put into production, used as operating supplies, or used in repair and maintenance	321	$		
b. Cost of products bought and sold without further manufacture or assembly (Resales)	322			
c. Cost of fuels consumed during the year for heat and power	323			
d. Cost of purchased electricity	324			
e. Cost of contract work done for you by others on your materials	325			
f. TOTAL COST (item 5) ▶	326	$		

ITEM 6 – Not applicable to this form

ITEM 7 Inventories of this establishment

	END OF 1976 Key	Mil.	Thou.	Dol.	END OF 1977 Key	Mil.	Thou.	Dol.
a. Finished products	331	$			335	$		
b. Work-in-process	332				336			
c. Materials, supplies, fuels, etc.	333				337			
d. TOTAL INVENTORIES (item 7) ▶	334	$			338	$		

ITEM 8 Capital expenditures during year

	Key	Mil.	Thou.	Dol.
a. New structures and new additions to this plant (Exclude land)	342	$		
b. New machinery and equipment including replacements and capitalized repairs	343			
c. Used buildings and equipment	347			
d. TOTAL CAPITAL EXPENDITURES (item 8) ▶	350	$		

ITEMS 9–15 – Not applicable to this form

CENSUS USE

CONTINUE ON PAGE 2 ▶

Form MC-36B (Rev.,

Page 2

ITEM 16A — Operational status

a. Mark (X) **ONE** box — *Be sure to indicate the date of any change*

		Enter figures only Mo.	Day	Year
112 1 ☐	No change in operator or operations			
2 ☐	Reorganized — *Complete report for full year and describe type of change in remarks*			
3 ☐	Started new business (newly constructed or completely equipped when started)			
4 ☐	Establishment closed (no new owner or operator), dismantled, abandoned, or destroyed			
5 ☐	Establishment idle or inactive but still owned			
6 ☐	Establishment was acquired or leased from another company			

Mark (X) **ONE** box and give name and address if —

☐ Building only acquired

☐ Complete plant acquired (building, machinery, and equipment)

Name of former operator — Enter current EI number (9 digits)

Number and street, city, State, ZIP code

	Mo.	Day	Year
7 ☐ Establishment was sold or leased to another company			

Mark (X) **ONE** box and give name and address if —

☐ Building only sold

☐ Complete plant sold (building, machinery, and equipment)

Name of new operator — Enter current EI number (9 digits)

Number and street, city, State, ZIP code

b. Is the FIRST DIGIT of your Census File Number (imprinted in the address box) a Zero "0"? ☐ YES — *Complete item 16B, a through d* ☐ NO — *SKIP to Item 16C*

ITEM 16B — Ownership and control

Enter the company name and address *(Number and street, city, State, ZIP code)* and EI number. If more space is needed to list companies, use remarks section.

113 a. Is this company owned or controlled by another company? 1 ☐ YES → 2 ☐ NO — 603 Name and address of owning or controlling company — Enter current EI number (9 digits)

114 b. Does this company own or control any other company or companies? 1 ☐ YES → 2 ☐ NO — 604 Name and address of owned or controlled company — Enter current EI number (9 digits)

c. Did this company have any manufacturing plants under construction but not in operation at the end of the year? 1 ☐ YES 2 ☐ NO

d. Did this company operate at more than one location during the survey year? If more space is needed, attach separate sheet. 1 ☐ YES — *List additional locations below* 2 ☐ NO — *SKIP to Item 16C*

Physical address of business location *(Number and street, city, State, ZIP code)* (1)	Employer Identification Number (2)	Kind of business at this location (3)	Sales and receipts (4) Mil.	Thou.	Dol.	Annual payroll (5) Mil.	Thou.	Dol.	Number of employees (6)	Are these figures included on the front of this report? (7)
605	606 *(9 digits)*	607	608			609			610	☐ YES ☐ NO
605	606 *(9 digits)*	607	608			609			610	☐ YES ☐ NO

ITEM 16C — CHECKS to assure a complete and accurate report

The Bureau of the Census reviews this report for omissions, inconsistencies, and unusual ratios. To save you future correspondence about these problems, please make the following checks before returning this report.

- Review the report carefully to see that no items are omitted for the year being covered.
- Calculate and enter figures for the four "reasonableness" checks below, and review the results.
- Correct your report for any errors you find and explain unusual figures in remarks.

For most manufacturing establishments, the figures computed usually fall within the ranges indicated.

"Reasonableness" checks	Calculation required for each check	Figures for survey year	Usual range
a. Average hourly wages per production worker	Item 3Aa (Production workers' wages) ÷ item 4e (Total hours worked)	$/hr.	$2 – $10
b. Hours worked per year per production worker	Item 4e (Total hours worked) ÷ item 2f (Average number of production workers)	hrs./yr.	1000 – 3000
c. Salaries and wages per dollar of shipments	Item 3Ac (Total payroll) ÷ item 18 (Total value of shipments)	¢	05¢ – 95¢
d. Materials cost per dollar of shipments	Item 5f (Total materials cost) ÷ item 18 (Total value of shipments)	¢	05¢ – 95¢

e. Is the total for Value of Shipments (item 18) greater than the sum for payroll (item 3Ac) plus total Cost of Materials, etc. (item 5f)? ☐ YES ☐ NO — *Explain in remarks*

Remarks — *Please use this space for any explanations that may be essential in understanding your reported data.*

SPECIAL INSTRUCTIONS FOR ITEMS 2–8

▶ **Item 2 — Number of employees** — Report all employees at this establishment who received pay for part of the pay period including the 12th of the specified months. Include officers at this establishment, if a corporation; if an unincorporated concern exclude proprietor or partners.

▶ **Items 2a–2d — Number of production workers** — Report workers (up through the working foreman level) engaged in fabricating, processing, assembling, inspecting, and other manufacturing.

▶ **Item 2g — All other employees** — Report nonproduction personnel, including those engaged in supervision (above the working foreman level), installation and servicing of own product, sales, delivery, professional, technical, administrative, etc.

▶ **Item 3a — Annual payrolls** — Report gross earnings prior to deductions paid in the calendar year to those employees reported in item 2. Include commissions, dismissal pay, bonuses, and vacation pay.

▶ **Item 4 — Plant hours worked by production workers by quarter** — Include all production hours worked, including overtime hours, but excluding paid vacations, etc. These should be reported as actual hours worked, not straight-time equivalent hours.

▶ **Item 5 — Cost of materials, etc.** — Report total delivered cost after discounts and including freight of the materials actually consumed or put in production during the year. Include purchases, interplant transfers, and withdrawal from inventories.

If there are no records of consumption, purchases may be reported instead for minor items. This can also be done for major items if purchases do not differ significantly from the amounts actually used. Where consumption of major items differs significantly from purchases, consumption may be estimated by adding beginning inventories to the amount purchased and subtracting ending inventories.

▶ **Item 5a — Cost of materials, parts, supplies, containers, etc., consumed** — The delivered cost figures should cover all raw materials, containers, scrap, supplies, etc., which were: (1) put into production, (2) used as operating supplies, (3) used in repair and maintenance. Item 5a should be consistent with the data in item 17B.

▶ **Item 5b — Cost of products bought and sold** — Report the cost of all products bought and sold in the same condition as when purchased, and not made part of another product manufactured by this establishment. (Total sales value of all products sold is to be reported in item 18 on the line for resales.)

▶ **Item 5c — Cost of fuels consumed** — Report the total cost of all fuels consumed for heat, power, transportation, or the generation of electricity. Do not include the estimated cost of fuels, such as sawdust or blast furnace gas, produced as a by-product of your manufacturing activities. Include anthracite and bituminous coal, coke, natural and manufactured gas, fuel oil, liquefied petroleum gas, gasoline, and all other fuels including purchased steam.

▶ **Item 5d — Cost of purchased electricity** — Report the total cost of electric energy purchased from other companies or received from other establishments of your company. Exclude the value of electricity generated and used at this establishment.

▶ **Item 5e — Cost of contract work done for you by others on your materials** — If any contract work was done by others on materials furnished by your establishment, report the total payments made during the year for such work, including freight out and in. Exclude the cost of materials worked on, which should be included in item 5a.

▶ **Item 8 — Capital expenditures during year (Exclude expenditures for land)** — Include all costs actually incurred during 1977 chargeable to the fixed assets accounts and of the type for which depreciation or amortization accounts are ordinarily maintained. This should include construction and repair work performed by your own forces.

FORM MC-36B (Rev.) U.S. DEPARTMENT OF COMMERCE BUREAU OF THE CENSUS

1977 CENSUS OF MANUFACTURES

SWITCHGEAR AND SWITCHBOARD APPARATUS AND INDUSTRIAL CONTROLS – Continued

PLEASE ENTER THIS ESTABLISHMENT'S 11-DIGIT CENSUS FILE NUMBER

Name of establishment (Same as address box)

Item 17A WATER USE DURING 1977

348

1. What was the total quantity of water intake for this establishment for use in the production process and auxiliary operations (such as cooling and condensing, sanitary services, and boiler feed) during the calendar year 1977?

Mark (X) one box only

1 ☐ Under 1 million gallons
2 ☐ 1–9 million gallons
3 ☐ 10–19 million gallons
4 ☐ 20–49 million gallons
5 ☐ 50–99 million gallons
6 ☐ 100 million gallons or over

349

2. Did you recirculate any water during the calendar year 1977? . . . . . 1 ☐ YES 2 ☐ NO

Item 17B CONSUMPTION OF SELECTED MATERIALS DURING 1977

Instructions - Please read

1. **GENERAL** – The materials, parts, and supplies listed below are those commonly consumed in the manufacture, processing, or assembly of the products listed in item 18. Please review the entire list and **report separately** for each item consumed. The materials, parts, and supplies consumed at this establishment which are not prelisted should be described and reported in the "All other materials, etc." line at the end of this section. If your consumption of a listed material is valued at less than $10 000, enter an (X) in column (E) and include the value with "All other materials, etc." Census material code 970099 8.

   If your book records do not contain information as requested, **reasonable estimates are acceptable.**

2. **VALUATION OF MATERIALS CONSUMED** – The value of the materials, etc., consumed should be based on the delivered cost, i.e., the amount paid or payable after discounts and including freight and other direct charges incurred in acquiring the materials. This includes purchases, transfers from other establishments of your company, and withdrawals from inventories. Materials transferred to you from other plants within your company should be assigned their full economic value, as assigned by the shipping plant, plus cost of freight and handling charges.

3. **CONTRACT WORK** – Materials purchased for use by others making products for you on a contract basis should be included. Amounts paid to other companies for such contract work should be reported in item 5e, and should include freight in and out. Materials owned by others but used at this establishment in making products for others under contract or on commission should be excluded.

4. **MATERIALS PRODUCED AND CONSUMED** – Materials, parts, and supplies which are produced and consumed in the same establishment in the manufacture of products should be reported in column (C-1). Please report only the quantities of these materials produced and consumed. If the specific input materials used to produce these items are listed, the quantity and value should be reported in columns (C-2) and (D). If not, the cost should be included in the "All other materials, etc." line, Census material code 970099 8.

Line number	5 Materials, parts, and supplies (A)			Census material code 571 (B-1)	Unit of measure for quantities (B-2)	Quantities produced and consumed 572 (C-1)	Materials purchased and consumed: Quantity 573 (C-2)	Materials purchased and consumed: Cost, including delivery cost (freight-in) (D) 574 Millions 000	Thousands 000	Dollars 000	If you consumed less than $10,000 of the item enter (X) 575 (E)
1	MILL SHAPES AND FORMS (EXCEPT CASTINGS)	Carbon steel	Bars and bar shapes	331011 7	Short tons			$			
2			Sheet and strip	331012 5

Form MC-36B (Rev.)

Item 18 **PRODUCTS AND SERVICES OF THIS ESTABLISHMENT DURING 1977**

Instructions - Please read

1. **GENERAL** – The products and services listed below are those that are generally made in your industry. Please review the entire list before completing the inquiry. If you produce products that are not prelisted, they should be described and reported in the "All other products" section at the end of item 18. **Please do not combine product lines.**

   Products for which quantity data are requested should be reported in the unit of measure specified.

   If your book records do not contain information as requested, **reasonable estimates are acceptable.**

2. **VALUATION OF PRODUCTS** – The value of the products shipped and services performed should be based on the **net selling value, f.o.b. plant,** after discounts and allowances, and exclusive of freight charges and excise taxes.

   When transferring products to other establishments within your company, the shipping plant should assign the full economic value to the transferred products, i.e., include all direct costs of production and a reasonable proportion of all other costs and profits.

3. **PRODUCTS BOUGHT AND SOLD WITHOUT FURTHER MANUFACTURE** – Products which you purchase and sell as originally purchased (not used in the further manufacturing, processing, or assembling of products made in this establishment) should be reported as "Resales," Census product code 99989 00 6.

4. **CONTRACT WORK**

   a. **Products made by others for you from your materials:** Report such products on the specific lines of this section as if they were made in this establishment.

   b. **Products that you made from materials owned by others:** Report the amount that you received for "commission or contract receipts" on line 29, Census product code 93000 00 8. Do not report on the specific product lines for these products.

5. **DETAILED DATA REPORTED ELSEWHERE** – This report requires totals for groups of products covered in more detailed Current Industrial Reports (CIR). If you report on the CIR forms the value of shipments for items designated by an asterisk should equal the sum of the detail reported on the CIR's.

Line number	Products and services (5) — * Item corresponds to products reported on Current Industrial Reports	Census product code 581	Unit of measure for quantities	Corresponds to the sum of products for 1977 reported on – Census form	Corresponds to the sum of products for 1977 reported on – Code	Products shipped and other receipts: Quantity 583	Value, f.o.b. plant (E) 584 Millions	Thousands	Dollars

FORM MC-37EX
(RAILROAD SHOPS)

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

1977 CENSUS OF MANUFACTURES

LOCOMOTIVES AND CARS BUILT AND REBUILT IN SHOPS OF OPERATING RAILROADS

Please complete and return this form as soon as possible after receipt to

BUREAU OF THE CENSUS
Industry Division
Washington, D.C. 20233

NOTICE – Response to this inquiry is **required by law (title 13, U.S. Code).** By the same law, your report to the Census Bureau is **confidential.** It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are **immune from legal process.**

In correspondence pertaining to this report, please refer to this Census File Number

Employer Identification Number

Please correct errors in name, address and ZIP code. ENTER street and number if not shown.

Instructions - Please read

Please return one copy of this report to the Bureau of the Census, Industry Division, Washington, D.C., 20233, WITHIN 30 DAYS. A separate report should be completed for each shop of your company at which any locomotives or railroad cars were built or rebuilt during 1977.

Include as "rebuilt" locomotives and railroad cars those for which the cost of their dismantling, improvement, and modernization is more than 50 percent of the replacement cost of a new unit of the same class and kind at the time of rebuilding. Do not include as "rebuilt" any conversions or reclassifications, nor units which were reconditioned by replacing defective parts. The values reported for "rebuilt" locomotives and cars should represent the additional value written into the property account.

Item A – NAME OF ESTABLISHMENT COVERED BY THIS REPORT			
Item B – LOCATION OF ESTABLISHMENT	Number and street		
	City	State	ZIP code
Item C – NATURE OF ACTIVITY	Describe briefly the kind of activity of this establishment		
Item D – MAN-HOURS OF PRODUCTION WORKERS	Were more than 50 percent of the total production worker man-hours worked at this shop during 1977 devoted to building or rebuilding locomotives, passenger cars, or freight cars? ..... ☐ Yes ☐ No		

PLEASE CONTINUE ON PAGE 2

Form MC-37EX

Page 2

Item E PRODUCTS MADE IN RAILROAD SHOP DURING 1977

Instructions - Please read

Columns (D) and (E) — Total built and rebuilt — Locomotives and cars built and rebuilt by railroads in their shops for their own use should be reported when they are transferred from the shop to the operating part of the company. The value of new locomotives and cars built by railroads for their own use should represent the amount at which they were written into the property accounts. The value reported for locomotives and cars "rebuilt" by railroad companies should represent the additional value written into the property account.

Report separately each product listed; do not combine product lines.

Lines 1–4, 21, and 22 — Include under "rebuilt," locomotives and railroad cars for which the cost of their dismantling, improvement, and modernization is more than 50 percent of the replacement cost of a new unit of the same class and kind at the time of rebuilding. Do not include as rebuilt any units which were reconditioned by replacing defective parts. Do not include conversions or reclassifications.

Column (F) — Weight of items reported in column (D) — Report the weight of locomotives and cars as the empty light weight or "tare" weight.

Line number	Product (A)				Census product code 581 (B)	Total built and rebuilt: Quantity (NUMBER OF UNITS) 583 (D)	Total built and rebuilt: Value f.o.b. plant (THOUSANDS OF DOLLARS) 584 (E)	Weight of items reported in column (D) (SHORT TONS) 585 (F)
1	LOCOMOTIVES, BOTH NEW AND REBUILT, AND PARTS FOR LOCOMOTIVES SOLD SEPARATELY (37431)	Locomotives	Diesel-electric (except mining type)	Rail service type	37431 11 1		$	
2				Other types	37431 15 2			
3			Other (except mining type)	Rail service type	37431 21 0

In correspondence pertaining to this report refer to this Census File Number (11 digits)

Employer Identification Number

ITEM 1A Physical Location — *Complete a, b, and c.*

a. Is this establishment located in the State, county, and place shown below? *(If blank or incomplete, please complete (1) through (4).)* 650
1 ☐ YES – *SKIP to part b*
2 ☐ NO – *Correct or complete lines (1) through (4)*

(1) Number and street

(2) City, village, or other place | State | ZIP code

(3) County | (4) If you corrected lines 1, 2, 3, give year moved to new location 19__

(Please correct any error in name and address including ZIP code)

b. Type of municipality indicated in 1Aa(2)
1 ☐ City 2 ☐ Town 3 ☐ Village 4 ☐ Borough 5 ☐ Township 6 ☐ Unincorporated 7 ☐ Other – *Specify* 8 ☐ Don't know

c. Is this establishment located inside the legal boundaries of the city, town, village, etc., indicated in 1Aa(2)?
1 ☐ Yes 2 ☐ No 3 ☐ No legal boundaries 4 ☐ Don't know

NOTE – The area served by a post office generally does not coincide with the legal boundaries of the municipality from which it takes its name.

ITEM 1B Employer Identification Number(s) — Is the Employer Identification (EI) Number printed in the upper right of the address box the SAME as that used for this establishment on its latest 1977 Employer's Quarterly Federal Tax Return, Treasury Form 941?
☐ YES ☐ NO – *Enter current EI number* → (9-digits) 108

ITEM 1C Organizational status — 109
Mark (X) the **ONE** box which best describes this establishment during 1977
1 ☐ Individual proprietorship 2 ☐ Partnership 0 ☐ Corporation (Do not mark if any form of cooperative association) 8 ☐ Cooperative association (corporate or non-corporate) 9 ☐ Other – *Specify*

NOTE Figures for dollars, man-hours, KWH should be rounded to thousands. However, you may enter figures to nearest dollars. Carefully enter your figures in the correct columns, e.g., if payroll is $1,125,628, report either . . . . . | Mil. | Thou. | Dols. | OR | Mil. | Thou. | Dols.
$ 1 | 126 | | | $ 1 | 125 | 628

Complete each item, enter "0" when appropriate.

	Key	1977 Number	1976 Number
ITEM 2 – Number of employees			
Number of production workers during pay period including the 12th of month — a. March	301		
b. May	302		
c. August	303		
d. November	304		
e. Sum of lines a–d	305		
f. Average number *(Divide line e by 4)*	306		
g. All other employees (pay period of March 12)	307

a. Legally required including Social Security	312						
b. Payments for voluntary programs	313						
c. TOTAL (Item 3B) →	314						
ITEM 3C – First quarter payroll							
Total payroll for the first quarter (Jan.–March)	315				XXX	XXX	XXX

ITEM 4 – Plant hours worked by production workers	Key	1977 Mil.	1977 Thou.	1977 Hours	1976 Mil.	1976 Thou.	1976 Hours
a. January through March	316						
b. April through June	317						
c. July through September	318						
d. October through December	319						
e. TOTAL (Item 4) →	320						

Complete each item, enter "0" when appropriate.	Key	1977 Mil.	1977 Thou.	1977 Dols.	Key	1976 Mil.	1976 Thou.	1976 Dols.
ITEM 5 – Cost of materials and services used								
a. Cost of materials, parts, components, containers, etc., used	321							
b. Cost of products bought and sold as such	322							
c. Cost of fuels consumed for heat or power *(See item 12)*	323							
d. Cost of purchased electricity *(See item 6)*	324							
e. Cost of contract work done for you by others	325							
f. TOTAL (Item 5) →	326							

ITEM 6 – Quantity of electricity	Key	1977 Kilowatt hours Mil.	1977 Thou.	1977 Units	1976 Kilowatt hours Mil.	1976 Thou.	1976 Units
a. Purchased electricity (quantity comparable to cost as reported in item 5d)	327						
b. Generated electricity (gross less generating station use)	328						
c. Electricity sold or transferred to other establishments	329						

ITEM 7 – Inventories of this establishment at end of year *(Report both years)*	Key	1977 Mil.	1977 Thou.	1977 Dols.	Key	1976 Mil.	1976 Thou.	1976 Dols.
a. Finished products	335				331			
b. Work-in-process	336				332			
c. Materials, supplies, fuels, etc.	337				333			
d. TOTAL (Item 7) →	338				334			

ITEM 8 – Depreciable assets, capital expenditures, and retirements

Refer to the instruction manual for detailed instructions.

(a)	Key	1977 Total (b) Mil.	Thou.	Dols.	Key	Buildings and other structures (exclude land) (c) Mil.	Thou.	Dols.	Key	Machinery and equipment (d) Mil.	Thou.	Dols.	1976 Total (e) Mil.	Thou.	Dols.
a. Gross value of depreciable assets (usually original cost) at beginning of year	341				339				340						
b. Capital expenditures for new buildings and machinery	344				342				343						
c. Capital expenditures for used buildings and machinery	347				345				346						
d. Retirements and disposition of depreciable assets (i.e., gross value of assets sold, retired, scrapped, destroyed, etc.)	353				351				352				XXX	XXX	XXX
e. Gross value of depreciable assets at end of year (should equal lines 8a + 8b + 8c – 8d)	356				354				355						
ITEM 9 – Depreciation charges for the year	359				357				358				XXX	XXX	XXX
ITEM 10 – Rental payments	362				360				361						

ITEM 11A Total value of products shipped and other receipts

For 1977 report the total value of products shipped and other receipts as entered in **item 18.** This value should be completely comparable to the total reported for 1976. If the two figures are not comparable, please explain the reasons why in the remarks section. (Reporting by product class is not required for 1977.) →

	Key	1977 Value (a) Mil.	Thou.	Dols.	1976 Value (b) Mil.	Thou.	Dols.
	330						

ITEM 11B Value of products exported (also included in item 11A)

Report the value of products shipped for EXPORT. Include direct exports and products shipped to exporters or others for export. Do not include products shipped for further manufacture, assembly, or fabrication in the United States. 370
1 ☐ $0–24(999)
2 ☐ $25(000) or more – *Report the value of exports* → 371

ITEM 11C Unfilled orders — *(See instruction manual)*

a. Does this establishment primarily produce for stock and fill orders from inventory? 372 1 ☐ Yes 2 ☐ No

b. What is the number of months normally required to fill an order? 373 1 ☐ Less than one month 2 ☐ 1 or 2 months 3 ☐ 3 months or more

NOTE – If there are any qualifications regarding the unfilled orders data, please explain in the remarks section on the reverse side and complete all parts of this item.

c. Report the value of unfilled orders on your books as of the end of the year → 374

ITEM 12 — Purchased fuels used for heat, power, and generating electricity in 1977

Kind of fuel (a)	Code (b)	Unit of measure for quantities (c)	1977 Quantity (d)	1977 Cost, including delivery cost (freight-in) (e) Mil.	Thou.	Dols.	Unit cost calculation: Calculated unit cost (f)	Usual range of unit costs (Please explain unusual figures in remarks) (g)
1. Coal	121005 3	Short ton					$ per ton	$10–$90 per ton
2. Coke (including breeze)	331210 5	Short ton					per ton	40–150 per ton
3. Distillate fuel oil (#'s 1, 2, 4, and light diesel)	291141 0	Bbl. (42 gal.)					per bbl.	5–25 per bbl.
4. Residual fuel oil (#'s 5, 6 and heavy diesel)	291151 9	Bbl. (42 gal.)					per bbl.	5–25 per bbl.
5. Natural gas	131157 0	1,000 cu. ft.					per MCF	0.25–4.00 per MCF
6. Other fuels — *Specify kind*	960011 5							
7. TOTAL COST OF FUELS *(Should equal cost shown in item 5c, page 1)* →								

ITEM 13 — Method of valuation for inventories reported for 1977 in item 7

Using the inventory total reported for this establishment in item 7d for 1977, please indicate the breakdown of that total according to the inventory valuation methods shown.

- **Cost method** — Report amounts on lines 1a–f.
- **Market basis always used** — Report amounts on line 2b.
- **Lower of cost or market** — Report amounts valued at cost on lines 1a–f according to the applicable methods and the amount at market on line 2a.

Method of valuation (a)		Key	Amount at end of 1977 (b) Mil.	Thou.	Dols.
1. Cost	a. First-in, First-out (FIFO)	381			
	b. Last-in, First-out (LIFO)	382			
	c. Average cost	383			
	d. Specific or actual cost	384			
	e. Standard cost	385			
	f. Other — *Specify*	386			
2. Market	a. Market used for valuation because market lower than cost	387			
	b. Market always used for valuation	388			
TOTAL *(Equals the total reported in item 7d for 1977)* →		389			397

During the calendar year 1977 did you change the method of valuating the inventories that you reported for this establishment?

1 ☐ YES — *Indicate the nature of the changes in remarks.*

2 ☐ NO

ITEM 14 — Cost of purchased services *(See Instruction Manual)*

	Key	1977 Mil.	Thou.	Dols.
1. Repair of buildings and other structures	390			
2. Repair of machinery	391			
3. Cost of purchased communication services (telephone, telegraph, etc.)	392			

ITEM 15 — Breakdown of machinery and equipment expenditures by type reported in item 8b, col. d *(See instruction manual)*

	Key	1977 Mil.	Thou.	Dols.
1. Automobiles, trucks, etc., for highway use	393			
2. Computers and peripheral data processing equipment	394			
3. All other expenditures for new machinery and equipment	395			
TOTAL *(Should be the same as item 8b, column d)* →				

ITEM 16A — Status of this establishment during 1977 *(Be sure to indicate the date of any change.)*

112 *MARK (X) ONE BOX*

	Enter figures only Mo.	Day	Year
1 ☐ No change in operator or operations			
2 ☐ Reorganized — Complete report for full year and describe type of change in remarks.			
3 ☐ Started new business (newly constructed or completely equipped when started)			
4 ☐ Establishment closed (no new owner or operator), dismantled, abandoned, or destroyed on			
5 ☐ Establishment idle or inactive but still owned			
6 ☐ Establishment was acquired or leased from another company			
☐ Building only acquired			
☐ Complete plant acquired (building, machinery, and equipment)			
Name of former operator / EI Number *(9 digits)*			
Number and street, city, State, ZIP code			
7 ☐ Establishment was sold or leased to another company			
☐ Building only sold			
☐ Complete plant sold (building, machinery, and equipment)			
Name of new operator / EI Number *(9 digits)*			
Number and street, city, State, ZIP code			

ITEM 16B — Company organization

113 **a. Is this company owned or controlled by another company?** 1 ☐ YES → 2 ☐ NO

114 **b. Does this company own or control any other company or companies?** 1 ☐ YES → 2 ☐ NO

Enter the company name and address *(Number and street, city, State, ZIP code)* and EI number. *If more space is needed to list companies, use remarks section.*

603 Name and address of owning or controlling company — EI Number *(9 digits)*

604 Name and address of owned or controlled company — EI Number *(9 digits)*

c. Did this company have any manufacturing plants under construction but not in operation at the end of the year? 1 ☐ YES 2 ☐ NO

d. Did you operate at more than one location during the survey year? *If more space is needed, attach separate sheet.* 1 ☐ YES — *List additional locations below* 2 ☐ NO — *SKIP to item 16C below*

Physical address of business location *(Number and street, city, State, ZIP code)* (a)	Employer Identification Number (b)	Kind of business at this location (c)	Sales and receipts (d) Mil.	Thou.	Dols.	Annual payroll (e) Mil.	Thou.	Dols.	Number of employees (f)	Are these figures included on the front of this report? (g)
605	606	607	608			609			610	☐ YES ☐ NO
605	606	607	608			609			610	☐ YES ☐ NO

ITEM 16C — CHECKS to assure a complete and accurate report

The Bureau of the Census reviews your report for omissions, inconsistencies, and unusual ratios. To save you future correspondence about these problems, please make the following checks before returning your report.

(1) Review the report carefully to see that no items are omitted for the year being covered.
(2) Calculate and enter figures for the four "reasonableness" checks below, and review the results.
(3) Correct your report for any errors you find and explain unusual figures in remarks.

For most manufacturing establishments, the figures computed usually fall within the ranges indicated.

"Reasonableness" checks	Calculation required for each check	Figures for survey year	Usual range
a. Average hourly wages per production worker	Item 3Aa (Production workers' wages) ÷ item 4e (Total hours worked)	$/hr.	$2 – $10
b. Hours worked per year per production worker	Item 4e (Total hours worked) ÷ item 2f (Average number of production workers)	hrs./yr.	1000 – 3000
c. Salaries and wages per dollar of shipments	Item 3Ac (Total payroll) ÷ item 11A (Total value of shipments)	¢	05¢ – 95¢
d. Materials cost per dollar of shipments	Item 5f (Total materials cost) ÷ item 11A (Total value of shipments)	¢	05¢ – 95¢

e. Is the total for Value of Shipments (item 11A) greater than the sum for payroll (item 3Ac) plus total Cost of Materials, etc. (item 5f)? ☐ YES ☐ NO — *Explain in remarks*

Remarks — *Please use this space for any explanations that may be essential in understanding your reported data.*

PENALTY FOR FAILURE TO REPORT
DUE DATE: FEBRUARY 15, 1978

Form Approved: O.M.B. No. 41-S77001

FORM CB-50F (5006)

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

1977 CENSUS OF DISTRIBUTIVE TRADES

ELECTRICAL GOODS

Important — *PLEASE READ ALL ACCOMPANYING INSTRUCTIONS*

Please complete this form and RETURN TO → **BUREAU OF THE CENSUS**
1201 East Tenth Street
Jeffersonville, Indiana 47132

Census use only	Unit No.	Item code	Unit No.	Item code	Unit No.	Item code

NOTICE — Response to this inquiry is **required by law (title 13, U.S. Code).** By the same law, your report to the Census Bureau is **confidential.** It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are **immune from legal process.**

In correspondence pertaining to this report, please refer to this Census File Number → **CB-50F (5006)**

Employer Identification Number →

KEEP THIS COPY FOR YOUR FILES

PLEASE COMPLETE AND RETURN THE FORM WHICH SHOWS YOUR NAME AND ADDRESS

Please correct errors in name, address and ZIP code. ENTER street and number if not shown.

Item 1 – PHYSICAL LOCATION OF ESTABLISHMENT – In order to assign this establishment to the correct geographic area, the Bureau of the Census must know the actual location **which may differ from the mailing address.** *Complete items a through g.*

a. Address number and street name of physical location – *If not known, enter building name, shopping center name, or other physical location description. Do not enter P.O. box or rural route.*

Mark (X) for a, b, c, and d if same as mailing label; if different show corrections.

Same as mailing label [ ] **OR ▶**

b. Name of city, town, village, borough, etc., of physical location

Same as mailing label [ ] **OR ▶**

c. State — Same as mailing label [ ] **OR ▶**

d. ZIP code — Same as mailing label [ ] **OR ▶**

e. Type of municipality indicated in 1b (*Mark (X) one*)
1 [ ] City
2 [ ] Town
3 [ ] Village
4 [ ] Borough
5 [ ] Township
6 [ ] Unincorporated
7 [ ] Other – *Specify* _____
8 [ ] Don't know

f. Is this establishment located inside the legal boundaries of the city, town, village, etc., indicated in 1b?
1 [ ] Yes
2 [ ] No
3 [ ] No legal boundaries
4 [ ] Don't know

NOTE – The area served by a post office generally does not coincide with the legal boundaries of the municipality from which the post office takes its name.

g. Name of county (Louisiana parish) of physical location

Item 2 – EMPLOYER IDENTIFICATION NUMBER

Is the Employer Identification (EI) Number printed in the upper right of the address box the SAME as that used for this establishment on its latest 1977 Employer's Quarterly Federal Tax Return, Treasury Form 941?

1 YES
2 NO – *Enter current EI number* → [ ][ ][ ]–[ ][ ][ ][ ][ ][ ][ ] *(9 digits)*

Item 3 – OPERATIONAL STATUS

a. Mark (X) the **ONE** box which best describes this establishment at the end of 1977.

001
1 [ ] In operation
2 [ ] Temporarily or seasonally inactive
3 [ ] Ceased operation – *Give date* →
4 [ ] Sold or leased to another operator – *Give date AND name, etc.* →

Figures only

Month	Day	Year

Name of new owner or operator

Number and street

City | State | ZIP code

b. How many months during 1977 did this firm or organization actively operate this establishment? 002 — Number of months

Item 4 – ORGANIZATIONAL STATUS

a. Mark (X) the **ONE** box which best describes this establishment during 1977.

003
1 [ ] Individual proprietorship
2 [ ] Partnership
8 [ ] Cooperative association
5 [ ] Governmental – *Specify* _____
6 [ ] Corporation (other than specified above)
9 [ ] Other – *Specify* _____

b. Was all or part of the income of this establishment or organization exempt from Federal income taxes under Section 501 or 521 of the Internal Revenue Code? 004
1 [ ] YES
2 [ ] NO

Important – Please read

Dollar figures should be reported as illustrated. Please be careful to enter the figures in the **correct columns.** See example below:

EXAMPLE: If figure is **$1,125,628.28** →

	Millions (000)	Thousands (000)	Dollars (000)
•**PREFERRED** method	1	125	
Acceptable method	1	125	628

Item 5 – DOLLAR VOLUME OF BUSINESS IN 1977

		Mil.	Thou.	Dol.
a. Sales and other operating receipts **EXCLUDING** sales (or other) taxes collected	010			
b. Were sales (or other) taxes collected from customers and forwarded to taxing authorities?	011 (1 YES, 2 NO)			
If "YES," report the amount of such taxes (**DO NOT** include taxes in 5a above)	012			
c. TOTAL SALES and other operating receipts including sales (or other) taxes (Sum of 5a and 5b above) →	013			
d. Did this establishment sell merchandise on a commission basis? (1 YES, 2 NO) *If "YES," go to 5e, if "NO," SKIP to 5g.*	100			
e. Gross selling value of business conducted for the account of others (Include in 5a)	101			
f. Dollar volume of commissions or brokerage received on transactions negotiated for others	102			
g. Did your company (including firms under common ownership and control) manufacture or mine, in the United States or its possessions, 50% or more of the products sold by this establishment? (1 YES, 2 NO)	103			
h. Did this establishment have transfers (billings) to other establishments within your company? (1 YES, 2 NO) *If "YES," go to 5i; if "NO," SKIP to item 5j.*	104			
i. Dollar volume of transfers (billings) to other establishments within your company (**DO NOT** include in 5a)	105			
j. Did construction receipts represent 50% or more of the total sales (as reported in 5a) of this establishment? (1 YES, 2 NO)	106			

Item 6 – PAYROLL AND EMPLOYMENT

		Mil.	Thou.	Dol.
a. Payroll (1) **Total ANNUAL** payroll in 1977 before deductions	030			
(2) Payroll for the **FIRST QUARTER** of 1977	031			

b. Employment – Number of paid employees for the pay period including the 12th of the month (include both full- and part-time employees)

032 (1) MAR	033 (2) MAY	034 (3) AUG	035 (4) NOV

Item 7 – OPERATING EXPENSES AND INVENTORIES

		Mil.	Thou.	Dol.
a. **Total** 1977 operating expenses, including payroll →	040			

b. Did you have merchandise inventories during 1977? 045 (1 YES – *Go to 7c*, 2 NO – *SKIP to item 8*)

c. Indicate the value of merchandise inventories on hand at the end of the year specified according to the valuation methods shown.

- **Cost method** – Report amounts on lines (1)(a) through (e)
- **Market basis always used** – Report amounts on line (2)(b)
- **Lower of cost or market** – Report amounts valued at cost on lines (1)(a) through (e) according to the applicable methods and the amount at market on line (2)(a)

Method of inventory valuation		Key	Amount at end of 1977 Mil.	Thou.	Dol.	Key	Amount at end of 1976 Mil.	Thou.	Dol.
(1) Cost	(a) First-in, First-out (FIFO)	110				120			
	(b) Last-in, First-out (LIFO)	111				121			
	(c) Average cost	112				122			
	(d) Specific or actual cost	113				123			
	(e) Other – *Specify*	114				124			
(2) Market	(a) Market used for valuation because market lower than cost	115				125			
	(b) Market always used for valuation	116				126			
(3)	TOTAL INVENTORIES (Sum of lines (1)(a) through (e) and lines (2)(a) and (b)) →	046				047			

Please continue on page 2 →

Item 8 – TYPE OF OPERATION – Mark (X) the **ONE** item that is best suited to your business – the basis on which the major portion of your operation was conducted in 1977.

a. Merchant (buying and selling on own account) – An establishment primarily engaged in buying and selling merchandise produced by other firms on its own account.

- **Importer** – Source of purchase is primarily foreign.
- **Exporter** – Purchasing goods in the United States for delivery to customers outside the United States.
- **Wholesale merchant, jobber, distributor** – Buying and selling merchandise in the United States for delivery in the United States.

b. Manufacturers' sales branch or sales office – An establishment primarily engaged in selling goods mined or manufactured in the United States and its possessions or Puerto Rico by your company, your parent company, or companies corporately affiliated with your company.

- **Sales branch** – Manufacturers' sales outlet which carries stock.
- **Sales office** – Manufacturers' sales outlet which does not carry stock.

c. Broker, agent, commission merchant – An establishment primarily engaged in selling (or buying) merchandise on an agency basis for others, but not dealing primarily on own account.

- **Auction company** – Selling merchandise for others at wholesale from a permanent location by the auction method.
- **Broker** – Selling (or buying) merchandise on a brokerage basis for others in the United States market, but not receiving goods on consignment.
- **Commission merchant** – Receiving goods on consignment and selling them in the United States market.
- **Import agent** – Representing, on an agency basis, firms outside the United States selling goods in the domestic market.
- **Export agent** – Representing, on an agency basis, domestic firms selling merchandise for delivery outside the United States or its possessions.
- **Manufacturers' agent** – Selling for a limited number of manufacturers on a continuing agency basis.

d. Other type of operation – If none of the above types apply, describe your method of operation.

060

a. Merchant (buying and selling on own account)
- (1) Importer ☐ 12
- (2) Exporter ☐ 13
- (3) Wholesale merchant, jobber, distributor ☐ 11

b. Manufacturers' sales branch or sales office
- (1) Sales branch (with stock) ☐ 21
- (2) Sales office (without stock) ☐ 22

c. Broker, agent, commission merchant
- (1) Auction company ☐ 41
- (2) Broker (representing buyers or sellers) ☐ 42
- (3) Commission merchant ☐ 43
- (4) Import agent ☐ 44
- (5) Export agent ☐ 45
- (6) Manufacturers' agent ☐ 46

d. Other type of operation – *Specify* ☐

Item 9 – KIND OF BUSINESS – Mark (X) the **ONE** item that best describes the **principal** kind of business of this establishment in 1977. If none applies, mark the last item and enter the description by which your business is known to the trade or public.

070

a. Electrical goods
- (1) Electrical apparatus and equipment, wiring supplies, and construction materials ☐ 506300
- (2) Electrical appliances, television and radio sets ☐ 506400
- (3) Electronic parts and equipment ☐ 506500

b. Other kind of business – *Specify* ☐

Item 10 – SALES BY COMMODITY LINES

Report the volume of sales of each of the listed commodity lines which account for at least 1% of this establishment's sales. If any commodities sold are not prelisted but account for 1% or more of total sales, write in the description and volume of sales in the space provided.

Sales may be reported either in dollar figures (see example on page 1), or as a percent (in whole percents) of the total (see example).

The sum of reported commodity lines should equal the total sales as reported in item 5a if dollars are reported; if percents are used, the sum should equal 100.

EXAMPLE FOR REPORTING PERCENTS	If figure is **38.76%** of total sales:	Mil.	Thou.	Dol.	Percent
	• Report whole percents →				39%
	Not acceptable →				38.76%

Description	Census use only	Estimated sales during 1977 Mil.	Thou.	Dol.	Percent
Electrical goods	170	171			172
1. Electrical apparatus and equipment					
a. Power and distribution transformers	1311				
b. Switchgear and switchboard apparatus	1312				
c. Motors and generators	1313				
d. Industrial controls (power circuit devices and controls)	1314				
e. Electric lamps and bulbs	1316				
f. Interior wiring (Report conduit on line i)	1317				
g. Lighting fixtures (residential and commercial)	1318				
h. Communication equipment	1319				
i. Other electrical apparatus and equipment (Include conduits, transmission hardware, lightning rods, etc.)	1321				
j. **Total** (Sum of lines 1a through 1i) →	1300				
2. Electrical appliances, household	170	171			172
a. Radio and TV sets	1411				
b. Electrical household ranges and ovens	1412				
c. Refrigerators and freezers, household	1413				
d. Household laundry equipment	1414				
e. Vacuum cleaners and sewing machines, household	1415				
f. Room air conditioners	1416				
g. Other electric household appliances (Include fans, dishwashers, etc.)	1417				
h. **Total** (Sum of lines 2a through 2g) →	1400				
3. Electronic parts and equipment					
a. Electron tubes, receiving and transmitting (Include cathode ray TV picture tubes)	1511				
b. Intercommunication equipment	1512				
c. Public address equipment	1513				
d. Semiconductors, transistors, diodes, rectifiers, and other semiconductor devices (solar cells, zener diodes, etc.)	1514				
e. Other electronic parts and equipment	1515				
	170	171			172
f. **Total** (Sum of lines 3a through 3e) →	1500				

Description	Census use only	Estimated sales during 1977 Mil.	Thou.	Dol.	Percent
Other commodity lines	170	171			172
4. Automotive parts and supplies	0200				
5. Household and lawn furniture	0400				
6. Household china, glassware, and crockery	0500				
7. Linens, domestics, draperies, and shades	0520				
8. Floor coverings	0540				
9. Other home furnishings	0560				
10. Plywood, millwork	0650				
11. Sporting and recreational goods and supplies	0800				
12. Toys, hobby goods and supplies	0900				
13. Photographic equipment and supplies	1000				
14. Hardware (Include power hand tools)	1600				
15. Plumbing and heating equipment and supplies	1700				
16. Warm air heating and air conditioning equipment and supplies	1800				
17. Refrigeration equipment and supplies	1900				
18. Restaurant and hotel equipment and supplies	2020				
19. Farm machinery and equipment	2200				
20. Garden, lawn machinery and equipment	2250				
21. Jewelry, watches, diamonds, and other precious stones (Include silverware)	170 2900	171			172
22. Other durable goods (Include phonograph records and pre-recorded tapes)	3030				
23. Art goods (Include gifts, novelties, and souvenirs)	5910				
24. Miscellaneous commodities – *Specify*					
a.	9800				
b.	9800				
c.	9800				
25. Rental receipts – *Specify*	9940				
26. Service receipts and labor charges (Include installed parts)					
a. Labor charges	9711				
b. Parts installed and repair work	9712				
c. Other service receipts	9713				
d. **Total** (Sum of lines 26a through 26c) →	9700				
27. TOTAL SALES IN 1977 (Sum of lines 1 through 26 should equal the entry in item 5a) →	170 9990	171			172 100%

FORM CB-50F (5006)

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

1977 CENSUS OF DISTRIBUTIVE TRADES
ELECTRICAL GOODS

Please enter the 11-digit CENSUS FILE NUMBER as shown on this report *(See label on page 1)*

Item 11 – SALES BY CUSTOMER CLASSES

Report the approximate percentage of your 1977 sales (item 5a) to each of the customer classes listed.

Line a – Sales to laboratories, manufacturers of all types, service business, and other business concerns that normally buy for business use rather than for resale of the goods in the form purchased.

Line b – Sales to farmers for use in agricultural production.

Line c – Sales to builders and contractors for construction purposes, not for resale.

Line d – Sales to the Federal government (including the military, post exchanges, GSA, GPO, and similar Federal agencies) and to State and local governments. Include here only sales made by this establishment DIRECT to governmental agencies.

Line e – Sales to retailers of all types (retail chain organizations, independent stores, department stores, etc.) who normally buy for resale to home consumers. Sales to repair shops of all types.

Line f – Sales to organizations that normally purchase for resale at wholesale. Sales to suppliers of plumbing, electrical, farm, and office machinery and supplies. Sales through agents and brokers selling on your account.

Line h – Include sales made direct to buyers in foreign countries, or through their agents in this country. Include transfers, if any, to your own foreign branches. United States possessions should not be considered as foreign countries.

		Whole percents
a.	To institutional, industrial, commercial, and professional users *Report sales to repair shops on line e.*	141
b.	To farmers (for farm use)	142
c.	To builders	143
d.	To governmental bodies (Federal, State, and local governments)	144
e.	To retailers and repair shops	145
f.	To wholesale establishments	146
g.	To household consumers and individual users	147
h.	Export sales	148
i.	TOTAL (Sum of lines a through h should add to 100) →	100%

Item 12 – EMPLOYMENT BY PRINCIPAL ACTIVITY

Report the approximate number of employees at this establishment according to their principal activity during the pay period including March 12, 1977 (total should equal item 6b(1)).

Line a – Include employees primarily engaged in selling services and merchandise from this establishment.

Line b – Include traveling salesmen, truck salesmen, etc.

Line c – Include employees primarily engaged in office and clerical work for this establishment. (See instruction for line e.)

Line d – Include employees primarily engaged in warehousing activities for this establishment. (See instruction for line e.)

Line e – Central administrative – Employees primarily engaged in various management, accounting, clerical, warehousing, etc., services for **other** establishments of your company. Include corporate officers unless primarily engaged in sales activities.

		Number of employees
a.	Inside selling	130
b.	Outside selling	131
c.	Office and clerical	132
d.	Warehousing	133
e.	Administrative	134
f.	Manufacturing	135
g.	Other – *Specify*	136
h.	TOTAL (Sum of lines a through g should equal entry in item 6b(1)) →	137

Item 13 – WAREHOUSE, STOCKROOM, AND OTHER INVENTORY STORAGE SPACE, DECEMBER 31,1977

Report occupiable floor space excluding space occupied by interior walls, permanent aisles, elevator shafts, stairways, offices, receiving and shipping platforms, etc.

a. Did you have warehouse, stockroom, or other inventory storage space on December 31, 1977? 149 — 1 ☐ YES – *Go to 13b* 2 ☐ NO – *SKIP to item 15*

		Square feet		
		Mil.	Thou.	000
b.	Occupiable floor space (under-roof) – occupied and unoccupied – of this establishment	150		

Item 14 – Not applicable to this form

Item 15 – CREDIT SALES, RECEIVABLES, AND BAD DEBT LOSSES

a. Did you have credit sales, receivables, or bad debt losses in 1977? 155 — 1 ☐ YES – *Go to 15b* 2 ☐ NO – *SKIP to item 16*

b.	Approximately what percent of your 1977 sales were made on credit?	156	%	
		Mil.	Thou.	Dol.
c.	Accounts and notes receivable, outstanding as of December 31, 1977	157		
d.	Bad debt losses, 1977	158		

Item 16 – TRUCKS, TRUCK TRACTORS, AND TRUCK TRAILERS OPERATED, MID-DECEMBER 1977

a. Did this establishment operate any trucks, truck tractors, or truck trailers mid-December 1977? 160 — 1 ☐ YES – *Go to 16b* 2 ☐ NO – *SKIP to item 17*

b. Number and type of vehicles operated mid-December 1977	TOTAL	Owned	Rented or leased (without drivers)
(1) Trucks (except tractor trailer)	161	162	163
(2) Truck tractors	164	165	166
(3) Semi-trailers and full-trailers	167	168	169

Remarks – *Please use this space for any explanation that may be essential in understanding your reported data.*

Item 17 – CERTIFICATION

Census use only	18a. ☐ YES ☐ NO	18b. ☐ YES ☐ NO	19a. ☐ YES ☐ NO	19b. Number 079	Not returned ☐	Blank ☐

FORM MA-171 (11-25-77)

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

DEPARTMENT OF DEFENSE-OWNED AND OPERATED ESTABLISHMENTS PRIMARILY ENGAGED IN MANUFACTURING AND ASSEMBLY, AND/OR RESEARCH AND DEVELOPMENT – 1977

(Includes shipyards)

(Supplement to the Annual Survey of Manufactures, Census Form MA-100)

INSTRUCTIONS – This report is to be prepared by those Department of Defense establishments whose primary activities are manufacture and assembly and/or research and development. All shipyards are included.

The information requested is based upon reports now regularly prepared by most such establishments.

NOTICE – Response to this inquiry is required by law (title 13, U.S. Code). By the same law, your report to the Census Bureau is confidential. It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are immune from legal process.

(Please correct if any error in name and address, including ZIP code)

PLEASE RETURN THIS COPY

ITEM 1 – NAME AND PHYSICAL LOCATION OF ESTABLISHMENT ON DECEMBER 31, 1977

a. Name of establishment

Your answers to parts b, c, d, e, and f of this item should relate to the ACTUAL PHYSICAL LOCATION of this establishment which may be different from the mailing address.

b. Street and number of establishment location*

*If establishment location cannot be described by street and number, give name and number, if any, of road or highway and sufficient information to locate establishment, e.g., Rt. 25, 3 miles south of Charlesville.

c. Type and name of place in which located – *Mark (X) first applicable type and enter name of place.*

Type	Name of place
☐ City	
☐ Village or borough	
☐ Town	
☐ Township	
☐ Other – *Specify*	

d. Is this establishment physically located within the legal boundaries of the place named in "c"?

☐ Yes ☐ No

e. County in which located

f. State | **ZIP code**

g. Telephone number of establishment *(Include area code)*

ITEM 2 – NATURE OF ACTIVITY

Describe briefly the kind of activity of this establishment. If a manufacturing plant, list the three most important products.

ITEM 3 EMPLOYMENT PAYROLLS IN CALENDAR YEAR 1977

(Civilian employees only)

Class of employee	Item code	Number of civilian employees in 1977: At end of quarter (As reported on Civil Service Form SF-113-A**) March (A)	June (B)	September (C)	December (D)	Sum of columns A, B, C, and D (E)	Average number of employees (Col. E divided by 4) (F)	Total wages and salaries of civilian employees (Thousands of dollars) (G)
a. Wage Board employees	41							$
b. All others	42							$
c. **TOTAL CIVILIAN EMPLOYEES** → *(Sum of lines a and b)*	49							$

** The number of Wage Board employees (line a) should be the same as reported on line 5 of SF-113-A. The total (line c) should be the same as reported on line 1 of SF-113-A.

ITEM 4 MAN-DAYS OF WAGE BOARD EMPLOYEES BY CALENDAR QUARTER 1977

Enter the total number of man-days of Wage Board employees for each calendar quarter of 1977. Do not include days paid for vacations, holidays, or sick leave.

Item code	1977 Quarterly period	Man-days (Thousands) (A)	Estimated number of man-hours*** (Thousands) (B)
51	a. January through March		
52	b. April through June		
53	c. July through September		
54	d. October through December		
59	e. **TOTAL, 1977** → *(Sum of lines a, b, c, and d)*		

*** Obtain figure for column (B) by multiplying column (A) by average number of hours per day per Wage Board employee in this establishment.

Please continue on page 2

ITEM 5 BILLINGS BY THIS ESTABLISHMENT DURING CALENDAR YEAR 1977

Enter below the specified classes of billings of this establishment for calendar year 1977

Billings for products and services (including progress billings)	Item code	Value (Thousands of dollars)
Manufacture and assembly	61	$
Construction and conversion	62	
Overhaul, repair, and renovation	63	
Alteration and modification	64	
Research and development	65	
Other billings	66	
Total billings for products and services	67	
Increase or decrease in unbilled costs of work in progress	68	
TOTAL EARNED REVENUE →	69	

ITEM 6 COSTS DURING CALENDAR YEAR 1977

Types of costs incurred	Item code	Cost (Thousands of dollars)
Materials, supplies, and parts used	71	$
Wages and salaries (same as item 3, code 49, col. G)	72	
Contractual services and other costs	73	
TOTAL COSTS INCURRED →	79	
VALUE ADDED (Census use only)	81	

ITEM 7 CHECKS TO ASSURE A COMPLETE AND ACCURATE REPORT

(Please complete this item after you have answered all items on this report.)

The Census Bureau reviews your report for omissions, inconsistencies, and unusual ratios. To save you future correspondence about these problems, please make the following checks before returning your report:

a. Review this report carefully to see that no items are omitted.
b. Calculate and enter the four "reasonableness" checks (described below), then review the resulting figures.
c. Correct your report for any errors you find, explain unusual figures in "Remarks" section.

"Reasonableness" checks	Calculation required for each check	Resulting figures for 1977
(1) Average hourly wages per Wage Board employee	Item code 41, column G (Wages paid Wage Board employees) – item code 59, column B (Total estimated work-hours)	$
(2) Work days per year per Wage Board employee	Item code 59, column A (Wage Board work-days in thousands) × 1,000 – item code 41, column F (Average number of Wage Board employees)	_____ Work-days
(3) Wages and salaries per dollar of earned revenue	Item code 72, (Wages and salaries of civilian employees) – item code 69 (Total earned revenue)	$

(4) Is the total earned revenue (item code 69, total) greater than total costs incurred (item code 79, total)? . . . . . ☐ Yes ☐ No – *If "No," please explain in "Remarks" section.*

Survey No. 5001

1978 SURVEY OF WATER USE IN MANUFACTURING

Please complete and return this form within 30 days after receipt to:

BUREAU OF THE CENSUS
1201 East Tenth Street
Jeffersonville, Indiana 47132

PLEASE RETURN THIS COPY

GENERAL INSTRUCTIONS

Report all quantities in millions of gallons per year. Do not report in gallons per minute or gallons per day.

If the quantity used for the year is → 5,600,000,000 gallons – report as 5,600
5,600,000 gallons – report as 6
600,000 gallons – report as 1
Less than 500,000 gallons – report as 0

If no water is used, treated, or discharged, report "None." If your records on water used are in cubic feet, convert to gallons (1 cubic foot equals 7.5 gallons). Reasonably accurate estimates are acceptable.

Brackish water is defined as all water with 1,000 to 10,000 parts per million of dissolved solids.

Salt water is defined as all water with more than 10,000 parts per million of dissolved solids.

Item I – WATER INTAKE BY SOURCE AND BY KIND, 1978

1 – Include water supplied by a water system (whether municipally or privately owned), the primary purpose of which is the supply of water to the general public. Include water supplied by systems, the principal function of which is the supply of water to industrial users.

2 through 5 – Include water obtained from your own water supply system, and water obtained from another company where the supplying company is not primarily a water supplier to the general public and/or industrial users. Include only your own portion of water obtained from a joint water supply system.

Water from –	Item code (a)	MILLIONS OF GALLONS FOR THE YEAR Fresh (b)	Brackish (c)	Salt (d)
1. Public water system	1010			
2. Company surface water system, such as streams or lakes	1020			
3. Company ground water systems, such as wells or deep springs	1030			
4. Company tide water system from estuaries, bays, or oceans	1040			
5. Other sources	1060			
6. TOTAL *(Sum of lines 1 through 5)* →	1099			

Item II – WATER INTAKE BY PURPOSE AND BY KIND, 1978

1 – Process water is all water that comes directly in contact with products and/or materials, including water which is consumed in the manufacture of products.

2a, 2b, 4, and 5 – Self-explanatory.

2c – Include water which is used for cooling and condensing purposes in conjunction with the operation of process equipment, but which does not come in direct contact with products or materials.

3 – Sanitary service includes all water used for drinking, lunchrooms or cafeterias, and domestic sewage.

	Item code (a)	Fresh (b)	Brackish (c)	Salt (d)
1. Process	2010			
2. Cooling and condensing – a. For steam electric power generation	2020			
b. For air conditioning	2030			
c. Other cooling and condensing	2040			
3. Sanitary service	2045			
4. Boiler feed	2055			
5. Other uses	2065			
6. TOTAL *(Sum of lines 1 through 5 should equal item 1, line 6)* →	2099			

Item III – TOTAL WATER INTAKE, WATER RECIRCULATED AND REUSED, AND GROSS WATER USED, BY PURPOSE, 1978

If no water was recirculated or reused, mark "No" box on line 1 and skip to item IV.

If water was recirculated or reused –

In col. (b) report the sum of cols. (b) through (d) for each line in item II above.

In col. (c) report the estimated quantity of water recirculated or reused. For example: If 100 million gallons of intake water were recirculated twice, report 200 million gallons in this column.

In col. (d) report the estimated quantity of water that would have been required if no water had been recirculated or reused. Col. (d) should equal the sum of cols. (b) and (c), less consumption and evaporation loss.

1. Was any water recirculated or reused? *(Mark "X" one box)*
3002 ☐ No – *SKIP to item IV*
3001 ☐ Yes – *Complete columns (b) through (d)*

	Item code (a)	MILLIONS OF GALLONS FOR THE YEAR Total intake (b)	Recirculated and reused (c)	Gross water used (d)
2. Process	3010			
3. Cooling and condensing – a. For steam electric power generation	3020			
b. For air conditioning	3030			
c. Other cooling and condensing	3040			
4. Sanitary service	3045			
5. Boiler feed	3055			
6. Other uses	3065			
7. TOTAL *(Sum of lines 2 through 6)* →	3099			

Item IV – WATER DISCHARGED BY POINT OF DISCHARGE AND BY TREATMENT, 1978

Treated means the use of any of a wide variety of techniques used to cool, detoxify, decompose, separate-to-store, or ameliorate. Treated or untreated water applies to the status of the effluent as it reaches the discharge point.

Include all water brought to ultimate discharge point whether treated or not. Do not include water held in your ponds, lagoons or basins, for reuse or treatment, until actually discharged. Do not report water evaporated or otherwise consumed and not brought to ultimate discharge point.

1 – Report water discharged to public utility sewer systems, whether municipally or privately owned.

2 through 5 – Self-explanatory.

6 – Include seepage into ground from your holding ponds, lagoons, etc. (**Note** – If water is transferred to an agricultural establishment for spray irrigation, report such quantity on line 7.)

7 – Include transfers, after your own use, to another establishment of either your company or another company.

Water used and discharged to –	Item code (a)	MILLIONS OF GALLONS FOR THE YEAR Untreated (b)	Treated (c)
1. Public utility sewer	4010		
2. Streams and rivers	4015		
3. Lakes and ponds	4025		
4. Bays and estuaries	4031		
5. Ocean	4035		
6. Ground (wells, spray, seepage, etc.)	4040		
7. Transferred to other users	4050		
8. TOTAL *(Sum of lines 1 through 7)* →	4099		

Please continue on page 2

Item V – WATER DISCHARGED BY LAST USE AND BY TREATMENT

Col. (c) – Includes process water that has come directly into contact with products and or materials.

Cols. (d), (e), (h), and (i) – Self-explanatory.

Col. (f) – Includes water which has been used for cooling and condensing purposes in conjunction with the operation of process equipment, but which has not come in direct contact with products or materials.

Col. (g) – Sanitary service water discharged is that water which has been used for drinking, lunchrooms or cafeterias, and domestic sewage.

Item (a)	Item code (b)	Process (c)	COOLING AND CONDENSING: For steam electric power generation (d)	COOLING AND CONDENSING: For air conditioning (e)	COOLING AND CONDENSING: Other cooling and condensing (f)	Sanitary service (g)	Boiler feed (h)	Other uses (i)	TOTAL *(Should equal item IV, line 8)* (j)

	5040	%	%	%	%	%	%	%	%

Item VI – CAPITAL EXPENDITURES, ASSETS, AND ANNUAL COSTS FOR WATER TREATMENT, 1978

Instructions –

1 – Include capital expenditures for new plant and equipment acquisitions (both replacement and expansion) and expenditures for construction in progress. Capital expenditures are those chargeable to your establishment's accounts for plant and equipment that are subject to depreciation or amortization. Include expenditures for both end-of-line techniques and changes-in-production processes. **NOTE –** If you report on form MA-200, this line should equal item 3, line c, on that form.

2 – Report the original cost of depreciable assets used for abatement of water pollutants such as buildings, structures, machinery, and equipment for which depreciation or amortization reserves are maintained. Include cumulative costs for both end-of-line techniques and changes-in-production processes. Exclude land. Report as of the end of 1978.

3a – Report the annual operating costs and expenses for abatement of water pollutants in 1978. Include all costs and expenses to operate and maintain plant(s) and equipment to abate water pollutants. Include leasing costs of equipment to treat water, payments to private contractors and consultants, monitoring costs, and rental costs of land. **NOTE –** If you report on form MA-200, this line should equal the part of the cost reported in item 7a, on form MA-200 that is for abatement of water pollutants. Do not reduce annual costs by subtracting the estimate of costs recovered. Do not include payments to governmental units for public sewerage use.

4 – Report land that you own or rent or lease from others primarily for abatement of water pollutants. For example, land use used for settling ponds, drying beds, equalization basins, sludge lagoons, etc.

	Item code (a)	Report in thousands of dollars (b) Millions ($000)	Report in thousands of dollars (b) Thousands (000)	Mark (X) here if less than $500 and greater than 0 (c)
1. Capital expenditures for abatement of water pollutants	6010	$		☐
2. Estimated gross value of assets (original cost) of your in-place plant and equipment for abatement of water pollutants	6020	$		☐
3. Annual operating costs for abatement of water pollutants a. Report your best estimate of the annual costs of abatement of water pollutants	6031	$		☐
b. Report your best estimate of the percentage incurred by KIND OF COST		Report to the nearest whole percent		
(1) Depreciation	6032	%		
(2) Labor	6033	%		
(3) Private contractor services	6034	%		
(4) Materials and supplies (including fuel and power)	6035	%		
(5) Equipment leasing and other costs	6036	%		
(6) TOTAL *(Sum of lines (1) through (5) should equal 100%)*		100%		
4. Land used in the abatement of water pollutants a. Report your best estimate of the number of acres of land used in the abatement of water pollutants	6041	_____ Acres		
b. Estimate the percentage of such land that is rented and or leased	6042	Report to the nearest whole percent: %		

	Item code (a)	Report in thousands of dollars (b) Millions ($000)	Report in thousands of dollars (b) Thousands (000)	Mark (X) here if less than $500 and greater than 0 (c)
c. Estimate the rental cost of such land that is rented and or leased	6043	$		☐

INSTRUCTIONS

▶ **SURVEY DESCRIPTION**

As part of the 1977 Census of Manufactures, the Bureau of the Census is conducting this survey on Distribution of Manufacturers' Sales by Class of Customer. This survey is conducted every 10 years and was last done as part of the 1967 Census of Manufactures. Similar information on the sales of wholesalers by class of customer is being collected in the Census of Business for 1977 on Forms CB-50A—CB-50W. This survey will provide a current analysis of the marketing channels through which goods move from the manufacturer to the user or consumer. The results are needed for the improvement of the national income and product statistics.

▶ **HOW TO REPORT** — This report provides a summary of the distribution of the shipments of this company by class of customer. The total value of products distributed should approximately **equal the total value reported on the accompanying 1977 Census of Manufactures report form.** If you operate additional places of business, please let us know and we will send you the correct forms.

This report will measure the flow of products from this company to its customers. Please report in column (B) the value of all of your products, **whether made in your company or purchased and sold without further fabrication**, shipped to each of the class of customer categories listed in column (A). Report shipments on consignment as though the merchandise had been sold at the time of the shipment. If such consignment shipments are to agents, consider the agent as a wholesaler.

We appreciate that there is no uniform system of sales analysis and that completeness of records varies considerably among companies. Therefore, it will be necessary for companies to derive **estimates** based on any information available as to the type of economic activity of their customers. **Approximations are acceptable. If filing by due date causes an undue burden, a time extension request should be sent to the above address.** Please enter your 11-digit Census File Number on any correspondence with us regarding this report.

▶ **DESCRIPTION OF CLASS OF CUSTOMER**

- **Wholesalers — line 1** — Report shipments to companies who are purchasing primarily to sell the products to other businesses or institutions. Include industrial distributors, drop shippers, desk jobbers, voluntary group wholesalers, retail cooperative warehouses, and exporters.
- **Retailers — line 2** — Report shipments to chain stores, mail order houses, department stores, independent retailers, including independent route salesmen such as bakery or dairy truck distributors who sell directly to households.
- **Manufacturers — line 3** — Include as manufacturers, food processors such as meat packers, bakeries, and bottling plants; sheet metal operations; feed mixers; logging camps; sawmills; printing; publishing; ready-mixed concrete; apparel jobbers; and machine shops.
- **Federal Government — line 4** — Include sales to all branches of Federal Government and to corporations owned by the Federal Government. If you have sales as a subcontractor on a Federal contract, report your sales according to the activity of the prime contractor for whom you did the work.
- **Other — line 5** — Includes the following:
  - a. State and local governments
  - b. Construction companies
  - c. Mining companies
  - d. Utility companies
  - e. Transportation companies
  - f. Private and public institutions (e.g., hospitals and schools)
  - g. Banks
  - h. Restaurants
  - i. Hotels
  - j. Individuals
  - k. Households
  - l. Farmers
  - m. Exports (Include products directly exported by your company. Products shipped to export intermediaries should be reported as shipped to wholesalers.)

▶ **1. Distribution of sales**

Class of customer (A)	Line No.	Value of products shipped (B) Mil. $000	Thou. 000	Dol. 000
Shipments to wholesalers	1	$		
Shipments to retailers	2			
Shipments to other manufacturers	3			
Shipments to the Federal Government	4			
Other shipments (State and local governments, construction, mining, utility and transportation companies, private and public institutions, banks; restaurants, hotels, other service-type businesses, including exports. Include here also direct sales to individual households, farmers, etc.)	5			
TOTAL *(Sum of lines 1 through 5 should equal sum of values reported in specified PRODUCT LINES including resales in item 18 on your Census of Manufactures report form.)* →	6			
Receipts for work done for others on their materials *(same as contract receipt values in item 18 on Census of Manufactures report form)*	7			
Miscellaneous receipts *(sum of miscellaneous receipts reported in item 18 on Census of Manufactures report form)*	8			
TOTAL *(Sum of lines 6, 7, and 8 should be the same as total value of shipments reported in item 18 of your Census of Manufactures report form.)* →	9	$		

		Percentage
▶ **2.** Enter the percent of line 9 which represents goods manufactured by other companies and **bought and sold** by this company without further fabrication (resales).	10	%
▶ **3.** If data are reported on line 5, do they include shipments to State and local governments and/or construction companies?		
1 ☐ YES — Estimate the percentage breakdown of shipments reported on line 5 for the three categories listed on lines 11 through 13 →		
2 ☐ NO		
a. State and local governments	11	%
b. Construction	12	%
c. Other	13	%

GENERAL INSTRUCTIONS

(See also specific instructions with Product Group Reference List)

▶ SURVEY DESCRIPTION

As part of the 1977 Census of Manufactures, the Bureau of the Census is conducting this survey on Distribution of Manufacturers' Sales by Class of Customer. This survey is conducted every 10 years and was last done as part of the 1967 Census of Manufactures. (Similar information on the sales of wholesalers by class of customer is collected in the Census of Business for 1977 on forms CB-50A–CB-50W.) This survey will provide a current analysis of the marketing channels through which goods move from the manufacturer to the user or consumer. The results are needed for the improvement of the national income and product statistics.

▶ HOW TO REPORT – You are requested to provide a summary company level report on the shipment of groups of products as reported by your manufacturing establishments on census forms for 1977. The reference list which accompanies this report shows the product group categories for which class of customer information is to be reported. These 4-digit categories represent combinations of the 7-digit product shipments reported in item 18 of your census forms based on the first 4 digits of the 7-digit code. (A detailed example illustrating this cumulative process can be found on pages 2 and 3 of the reference list.) Report at FOB factory value.

Please indicate at the top of the columns on this NC-K4 report form those product group codes which best fit the description of your manufacturing activities. If you reported values for products bought and sold in the same condition (resales), code 99989 00 6 of your census report form, allocate that amount to the appropriate product group. Please estimate the percent of each product group which is resales on line 11. **Exclude** miscellaneous receipts and receipts for contract and commission work.

We appreciate that there is no uniform system of sales analysis and that completeness of records varies considerably among companies. Therefore, it will be necessary for companies to derive **estimates** based on any information available as to the type of economic activity of their customers. **Approximations are acceptable. If filing by due date causes an undue burden, a time extension request should be sent to the above address.** Please enter your 11-digit Census File Number on any correspondence with us regarding this report.

▶ DESCRIPTION OF CLASS OF CUSTOMER

Shipments to other establishments of this company –

These shipments should be allocated on lines 1–4, according to type of business activity of these locations.

- **Wholesale establishments – line 1 –** Include not only shipments to wholesale locations but also shipments to or on order from sales branches, sales offices, and administrative offices which operate primarily to sell products manufactured by your company. These activities are reported on Census of Business Forms CB-50A–CB-50W and on Form NC-X6, Central Administrative Offices and Auxiliaries.
- **Retail stores and outlets – line 2 –** Report shipments to separately operated retail stores which also report in the Census of Business for this company.
- **Manufacturing establishments – line 3 –** Report all transfers or shipments from one manufacturing plant of this company to another whether for further processing, for use as a material or supply, or for resales by the other plants.
- **Other establishments – line 4 –** Report shipments to other plants of this company such as mining, construction, transportation, communication, services, etc.

Shipments to other companies, governments, individuals, and for export –

These shipments should be allocated according to type of customer on lines 5–9. Report shipments on consignment as though the merchandise had been sold at the time of the shipment. If such consignment shipments are to agents, consider the agent as a wholesaler.

- **Wholesalers – line 5 –** Report shipments to companies that are purchasing primarily to resell the products to other businesses or institutions. Include industrial distributors, drop shippers, desk jobbers, voluntary group wholesalers, retail cooperative warehouses, and exporters.
- **Retailers – line 6 –** Report shipments to chain stores, mail order houses, department stores, independent retailers, including independent route salesmen such as bakery or dairy truck distributors who sell directly to households.
- **Manufacturers – line 7 –** Include as manufacturers, food processors such as meat packers, bakeries, dairies, and bottling plants; sheet metal operations; feed mixers; logging camps; sawmills; printing; publishing; ready mixed concrete; apparel jobbers; machine shops.
- **Federal Government – line 8 –** Include sales to all branches of the Federal Government and to corporations owned by the Federal Government. If you have sales as a subcontractor on a Federal contract, report your sales according to the activity of the prime contractor for whom you did the work.
- **Other – line 9 – Includes the following:**
  - a. State and local governments
  - b. Construction companies
  - c. Mining companies
  - d. Utility companies
  - e. Transportation companies
  - f. Private and public institutions (e.g., hospitals and schools)
  - g. Banks
  - h. Restaurants
  - i. Hotels
  - j. Individuals
  - k. Households
  - l. Farmers
  - m. Exports (Include products directly exported by your company. Products shipped to export intermediaries should be reported as shipped to wholesalers.)

Remarks – *Please use this space for any information that may be essential in understanding your reported data.*

Form Approved: O.M.B. No. 41-S79017

FORM MA-131.3732
(1-19-79)

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

1977 CENSUS OF MANUFACTURES
SUPPLEMENTAL INQUIRY

Consumption of Materials, Parts, Containers, and Supplies During 1977

Complete and return this form to: Bureau of the Census, ATTN: Industry Division, Washington, D.C. 20233

NOTICE – Your report to the Census Bureau is confidential by law (title 13, U.S. Code, section 9). It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are immune from legal process.

(Please correct any error in name and address including ZIP code)

This form covers materials used by establishments classified in the following industries according to the 1972 Standard Industrial Classification. The 1977 Census of Manufactures form which was probably completed for this establishment appears in the parenthesis.

3732 – Boat Building and Repairing (MC-37K – Boat Building and Repairing)

GENERAL INSTRUCTIONS

This report form is a supplement to items 5a and 17B, "Consumption of selected materials," of the 1977 Census of Manufactures report which you have already completed. It requests additional information about the materials, parts, containers, and supplies used to make your products. Please refer to the file copy of the report you originally returned for the establishment described in the address box as you complete the information requested on this form.

This report requests information about the detailed composition of the line in item 17B coded 970099, "All other materials, components, parts, containers, and supplies consumed." Although you may have provided us with your three principal materials included in item 17B, code 970099 on your original Census form, a breakdown of the costs is also needed. If you also provided us with the cost figures for these three materials, the sum of these materials may still leave a substantial portion of your "All other materials" unclassified. This information is needed for the preparation of the basic tables used to benchmark the estimates of the Gross National Product.

SPECIFIC INSTRUCTIONS

Section 1 – SUMMARY OF MATERIALS CONSUMED DURING 1977.

This section contains a three-line summary of information that was reported in item 17B of your 1977 Census of Manufactures report form, "Consumption of selected materials during 1977."

Line 1 – Materials, parts, components, containers, etc. – The figure that has been preposted on line 1 represents the sum of the dollar figures for item 17B as reported on your original Census report form, less the figure reported for code **970099**.

Line 2 – All other materials, etc. – The figure that has been preposted on line 2 represents the dollar value of code **970099** of item 17B of your original Census report form.

Line 3 – Sum of lines 1 and 2 – This preposted figure should be identical to the dollar value reported in the total of item 17B of your original Census report form (which should also be identical to that value reported in item 5a).

Section 2 – 1977 CONSUMPTION OR USE OF SELECTED MATERIALS, PARTS, COMPONENTS, ETC.

In this section, report the cost of each specified material, part, component, etc., **provided** that cost was $50,000 or more. (If some of the item was consumed but less than $50,000 worth, we would appreciate your entering an "X" in the cost column.) The materials specified in this section were not requested separately in item 17B of the original Census report.

If your records are summarized differently from the classifications indicated on the prelisted items, you may use your categories, **unless** they are too general. You may use the write-in lines under "Other important materials," code **99998**, to describe these categories or attach a separate sheet. Please describe these categories as clearly as possible.

Other important materials (code 99998) – If this establishment used any materials, components, or parts that were not specified above in section 2 or in item 17B of the original Census report, please list them separately here and report the cost of each, **provided** the cost was $50,000 or more and the total expenditure was 1 percent or more of the total cost reported in section 1, line 3.

In reporting nonlisted items on the blank lines provided do not use general terms such as "operating supplies" or "interplant receipts." Groupings of closely related materials, parts, and supplies similar to those shown on the preprinted items may be used.

All other materials, parts, etc., not reported above – Code **99999** (next to last line, section 2). Report the total costs of those materials, parts, etc., used for which separate costs were not reported on the lines above. Include also the costs of the preprinted specified materials that were not reported separately because the individual cost was less than $50,000.

Report each of the materials actually consumed during **1977** whether received from other companies, withdrawn from inventory or obtained from other establishments of this company. Report all materials, parts, components, etc., purchased or received from other establishments of your company. Do not report parts, components, etc., produced in this establishment which are consumed in producing the final products of this establishment. For example: castings, forgings, stampings, fasteners, valves, hardware, etc., produced in this establishment which become part of the establishment's final product should not be reported since this would involve duplication of the materials consumed in the production of these components. Castings, forgings, etc., **received from other plants** of this company should be reported by this establishment.

1977 Delivered cost – Report in thousands of dollars, the delivered cost actually paid or payable, after discounts and allowances. Include freight and direct charges incurred in acquiring the listed materials consumed during **1977**. The values for materials transferred from other establishments of this company should be consistent with the values reported on your Census of Manufactures form.

The reported figures may be derived from either purchase, consumption, or other records. The figures reported for major materials and supply items should represent amounts actually consumed, and if these differ significantly from purchase costs, the latter should be adjusted to consumption levels by means of an estimate.

If **1977** actual data are not available for any item, the cost may be estimated by utilizing percentages or other techniques, provided the results are reasonably representative of the types and proportions of materials used in **1977**.

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

1977 CENSUS OF MINERAL INDUSTRIES

SUPPLEMENTAL INQUIRY SUPPLIES USED DURING 1977

Complete and return this form to: Bureau of the Census, ATTN: Industry Division, Washington, D.C. 20233

NOTICE – Your report to the Census Bureau is confidential by law (title 13, U.S. Code, section 9). It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are immune from legal process.

(Please correct any error in name and address including ZIP code)

This form covers materials used by establishments classified in the following industries according to the 1972 Standard Industrial Classification. The 1977 Census of Mineral Industries form which was probably completed for this establishment appears in the parenthesis.

1011 – Iron Ores (Form MC-10A – Iron, Bauxite, Ferroalloy, Uranium, and Miscellaneous Ores)

GENERAL INSTRUCTIONS

This report form is a supplement of items 5a and 17B, "Gas purchased for gas lift and repressuring, purchased machinery installed, and supplies used during 1977," of the 1977 Census of Mineral Industries report which you have already completed. It requests additional information about the all other supplies used in your operations. Please refer to the file copy of the report you originally returned for the establishment described in the address box as you complete the information requested on this form.

This report requests information about the detailed composition of the line in item 17B coded 970099, "All other supplies." Although you may have provided us with your three principal supplies included in item 17B, code 970099 on your original Census form, a breakdown of the costs is also needed. This report also requests a breakdown of the line in item 17B coded 353011, "Purchased machinery installed (including mobile loading and transportation equipment as well as equipment and parts for renewal and repairs)." This information is needed for the preparation of the basic tables used to benchmark the estimates of the Gross National Product

SPECIFIC INSTRUCTIONS

Section 1 – SUMMARY OF SUPPLIES USED AND PURCHASED MACHINERY INSTALLED DURING 1977.

This section contains a four-line summary of information that was reported in item 17B of your 1977 Census of Mineral Industries report form, "Gas purchased for . . . and supplies used during 1977."

Line 1 – Supplies reported separately – The figure that has been preposted on line 1 represents the sum of the dollar figures for item 17B as reported on your original Census report form, less the figures for "Purchased machinery installed" (code **353011**) and "All other supplies" (code **970099**).

Line 2 – Purchased machinery installed (including mobile loading and transportation equipment as well as equipment and parts for renewal and repairs) – The figure that has been preposted on line 2 represents the dollar value reported in item 17B, code **353011**, of your original Census report form.

Line 3 – All other supplies – The figure that has been preposted on line 3 represents the dollar value reported in item 17B, code **970099**, of your original Census report form.

Line 4 – Total purchased machinery installed and all other supplies – The figure that has been preposted on line 4 represents the sum of lines 2 and 3, above.

Line 5 – Sum of lines 1–3 – This preposted figure should be identical to the dollar value reported in the total of item 17B of your original Census report form (which should also be the same as the value reported in item 5a).

Section 2 – SELECTED SUPPLIES USED DURING 1977

In this section, report the cost of each specified supply item, **provided** that cost was $50,000 or more. (If some of the item was used but less than $50,000 worth, we would appreciate your entering an "X" in the cost column.) The items specified in this section were not requested separately in item 17B of the original Census report.

If your records are summarized differently from the classifications indicated on the prelisted items, you may use your categories, **unless** they are too general. You may use the write-in lines under "Other important supplies," (code **99998**) to describe these categories or attach a separate sheet. Please describe these categories as clearly as possible.

Other important supplies (code 99998) – If this establishment used any items, components, or parts that were not specified above in section 2 or in item 17B of the original Census report, please list them separately here and report the cost of each, **provided** the cost was $50,000 or more and total expenditure was 1% or more of the total cost reported in section 1, line 4.

In reporting nonlisted items on the blank lines provided do not use general terms such as "operating supplies" or "interplant receipts." Groupings of closely related materials, parts, and supplies similar to those shown on the preprinted items may be used.

All other supplies not listed above – Code **99999** (next to last line, section 2). Report the total costs of those supplies used for which separate costs were not reported on the lines above. Include also the costs of the preprinted specified materials that were not reported separately because the individual cost was less than $50,000.

Report each of the supplies actually consumed during **1977** whether received from other companies, withdrawn from inventory, or obtained from other establishments of this company.

1977 Delivered cost – Report in thousands of dollars, the delivered cost actually paid or payable, after discounts and allowances. Include freight and direct charges incurred in acquiring the listed supplies consumed during **1977**. The values for supplies transferred from other establishments of this company should be consistent with the values reported on your Census of Mineral Industries form.

The reported figures may be derived from either purchase, consumption, or other records. The figures reported for major supply items should represent amounts actually consumed, and, if these differ significantly from purchase costs, the latter should be adjusted to consumption levels by means of an estimate.

If **1977** actual data are not available for any item, the cost may be estimated by utilizing percentages or other techniques, provided the results are reasonably representative of the types and proportions of supplies used in **1977**.

APPENDIX E. Authority for Census: Title 13, United States Code

COLLECTION AND PUBLICATION: Five-year periods (131)

The Secretary shall take, compile, and publish censuses of manufactures, of mineral industries, and of other businesses . . . in the year 1964, then in the year 1968, and every fifth year thereafter, and each such census shall relate to the year immediately preceding the taking thereof.

Geographic scope of censuses (191a)

(a) Each of the censuses authorized by this chapter shall include each State, the District of Columbia, the Virgin Islands, Guam, the Commonwealth of the Northern Mariana Islands, and the Commonwealth of Puerto Rico, and as may be determined by the Secretary, such other possessions and areas over which the United States exercises jurisdiction, control, or sovereignty. Inclusion of the other areas over which the United States exercises jurisdiction or control shall be subject to the concurrence of the Secretary of State.

Wrongful Disclosure of Information (214)

Whoever, being or having been an employee or staff member referred to in subchapter II of chapter I of this title, having taken and subscribed the oath of office, or having sworn to observe the limitations imposed by section 9 of this title, publishes or communicates any information, the disclosure of which is prohibited under the provisions of section 9 of this title, and which comes into his possession by reason of his being employed (or otherwise providing services) under the provisions of this title, shall be fined not more than $5,000 or imprisoned not more than 5 years, or both.

FAILURE TO ANSWER QUESTIONS AFFECTING COMPANIES, BUSINESSES, RELIGIOUS BODIES, AND OTHER ORGANIZATIONS: FALSE ANSWERS (224)

Whoever, being the owner, official, agent, person in charge, or assistant to the person in charge, of any company, business, institution, establishment, religious body, or organization of any nature whatsoever, neglects or refuses, when requested by the Secretary or other authorized officer or employee of the Department of Commerce or bureau or agency thereof, to answer completely and correctly to the best of his knowledge all questions relating to his company, business, institution, establishment, religious body, or other organization, or to records or statistics in his official custody, contained on any census or other schedule or questionnaire prepared and submitted to him under the authority of this title, shall be fined not more than $500; and if he willfully gives a false answer to any such question, he shall be fined not more than $10,000.

APPENDIX F. Standard Consolidated Statistical Areas and Standard Metropolitan Statistical Areas

(Titles and definitions of the SCSA's and the SMSA's in the United States established by the Department of Commerce, Office of Federal Statistical Policy and Standards, as of December 1977)

Standard Consolidated Statistical Areas

Boston-Lawrence-Lowell, Mass.-N.H.	Consists of Boston, Mass., SMSA; Lawrence-Haverhill, Mass.-N.H., SMSA; Lowell, Mass.-N.H., SMSA; and Brockton, Mass., SMSA
Chicago-Gary, Ill.-Ind.[1]	Consists of Chicago, Ill., SMSA, and Gary-Hammond-East Chicago, Ind., SMSA
Cincinnati-Hamilton, Ohio-Ky.-Ind.	Consists of Cincinnati, Ohio-Ky.-Ind., SMSA, and Hamilton-Middletown, Ohio, SMSA
Cleveland-Akron-Lorain, Ohio	Consists of Cleveland, Ohio, SMSA; Akron, Ohio, SMSA; and Lorain-Elyria, Ohio, SMSA
Detroit-Ann Arbor, Mich.	Consists of Detroit, Mich., SMSA, and Ann Arbor, Mich., SMSA
Houston-Galveston, Tex.	Consists of Houston, Tex., SMSA, and Galveston-Texas City, Tex., SMSA
Los Angeles-Long Beach-Anaheim, Calif	Consists of Los Angeles-Long Beach, Calif., SMSA; Anaheim-Santa Ana-Garden Grove, Calif., SMSA; Riverside-San Bernardino-Ontario, Calif., SMSA; and Oxnard-Simi Valley-Ventura, Calif., SMSA
Miami-Fort Lauderdale, Fla	Consists of Miami, Fla., SMSA, and Fort Lauderdale-Hollywood, Fla., SMSA
Milwaukee-Racine, Wis.	Consists of Milwaukee, Wis., SMSA, and Racine, Wis., SMSA
New York-Newark-Jersey City, N.Y.-N.J.-Conn.[2]	Consists of New York, N.Y.-N.J., SMSA; Nassau-Suffolk, N.Y., SMSA; Newark, N.J., SMSA; Jersey City, N.J., SMSA; New Brunswick-Perth Amboy-Sayreville, N.J., SMSA; Paterson-Clifton-Passaic, N.J., SMSA; Long Branch-Asbury Park, N.J., SMSA; Stamford, Conn., SMSA; and Norwalk, Conn., SMSA
Philadelphia-Wilmington-Trenton, Pa.-Del.-N.J.-Md.	Consists of Philadelphia, Pa.-N.J., SMSA; Wilmington, Del.-N.J.-Md., SMSA; and Trenton, N.J., SMSA
San Francisco-Oakland-San Jose, Calif.	Consists of San Francisco-Oakland, Calif., SMSA; San Jose, Calif., SMSA; and Vallejo-Fairfield-Napa, Calif., SMSA
Seattle-Tacoma, Wash.	Consists of Seattle-Everett, Wash., SMSA, and Tacoma, Wash., SMSA

Standard Metropolitan Statistical Areas

Abilene, Tex.	Consists of Callahan, Jones, and Taylor Counties, Tex.
Akron, Ohio	Consists of Portage and Summit Counties, Ohio
Albany, Ga.	Consists of Dougherty and Lee Counties, Ga.
Albany-Schenectady-Troy, N.Y.	Consists of Albany, Montgomery, Rensselaer, Saratoga, and Schenectady Counties, N.Y.
Albuquerque, N. Mex.	Consists of Bernalillo and Sandoval Counties, N. Mex.
Alexandria, La.	Consists of Grant and Rapides Parishes, La.
Allentown-Bethlehem-Easton, Pa.-N.J.	Consists of Carbon, Lehigh, and Northampton Counties, Pa.; and Warren County, N.J.
Altoona, Pa.	Coextensive with Blair County, Pa.
Amarillo, Tex.	Consists of Potter and Randall Counties, Tex.
Anaheim-Santa Ana-Garden Grove, Calif.	Coextensive with Orange County, Calif.
Anchorage, Alaska	Coextensive with Anchorage Division, Alaska
Anderson, Ind.	Coextensive with Madison County, Ind.
Ann Arbor, Mich.	Coextensive with Washtenaw County, Mich.
Anniston, Ala.[3]	Coextensive with Calhoun County, Ala.
Appleton-Oshkosh, Wis.	Consists of Calumet, Outagamie, and Winnebago Counties, Wis.
Asheville, N.C.	Consists of Buncombe and Madison Counties, N.C.
Atlanta, Ga.	Consists of Butts, Cherokee, Clayton, Cobb, De Kalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Henry, Newton, Paulding, Rockdale, and Walton Counties, Ga.

See footnotes at end of appendix.

SMSA'S—Con.

Atlantic City, N.J.	Coextensive with Atlantic County, N.J.
Augusta, Ga.-S.C.	Consists of Columbia and Richmond Counties, Ga., and Aiken County, S.C.
Austin, Tex.[4]	Consists of Hays, Travis, and Williamson Counties, Tex.
Bakersfield, Calif.	Coextensive with Kern County, Calif.
Baltimore, Md.	Consists of Baltimore[5] city and Anne Arundel, Baltimore, Carroll, Harford, and Howard Counties, Md.
Baton Rouge, La.	Consists of Ascension, East Baton Rouge, Livingston, and West Baton Rouge Parishes, La.
Battle Creek, Mich.	Consists of Barry and Calhoun Counties, Mich.
Bay City, Mich.	Coextensive with Bay County, Mich.
Beaumont-Port Arthur-Orange, Tex.	Consists of Hardin, Jefferson, and Orange Counties, Tex.
Billings, Mont.	Coextensive with Yellowstone County, Mont.
Biloxi-Gulfport, Miss.	Consists of Hancock, Harrison, and Stone Counties, Miss.
Binghamton, N.Y.-Pa.	Consists of Broome and Tioga Counties, N.Y., and Susquehanna County, Pa.
Birmingham, Ala.	Consists of Jefferson, St. Clair, Shelby, and Walker Counties, Ala.
Bloomington, Ind.[3]	Coextensive with Monroe County, Ind.
Bloomington-Normal, Ill.	Coextensive with McLean County, Ill.
Boise City, Idaho	Coextensive with Ada County, Idaho
Boston, Mass.	Consists of Beverly, Lynn, Peabody, and Salem cities, and Boxford, Danvers, Hamilton, Lynnfield, Manchester, Marblehead, Middleton, Nahant, Saugus, Swampscott, Topsfield, and Wenham towns in Essex County; Cambridge, Everett, Malden, Medford, Melrose, Newton, Somerville, Waltham, and Woburn cities, and Acton, Arlington, Ashland, Bedford, Belmont, Boxborough; Burlington, Carlisle, Concord, Framingham, Holliston, Lexington, Lincoln, Natick, North Reading, Reading, Sherborn, Stoneham, Sudbury, Wakefield, Watertown, Wayland, Weston, Wilmington, and Winchester towns in Middlesex County; Quincy city, and Bellingham, Braintree, Brookline, Canton, Cohasset, Dedham, Dover, Foxborough, Franklin, Holbrook, Medfield, Medway, Millis, Milton, Needham, Norfolk, Norwood, Randolph, Sharon, Stoughton, Walpole, Wellesley, Westwood, Weymouth, and Wrentham towns in Norfolk County; Abington, Duxbury, Hanover, Hanson, Hingham, Hull, Kingston, Marshfield, Norwell, Pembroke, Rockland, Scituate towns in Plymouth County; and Boston, Chelsea, and Revere cities, and Winthrop town in Suffolk County, Mass.
Bradenton, Fla.[3]	Coextensive with Manatee County, Fla.
Bridgeport, Conn.	Consists of Bridgeport and Shelton cities, and Easton, Fairfield, Monroe, Stratford, and Trumbull towns in Fairfield County; and Derby and Milford cities in New Haven County, Conn.
Bristol, Conn.	Consists of Bristol city and Burlington town in Hartford County, and Plymouth town in Litchfield County, Conn.
Brockton, Mass.	Consists of Easton town in Bristol County; Avon town in Norfolk County; and Brockton city, and Bridgewater, East Bridgewater, Halifax, West Bridgewater, and Whitman towns in Plymouth County, Mass.
Brownsville-Harlingen-San Benito, Tex.	Coextensive with Cameron County, Tex.
Bryan-College Station, Tex.	Coextensive with Brazos County, Tex.
Buffalo, N.Y.	Consists of Erie and Niagara Counties, N.Y.
Burlington, N.C.	Coextensive with Alamance County, N.C.
Canton, Ohio	Consists of Carroll and Stark Counties, Ohio
Cedar Rapids, Iowa	Coextensive with Linn County, Iowa
Champaign-Urbana-Rantoul, Ill.	Coextensive with Champaign County, Ill.
Charleston-North Charleston, S.C.[6]	Consists of Berkeley, Charleston, and Dorchester Counties, S.C.
Charleston, W. Va.	Consists of Kanawha and Putnam Counties, W. Va.
Charlotte-Gastonia, N.C.	Consists of Gaston, Mecklenburg, and Union Counties, N.C.

See footnotes at end of appendix.

SMSA'S—Con.

Chattanooga, Tenn.-Ga.	Consists of Hamilton, Marion, and Sequatchie Counties, Tenn.; and Catoosa, Dade, and Walker Counties, Ga.
Chicago, Ill.	Consists of Cook, Du Page, Kane, Lake, McHenry, and Will Counties, Ill.
Cincinnati, Ohio-Ky.-Ind.	Consists of Clermont, Hamilton, and Warren Counties, Ohio; Boone, Campbell, and Kenton Counties, Ky.; and Dearborn County, Ind.
Clarksville-Hopkinsville, Tenn.-Ky.[3]	Consists of Montgomery County, Tenn. and Christian County, Ky.
Cleveland, Ohio	Consists of Cuyahoga, Geauga, Lake, and Medina Counties, Ohio
Colorado Springs, Colo.	Consists of El Paso and Teller Counties, Colo.
Columbia, Mo.	Coextensive with Boone County, Mo.
Columbia, S.C.	Consists of Lexington and Richland Counties, S.C.
Columbus, Ga.-Ala.	Consists of Chattahoochee County and Columbus[5] (consolidated government), Ga., and Russell County, Ala.
Columbus, Ohio	Consists of Delaware, Fairfield, Franklin, Madison, and Pickaway Counties, Ohio
Corpus Christi, Tex.	Consists of Nueces and San Patricio Counties, Tex.
Dallas-Fort Worth, Tex.	Consists of Collin, Dallas, Denton, Ellis, Hood, Johnson, Kaufman, Parker, Rockwall, Tarrant, and Wise Counties, Tex.
Danbury, Conn.	Consists of Danbury city and Bethel, Brookfield, New Fairfield, Newtown, and Redding towns in Fairfield County; and New Milford town in Litchfield County, Conn.
Davenport-Rock Island-Moline, Iowa-Ill.	Consists of Scott County, Iowa and Henry and Rock Island Counties, Ill.
Dayton, Ohio	Consists of Greene, Miami, Montgomery, and Preble Counties, Ohio
Daytona Beach, Fla.	Coextensive with Volusia County, Fla.
Decatur, Ill.	Coextensive with Macon County, Ill.
Denver-Boulder, Colo.	Consists of Adams, Arapahoe, Boulder, Denver, Douglas, Gilpin, and Jefferson Counties, Colo.
Des Moines, Iowa	Consists of Polk and Warren Counties, Iowa
Detroit, Mich.	Consists of Lapeer, Livingston, Macomb, Oakland, St. Clair, and Wayne Counties, Mich.
Dubuque, Iowa	Coextensive with Dubuque County, Iowa
Duluth-Superior, Minn.-Wis.	Consists of St. Louis County, Minn. and Douglas County, Wis.
Eau Claire, Wis.[3]	Consists of Chippewa and Eau Claire Counties, Wis.
El Paso, Tex.	Coextensive with El Paso County, Tex.
Elmira, N.Y.	Coextensive with Chemung County, N.Y.
Erie, Pa.	Coextensive with Erie County, Pa.
Eugene-Springfield, Oreg.	Coextensive with Lane County, Oreg.
Evansville, Ind.-Ky.	Consists of Gibson, Posey, Vanderburgh, and Warrick Counties, Ind. and Henderson County, Ky.
Fall River, Mass.-R.I.	Consists of Fall River city and Dighton, Somerset, Swansea, and Westport towns in Bristol County, Mass.; and Little Compton, Portsmouth, and Tiverton towns in Newport County, R.I.
Fargo-Moorhead, N. Dak.-Minn.	Consists of Cass County, N. Dak. and Clay County, Minn.
Fayetteville, N.C.	Coextensive with Cumberland County, N.C.
Fayetteville-Springdale, Ark.	Consists of Benton and Washington Counties, Ark.
Fitchburg-Leominster, Mass.	Consists of Shirley and Townsend towns in Middlesex County, and Fitchburg and Leominster cities and Lunenburg and Westminster towns in Worcester County, Mass.
Flint, Mich.	Consists of Genesee and Shiawassee Counties, Mich.
Florence, Ala.	Consists of Colbert and Lauderdale Counties, Ala.
Fort Collins, Colo.[3]	Coextensive with Larimer County, Colo.
Fort Lauderdale-Hollywood, Fla.	Coextensive with Broward County, Fla.
Fort Myers, Fla.	Coextensive with Lee County, Fla.
Fort Smith, Ark.-Okla.	Consists of Crawford and Sebastian Counties, Ark. and Le Flore and Sequoyah Counties, Okla.

See footnotes at end of appendix.

SMSA'S—Con.

Fort Wayne, Ind.	Consists of Adams, Allen, De Kalb, and Wells Counties, Ind.
Fresno, Calif.	Coextensive with Fresno County, Calif.
Gadsden, Ala.	Coextensive with Etowah County, Ala.
Gainesville, Fla.	Coextensive with Alachua County, Fla.
Galveston-Texas City, Tex.	Coextensive with Galveston County, Tex.
Gary-Hammond-East Chicago, Ind.	Consists of Lake and Porter Counties, Ind.
Grand Forks, N. Dak.-Minn.[3]	Consists of Grand Forks County, N. Dak. and Polk County, Minn.
Grand Rapids, Mich.	Consists of Kent and Ottawa Counties, Mich.
Great Falls, Mont.	Coextensive with Cascade County, Mont.
Greeley, Colo.[3]	Coextensive with Weld County, Colo.
Green Bay, Wis.	Coextensive with Brown County, Wis.
Greensboro—Winston-Salem—High Point, N.C.	Consists of Davidson, Forsyth, Guilford, Randolph, Stokes, and Yadkin Counties, N.C.
Greenville-Spartanburg, S.C.	Consists of Greenville, Pickens, and Spartanburg Counties, S.C.
Hamilton-Middletown, Ohio	Coextensive with Butler County, Ohio
Harrisburg, Pa.	Consists of Cumberland, Dauphin, and Perry Counties, Pa.
Hartford, Conn.	Consists of Hartford city and Avon, Bloomfield, Canton, East Granby, East Hartford, East Windsor, Enfield, Farmington, Glastonbury, Granby, Manchester, Marlborough, Newington, Rocky Hill, Simsbury, South Windsor, Suffield, West Hartford, Wethersfield, Windsor, and Windsor Locks towns in Hartford County; New Hartford town in Litchfield County; Cromwell, East Hampton, and Portland towns in Middlesex County; Colchester town in New London County; and Andover, Bolton, Columbia, Coventry, Ellington, Hebron, Stafford, Tolland, Vernon, and Willington towns in Tolland County, Conn.
Honolulu, Hawaii	Coextensive with Honolulu County, Hawaii
Houston, Tex.	Consists of Brazoria, Fort Bend, Harris, Liberty, Montgomery, and Waller Counties, Tex.
Huntington-Ashland, W. Va.-Ky.-Ohio	Consists of Cabell and Wayne Counties, W. Va.; Boyd and Greenup Counties, Ky.; and Lawrence County, Ohio
Huntsville, Ala.	Consists of Limestone, Madison, and Marshall Counties, Ala.
Indianapolis, Ind.	Consists of Boone, Hamilton, Hancock, Hendricks, Johnson, Marion, Morgan, and Shelby Counties, Ind.
Jackson, Mich.	Coextensive with Jackson County, Mich.
Jackson, Miss.	Consists of Hinds and Rankin Counties, Miss.
Jacksonville, Fla.	Consists of Baker, Clay, Duval, Nassau, and St. Johns Counties, Fla.
Jersey City, N.J.	Coextensive with Hudson County, N.J.
Johnson City-Kingsport-Bristol, Tenn.-Va.[7]	Consists of Carter, Hawkins, Sullivan, Unicoi, and Washington Counties, Tenn., and Bristol[5] city and Scott and Washington Counties, Va.
Johnstown, Pa.	Consists of Cambria and Somerset Counties, Pa.
Kalamazoo-Portage, Mich.	Consists of Kalamazoo and Van Buren Counties, Mich.
Kankakee, Ill.[3]	Coextensive with Kankakee County, Ill.
Kansas City, Mo.-Kans.	Consists of Cass, Clay, Jackson, Platte, and Ray Counties, Mo., and Johnson and Wyandotte Counties, Kans.
Kenosha, Wis.	Coextensive with Kenosha County, Wis.
Killeen-Temple, Tex.	Consists of Bell and Coryell Counties, Tex.
Knoxville, Tenn.	Consists of Anderson, Blount, Knox, and Union Counties, Tenn.
Kokomo, Ind.[3]	Consists of Howard and Tipton Counties, Ind.
La Crosse, Wis.	Coextensive with La Crosse County, Wis.
Lafayette, La.	Coextensive with Lafayette Parish, La.
Lafayette-West Lafayette, Ind.	Coextensive with Tippecanoe County, Ind.
Lake Charles, La.	Coextensive with Calcasieu Parish, La.

See footnotes at end of appendix.

SMSA'S—Con.

Lakeland-Winter Haven, Fla.	Coextensive with Polk County, Fla.
Lancaster, Pa.	Coextensive with Lancaster County, Pa.
Lansing-East Lansing, Mich.	Consists of Clinton, Eaton, Ingham, and Ionia Counties, Mich.
Laredo, Tex.	Coextensive with Webb County, Tex.
Las Vegas, Nev.	Coextensive with Clark County, Nev.
Lawrence, Kans.[5]	Coextensive with Douglas County, Kans.
Lawrence-Haverhill, Mass.-N.H.	Consists of Haverhill and Lawrence cities and Amesbury, Andover, Georgetown, Groveland, Merrimac, Methuen, North Andover, Salisbury, and West Newbury towns in Essex County, Mass. and Atkinson, Hampstead, Kingston, Newton, Plaistow, Salem, and Windham towns in Rockingham County, N.H.
Lawton, Okla.	Coextensive with Comanche County, Okla.
Lewiston-Auburn, Maine	Consists of Auburn and Lewiston cities and Lisbon town in Androscoggin County, Maine
Lexington-Fayette, Ky.[8]	Consists of Bourbon, Clark, Fayette, Jessamine, Scott, and Woodford Counties, Ky.
Lima, Ohio	Consists of Allen, Auglaize, Putnam, and Van Wert Counties, Ohio
Lincoln, Nebr.	Coextensive with Lancaster County, Nebr.
Little Rock-North Little Rock, Ark.	Consists of Pulaski and Saline Counties, Ark.
Long Branch-Asbury Park, N.J.	Coextensive with Monmouth County, N.J.
Longview, Tex.[3]	Consists of Gregg and Harrison Counties, Tex.
Lorain-Elyria, Ohio	Coextensive with Lorain County, Ohio
Los Angeles-Long Beach, Calif.	Coextensive with Los Angeles County, Calif.
Louisville, Ky-Ind.	Consists of Bullitt, Jefferson, and Oldham Counties, Ky. and Clark and Floyd Counties, Ind.
Lowell, Mass.-N.H.	Consists of Lowell city and Billerica, Chelmsford, Dracut, Tewksbury, Tyngsborough, and Westford towns in Middlesex County, Mass.; and Pelham town in Hillsborough County, N.H.
Lubbock, Tex.	Coextensive with Lubbock County, Tex.
Lynchburg, Va.	Consists of Lynchburg[5] city and Amherst, Appomattox, and Campbell Counties, Va.
Macon, Ga.	Consists of Bibb, Houston, Jones, and Twiggs Counties, Ga.
Madison, Wis.	Coextensive with Dane County, Wis.
Manchester, N.H.	Consists of Manchester city and Bedford and Goffstown towns in Hillsborough County; Allenstown, Hooksett, and Pembroke towns in Merrimack County; and Derry and Londonderry towns in Rockingham County, N.H.
Mansfield, Ohio	Coextensive with Richland County, Ohio
McAllen-Pharr-Edinburg, Tex.	Coextensive with Hidalgo County, Tex.
Melbourne-Titusville-Cocoa, Fla.	Coextensive with Brevard County, Fla.
Memphis, Tenn.-Ark.-Miss.	Consists of Shelby and Tipton Counties, Tenn.; Crittenden County, Ark.; and De Soto County, Miss.
Meriden, Conn.	Coextensive with Meriden city in New Haven County, Conn.
Miami, Fla.	Coextensive with Dade County, Fla.
Midland, Tex.	Coextensive with Midland County, Tex.
Milwaukee, Wis.	Consists of Milwaukee, Ozaukee, Washington, and Waukesha Counties, Wis.
Minneapolis-St. Paul, Minn.-Wis.	Consists of Anoka, Carver, Chisago, Dakota, Hennepin, Ramsey, Scott, Washington, and Wright Counties, Minn. and St. Croix County, Wis.
Mobile, Ala.	Consists of Baldwin and Mobile Counties, Ala.
Modesto, Calif.	Coextensive with Stanislaus County, Calif.
Monroe, La.	Coextensive with Ouachita Parish, La.
Montgomery, Ala.	Consists of Autauga, Elmore, and Montgomery Counties, Ala.
Muncie, Ind.	Coextensive with Delaware County, Ind.
Muskegon-North Shores-Muskegon Heights, Mich.[9]	Consists of Muskegon and Oceana Counties, Mich.

See footnotes at end of appendix.

SMSA'S—Con.

Nashua, N.H.	Consists of Nashua city and Amherst, Hudson, Merrimack, and Milford towns in Hillsborough County, N.H.
Nashville-Davidson, Tenn.	Consists of Cheatham, Davidson, Dickson, Robertson, Rutherford, Sumner, Williamson, and Wilson Counties, Tenn.
Nassau-Suffolk, N.Y.	Consists of Nassau and Suffolk Counties, N.Y.
New Bedford, Mass.	Consists of New Bedford city and Acushnet, Dartmouth, Fairhaven, and Freetown towns in Bristol County; and Lakeville, Marion, and Mattapoisett towns in Plymouth County, Mass.
New Britain, Conn.	Consists of New Britain city and Berlin, Plainville, and Southington towns in Hartford County, Conn.
New Brunswick-Perth Amboy-Sayreville, N.J.	Coextensive with Middlesex County, N.J.
New Haven-West Haven, Conn.[10]	Consists of Clinton town in Middlesex County; and New Haven and West Haven cities and Bethany, Branford, East Haven, Guilford, Hamden, Madison, North Branford, North Haven, Orange, Wallingford, and Woodbridge towns in New Haven County, Conn.
New London-Norwich, Conn.-R.I.	Consists of Old Saybrook town in Middlesex County; New London and Norwich cities and Bozrah, East Lyme, Griswold, Groton, Ledyard, Lisbon, Montville, Old Lyme, Preston, Sprague, Stonington, and Waterford towns in New London County, Conn.; and Hopkinton and Westerly towns in Washington County, R.I.
New Orleans, La.	Consists of Jefferson, Orleans, St. Bernard, and St. Tammany Parishes, La.
New York, N.Y.-N.J.	Consists of Bronx, Kings, New York, Putnam, Queens, Richmond, Rockland, and Westchester Counties, N.Y. and Bergen County, N.J.
Newark, N.J.	Consists of Essex, Morris, Somerset, and Union Counties, N.J.
Newport News-Hampton, Va.[11]	Consists of Hampton,[5] Newport News,[5] Poquoson,[5] and Williamsburg[5] cities and Gloucester, James City, and York Counties, Va.
Norfolk-Virginia Beach-Portsmouth, Va.-N.C.[12]	Consists of Chesapeake,[5] Norfolk,[5] Portsmouth,[5] Suffolk,[5] and Virginia Beach[5] cities, Va. and Currituck County, N.C.
Northeast Pennsylvania	Consists of Lackawanna, Luzerne, and Monroe Counties, Pa.
Norwalk, Conn.	Consists of Norwalk city and Weston, Westport, and Wilton towns in Fairfield County, Conn.
Odessa, Tex.	Coextensive with Ector County, Tex.
Oklahoma City, Okla.	Consists of Canadian, Cleveland, McClain, Oklahoma, and Pottawatomie Counties, Okla.
Omaha, Nebr.-Iowa	Consists of Douglas and Sarpy Counties, Nebr. and Pottawattamie County, Iowa
Orlando, Fla.	Consists of Orange, Osceola, and Seminole Counties, Fla.
Owensboro, Ky.	Coextensive with Daviess County, Ky.
Oxnard-Simi Valley-Ventura, Calif.	Coextensive with Ventura County, Calif.
Panama City, Fla.[3]	Coextensive with Bay County, Fla.
Parkersburg-Marietta, W. Va.-Ohio	Consists of Wirt and Wood Counties, W. Va. and Washington County, Ohio
Pascagoula-Moss Point, Miss.[3]	Coextensive with Jackson County, Miss.
Paterson-Clifton-Passaic, N.J.	Coextensive with Passaic County, N.J.
Pensacola, Fla.	Consists of Escambia and Santa Rosa Counties, Fla.
Peoria, Ill.	Consists of Peoria, Tazewell, and Woodford Counties, Ill.
Petersburg-Colonial Heights-Hopewell, Va.	Consists of Colonial Heights,[5] Hopewell,[5] and Petersburg[5] cities and Dinwiddie and Prince George Counties, Va.
Philadelphia, Pa.-N.J.	Consists of Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties, Pa.; and Burlington, Camden, and Gloucester Counties, N.J.
Phoenix, Ariz.	Coextensive with Maricopa County, Ariz.
Pine Bluff, Ark.	Coextensive with Jefferson County, Ark.
Pittsburgh, Pa.	Consists of Allegheny, Beaver, Washington, and Westmoreland Counties, Pa.
Pittsfield, Mass.	Consists of Pittsfield city and Adams, Cheshire, Dalton, Lanesborough, Lee, Lenox, and Stockbridge towns in Berkshire County, Mass.

See footnotes at end of appendix.

SMSA'S—Con.

Portland, Maine	Consists of Portland, South Portland, and Westbrook cities and Cape Elizabeth, Cumberland, Falmouth, Freeport, Gorham, Scarborough, Windham, and Yarmouth towns in Cumberland County; and Saco city and Old Orchard Beach town in York County, Maine
Portland, Oreg.-Wash.	Consists of Clackamas, Multnomah, and Washington Counties, Oreg. and Clark County, Wash.
Poughkeepsie, N.Y.	Coextensive with Dutchess County, N.Y.
Providence-Warwick-Pawtucket, R.I.-Mass.	Consists of Barrington, Bristol, and Warren towns in Bristol County; Warwick city and Coventry, East Greenwich, and West Warwick towns in Kent County; Jamestown town in Newport County; Central Falls, Cranston, East Providence, Pawtucket, Providence, and Woonsocket cities and Burrillville, Cumberland, Johnston, Lincoln, North Providence, North Smithfield, Scituate, and Smithfield towns in Providence County; and Narragansett, North Kingstown, and South Kingstown towns in Washington County, R.I.; Attleboro city and North Attleborough, Norton, Rehoboth, and Seekonk towns in Bristol County; Plainville town in Norfolk County; and Blackstone and Millville towns in Worcester County, Mass.
Provo-Orem, Utah	Coextensive with Utah County, Utah
Pueblo, Colo.	Coextensive with Pueblo County, Colo.
Racine, Wis.	Coextensive with Racine County, Wis.
Raleigh-Durham, N.C.	Consists of Durham, Orange, and Wake Counties, N.C.
Reading, Pa.	Coextensive with Berks County, Pa.
Reno, Nev.	Coextensive with Washoe County, Nev.
Richland-Kennewick, Wash.	Consists of Benton and Franklin Counties, Wash.
Richmond, Va.[13]	Consists of Richmond[5] city and Charles City, Chesterfield, Goochland, Hanover, Henrico, New Kent, and Powhatan Counties, Va.
Riverside-San Bernardino-Ontario, Calif.	Consists of Riverside and San Bernardino Counties, Calif.
Roanoke, Va.	Consists of Roanoke[5] and Salem[5] cities and Botetourt, Craig, and Roanoke Counties, Va.
Rochester, Minn.	Coextensive with Olmsted County, Minn.
Rochester, N.Y.	Consists of Livingston, Monroe, Ontario, Orleans, and Wayne Counties, N.Y.
Rockford, Ill.	Consists of Boone and Winnebago Counties, Ill.
Sacramento, Calif.	Consists of Placer, Sacramento, and Yolo Counties, Calif.
Saginaw, Mich.	Coextensive with Saginaw County, Mich.
St. Cloud, Minn.	Consists of Benton, Sherburne, and Stearns Counties, Minn.
St. Joseph, Mo.	Consists of Andrew and Buchanan Counties, Mo.
St. Louis, Mo.-Ill.	Consists of St. Louis[5] city and Franklin, Jefferson, St. Charles, and St. Louis Counties, Mo.; and Clinton, Madison, Monroe, and St. Clair Counties, Ill.
Salem, Oreg.	Consists of Marion and Polk Counties, Oreg.
Salinas-Seaside-Monterey, Calif.	Coextensive with Monterey County, Calif.
Salt Lake City-Ogden, Utah	Consists of Davis, Salt Lake, Tooele, and Weber Counties, Utah
San Angelo, Tex.	Coextensive with Tom Green County, Tex.
San Antonio, Tex.	Consists of Bexar, Comal, and Guadalupe Counties, Tex.
San Diego, Calif.	Coextensive with San Diego County, Calif.
San Francisco-Oakland, Calif.	Consists of Alameda, Contra Costa, Marin, San Francisco, and San Mateo Counties, Calif.
San Jose, Calif.	Coextensive with Santa Clara County, Calif.
Santa Barbara-Santa Maria-Lompoc, Calif.	Coextensive with Santa Barbara County, Calif.
Santa Cruz, Calif.	Coextensive with Santa Cruz County, Calif
Santa Rosa, Calif.	Coextensive with Sonoma County, Calif.
Sarasota, Fla.	Coextensive with Sarasota County, Fla.
Savannah, Ga.	Consists of Bryan, Chatham, and Effingham Counties, Ga.
Seattle-Everett, Wash.	Consists of King and Snohomish Counties, Wash.

See footnotes at end of appendix.

SMSA'S—Con.

Sherman-Denison, Tex.	Coextensive with Grayson County, Tex.
Shreveport, La.	Consists of Bossier, Caddo, and Webster Parishes, La.
Sioux City, Iowa-Nebr.	Consists of Woodbury County, Iowa and Dakota County, Nebr.
Sioux Falls, S. Dak.	Coextensive with Minnehaha County, S. Dak.
South Bend, Ind.	Consists of Marshall and St. Joseph Counties, Ind.
Spokane, Wash.	Coextensive with Spokane County, Wash.
Springfield, Ill.	Consists of Menard and Sangamon Counties, Ill.
Springfield, Mo.	Consists of Christian and Greene Counties, Mo.
Springfield, Ohio	Consists of Champaign and Clark Counties, Ohio
Springfield-Chicopee-Holyoke, Mass.-Conn.	Consists of Chicopee, Holyoke, Springfield, and Westfield cities and Agawam, East Longmeadow, Hampden, Longmeadow, Ludlow, Monson, Palmer, Southwick, West Springfield, and Wilbraham towns in Hampden County; Northampton city and Belchertown, Easthampton, Granby, Hadley, Hatfield, Southampton, and South Hadley towns in Hampshire County; Warren town in Worcester County, Mass.; and Somers town in Tolland County, Conn.
Stamford, Conn.	Consists of Stamford city and Darien, Greenwich, and New Canaan towns in Fairfield County, Conn.
Steubenville-Weirton, Ohio-W. Va.	Consists of Jefferson County, Ohio and Brooke and Hancock Counties, W. Va.
Stockton, Calif.	Coextensive with San Joaquin County, Calif.
Syracuse, N.Y.	Consists of Madison, Onondaga, and Oswego Counties, N.Y.
Tacoma, Wash.	Coextensive with Pierce County, Wash.
Tallahassee, Fla.	Consists of Leon and Wakulla Counties, Fla.
Tampa-St. Petersburg, Fla.	Consists of Hillsborough, Pasco, and Pinellas Counties, Fla.
Terre Haute, Ind.	Consists of Clay, Sullivan, Vermillion, and Vigo Counties, Ind.
Texarkana, Tex.-Texarkana, Ark.	Consists of Bowie County, Tex. and Little River and Miller Counties, Ark.
Toledo, Ohio-Mich.	Consists of Fulton, Lucas, Ottawa, and Wood Counties, Ohio and Monroe County, Mich.
Topeka, Kans.	Consists of Jefferson, Osage, and Shawnee Counties, Kans.
Trenton, N.J.	Coextensive with Mercer County, N.J.
Tucson, Ariz.	Coextensive with Pima County, Ariz.
Tulsa, Okla.	Consists of Creek, Mayes, Osage, Rogers, Tulsa, and Wagoner Counties, Okla.
Tuscaloosa, Ala.	Coextensive with Tuscaloosa County, Ala.
Tyler, Tex.	Coextensive with Smith County, Tex.
Utica-Rome, N.Y.	Consists of Herkimer and Oneida Counties, N.Y.
Vallejo-Fairfield-Napa, Calif.	Consists of Napa and Solano Counties, Calif.
Vineland-Millville-Bridgeton, N.J.	Coextensive with Cumberland County, N.J.
Waco, Tex.	Coextensive with McLennan County, Tex.
Washington, D.C.-Md.-Va.[14]	Consists of District of Columbia; Charles, Montgomery, and Prince Georges Counties, Md; and Alexandria,[5] Fairfax,[5] Falls Church,[5] Manassas,[5] and Manassas Park[5] cities and Arlington, Fairfax, Loudoun, and Prince William Counties, Va.
Waterbury, Conn.	Consists of Thomaston, Watertown, and Woodbury towns in Litchfield County; and Waterbury city, Naugatuck borough, and Beacon Falls, Cheshire, Middlebury, Prospect, Southbury, and Wolcott towns in New Haven County, Conn.
Waterloo-Cedar Falls, Iowa	Coextensive with Black Hawk County, Iowa
West Palm Beach-Boca Raton, Fla.	Coextensive with Palm Beach County, Fla.
Wheeling, W. Va.-Ohio	Consists of Marshall and Ohio Counties, W. Va. and Belmont County, Ohio
Wichita, Kans.	Consists of Butler and Sedgwick Counties, Kans.
Wichita Falls, Tex.	Consists of Clay and Wichita Counties, Tex.
Williamsport, Pa.	Coextensive with Lycoming County, Pa.
Wilmington, Del.-N.J.-Md.	Consists of New Castle County, Del.; Salem County, N.J.; and Cecil County, Md.
Wilmington, N.C.	Consists of Brunswick and New Hanover Counties, N.C.

APPENDIX G. Scope and Coverage of Fuels and Electric Energy

BACKGROUND

The manufacturing industries in the United States consume a substantial portion of the coal, coke, fuel oil, natural gas, and electric energy produced in this country. These energy inputs are the primary sources of the heat and power used by the manufacturing sector to produce manufactured products. Data on this important aspect of the domestic economy have been collected and published by the Bureau of the Census for more than six decades. This report presents statistics on quantities and costs of specified fuels used for heat and power, quantity and cost of electric energy purchased, and quantity of electric energy generated less that sold by manufacturing plants in the United States during 1977.

Census reports on quantities of fuels important in manufacturing began with the census of manufactures for 1909. This series has continued to be compiled periodically in subsequent censuses of manufactures for 1914, 1919, 1929, 1937, 1939, 1947, 1954, 1958, 1962 (as part of the 1963 Census of Manufactures), 1967, and 1971 (as part of the 1972 Census of Manufactures), and as part of the annual survey of manufactures (ASM) for 1974, 1975, and 1976.

Data on quantities of electric energy purchased by manufacturers were first collected for 1929 and then for the subsequent census years (listed above). Data on cost of fuels and electric energy were first published for 1929, although some data on costs had been collected in prior censuses. Data on quantity of electric energy generated by manufacturing plants were first compiled for 1939. The data for that year also provided, for the first time, statistics on fuels purchased for heat and power separate from those purchased as materials.

For the intercensal years prior to 1974, which were covered by the annual survey of manufactures, data on the total cost of fuels purchased, the quantity and cost of purchased electric energy, and the quantity of electricity generated appear in the ASM volumes covering 1950-1953, 1955-1957, 1959-1962, 1964-1966, and 1968-1971. The data for 1972 and 1973 appear in the individual ASM report on Fuels and Electric Energy for 1974, M74(AS) 4.2.

The 1974 report included, for the first time as part of the ASM, detailed data on the total cost of fuels and total quantity consumed by fuel type: Distillate and residual fuel oil; bituminous coal, lignite, and anthracite; coke and breeze; and natural gas.

Except for the 1950-1953 statistics on electricity generated, which were prepared from Federal Power Commission data, all of the intercensal statistics are estimates. A description of the sample, sampling techniques, coverage, etc., for these years is included in the ASM publications.

1977 REPORTING STRUCTURE

For 1977, data on cost of fuels and purchased electric energy were collected on the 1977 Census of Manufactures report forms. Data on individual fuels as well as data on quantity of purchased electric energy and generated and sold electric energy were collected on 1977 Annual Survey of Manufactures form MA-100. The MA-100 was mailed with the census report form to each of the manufacturing establishments included in the survey sample. Establishments not included in the sample received only census report forms. Thus the statistics published on the cost of fuels and electric energy are census totals whereas the statistics on the individual fuels and quantities of electric energy are sample estimates.

Fuels Consumed

Form MA-100 requested information on detailed fuels consumed: Quantity and cost of coal, coke, distillate fuel oil, residual fuel oil, and natural gas. It also requested cost only for other types of fuels consumed.

The cost of fuels refers to direct charges actually paid or payable for fuels consumed during the year, including freight charges and other direct charges incurred by the establishment in acquiring these fuels. Manufacturers included the cost of fuels consumed regardless of whether they were purchased by the individual establishment from other companies, transferred to it from other establishments of the same company, or withdrawn from inventory during the year.

Electric Energy

Data also were obtained on form MA-100 on the quantity and cost of electric energy purchased from other companies or transferred from other establishments of the same company. In addition, information was collected on the amount of electric energy generated by the establishment, and the quantity of electric energy sold or transferred to other plants of the same company. In reporting figures on energy sold some manufacturing establishments, acting as central distribution stations for several company plants in the same general area, included quantities of purchased electricity which were subsequently transferred to other company plants.

The cost of electric energy represents the amount actually paid during the year for electric energy purchased from other companies or received from other establishments of the same company. It does not include the value of electricity generated and used at the establishment.

DESCRIPTION OF SURVEY SAMPLE

Sample estimates in this report are compiled from a survey of a probability sample of about 70,000 manufacturing establishments selected from a total of about 300,000 establishments. The sample was selected from the 1972 Census of Manufactures list supplemented by Social Security Administration (SSA) lists of new manufacturers that opened after 1972. As in earlier surveys, companies rather than establishments were defined as the sampling units. The selected companies were required to report for all of their plants so that new establishments of existing companies also were represented.

All companies that had any manufacturing establishments with 250 employees or more in the 1972 census were included in the survey panel. These large companies, which were included with certainty, collectively account for more than two-thirds of total manufacturing employment. Smaller companies were sampled with probabilities ranging from 1.000 down to 0.005, in accordance with mathematical theory for optimum allocation of a sample.

The certainty cutoff level of 250 employees is a change from the previous sample design (1965-1969) in which all companies with any manufacturing establishments with more than 100 employees were included (except for the apparel and printing and publishing industries where the certainty cutoff level was 250 employees). The higher certainty cutoff level for the new panel permits a more effective representation of the smaller manufacturing companies.

The probabilities of selection assigned to the smaller companies were proportional to measures of size determined for each company. For companies included in the 1972 Census of Manufactures, the measures of size depended directly upon each company's 1972 product class values and the historic variability of the year-to-year shipments of each product class. Roughly equivalent measures of size were assigned to the postcensus companies based on their industry codes and anticipated employment. (More specific information was not available for them in the SSA lists used for sampling.)

In order to improve reliability of general statistics for geographic areas, two features were incorporated into the sample design. First, some weight was given to the total value of shipments of each establishment relative to the total value of shipments for the State in which the establishment was located. Second, product class values for establishments in States where the total level of manufacturing was relatively low or rapidly expanding (but for which the reliability of estimates was not expected to be much improved by the first sample design feature) were multiplied by factors ranging from 1.15 to 1.25 before measures of size were developed.

This method of assigning measures of size was used to maximize the precision (minimize the variance) of the estimates of the year-to-year change in the value of product class shipments. It also gave weight to differences in employment, value added, and other general statistics, for these are highly correlated with total value of shipments, and the assigned size measures varied directly with that total for each company.

The cost of collecting and processing data for a company is roughly proportionate to the number of its establishment reports. Therefore, each company's initial size measure was divided by the square root of its number of establishments. Sample selection probabilities then were obtained by multiplying each company's final measure of size by an overall sampling fraction calculated to yield the total expected sample size.

The sample selection procedure gave each company in the sampling frame an independent chance of selection. This method of selection differs from the method of systematic selection used in annual surveys before 1959. With systematic selection only certain combinations of companies can fall into the sample, depending on the order in which they are arrayed at the time the sample is drawn. Independent selection permits the rotation of companies into and out of a given sample panel, without introducing a bias into the survey estimates.

REVISED METHOD OF ESTIMATION

The estimates of fuel and electric energy data for 1976 that appear in this report may differ from those found in the 1976 publication. The reason for this is a change in the basic estimation procedure. The original 1976 estimates were produced using a fixed base difference estimator, as follows:

$$Y'_{76} = Y'_{76} + (X_{72} - X'_{72})$$

where Y'_{76} is a linear estimate obtained by multiplying each sample establishment's data by its corresponding sampling weight. The term in the parenthesis is a fixed base difference. It represents the difference in the 1972 census or base year between the census universe total, X_{72}, and the linear estimate from the sample X'_{72}.

This difference estimate was used to produce more reliable estimates than could have been produced by the simple linear estimate alone. One very important assumption involved in the decision to use the difference estimate was that the universe totals, and hence the absolute difference between a given linear estimate and the corresponding universe total, would remain relatively constant for four to five years. However, a high rate of inflationary growth has been experienced by the data items in this report. This suggested the need for revision of 1976 data.

Revised data for 1976 were generated using a ratio adjusted difference estimation procedure that allows for adjustment of the difference estimate for estimates of universe growth.

The revised estimates for 1976 were obtained as follows:

$$Y''_{76} = Y'_{76} + \frac{Y'_{76}}{Y'_{77}}(X_{77} - X'_{77})$$

where Y'_{76} is the linear estimate as defined above. The term in parenthesis $(X_{77} - X'_{77})$ is the difference between the linear estimate from the sample in 1977 (X'_{77}) and the universe census estimate in 1977 (X_{77}).

The ratio Y'_{76}/Y'_{77} is computed at the State total level and is a measure of the reciprocal of the estimated growth in the universe between 1976 and 1977. If the universe has in fact not changed between 1976 and 1977 we would expect this ratio to be equal to 1.0 and the 1977 fixed base difference would be appropriate for 1976 data. If, however, the universe has changed, whether by inflation or actual growth, the estimated difference based on 1977 data would probably be an overstatement of the 1976 difference. This ratio adjustment, Y'_{76}/Y'_{77}, is intended to adjust the 1977 difference to reflect the year-to-year universe change. The use of this estimation procedure involves assumption that the percent of the universe covered by the weighted sample is relatively constant between 1976 and 1977, as opposed to the fixed base difference estimate assumption that the absolute difference between the weighted sample and the universe was relatively constant for the two years.

QUALIFICATIONS OF THE DATA

The estimates developed from the Annual Survey of Manufactures (ASM) sample may differ somewhat from the results of a survey covering all companies in the sampled lists but otherwise conducted under essentially the same conditions as the actual sample survey. The sampling errors—differences between estimates obtained and the results theoretically obtainable from a comparable complete coverage survey—are unknown. Guides to potential size of the sampling errors, however, are provided by standard errors of the estimates.

The particular sample selected for the ASM is one of a large number of similar probability samples that, by chance, might have been selected under the same specifications. Each of the possible samples would yield somewhat different sets of results, and the standard errors are measures of the variation of all the possible sample estimates around the theoretical, comparable complete coverage values.

Estimates of the standard errors have been computed from the sample data for selected statistics in this report. They are presented in the form of relative standard errors, the standard errors divided by the estimated values to which they refer.

In conjunction with its associated estimate, the relative standard error may be used to define confidence intervals—ranges that would include the comparable complete coverage value for specified percentages of all the possible samples. The complete coverage value would be included in the range:

1. From one standard error below to one standard error above the derived estimate for about two-thirds of all possible samples.
2. From two standard errors below to two standard errors above the derived estimate for about 19 out of 20 of all possible samples.
3. From three standard errors below to three standard errors above the derived estimate for nearly all samples.

An inference that the comparable complete survey result would be within the indicated ranges would be correct in approximately the relative frequencies shown. Those proportions, therefore, may be interpreted as defining the confidence with which the estimates from a particular sample would differ from complete coverage results by as much as one, two, or three standard errors.

For example, suppose an estimated total is shown as 50,000 with an associated relative standard error of 2 percent, i.e., a standard error of 1,000 (2 percent of 50,000). Then there is approximately 67 percent confidence that the interval 49,000 to 51,000 includes the complete coverage total, about 95 percent confidence that the interval 48,000 to 52,000 includes the complete coverage total, and almost certain confidence that the interval 47,000 to 53,000 includes the complete coverage total.

In addition to the sampling errors, the estimates are subject to various operational errors: Errors of collection, reporting, coding, transcription, imputation for nonresponse, etc. These operational errors would also occur if a complete canvass were to be conducted under the same conditions as the survey. Explicit measures of their effects generally are not available. However, it is believed that most of the important operational errors were detected and corrected in the course of the Bureau's review of the data for reasonableness and consistency. When they were detected too late to correct, the data were suppressed or specifically qualified in the tables. The small operational errors usually remain. To some extent the aggregated totals compensate for them.

As derived, the estimated standard errors include part of the effect of the operational errors. The total error, which depends upon the joint effect of the sampling and operation errors, is usually of the order of size indicated by the standard error or only moderately higher. For some estimates, however, the total error may considerably exceed the standard errors shown.

The concept of complete coverage under the conditions prevailing for the annual surveys of manufactures is not identical to the complete coverage of the censuses of manufactures as the censuses have been conducted. Nearly all types of operational errors that affect the surveys also occur in the censuses. The surveys and the censuses, however, are conducted under quite different conditions, and operational errors can be controlled more tightly in the surveys than in the censuses. As a result, errors in many of the census figures are of the same order of size as the total errors of the corresponding annual survey estimates. The differences between the census and survey operating conditions also disturb, to some degree, the comparability of the ASM and census data.

APPENDIX I. Description of Water Use Regions

WATER USE REGIONS

New England—The drainage within the United States that ultimately discharges into (a) the Bay of Fundy; (b) the Atlantic Ocean, whose point of discharge is located within and between the States of Maine and Connecticut; (c) Long Island Sound; and (d) the St. Francis River, a tributary of the St. Lawrence River.

Middle Atlantic—The drainage within the United States that ultimately discharges into (a) the Atlantic Ocean, whose point of discharge is located within and between the States of New York and Virginia; and (b) the Richelieu River, a tributary of the St. Lawrence River.

South Atlantic—The drainage that ultimately discharges into (a) the Atlantic Ocean, whose point of discharge is located within and between the States of North Carolina and Florida; and (b) the Gulf of Mexico whose point of discharge is located within and between the States of Florida and Mississippi, including the Pearl River.

Great Lakes—The drainage within the United States that discharges into (a) the Great Lakes system, including the Lakes surfaces; and (b) the St. Lawrence River as far east as, but excluding, the Richelieu River.

Ohio—The drainage of the Ohio River, excluding that of the Tennessee River.

Tennessee—The drainage of the Tennessee River.

Upper Mississippi—The drainage of the Mississippi River above the mouth of the Ohio River, but excluding that of the Missouri River above a point immediately below the mouth of the Gasconade River.

Lower Mississippi—The drainage of (a) the Mississippi River below the mouth of the Ohio River, but excluding the drainages of the Arkansas, White, and Red Rivers above the points of highest backwater effects of the Mississippi River in those rivers; and (b) the coastal streams, other than the Mississippi River, that discharge into the Gulf of Mexico from, but excluding, the Pearl River to, but excluding, the Sabine River.

Souris-Red-Rainy—The drainage within the United States of the Souris, Red, and Rainy Rivers.

Missouri—The drainage within the United States of (a) the Missouri River above a point immediately below the mouth of the Gasconade River; and (b) the Saskatchewan River.

Arkansas-White-Red—The drainage of (a) the Arkansas River above the point of highest backwater effect of the Mississippi River; (b) the Red River above the point of highest backwater effect of the Mississippi River; and (c) the White River above the point of highest backwater effect of the Mississippi River, near Peach Orchard Bluff, Arkansas.

Texas Gulf—The drainage that discharges into the Gulf of Mexico from and including Sabine Pass to, but excluding, the Rio Grande and the lower Rio Grande Valley.

Rio Grande—The drainage within the United States of (a) the Rio Grande; (b) the San Luis Valley, North Plains, San Augustine Plains, Mimbres, Estancia, Jornado del Muerto, Tularosa, Salt, and various smaller closed basins; and (c) the lower Rio Grande Valley.

Upper Colorado—The drainage of (a) the Colorado River above the Lee Ferry Compact Point which is about 1 mile below the mount of the Paria River; and (b) the Great Divide closed basin.

Lower Colorado—The drainage within the United States of (a) the Colorado River below the Lee Ferry Compact Point which is about 1 mile below the mouth of the Paria River; (b) the Rios Yaqui, Magdalena, and Sonoita and other lesser streams that ultimately discharge into the Gulf of California; and (c) the Animas Valley, Wilcox Playa, El Dorado Valley, and other smaller closed basins.

Great Basin—The drainage of the Great Basin that ultimately discharges into the States of Utah and Nevada.

Columbia-North Pacific—The drainage within the United States that ultimately discharges into (a) the Straits of Georgia and of Juan de Fuca; (b) the Pacific Ocean whose point of discharge is within the States of Washington and Oregon, including the Columbia River; and (c) the Great Basin in the State of Oregon.

California-South Pacific—The drainage within the United States that ultimately discharges into (a) the Pacific Ocean whose point of discharge is within the State of California, which includes the Central Valley; and (b) that portion of the Great Basin, and other closed basins, in the State of California.

Alaska—The drainage within the State of Alaska.

Hawaii—The drainage within the State of Hawaii.

APPENDIX J. Technical Notes for Origin of Exports

This appendix presents the estimating procedure followed in developing the various levels of export and export-related data for 1977.

I. VALUE OF EXPORTS

A. Reported Value of Export Shipments

1. Establishments in the annual survey of manufactures (ASM) were requested to report their value of products which were shipped for export, if that value was $25,000 or more. There was no estimation or imputation of export data for nonreporting establishments, although large establishments were contacted if they left the export question blank.

2. ASM sample estimates of the reported value of products shipped for export were then derived by a ratio estimating procedure. For each geographic four-digit SIC cell, the estimated ratio of reported export shipments to total value of shipments was obtained. This ratio (which is a ratio of two linear estimates) was then multiplied by the census estimate for total value of shipments for the cell. The use of the census estimate corrects for oversampling or undersampling in the ASM in each detail cell.

Since export data are not collected in the census, the adjustment described above could not be applied directly for exports. It is applied indirectly by this ratio estimating process, in which it is assumed that where there is oversampling or undersampling for total value of shipments, there will be a similar oversampling or undersampling for exports.

These ratio estimates were calculated as follows:

$$77\ Ex_{Geo\ 4} = \left(\frac{\sum_{h \epsilon Geo\ 4} w_h\ 77\ Ex_h}{\sum_{h \epsilon Geo_4} w_h\ 77\ VS_h} \right) \left(77\ VS_{Geo\ 4} \right)$$

where

$77\ Ex_{Geo\ 4}$	=	the 1977 ratio adjusted estimate of reported exports for a specified geographic cell at the four-digit industry level,
$\sum_{h \epsilon Geo\ 4}$	=	the sum over the set of establishments in a geographic cell at the four-digit industry level,
w_h	=	the ASM weight associated with establishment h,
$77Ex_h$	=	the reported value of export shipments for establishment h,
$77VS_h$	=	the reported total value of shipments for establishment h,
$77VS_{Geo4}$	=	the census estimate for total value of shipments applied to the geographic by four-digit industry cell.

B. Estimated Total Value of Export Shipments

1. The estimate for exports just described understates the true value of exports:

a. It does not provide estimates for establishments in the survey sample not responding to the export question.
b. It does not provide estimates for those manufactured products which are exported by wholesalers and/or exporters, the export of which is unknown to the manufacturer and, therefore, not reported.

2. In order to convert these estimates of exports to estimates of the total value of exports, data were assembled from FT 610, U.S. Exports/Domestic Merchandise, SIC-Based Products by World Area, which presents actual port value of exports based on shipper's export documents. Two conversion processes were necessary to equate these exports to f.o.b. plant values. (See appendix B)

a. The foreign trade statistics were summarized to three-digit industry group levels. Adjustments were then made to convert the data to comparable three-digit SIC groups.
b. The export values (at the three-digit SIC level) were further adjusted from port value to f.o.b. plant values (which makes them compatible with the ASM concepts) by utilizing factors developed from the Bureau of Economic Analysis (BEA) input/output tables. The factors serve to eliminate the costs of transportation, insurance, wholesalers, and other expenses incurred between the time an export leaves the manufacturing plant and the time it reaches its port of exportation.

3. These foreign-trade-based data for exports, which have now been converted to f.o.b. plant values, were next compared to the ratio estimates of exports (summed to three-digit SIC levels) developed from the ASM reported export values. Differences between these sets of estimates were allocated to geographic levels within the three-digit SIC groups. This allocation was based on a weighted average of two ratios:

a. The estimated reported exports for the three-digit SIC geographic level to the estimated reported exports for the three-digit-national level.
b. The estimated employment at the three-digit SIC geographic level to the estimated employment at the three-digit SIC national level. (The components of this second ratio are difference estimates from the ASM.)

The weighting factors applied to these two ratios vary by three-digit SIC and are based on the coverage percentages of the ASM export estimates relative to their respective foreign-trade-based estimates.

The final estimates of the value of export shipments were calculated as follows:

$$77\ \text{Fin Ex}_{\text{Geo 3}} = 77\ \text{Ex}_{\text{Geo 3}} + \left\{ \left(\text{Ft}_{\text{Nt 3}} - \text{ASM}_{\text{Nt 3}} \right) \left[\left(\frac{\text{ASM}_{\text{Nt 3}}}{\text{FT}_{\text{Nt 3}}} \right) \left(\frac{77\ \text{Ex}_{\text{Geo 3}}}{\text{ASM}_{\text{Nt 3}}} \right) + \left(1 - \frac{\text{ASM}_{\text{Nt 3}}}{\text{FT}_{\text{Nt 3}}} \right) \left(\frac{77\ \text{TE}_{\text{Geo 3}}}{77\ \text{TE}_{\text{Nt 3}}} \right) \right] \right\}$$

where

- $77\ \text{Fin Ex}_{\text{Geo 3}}$ = the 1977 final adjusted export estimate for a specified three-digit SIC, geographic cell,
- $77\ \text{Ex}_{\text{Geo 3}}$ = the 1977 ratio estimate of exports for a specified three-digit SIC, geographic cell (see I.A.2.),
- FT_{Nt3} = the 1977 foreign-trade-based estimate of exports for a national three-digit SIC level,
- $\text{ASM}_{\text{Nt 3}}$ = the 1977 ASM ratio estimate for exports for a national three-digit SIC level,
- $77\ \text{TE}_{\text{Geo 3}}$ = the 1977 census estimate for total manufacturing employment for a specified three-digit SIC, geographic cell,
- $77\ \text{TE}_{\text{Nt 3}}$ = the 1977 census estimate of total manufacturing employment for a national three-digit SIC level.

It should be noted that in a small number of cases where the ratio $\frac{\text{ASM}_{\text{Nt 3}}}{\text{FT}_{\text{Nt3}}}$ exceeded 1, the ratio was made to equal 1. This situation can occur for any of three reasons:

a. A noncertainty establishment in the ASM, reports exports out of context with its sampling weight.
b. The margin of cost markup between f.o.b. plant and port of export is overstated.
c. The commodity classification of the foreign trade data versus the industry classification of the ASM data causes significant data discrepancies at the three-digit SIC level. These conceptual differences rarely affect two-digit SIC level data.

II. ESTIMATES OF EMPLOYMENT RELATED TO EXPORTS

A. Derived Export-Related Employment for ASM Establishments

1. Employment related to exports was not reported in the ASM. Therefore, it was estimated for each ASM establishment by assuming that the percentage of the establishment's total employment that is export related is the same as the percentage of the establishment's total value of shipments that is exported. Using these establishment export-related employment figures, ASM estimates were then developed by the same ratio estimating method (with total employment as the associated item) that was used for the value of export shipments (described in paragraph I.A.2. of this appendix).

2. The employment data presented in this report which are considered to be export related or export generated were first calculated (not reported) at the establishment level for establishments reporting $25,000 or more of exports as follows:

$$77\ \text{EE}_{n} = 77\ \text{TE}_{h} \left(\frac{77\ \text{Ex}_{h}}{77\ \text{VS}_{h}} \right)$$

where

- $77\ \text{EE}_{h}$ = the 1977 export-related employment for establishment h,
- $77\ \text{TE}_{h}$ = the 1977 total employment (as reported in the ASM) for establishment h,
- $77\ \text{Ex}_{h}$ = the 1977 value of exports (as reported in the ASM) for establishment h,
- $77\ \text{VS}_{h}$ = the 1977 value of shipments (as reported in the ASM) for establishment h.

ASM sample estimates for export-related employment were then derived using the ratio-estimating method as follows:

$$77\ \text{EE}_{\text{Geo 4}} = \left(\frac{\sum_{h \epsilon \text{Geo 4}} w_h\ 77\ \text{EE}_h}{\sum_{h \text{Geo 4}} w_h\ 77\ \text{TE}_h} \right) \left(77\ \text{Te}_{\text{Geo 4}} \right)$$

where

- $77\ \text{EE}_{\text{Geo 4}}$ = the 1977 ratio estimate of employment related to exports, for a specified geographic cell at the four-digit industry level,
- $77\ \text{TE}_{\text{Geo 4}}$ = the sum over the set of establishments in a geographic four-digit SIC industry cell,
- w_h = the ASM weight associated with establishment h,
- $77\ \text{TE}_{\text{Geo 4}}$ = the census estimate for employment applied to the geographic by four-digit industry cell.

B. Universe Estimates of Export-Related Employment

The ratio estimates of employment considered to be directly related to exports must be further adjusted to a universe level comparable to the final estimate of exports as defined in paragraph I.B.3. This adjustment, however, is simple and straightforward. After the ratio estimates are summed to three-digit SIC geographic levels, final export-related employment estimates are calculated such that:

$$77\ \text{Fin EE}_{\text{Geo 3}} = 77\ \text{EE}_{\text{Geo 3}} \left(\frac{77\ \text{Fin Ex}_{\text{Geo 3}}}{77\ \text{Ex}_{\text{Geo 3}}} \right)$$

where

$77\ Fin\ EE_{Geo\ 3}$ = the 1977 final adjusted estimate of employment related to exports for a specified three-digit SIC geographic cell,

$77\ EE_{Geo\ 3}$ = the 1977 ratio estimate of employment related to exports for a specified three-digit SIC geographic cell,

$77\ Fin\ Ex_{Geo\ 3}$ = the 1977 final adjusted export estimate for a specified three-digit SIC geographic cell,

$77\ Ex_{Geo\ 3}$ = the 1977 ratio estimate of reported exports for a specified three-digit SIC geographic cell.

Note: All aggregate estimates above the three-digit SIC and/or State levels are summations of the appropriate detail levels, rather than independently calculated estimates.

APPENDIX K. Comparison of Value of Exports at Port of Exportation to the Value of Exports at Producing Plant by Industry Group: 1977

Code	Industry group	Value of exports at port of exportation			F.O.B. adjustment factor[3]	Value of exports, f.o.b. producing plant		
		Summary totals[1] (million dollars)	Classification adjustment[2] (million dollars)	Adjusted totals (million dollars)		Estimated total, f.o.b. plant (col. C x col. D) (million dollars)	Directly reported[4] (million dollars)	Reported exports as percent of estimated exports
		A	B	C	D	E	F	G
	All industries	94,808.3	+742.8	95,551.1	.8978	85,787.0	67,387.5	78.6

--	Manufactured products not distributed by SIC group.....	1,488.9	-1,488.9	-	-	-	-	-

Note: The detail may not add to the total due to independent rounding.

- Represents zero. n.e.c. Not elsewhere classified. (Z) Less than one-half the unit of measurement shown.

[1]Data were developed by three-digit industry group from FT-610, U.S. Exports/Domestic Merchandise, SIC Based Products by World Area and summed to the two-digit level.

[2]The foreign trade data which consist of two or more three-digit industry group classifications were adjusted to produce figures more comparable with the standard industrial classification system. For example, this adjustment procedure accounts for $680.8 million in Industry 214, Tobacco Stemming and Redrying, which was classified as an agricultural product in the foreign trade data, and for military apparel, which was classified only at the two-digit level in the foreign trade data.

The figure for miscellaneous exports ($1,488.9 million) includes only export shipments of $250 or less that were not distributed by SIC group in the foreign trade data. This figure was allocated to those three-digit industry groups that were identified as having some export shipments of $250 or less.

[3]Data were derived from unpublished Bureau of Economic Analysis (BEA) tabulations, forecasted to appear in the April 1979 issue of the Survey of Current Business, table A. The adjustment factors in column D are the BEA tabulation ratios of producer prices to purchased prices, where the producer price is equal to the purchaser price less transportation costs and wholesale and retail trade margins.

[4]The directly reported export values shown in column F may exceed the official export values shown in column E. Refer to appendix J, page J-2, for an explanation of why this situation may occur.

APPENDIX L. Product Reference List

Reproduced in this appendix is the product reference list used in the 1977 survey of distribution of manufacturers' sales by class of customer. See the introduction to this report for a description of the companies receiving the Product Group Reference List.

FORM NC-K4M (1) U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRODUCT GROUP REFERENCE LIST

DISTRIBUTION OF SALES CLASS OF CUSTOMER

1977 CENSUS OF MANUFACTURES

The purpose of this survey is to provide measures of the distribution of shipments to specified classes of customers with reasonable accuracy at the national level. If your records are not kept or not tabulated in this form, please provide your best approximations. An example of how to report appears on pages 2 and 3.

PRODUCT GROUP REFERENCE LIST

This booklet lists the Product Groups for which you are to report shipments or sales to specified classes of customers. Each Product Group is defined to include all those products with common first four digits of their codes for which value of shipments was reported in item 18 of your Census of Manufactures report form.

How to Choose the Appropriate PRODUCT GROUP in This List

Examination of the title of each of the lines of activity described below should assist you in selecting the proper page reference and product group listing describing the products applicable to your establishment. Each of the lists has been arranged to include most of the products manufactured by establishments engaged in the major lines of activity described below:

Major line of manufacturing activity:	Page
Food and Kindred Products	4
Tobacco Products	5
Textile Mill Products	5
Apparel and Textile Products	5
Lumber and Wood Products, Except Furniture	5
Furniture and Fixtures	5
Paper and Allied Products	6
Printing and Publishing	6
Chemicals and Allied Products	6
Petroleum and Coal Products	6
Rubber and Miscellaneous Plastics Products	6
Leather and Leather Products	6
Stone, Clay, Glass, and Concrete Products	6, 7
Primary Metals Industries	7
Fabricated Metal Products	7
Machinery, Except Electrical	7, 8
Electrical and Electronic Equipment	8
Transportation Equipment	8
Instruments and Related Products	8
Miscellaneous Manufacturing Industries	8

HOW TO REPORT

In order to complete your NC-K4M, Distribution of Sales by Class of Customer report form, three steps should be taken as shown in the following illustration. Reports from company X which has three manufacturing plants are used in this example.

▶ **STEP 1 – Assemble the 1977 Census of Manufactures reports for your manufacturing plants. Extract the value figures for products shipped from column (E), item 18, for all Census product codes (col. (B-1)) having the same first four digits. Include resales, but exclude contract and other miscellaneous receipts.**

Plant No. 1 → (Form MC-33B)

5 Products and services (A)				Census product code 581 (B-1)	Unit of measure for quantities (B-2)	Products shipped and other receipts, including interplant transfers: Quantity 583 (D)	Products shipped and other receipts, including interplant transfers: Value, f.o.b. plant (THOUSANDS OF DOLLARS) 584 (E)	Transfers to other plants of your company: Quantity 585 (F)	Transfers to other plants of your company: Value, f.o.b. plant (THOUSANDS OF DOLLARS) 586 (G)
GRAY IRON CASTINGS (EXCLUDE DUCTILE IRON)	Molds and stools for heavy steel ingots (33216)			33216 11 0	↑ Short tons ↓	900	$ 110	900	$ 110
	Cast iron pressure pipe and fittings (33217)	Cast iron pressure pipe	3" up to and including 10" (inside diameter)	33217 32 4		540	100		
			12" up to and including 20" (inside diameter)	33217 34 0					
	Other gray iron castings	Rolls for rolling mills		33219 31 2					
		Automotive uses		33219 39 5					
		Construction and utility uses		33219 49 4					
		All other uses		33219 98 1		500	200		
MISCELLANEOUS RECEIPTS	Sales of scrap refuse			99980 13 8			10		
	Other miscellaneous receipts			99980 98 9					
RESALES	Sales of products **bought and sold without further manufacture, processing, or assembly** in this establishment. *The cost of such items should be reported in item 5b.*			99989 00 6			20		
TOTAL *Sum of lines 1–30, column (E)*				77000 00 8	→	→	$ 440		

Plant No. 2 → (Form MC-35J)

5 Products and services (A)				Census product code 581 (B-1)	Unit of measure for quantities (B-2)	Products shipped and other receipts: Quantity 583 (D)	Products shipped and other receipts: Value, f.o.b. plant (E) 584 Millions 000	Thousands 000	Dollars 000
PAPER INDUSTRIES MACHINERY AND PARTS AND ATTACHMENTS (35540)	Pulp- and paper-industries machinery (new)	Paper and paperboard converting equipment	Bagmaking machines, including shipping sack machines, and envelope making machines	35540 51 7	↑ Units ↓	2	$	40	
			Corrugated boxmaking machines	35540 53 3					
			Box, carton, and shipping containers making machines, except corrugated box machines	35540 54 1	·		1	110	
			Toilet roll and napkin making machines	35540 56 6	No. of units				
			Other pulp mill machinery including digesters and recovery room equipment — *Specify kind*	35540 29 3					
Gray iron castings (other than white and ductile iron, pressure and soil pipe, and fittings and rolls for rolling mills)				33219 98 1	Short tons	3	1	120	
Offset multicolor lithographic printing presses (sheet-fed), including perfecting, 4-color, and over				35551 30 8	Complete presses	4		340	
MISCELLANEOUS RECEIPTS	Receipts for installation (or construction) of products of this establishment			99980 31 0					
	Receipts for repair work			99980 61 7					
	Other miscellaneous receipts			99980 98 9					
RESALES	Sales of products **bought and sold without further manufacture, processing, or assembly** in this establishment. *The cost of such items should be reported in item 5b.*			99989 00 6				100	
TOTAL *Sum of lines 1–50, column (E)*				77000 00 8	→	→	$ 2	710	

Plant No. 3 → (Form MC-35K)

5 Products and services (A)			Census product code 581 (B-1)	Unit of measure for quantities (B-2)	Products shipped and other receipts: Quantity 583 (D)	Products shipped and other receipts: Value, f.o.b. plant (E) 584 Millions 000	Thousands 000	Dollars 000
PRINTING PRESSES, OFFSET LITHOGRAPHIC (35551)	Sheet-fed	Single color	35551 23 3	↑ Complete presses ↓	5	$	100	
		Multicolor, including perfecting, 2 and 3 color	35551 26 6					
		Multicolor, including perfecting, 4 color and over	35551 30 8					
	Web-fed (Roll-fed)	Business forms presses	35551 33 2					
		Commercial (including heat-set)	35551 35 7					
		Newspaper	35551 32 4					
		All other	35551 36 5					
OTHER PRINTING	Electrotyping and stereotyping machinery and equipment		35555 62 2		50		200	
	Automatic plate processors		35555 63 0					
DUPLICATING MACHINES, EXCEPT PARTS AND ATTACHMENTS Corresponds to item codes 4111–4112, 4121–4122, 4140 and 4152, on Census Form MA-35R, Office, Computing and Accounting Machines, for 1977			35793 00 9			$	40	

HOW TO REPORT – Con.

▶ **STEP 2 – Combine the data for all products having the same first four digits. (These are referred to in the reference list as product groups.) Also allocate the value of resales (99989 00 6) by type of product.**

Product Group 3321

Plant No. 1	
33216 11 0	110
33217 32 4	100
33219 98 1	200
99989 00 6	20
Plant No. 2	
33219 98 1	1,120
Total	1,550

Product Group 3554

Plant No. 2	
35540 51 7	40
35540 54 1	1,110
99989 00 6	100
Total	1,250

Product Group 3555

Plant No. 2	
35551 30 8	340
Plant No. 3	
35551 23 3	100
35555 62 2	200
Total	640

Product Group 3579

Plant No. 3	
35793 00 9	40
Total	40

▶ **STEP 3 – For each product group estimate the value of shipments that went to various classes of customers listed on the NC-K4M report form and then enter the data accordingly.**

Form NC-K4M

DISTRIBUTION OF SALES BY CLASS OF CUSTOMER DURING 1977 (See Product Group Reference List for codes and descriptions)

▶ *Enter 4-digit product group codes (See product group reference list.) If you need additional columns, use extra worksheets.*

▶ 1. Distribution of sales by class of customer		Line No.	Code 3321 Mil. $000	Thou. 000	Dol. 000	Code 3554 Mil. $000	Thou. 000	Dol. 000	Code 3555 Mil. $000	Thou. 000	Dol. 000	Code 3579 Mil. $000	Thou. 000	Dol. 000	Code Mil. $000	Thou. 000	Dol. 000	Code Mil. $000
Shipments to other establishments of this company	Wholesale establishments (include those shipments to or on order from your separate sales branches, sales offices, and administrative offices).	1	$	100		$			$			$			$			$
	Retail stores and outlets	2																
	Manufacturing establishments (usually for further processing)	3		110														
	Other establishments (mining, construction service, transportation, communication, etc.)	4								40								
Shipments to other companies, governments, individuals, and for export	Wholesalers	5								500								
	Retailers	6	1	340														
	Manufacturers	7					900											
	Federal Government	8								100			40					
	Other (State and local governments; construction, mining, utility, and transportation companies; private and public institutions; banks, restaurants, hotels, and other service-type businesses; and for exports. Include also direct sales to individual households, farmers, etc.)	9					350											
Total *(Sum of lines 1–9 should approximate the sum of product shipments reported in Item 18, of your Census of Manufactures reports, including an allowance for any products bought and sold without further fabrication.)* ▶		10	$ 1	550		$ 1	250		$	640		$	40		$			$
2. Approximate percent of shipments reported on line 10 that are products bought and sold (resales) without further fabrication by the establishment making the shipment.		11		1 %			8 %			0 %			0 %			%		
3. If data are reported on line 9 for **ANY PRODUCT GROUP**, do they include shipments to State and local governments and or construction companies? 1 [X] Yes 2 [ ] No. If "Yes," estimate the percentage breakdown of shipments reported on line 9 for the three categories listed on lines 12 through 14.																		
a. State and local governments		12		%			10 %			%			%			%		
b. Construction companies		13		%			90 %			%			%			%		
c. All other		14		%			%			%			%			%		
d. Total *(Sum of lines 12–14 should equal 100%)* ▶		15		%			100 %			%			%			%		

FORM NC-K4M (8-12-77)

SPECIAL INSTRUCTIONS

The following product groups require special instructions for reporting to certain customers. Please note the instructions for the group codes below before completing the form. These products are designated by an asterisk on the reference list.

Group code	INSTRUCTIONS
2011, 2016, 2017	Shipments of these products directly from your manufacturing establishments to meat jobbers, wholesalers, and retailers should be combined and reported as shipments to wholesalers on line 5.
2211, 2221, 2231, 2241, 2251, 2252, 2253, 2254, 2257, 2258, 2259, 2261, 2262, 2269, 2271, 2272, 2279, 2281, 2282, 2283, 2284, 2291, 2292, 2293 2294, 2295, 2296, 2297, 2298, 2299, 2391, 2392, 2393, 2394, 2395, 2396, 2397	Report shipments from your manufacturing establishments on orders from piece goods converters as shipments to wholesalers on line 5. Report shipments to apparel jobbers as shipments to other manufacturers on line 7.
2311 – 2389	Report total on line 10. Do not report by class of customer.
2711 – 2795	Report total on line 10. Do not report by class of customer.
3721, 3761	Shipments of this group directly from your manufacturing establishments under the Mutual Security Program and the Military Defense Assistance Program should be reported as shipments to the Federal Government on line 8.

PRODUCT GROUP REFERENCE LIST

NOTE – Group codes shown in column (b) should correspond to the first 4-digits of the Census Product Code as reported in item 18 on Form MA-100, for the 1977 Census of Manufactures.

Radio, TV communication equipment	3662
Electron tubes, receiving type	3671
Cathode ray TV picture tubes	3672
Electron tubes, transmitting	3673
Semiconductors, related devices	3674
Electronic capacitors	3675
Electronic resistors	3676
Electronic coils, transformers	3677
Electronic connectors	3678
Electronic components, n.e.c.	3679

Product group title (a)	Group code (b)
ELECTRIC, ELECTRONIC EQUIPMENT – Con.	
Storage batteries	3691
Primary batteries, dry and wet	3692
X-ray apparatus and tubes	3693
Engine electrical equipment	3694
Electric equipment, supplies, n.e.c.	3699
TRANSPORTATION EQUIPMENT	
Motor vehicles and car bodies	3711
Truck and bus bodies	3713
Motor vehicle parts, accessories	3714
Truck trailers	3715
* Aircraft	3721
Aircraft engines, engine parts	3724
Aircraft equipment, n.e.c.	3728
Ship building and repairing	3731
Boat building and repairing	3732
Railroad equipment	3743
Motorcycles, bicycles, parts	3751
* Guided missiles, space vehicles	3761
Space propulsion units, parts	3764
Space vehicle equipment, n.e.c.	3769
Travel trailers and campers	3792
Tanks and tank components	3795
Transportation equipment, n.e.c.	3799
INSTRUMENTS AND RELATED PRODUCTS	
Engineering, scientific instruments	3811
Environmental controls	3822
Process control instruments	3823
Fluid meters, counting devices	3824
Instruments to measure electricity	3825
Measuring, controlling devices, n.e.c.	3829
Optical instruments and lenses	3832
Surgical, medical instruments	3841
Surgical appliances, supplies	3842
Dental equipment and supplies	3843
Ophthalmic goods	3851
Photographic equipment, supplies	3861
Watches, clocks, and watchcases	3873
MISCELLANEOUS MANUFACTURING INDUSTRIES	
Jewelry, precious metal	3911
Silverware and plated ware	3914
Jewelers' mats, lapidary work	3915
Musical instruments	3931
Dolls	3942
Games, toys, child's vehicles	3944
Sporting, athletic goods, n.e.c.	3949
Pens and mechanical pencils	3951
Lead pencils and art goods	3952
Marking devices	3953
Carbon paper and inked ribbons	3955
Costume jewelry	3961
Artificial flowers	3962
Buttons	3963
Needles, pins, and fasteners	3964
Brooms and brushes	3991
Signs and advertising displays	3993
Burial caskets	3995
Hard surface floor coverings	3996
Manufacturing industries, n.e.c.	3999

PRODUCT GROUPS NOT SHOWN

The list of product groups and their primary SIC industry code shown below are products which, while tabulated in the survey, are not shown in the table of this report.

The following situations necessitated the exclusion of product groups from the tables:

1. The coverage of the product group was either too low (indicating serious underreporting), and in fewer instances, too high (indicating misclassification of products by respondents).

2. Some figures were statistically unreliable, indicating a pattern of distribution by class of customer not reasonably expected for the products in question.

3. Some data had to be suppressed in order to avoid disclosing figures for individual companies.

SIC code	Product group description
2013	Sausages and other prepared meats
2044	Rice milling
2067	Chewing gum
2077	Animal and marine fats and oils
2097	Manufactured ice
2111	Cigarettes
2121	Cigars
2131	Chewing and smoking tobacco
2141	Tobacco stemming and redrying
2221	Weaving mills, manmade fiber and silk
2231	Weaving and finishing mills, wool
225	Knitting mills
2253	Knit outerwear mills
2257	Circular knit fabric mills
2258	Warp knit fabric mills
2259	Knitting mills, n.e.c.
2293	Paddings and upholstery filling
2429	Special product sawmills, n.e.c.
2515	Mattresses and bedsprings
2519	Household furniture, n.e.c.
2645	Die-cut paper and board
2646	Pressed and molded pulp goods
2649	Converted paper products, n.e.c.
2812	Alkalies and chlorine
2813	Industrial gases
2819	Industrial inorganic chemicals, n.e.c.
2861	Gum and wood chemicals

SIC code	Production group description
2999	Petroleum and coal products, n.e.c.
3031	Reclaimed rubber
3142	House slippers
3149	Footwear, except rubber, n.e.c.
3161	Luggage
317	Handbags and personal leather goods
3171	Women's handbags and purses
3211	Flat glass
3231	Products of purchased glass
3255	Clay refractories
3263	Fine earthenware food utensils
3264	Porcelain electrical supplies
3295	Minerals, ground or treated
3315	Steel wire and related products
3316	Cold finishing of steel shapes
3332	Primary lead
3333	Primary zinc
3339	Primary nonferrous metals, n.e.c.
3362	Brass, bronze, and copper foundries
3369	Nonferrous foundries, n.e.c.
3398	Metal heat treating
3399	Primary metal products, n.e.c.
3471	Plating and polishing
3565	Industrial patterns
3567	Industrial furnaces and ovens
3641	Electric lamps

SIC code	Production group description	SIC code	Production group description
3645	Residential lighting fixtures	3751	Motorcycles, bicycles, and parts
3648	Lighting equipment, n.e.c.	3795	Tanks and tank components
3652	Phonograph records	3799	Transportation equipment, n.e.c.
3671	Electron tubes, receiving types		
3672	Cathode ray television picture tubes	3873	Watches, clocks, and watchcases
3673	Electron tubes, transmitting		
3691	Storage batteries	3914	Silverware and plated ware
3692	Primary batteries, dry and wet	3915	Jewelers' materials and lapidary work
3693	X-ray apparatus and tubes	3953	Marking devices
		3962	Artificial flowers
3714	Motor vehicle parts and accessories	3963	Buttons
3716	Motor homes	3993	Signs and advertising displays
